Among employes, deaths from the principal diseases were as follows: Haemoglobinuric fever 2, labor pneumonia 5, malaria fever, E. A., 2, organic disease of the heart 2, tuberculosis 8, typhoid fever 1; leaving 12 deaths from all other diseases and 19 deaths from external violence.

No case of yellow fever, small pox, or plague originated on or was brought to the Isthmus during the month.

Respectfully,
GEO. W. GOETHALS,
Chairman and Chief Engineer.

Photographs of Historical Interest.

Six photographs of historical interest have been framed with native woods and placed in the outer offices of the Chief Engineer at Culebra. They are—name of wood attached in each case: Barbacoas Bridge, guayacan; Protestant Church, (Christ Church) Colon, cacique; American dredge, F. deLesseps, black palm; View on the Panama Railroad, cocobolo; Photograph of "John Aspinwall," a Colon negro of local notoriety subject of verses by J. S. Gilbert, guayacan; Map of Colon in 1865, acacia.

A parade ground and target range are being laid out for the Tenth Infantry back of the officers' quarters at Camp Otis.

RAILS USED IN PANAMA.

Samples Collected for Exhibition Purposes.

Samples of rails used at various periods on the Panama railroad and canal work have been collected, and may be seen in the office of the Chairman at Culebra. Cuts of cross sections of them are published herewith.

The first track used consisted of flat iron bars laid upon stringers, and this was the rail on the section from Aspinwall to Gatun, 1850-1852.

1
Inverted U Rail
1853-1869

The inverted U rail, shown in cut No. 1, weighed 53 pounds to the yard, and was the first rail used on the completed railroad, 1853- to 1869.

2
70 Pound Wrought Iron Rail
1865-1879

From 1865 to 1879 the 70-pound wrought iron rail, shown in Cut No. 2, was used. From 1876 to 1907 the first steel rail was used. It is shown in Cut No. 3. It weighed 50 pounds.

3
First Steel Rail
1876-1907

The wrought iron rail was sold for \$45 per ton and more than enough was realized from its sale to buy new steel rail, which was purchased in England at 6 pounds 5 shillings per ton.

Cuts No's. 4 and 5 show the Belgian rail used by the French canal company in construction work from 1882 to 1899. This rail weighed 50 and 60 pounds to the yard.

Cut No. 6 is a cross section of the 60-pound steel rail of American manufacture used by the Isthmian Canal Commission from 1905

to the present time, and by the Panama railroad from 1906 to 1910.

4
50 Pound Belgian Rail
1882-1899

Cut No. 7 is a section of the 90-pound American rail placed on curves of the Panama

5
60 Pound Belgian Rail
1882-1899

railroad in 1908. In 1910 open-hearth rail with 0.75 carbon was adopted as standard.

6
60 Pound Steel Rail
1905-1913

7
90 Pound Steel Rail
1908-1913

The samples are in 12-inch lengths and are mounted with the original fastenings upon a tie taken from the roadbed between Mindi and Gatun in 1912. The tie is of balsamo and was probably laid about 1884.

Bids for the structural steel framework for the permanent administration building at Balboa will be opened on March 6 at the Washington office.

SAN BLAS MISSION.

Exclusive Indians Invite American Woman to Establish School.

Miss Annie Coope, the American missionary to the Indians, who has been in Colon several months has left for the San Blas country for the purpose of establishing a school for the children and doing such evangelistic work as is possible among the Indians. Her going was in response to an invitation from the chief of one of the islands of the Mulatas group. She was accompanied by two Indians who were sent to escort her and made the trip in a small sail boat, leaving Colon on Thursday, February 20. She took with her a small organ at the request of the chief, and a large supply of household goods.

Miss Coope came to the Isthmus in 1909 accompanied by the Rev. George H. Penny, superintendent of the Christian Mission, a sect which has headquarters in Barbados. On November 12, the missionaries left Colon and proceeded to Nombre de Dios where they waited a month for the mail boat which runs between Colon and the Mulatas Islands. Two landings were made on the islands but Miss Coope and her companion were not permitted to remain on shore, being forcibly ejected from Rio Diablo. The missionaries returned to the Isthmus and Miss Coope left soon after for work among the Caribs of Venezuela, and in Mexico, and California. She returned to Colon in October, 1912, where she has been waiting the summons from Chief Charley Robinson. The chief is said to be an intelligent Indian. He was educated in the United States and has progressive ideas regarding the future of his people. The San Blas Indians have steadfastly refused all efforts of the white man to civilize them. Nominally, they are subject to the government of Panama, but they pay no taxes and have their own form of government. They trade, principally in coconuts, with the merchants of Colon, bringing their products down in sail canoes. Their territory lies on the Caribbean coast from Mandinga Bay to the Gulf of Uraba, and from the coast extending inland to the headwaters of the streams that flow into the Atlantic, and includes the Mulatas Islands, a small group lying just off the coast. Efforts have been made by Roman Catholics to establish mission work among them, but without success; from time to time Protestant missionaries have endeavored to enter their country, but until Miss Coope became acquainted with Charley Robinson no encouragement was ever given to any religious sect to establish mission schools there.

Women's Organizations.

The subject of the general meeting of the Cristobal Women's Club on Wednesday, March 5, will be woman suffrage. Other meetings scheduled for the month are as follows: March 12, Home Department, subject, Entertaining our Guest; March 19, Art and Literature department, subject, Modern pictures of children; March 26, meeting of the executive board at the Commission clubhouse at 9 a. m.

On Wednesday afternoon, February 19, the Gatun Woman's Club held a reception in honor of two of its members, Mrs. Charles H. Stoddard and Mrs. J. S. Hanna, who are leaving the Isthmus. A short program of music was furnished and refreshments were

served by the house committee. Mrs. Stoddard is the first vice president of the Canal Zone Federation of Women's Clubs, and was formerly president of the Gatun club. Mrs. Hanna has been treasurer of the Gatun club since 1909. Mrs. Barte has been elected to fill the office of treasurer for the remainder of the year.

The Tuesday morning lenten meetings of the Woman's Altar Guild of St. Luke's Chapel Ancon, have been held at members' homes as follows: On February 11, with Mrs. Barber; on February 18 with Mrs. De Kanstine, at the Hotel Tivoli; on February 25, with Mrs. Dodge at the American Legation in Panama. Hostesses for the remaining three weeks are Mrs. De Kanstine, on March 4; Mrs. Bishop on March 11, and Mrs. Feuille on March 18. The guild members are making garments for a vacation home for little girls near Morristown, N. J.

The annual public meeting of the Woman's Foreign Missionary Society of the Methodist Episcopal Church was held at the sea wall church, Panama, on Sunday morning, February 16, this meeting taking the place of the regular morning service. The president of the society, Mrs. Harry Compton, read a paper on Missionary work in South America, Mrs. Rounds gave a general outline on the missions of the Methodist church, and Miss Williams sang. The next meeting of the society will be held at the home of Mrs. E. M. Kayser, Ancon, on Saturday, March 1. The class is studying China.

Opening of Hotel Washington.

The date of the official opening of the Hotel Washington on Colon Beach has been fixed for the evening of March 29, when a grand ball will be given in the hotel by Canal Zone Post No. 40, American Veterans of Foreign Service. Cards of admission will be limited and will not be transferable. The price will be \$10.00 for each couple, and this will include the ball, luncheon, and transportation by special train to which no one will be admitted except holders of cards. Requests for cards will be numbered as received and should be addressed to Captain Courland Nixon, Chairman of the General Committee, or to L. E. DuBois, Adjutant, Cristobal, Canal Zone.

The interior painting and decorating of the new Hotel Washington at Colon will not be done for about a year, in order that the masonry and plaster may have time to season.

Washington's Birthday.

The first five grades of the Gatun public school entertained the upper school with a program consisting of patriotic songs and recitations in honor of Washington's Birthday on Friday afternoon, February 21.

Washington's Birthday was celebrated by Canal employes in various ways; the united Masonic lodges spent the day on a picnic at Taboga Island; the Cristobal and Gatun Sunday schools had an excursion to Toro Point; a party of Gatun residents went to Chorrera. There were dances at the Tivoli Hotel and at Kangaroo Hall, Empire.

Married.

PAUL-PITTMAN—On February 20, at St. Luke's Hospital Chapel, Ancon, Miss Katherine Key Pittman, of Memphis, Tenn., to Mr. Seymour Paul, of Harrisonburg, Va., the Reverend Henry A. Brown officiating. Canal Zone residence, Ancon.

DUNGAN-DOTY—On February 1, at Oak Park, Ill., Miss Geraldine Doty, of Oak Park, Ill., to Mr. Chevis Patterson Dungan, formerly of Corozal. Residence, Oak Park, Ill.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Moving picture schedule for week March 3 to 8: Monday, Empire; Tuesday, Culebra; Wednesday, Corozal; Thursday, Gatun; Friday, Cristobal; Saturday, Gorgona; Friday, Porto Bello.

COROZAL.

The moving picture schedule was changed from Monday night to Friday, February 28 on account of the Tenth Infantry band concert at Corozal on Monday night.

Washington's Birthday was observed by having "open house." In the evening Gatun's duckpin team lost three games to Corozal. The following are results of the games:

Corozal.				Gatun.			
Dalton...	79	86	92	Sims	88	97	71
Ryan...	72	82	84	Dunlap	89	86	88
Wilkins...	85			Dunst	72	88	100
Conner...	84	79	88	Gebbart	88	96	83
Tougher...	84	79	98	Davis	83	79	87
Webb...		73					

Totals... 404 399 450 420 446 429

On Thursday, February 20, a stag smoker was held at the Corozal Y. M. C. A., with the following for a program: Piano solo, Mr. McMahon; Scotch dialect solo, James Cullen; readings, Mr. Fenstermacher; flying ring act, R. A. Mitchell; hypnotic act, Mr. Haleen; refreshments; piano solo, Mr. McMahon; vocal solo, Mr. Sloan; comedy singing and dancing act, Alvia and Alvia; Irish dialect reading, Dick Roberts, Jr.; selection, Corozal male quartet; readings from Faust, Mr. Fenstermacher; vocal solo, Mr. Cullen; "The Lost Child," Mr. J. E. Cunningham; wrestling bout, Mr. Huber of Gatun and Mr. Andrews of Empire, result, draw.

EMPIRE.

On Thursday evening, February 20 the Culebra Y. M. C. A. duckpin team bowled the Empire team on the latter's alleys and lost three games. The following were the scores:

Empire... 492 469 473 Culebra... 431 429 439

An all-around championship athletic contest will be started the first of March. There will be two divisions of the gymnasium class, the advanced and the elementary squads, with first, second, and third ribbons for each division. Twenty different events will be run off during the contest, two each night after the gymnasium class. All men not now enrolled in the gymnastic class will be welcomed in the contest. One evening each week during the gymnastic class, there will be a demonstration of medical gymnastics, giving such exercises as will be of benefit in case of stooped shoulders, lowered right shoulder, flat-footedness, and constipation. On the other class night there will be a short talk on anatomy and physiology.

GORGONA.

Due to the musical entertainment the Gymnasium classes were changed to Monday and Wednesday, but will meet on regular days, Tuesdays and Thursdays, from now on.

Three hundred and fifty people attended motion pictures on Friday evening.

Gorgona Y. M. C. A. will put on a Country School entertainment, in a few weeks. The regular date for the entertainment has not been set.

The Edith Harris Scott Company will give an entertainment on March 5, 1913. On the 8th of March a special program will be given at the Y. M. C. A. for a benefit.

The Gorgona Chorus gave their regular concert on Thursday evening, the program is as follows: Orchestra, selection; Nancy Ma Yellow Rose, Geibel; Song of the Pedlar, Williams, Chorus; Duet (greeting), Mendelssohn; vocal solo (Onken), selected; Piano Solo, selected, Mrs. Regan; The song of the Triton, Taylor; Sleep Little One Sleep, Woole, chorus; Orchestra, selected; Anchored, Watson; Shoozy Shoo, Ambrose, chorus; soprano solo (La Tosca), Mrs. Boyd; Sweet and Low, Last Rose of Summer, We're going to leave Gorgona; contralto solo, Mrs. Pierson; Anvil chorus, Verdi; Soldiers chorus, Gounod, assisted by the 15-piece orchestra.

The high scores for the week (over 100): Sims, 100, 107; King, 111; Dunlap, 100, 104; Dunst, 103, 102; Norwick, 100; Seeth, 113; Ruchte, 108; Geheardt, 100; 113.

High scores in the ragtime duckpin tournament during the week, were as follows: Two Men—Sims and Roper, 593; Sims and Norwick, 597; Individual—Stoebr, 114; Stewart, 115; Davis, 125; Three games for Individual—Davis, 321; King, 304; Roper, 307.

GATUN.

After serving the Executive Council as its recording secretary for the past three years Mr. W. N. Windes.

has resigned on account of his leaving the Isthmus. Resolutions were drawn up in his honor.

The Edith Harris Scott Concert Company will appear at Gatun on Friday, March 7.

Group pictures of the Executive Council and a larger number of members were taken on Friday and will be on sale in about a week.

A change in the dates of the anniversary celebration has been thought advisable. The "smoker" will be held on Tuesday, March 4 and the public exercises and reception on Wednesday, March 5. Excellent programs have been arranged for both nights. The "smoker" will be for men only and will consist mostly of vaudeville numbers. The second night's program will be more formal and will include an address by Judge Thos. E. Brown of the Supreme Court of the Canal Zone. Lieut. Col. Wm. L. Sibert will preside. Following the exercises refreshments will be served on the first floor.

A basketball team representing the I. C. C. defeated a team from the McClintic-Marshall and American Bridge Companies on Wednesday evening, February 19.

CRISTOBAL.

The Cristobal Debating and Literary Society held its first meeting Wednesday night. The debate for the evening was: "Resolved, that there is more pleasure in Pursuit than in Possession." Messrs Daley and Walsh were the opposing speakers. The next meeting of the society will be held on Friday night, February 28, the subject being: "Resolved, that the Canal Zone should be depopulated upon completion of the Canal."

There was an attendance of 172 at the moving picture entertainment, Saturday night, February 22. The next in the series of moving pictures will be given Thursday night February 27.

The Edith Scott Concert Company will present their entertainment at Cristobal on March 4. Reserved seats will be on sale at the desk on March 1. Members free.

The Candlepin tournament held on February 22, was participated in by 15 members of the various Associations on the Zone, and prizes were won as follows: Frist, G. K. Weston, Cristobal; Second, Chas. Cotton, Cristobal; Third, T. H. Hurst, Cristobal.

In the married folks monthly tournament held on the night of February 22, scores were made as follows:

Mr. and Mrs. Bell...	93	148	186	427
Mr. and Mrs. Burrell...	99	148	166	413
Mr. and Mrs. Burn...	98	158	150	406
Mr. and Mrs. Landers...	63	174	158	395
Mr. and Mrs. Cotton...	72	170	145	387
Mr. and Mrs. Weston...	83	146	158	387
Mr. and Mrs. Buser...	75	149	158	382
Mr. and Mrs. Collins...	70	136	146	352

Ladies prizes for high score in each game were won by Mrs. Burrell in Newport and Candlepins, and Mrs. Bell in duckpins. Prizes for the gentlemen with high score in each game were won by Mr. Burn in Newport, Mr. Landers in Candlepins and Mr. Bell in duckpins.

Yacht on Fire.

The Cristobal fire department was called upon in the afternoon of February 21 to extinguish a fire in the coal bunkers of the private yacht *Rhielair* which is owned by D. G. Reid of New York, and chartered by H. C. Frick. The fire, which was caused by spontaneous combustion, and had been burning for more than a day when the department was called upon, was put out by flooding the hold of the vessel with four lines of hose, two of which were from the tug *Porto Bello*. The yacht, the estimated value of which is \$160,000, was only slightly damaged by the fire.

Ancon Crusher.

The following is a statement of rock crushed at Ancon Quarry during the week ending February 22:

DATE.	Hours worked.	Cubic yards.
February 17.	8.15	2,762
February 18.	9.00	2,798
February 19.	10.40	2,924
February 20.	10.50	3,224
February 21.	11.15	3,499
February 22 (Holiday).		
Total.	50.00	15,207

Lost—On train No. 7, February 24, from Colon to Pedro Miguel, a watch fob consisting of black ribbon and small locket with a chip diamond on one side and the monogram "V. R." on the other. Finder will please return to Vincent G. Raymond, Gorgona.

OFFICIAL CIRCULARS.

French Scrap and Equipment.

CULEBRA, C. Z., February 20, 1913.

CIRCULAR No. 426-A:

Hereafter, no French scrap of any description will be loaded by anyone without direct instructions from the Chief Quartermaster, and no parts shall be removed for repairing other equipment.

In case it becomes necessary for construction purposes to remove French equipment, the Chief Quartermaster's written instructions shall first be secured.

The French scrap made in the shops from repairing equipment now in use will be kept separate from other scrap, and no shipments made unless directed by the Chief Quartermaster.

Failure to observe this order may result in the discharge of the employee concerned.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Half Rate Mileage.

CULEBRA, C. Z., February 21, 1913.

CIRCULAR No. 420-F:

In the future the use of half-rate mileage tickets will be restricted:

1. To the employee himself. Tickets will not be issued in favor of more than one employee.
2. To relatives of employees residing with them on the Isthmus, who are not engaged in independent business.
3. To relatives visiting the Isthmus, whether residing with the employee or not.
4. In every case where a relative is to be included on a half-rate mileage ticket (except wives and children) the name of such relative must be furnished.

GEO. W. GOETHALS, Chairman.

Loss of Coal in Transit.

CULEBRA, C. Z., February 18, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order to prevent undue loss of coal in transit during the dry season, it is requested that Lidgerwood flat cars used in coaling steamshovels and other equipment be provided with suitable temporary or removable base-boards so that this loss may be kept at a minimum; or in lieu of this, that the amount of coal with which they are customarily loaded be sufficiently reduced to obviate this loss.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Regulations Governing the Use of Water in the Canal Zone.

CULEBRA, C. Z., February 20, 1913.

CIRCULAR No. 477:

Section 10 of the Rates, Rules and Regulations Governing the Use of Water in the Canal Zone reads as follows:

No person or persons shall remove, obstruct, injure, molest or otherwise tamper with any fire hydrant, standpipe, fire plug, tank, hand-grenade, fire extinguisher, hose, hose reel, cart, engine, harness, valve, box or cover stop cock, stop box or cover, or any other tool, fixture, apparatus, pump, machinery, or building of any kind whatsoever connected with or necessary to the proper and efficient operation of the water systems or for fire protection within the Canal Zone. Any person or persons violating any provision of this section shall be deemed guilty of a misdemeanor and, upon conviction, shall be punishable by a fine of not less than five dollars (\$5) nor more than twenty-five dollars (\$25), or by imprisonment for a term not exceeding thirty days, or by both such fine and imprisonment; *Provided, However,* That the provisions of this section shall not apply to firemen in the regular discharge of their duties and duly authorized representatives of the Division of Municipal Engineering.

Several instances of infraction of these rules and regulations on the part of Commission employees have recently been brought to my attention, and the Heads of Departments and Divisions are directed to have copies of this circular posted in conspicuous places, in order that all employees may be fully acquainted with the same. The Police Department is instructed to rigidly enforce these rules and regulations.

GEO. W. GOETHALS, Chairman.

Mail for the Depot Quartermaster.

MOUNT HOPE, C. Z., February 21, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

All mail intended for Mount Hope Depot, Printing Plant, Dry Dock Store, or Cristobal Shop Store, should be addressed to "Depot Quartermaster, Mount Hope." The only exception is that envelopes containing matter for THE CANAL RECORD should, in addition to this address, be plainly marked "Canal Record." This request is made that mail may be handled expeditiously in regular routine manner.

C. NIXON,

Approved:

R. E. WOOD,

Acting Chief Quartermaster.

*Indicates reductions from last list.
**Indicates 4 cents allowed for return of bottle.
†Indicates advances on last list.
‡Fowls weigh each about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock supply next lightest weight is supplied and refund note sent for difference.
§Sold only from Commissaries; no orders take for delivery.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon and Balboa, during the week ending February 22:

Panama, February 16, from New York, with 10 cases incandescent lamps, 15 cases insulated wire, 133 barrels sand, for Mechanical Division; 10 cases drugs, for Sanitary Department; 15 reels insulated cable, 20 cases electrical material, 90 cases castings, for First Division; 150 packages castings, for emergency dams; 8 cases dredge sleeves, for Atlantic Division; 56 cases books, 110 packages K. D. barrels, 7 pieces steel beams, 117 cases paper, 16 cases copper tacks, 100 bundles plain wire, 18 bales mops, 14 cases rivets, 17 cases castings, 20 crates air brake material, 50 rolls insulating paper, 12 cases lubricating oil, 400 bundles shovels, 1,200 drums lead in oil, 199 pigs lead, for stock; and a miscellaneous cargo, the whole consisting of 3,075 packages, weighing 375 tons.

Sixola, February 16, from New York, with 241 cases electrical material, 12 cases castings, 9 pieces pipe, for First Division; 250 kegs spikes, 21 cases paint, 54 barrels plastic magnesia, 28 pieces lumber, for stock.

Parismina, February 17, from New Orleans, with 1,126 pieces lumber, for Mechanical Division; 86 cases conduits, for First Division; 100 cases signal oil, 20 cases paint in oil, 147 pieces lumber, 1,134 pieces cross ties, 65 pieces castings, for stock.

Prinz Joachim, February 17, from New York, with 25 kegs bolts, for stock.

Lewis Luckenbach, February 19, from San Francisco, with 200 pigs lead, for stock.

Almirante, February 19, from New York, with 32 cases electrical material, for First Division; 50 drums calcium carbide, 250 kegs track spikes, for stock.

Manx Isles, February 19, from Baltimore, with 12,000 cases dynamite, 180 kegs white zinc, 133 cases glass, 125 barrels brick, for stock; 1,478 pieces car wheels, for Mechanical Division; 9,000 pieces conduit, 46 packages rack castings, 98 packages fender castings, 356 packages gate spares, 86 cases gate machinery, for First Division.

Allianca, February 22, from New York, with 11 cases fire extinguishers, 87 cases coupler pins, 16 sacks castings, 141 barrels sand, for Mechanical Division; 12 barrels terminal bells, for First Division; 43 cases caskets, for Sanitary Department; 28 cases iron railings, 70 packages signal material, for Panama Railroad Company; 10 barrels molasses, 100 bundles baskets, 48 bales rubber hose, 36 cases lanterns, 20 crates stove pipe, 80 cases paint, 20 barrels creosote oil, 15 reels wire rope, 61 pieces steel plates, 46 bundles steel bars, 729 pieces iron pipe, 720 pieces pig iron, 83 bundles shovels, 16 sacks castings, 100 barrels sulphate alumina, for stock; and a miscellaneous cargo, the whole consisting of 2,980 packages, weighing 450 tons.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg American Line, and of the United Fruit Company's Line on the Atlantic side of the Isthmus, and of the Panamanian Steamship Company's local service on the Pacific side.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays, at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m., and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.

The Panamanian Steamship Company's steamer *Panama* will sail from Panama for Aguadulce and Pedregal on March 1, 11, and 19.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, MARCH 5, 1913.

No. 28.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Tortola and Tortolita Islands Under American Jurisdiction.

Claimants to property on the islands of Tortola and Tortolita, situated off Punta Bruja, not far from the Pacific entrance to the Canal, have raised the question as to whether the islands are within the limits of the Canal Zone, with the view of presenting their claims before the Joint Commission in case the United States has jurisdiction. It has been determined that the islands are well within the 3-mile limit, and that they are considerably less than five miles from the center line of the Canal. Tortola, the larger of the two islands, is situated about 11,000 feet from Punta Bruja, and 18,000 feet from the Canal prism. Tortolita is about 12,000 feet from Punta Bruja, and 16,000 feet from the center line of the Canal.

Work at Corozal Farm.

The farm at Corozal for the care of the disabled employees of the Commission, the establishment of which was approved by the Chairman in November, 1912, has, so far, had only six applicants for admission. In order that the work of the farm might be started, on February 27, a force of 45 laborers was put to work for the purpose of clearing, ploughing, and planting a portion of the land lying to the north and east of Corozal. The employment of these men, pending the admission of a sufficient number of disabled inmates, or the transfer of the insane, was for the purpose of taking advantage of the beginning of the dry season to prepare the ground for the crops that will be planted. After this heavy work by the present force of laborers is completed, and the disabled and partially disabled are housed at the farm, all necessary work will have to be done by the labor of inmates.

The insane will not be transferred from the Ancon asylum to Corozal until the present quarters occupied by gold employees are vacated, and such alterations made in the buildings set aside for the asylum, as will

make them suitable for use as an asylum for the insane. There are sufficient barracks on hand at present to house all the disabled that may be stationed at the farm.

Naos Island Breakwater.

It is the present intention to build the Naos Island breakwater as far as practicable above high tide, with a width at the top sufficient for a railway track and a single roadway. It is proposed to raise the dike to elevation plus 25 feet to a point at such a distance from the island as will give a $\frac{1}{2}$ -per cent grade. In this manner, elevation plus 19 feet will probably be reached about 1,000 feet from the island. The highest elevation at present is 15 feet. This elevation exists in two places, one about 5,000 feet from the island, and the other at the island itself, while at one point, where the breakwater has settled, the elevation is only $6\frac{1}{2}$ feet. In order to prevent inroads from wave action, it is probable that the breakwater will be armored for the greater part of its length. Hard rock from Culebra Cut will be used for this purpose, and, as far as possible, for the causeway. Should the supply become exhausted before the completion of the work, the remainder of the rock required will be obtained from borrow pits.

Part of New Hotel Washington to be Opened.

In order to provide accommodations at the earliest possible moment for the tourists who are coming in increasing numbers, the second floor of the new Hotel Washington at Colon will be opened to guests, probably about March 10. The last of the furniture for the hotel, consisting of a consignment of bedsprings, is due on the *Advance* on March 7. Unfinished work on the second floor of the hotel is to be deferred, so far as practicable, until the close of the travel season. As the dining room and office are not yet completed, arrangements will be made for the people stopping at the new hotel to take their meals at the old Washington. A suitable reduction from the established rates will be made to guests for any inconvenience they may be subjected to by this arrangement, which is placed in effect solely for the purpose of accommodating Canal visitors, who, owing to the present crowded conditions, might otherwise have some trouble in finding a place to stay.

Tourist Travel Heavy.

The tourist travel to the Isthmus during February was heavier than in any previous month since the beginning of the Canal work. The number of persons arriving "in transit" during the month was 6,238, practically all of whom were tourists. This is much higher than the record for January, when the persons arriving "in transit" numbered 4,044, about 80 per cent of whom were tourists. Of the number of persons "in transit" in February, 3,323 arrived on ships that carried tourists only. The total number of vessels arriving

at the ports of Colon and Cristotal in February was 108, as compared with 130 for January. Among the vessels bringing visitors to the Canal in February were three private yachts, the *Rheclair*, the *Vergemere*, and the *Virginia*. In addition to the number of persons "in transit" in February, there were the crews of six vessels of the South Atlantic Squadron, numbering 3,348 persons, and, in January, 29 vessels of the same squadron, with a complement of 11,203 men, a total of 14,551 officers and men, all of whom were given an opportunity of viewing the Canal. In view of the increased tourist business, an additional car, converted at Gorgona shops from a Lidgerwood flat, has been placed in the sightseeing service, making three cars in all available for trips over the Canal.

Temporary Coal Trestle at Balboa.

The construction of a temporary coal trestle at Balboa has been authorized. It will be built on the site of the slide that carried away a part of the lumber dock in August of last year, and will be a 6-pile bent trestle, placed on 12-foot centers, constructed with side chutes, so that Western dump cars, or Rodgers ballast cars, can dump directly into the middle of a barge alongside. Treated piles will be used for the bents, and it is expected that much of the old lumber and piling left from the wreck of the lumber dock can be utilized in the work. The trestle will be built for two years' use, and the estimated cost is \$9,121.70. About 4,650 tons of coal are handled at Balboa each month.

Panama City Tramways.

Construction work on the lines of the Panama Tramways Company is well advanced, and it is expected that the system will be ready for operation in about three months' time. All the track has been laid, with the exception of an extension at the Balboa end, and a spur, which will probably be installed from the main line in Las Sabanas, to the new bathing pavilion on the seashore in the Bella Vista estate. The following general route has recently been determined upon for the extension of the company's track from the present terminus near the I.C.C. hotel at East Balboa to the present wharves at Balboa: Parallel with the Balboa highway to a point west of the iron bridge, thence between the Commission's power plant and the Union Oil Company's pumping station to the dump, thence over the dump and around the hill to the present dock buildings at Balboa.

The company's car shed is in course of erection, and notice has been received that the first shipment on the order of 14 standard length cars will be made from the United States on March 15. The company expects to erect its own power house eventually, but for the present current will be supplied from the Canal Commission's plant at Miraflores.

NOTES OF PROGRESS.

(Continued.)

This will necessitate the installation of two transformers, which have been ordered.

The new electric line will be the second one placed in operation in the city of Panama. On October 22, 1892, an English company, registered in London, was organized. It was named the United Electric Tramways Company, and was capitalized at 30,000 pounds, or \$150,000. It began work of construction in 1893, and in October of that year a part of the line was placed in operation. The rolling equipment consisted of four open and two closed cars, with a capacity of 25 passengers

each. Power was furnished from a small plant, consisting of dynamos built by Siemens & Company, and an engine by Marshall & Sons. From 1893 to 1896, the line was gradually added to, until in the latter year, there was a total length of about 5,000 feet in operation, extending from the old Cuartel, near Las Bovedas, to the present railroad station. Additional lines were projected, but the work was never carried out. In 1894, 115,622 passengers were carried, and in 1896, the number increased to 178,495. During the last two years of operation the company gave service only from 10 to 11 a. m., and from 5 to 10.30 p. m. The enterprise lost money, and the service was suspended in

1901. It is stated that at the time it was built this road was the first electrical line in South America. Up to and including 1896, the company had expended the sum of \$182,656.25. When the Americans came in 1904, the only remaining evidence of this line were the old rails that encumbered the streets, these being removed when paving was begun.

Quarantine Against Plague.

The Sanitary Department, within a few days, will probably withdraw the restrictions it has been imposing on vessels arriving at Colon from Liverpool. Since the report of a case of human plague in Liverpool, in July last, the department has been fumigating vessels from that port, and requiring the presentation of a certificate either from the consul or the health officer of the port, stating that while in port at Liverpool, the vessel in question was fumigated while empty, and that precautions were taken to prevent rats gaining access to it while off the wharves, such as keeping it breasted six feet from the wharves, and provided with rat guards on all hawesers.

The restrictions of the quarantine officers of the Sanitary Department at Colon, relative to vessels coming from Liverpool, have been the subject of much correspondence, and the department, after having on February 1, agreed to waive the fumigation of the vessels from Liverpool, provided proper precautions were taken to prevent rats gaining access to the vessel, by use of rat guards, etc., finally recommended that existing regulations, relative to requiring a certificate from either the health officer of the port, or a consular agent, be not modified until the Bureau of Public Health of the United States saw fit to discontinue the requiring of such a certificate. The rule of this bureau is, that if no infected rats are found in a port within six months, said port may be taken out of the class termed "Suspected of plague infection." The last infected rat at Liverpool was reported on August 30, 1912.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

About 98 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on March 1, the amount in place being 4,349,996 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 96 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 1, being 1,970,452 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 219,759 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending March 1, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.				Large stone.	Total.	SPILLWAY		
	Concrete placed.	Hours worked.	No. of mixer.	Concrete laid.			Hours worked.	No. mixers used.

Chilean Students Visit Canal.

Twenty students from the University of Chile at Santiago, arrived at Balboa on the *Palena* of the Compañía Sud Americana de Vapores, on February 25, on a tour of inspection of the Canal. The party is under the leadership of Prof. Carlos Hoerning, a member of the University faculty, and will remain here for about 18 days. With the arrival of the next steamer from Valparaiso, the party will be joined by Mr. Quesada, president of the Students Federation of Chile.

MIRAFLORES LOCKS AND SPILLWAY.

About 98 per cent of the concrete for the system of two twin locks at Miraflores was in place on March 1, the total amount on that date being 1,466,279 cubic yards, bucket measurement, out of a total of approximately 1,499,800. The record for each working day last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 1-cubic yard mixers.			Mixed by hand.	Large stone.	Total.	SPILLWAY. AUXILIARY PLANT.						Total.

EXECUTIVE ORDERS.

Artisans Eligible for Transfer to Classified Service.

All artisans, citizens of the United States, who are now or may hereafter be in the service of the Isthmian Canal Commission and who have rendered one year's satisfactory service on the Isthmus of Panama, and who may be recommended, upon discharge, for transfer, may be transferred within three years to corresponding positions in the classified service under the several Executive Departments and independent Government establishments, without examination, subject to the other provisions of the civil service rules.

WM. H. TAFT.

THE WHITE HOUSE,
February 18, 1913.

[No. 1705.]

Exempting Land Known as Las Sabanas from the Provisions of the Executive Order of December 5, 1912.

By virtue of the authority vested in me I hereby order that all that area of land in the Canal Zone known as Las Sabanas be excepted from the provisions of the Executive Order of December 5, 1912, directing the Chairman of the Isthmian Canal Commission to take possession on behalf of the United States of all privately owned lands in the Canal Zone, the said area being bounded on the south by the present limits of the City of Panama, on the southeast by the Pacific Ocean, on the northeast by the boundary line of the Canal Zone from monument 99 for a distance of four thousand seven hundred and forty-four and five-tenths (4,744-5/10) meters to monument marked "F," on the northwest by a line extending from said monument F south 63 degrees 32 minutes west for a distance of two thousand and eight and six-tenths (2,008-6/10) meters to the intersection of said line with the Curundú River, and on the west by the Curundú River from said point of intersection to the point where said river crosses the present boundary line of the City of Panama.

WM. H. TAFT.

THE WHITE HOUSE,
February 18, 1913.

[No. 1704.]

Examinations by Board of Local Inspectors.

Examinations for pilots, masters, mates, engineers, chauffeurs, and navigators of motor boats, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, March 12, 1913, beginning promptly at 8 a. m. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to operate same.

Immigration at Port of Colon During January and February.

According to the figures of the quarantine service, the number of persons who landed at the port of Colon from foreign ports during the month of January was 4,007, consisting of 1,749 cabin, and 2,258 steerage passengers. The number of persons who embarked for foreign ports during the same period was 2,806 consisting of 1,657 cabin, and 1,149 steerage

passengers. The number of persons who landed at Colon from foreign ports during February was 4,530, consisting of 1,661 cabin, and 2,861 steerage passengers. The number of persons who embarked for foreign ports in the same month was 2,870, consisting of 1,764 cabin, and 1,106 steerage passengers. The number of persons who landed over those who embarked was 1,660.

Clearing Trails.

The trail between Mount Hope and Majagual is being cleared on contract by W. D. Henry, whose bid of \$240 for the job was the

lowest among those opened by the Purchasing Agent on February 19. This is at the rate of \$35.54 per mile, the trail being 6.54 miles in length. Contract for the Arraijan-Rio Grande trail, the Arraijan-Cochinito trail, and the Gamboa-Cruces trail was awarded in aggregate to Ruben Arango R., at \$800, which is at the rate of \$51.64 per mile. These costs are lower than those of last year, when 59.54 miles were cleared at an average cost of \$74.88 a mile. The reduction is ascribed to a differential decrease of verdure to be removed in successive clearings.

LABOR FORCE AND QUARTERS IN JANUARY.

The total force at work on the Canal and Panama railroad on January 29, was 37,449. Of this number 26,123 were employed on the canal by the Commission, 4,892 by contractors, and 6,434 by the Panama railroad. The gold force on the Canal work composed almost exclusively of white Americans, was 4,501. The total Government force was as follows:

DEPARTMENT.	SILVER EMPLOYEES.*														Total silver.	Total gold.	Grand total.
	Artisans					European laborers.		West Indian laborers.									
	Monthly.	44 cents.	32 cents.	25 cents.	20 cents.	6 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.	10 cents.	7 cents.

Total	5,731	2,007	1,929	4,466	172	284	6,726	959	1,349

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco, and Naos Island. (2) Includes Europeans and Asiatics. (3) Includes 66 Panamanians. (4) Includes 38 East Indians. (5) Includes 88 Panamanians. (6) Includes Matachin. (7) Includes Colon Hospital. (8) Includes 30 East Indians. (9) Includes five Asiatics. Included in the above also, are 46 families, and 500 bachelors, belonging to the gold force of contractors.

JOINT LAND COMMISSION.

To Adjudicate Claims in Extinction of all Private Titles to Land in the Canal Zone.

Dr. Roland P. Falkner and Dr. L. S. Rowe, appointed by the President to represent the United States in the fourth commission to adjudicate claims in the expropriation of lands in the Canal Zone, arrived on the Isthmus on February 27, and on March 1, met in convening session with the representatives of Panama, Messrs. Federico Boyd and Samuel Lewis. The joint commission was formally organized at this meeting, and on March 3, it was received by the President of Panama and his cabinet. On March 6, the members will make a trip over the Canal Zone in preliminary survey, and the date for the first public hearing of specific claims will be announced shortly.

The extent of the work before the commission cannot be foretold. In conformity with the orders of the President, all privately owned land in the Canal Zone, with the exception of areas in Las Sabanas district, adjacent to the city of Panama is to be bought by the United States. The commission will proceed after the manner of a court of law, advertising time and place of hearing and establishing a docket of claims filed. It will probably be engaged for at least six months. The extinction of all remaining private titles in the Canal Zone entails more comprehensive work than that accomplished by the preceding commissions, whose work was principally in assessing values of separate tracts which were needed, adventitiously, in the Canal construction.

The first commission convened on February 15, 1905, and consisted of Mr. Federico Boyd and Dr. Carlos E. Cooke for Panama, and Mr. T. W. Gaff and Dr. C. A. L. Reed for the United States. The latter were succeeded on May 15, by Dr. H. R. Carter and Mr. E. C. Tobey. Altogether this commission made five awards, aggregating \$55,607.70, for 28,509 hectares of land and improvements.

A second commission, composed of Messrs. Ramón Arias (succeeded by Mr. Constantino Arosemena) and Samuel Lewis for Panama, and Messrs. Montgomery Blair and B. S. Ambler for the United States, adjudicated, in 1907, the half-interest of the Pacific Mail Steamship Company in the islands of Culebra, Flamenco, Naos, and Perico in Panama Bay. The company was paid \$20,000 for its improvements and \$20,000 for the land. The Panama Railroad Company held the other half-interest. This commission also assessed the damage done by a conflagration in the Malambo district of the city of Panama in 1906, which, it was claimed, was started by fumigation directed by the Isthmian Canal Commission. The commission did not fix the responsibility on the United States, and the matter is still pending; a bill providing for \$53,800 in payment for it has been introduced in several sessions of Congress, but has never been passed.

Messrs. Gil Ponce J. and Julio J. Fabrega, for Panama, and Edwin Denby and Everett C. Bumpus, for the United States, composed the third commission, which, in 1908, awarded \$123,980 for 1,963.5 hectares, involving 13 claims. The chairman, Mr. Denby, was chosen umpire for several cases on which the pre-

ceding commission had not been able to agree. In expropriation proceedings, reported in THE CANAL RECORD of August 12, 1908, he awarded \$61,000.

More Paper Currency.

For sanitary and other reasons, payments on the Canal have for several years past been made in gold coin, but it has been the practice of the Disbursing Department to use one dollar bills in making payments to employees entering upon annual leave or terminating service, for that portion of the amount due amounting to less than \$5, in order not to deplete the Panama silver, and also for the convenience of the employee.

It has been decided to extend this courtesy to the tourists, and upon request of the Sub-sistence Officer, the Disbursing Officer has taken steps to provide the necessary currency for such purposes, as, on account of the greatly increased travel, not only might it be inconvenient for tourists to receive Panama silver for amounts less than \$5, but the tendency would be to deplete the silver supply, all of which is needed in the Republic of Panama.

Civil Service Examinations.

Examinations for the following-named positions are scheduled to be held, probably on April, 13: Agricultural inspector, Philippine Service; assistant observer, Weather Bureau; cadet engineer, cadet officer, Lighthouse Service; civil engineer and draftsman, nonapportioned departmental service; civil engineer and superintendent of construction, Quartermaster Corps; mechanical draftsman, topographic draftsman, Isthmian Canal Service; engineer, Indian Service (steam engineering, electrical engineering, heating, refrigeration, gas and gasoline engines, hydraulics); farmer, Indian Service; junior engineer (civil), junior engineer (mechanical or electrical), Engineer Department at Large; junior engineer (mining), Bureau of Mines; scientific assistant, Department of Agriculture; surveyor, Philippine Service; teacher, Indian Service; trained nurse, Indian, Isthmian Canal, and Philippine services; wireman, nonapportioned departmental service.

Women will be admitted to the examinations for teacher, scientific assistant, and trained nurse, and women only will be admitted to examination for trained nurse, Philippine Service.

Note—This office has been advised that the following subjects with relative weights shown, will replace those given in Section 108 of the Manual of Examinations for mechanical draftsman, Isthmian Canal Service; 1. Machine design (including arithmetic, algebra and quadratics, geometry, mensuration, logarithms, use of tables, elementary problems in mechanics, use of slide rule, materials used in machine construction, and practical calculations involving the interpretation of formulas and the correct working out of results in special cases), 30; 2. Drafting (involving competent knowledge of machine construction and the ability to draw neatly to scale), 35; 3. Training, experience, and fitness, 35.

A limited supply has been received of a special announcement of the examination for scientific assistant, and, until the supply is exhausted, copies will be furnished upon request.

Applications for the above-named examinations will not be received in this office after

March 22; this date will be changed if necessary. Applications should be secured from and filed with this office. In requesting information the kind of examination desired should be mentioned.

The examinations will probably be held at Empire, in the Commission clubhouse, but the place and date of examination should be omitted in applications.

In answering questions as to residence applicants must show such residence in a State, and county therein, of the United States, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., March 1, 1913.

Isthmian Geological Researches.

Dr. George F. Becker, Chief of the Division of Chemical and Physical Research of the United States Geological Survey is on the Isthmus to obtain a mathematical analysis of the rock deformations that occur in Culebra Cut, as a part of the slide phenomena. This analysis is expected to contribute, not only to the science of geophysics, or the physics of the earth's crust, but to geology in general.

Mr. D. F. MacDonald, the Canal Commission geologist, has furnished Dr. Henry S. Washington, of the Carnegie Institution at Washington, with about a dozen detailed analyses of the typical rocks of the Isthmian region, as well as microscopic and broader studies of them, which is believed to be the most exhaustive study of Isthmian, or in fact, of Central American rocks, that has ever been made. Dr. Washington intends to use this information in a publication, by the Carnegie Institution, of detailed analyses of the chief rock units which compose the earth's crust, a work which is expected to be of fundamental importance to geologists, and to those who are dealing with the problems of geophysics and geochemistry.

Radiotelegraph Stations.

Forces of the United States Marine Corps began the erection of a wireless telegraph station at Balboa on February 10. One of the smokestacks at the Isthmian Canal Commission electric plant will be used as a mast for the flat-topped antennae, and the ground wires will pass into the storage pond for water used in cooling the air compressor at the plant. The radio apparatus to be installed will use a 25-cycle, 3-phase current and vibrate a wave length of 600 meters for communication with ships within a radius of 500 miles. The outfit was purchased from the government of the Republic of Panama, which had projected its installation at the National Palace, in the city of Panama, but abandoned the undertaking on account of the activities of the United States Government.

In accordance with the authority of Congress, the large wireless station at Colon was opened to commercial business during the month of January. Messages are transmitted for eight cents a word to ships two and three days out from port, delivery not being guaranteed to vessels farther north than Kingston.

Pardon for Silvers and Petersen.

Charles Silvers and F. P. Petersen have been granted a pardon, effective March 1, for the unserved part of a term of two and a half years in Culebra penitentiary, which they began on November 8, 1911, on conviction on five counts as accessories to embezzlement from the Isthmian Canal Commission.

REMOVAL OF GORGONA.

Dismantling of Family Houses to be Begun First—Applications for Married Quarters Restricted.

The Chairman and Chief Engineer, under date of March 3, approved the recommendations of the Acting Chief Quartermaster relative to dismantling all of the American built married and bachelor quarters at Gorgona. According to the present schedule, the water in Gatun Lake is expected to rise to a height that will inundate the site of Gorgona shops some time in September of this year. This allows but little over five months in which to remove the quarters, miscellaneous buildings, and shops. The work of the shops, prior to their abandonment, will probably be divided between the shops at Empire, and the marine shops at Cristobal, this arrangement to continue in effect until the completion of the permanent shop buildings at Balboa. Material in the storehouse will be transferred to the storehouse at Empire, and to the Mount Hope Depot.

The work of demolishing the married quarters will be begun at once, or as soon as arrangements can be made for the transfer of the present occupants to other points. Some of the vacated buildings will be taken to Corozal, and reerected there; and the remainder will be used at Balboa. It is expected that the dismantling of the bachelor quarters at Gorgona will be begun as soon as possible after August 1, the occupants of which will be given new assignments at the point most convenient to their work. At Empire, there are several nonhousekeeping family quarters, which will be converted into bachelor quarters as soon as they can be vacated. There are upward of 80 American built buildings to be taken down at Gorgona, including the following: Nine Type 1, two-family houses; 10 Type 5 bachelor quarters, converted into married quarters; one Type 7 two-family house; 23 Type 14 four-family houses; three Type 15 one-family houses; one Type 17 one-family house; two miscellaneous houses, without type numbers, used for married quarters; eight Type 18 bachelor quarters; three Type 5 bachelor quarters; one Type 21 officials' residence, and the usual public buildings common to the Canal Zone towns. In addition, there are 27 French cottages, used as married quarters; 12 two-family French houses, and one four-family French house. The French buildings will not be taken down for the present, and the public buildings, such as postoffice, police station, fire station, hospital, schoolhouses, clubhouse, etc., will be left until later. The value of the privately owned buildings in the native part of Gorgona will be adjudicated by the Joint Land Commission, and no decision will be arrived at as to their disposition until the commissioners have made their report.

Assignments will be stopped at Gorgona at once. On and after March 31, there will be no further assignments of married quarters at Bas Obispo, Las Cascadas, Empire, and Culebra, with the possible exception of the few on the No. 1 list of the applications for married quarters on file February 28. All applications on the No. 2 list will be cancelled.

On January 31, when this list was last compiled, there were 280 applicants for married quarters on file on the No. 2 list in the villages of Bas Obispo, Las Cascadas, Empire, and Culebra. It is planned to hold the married quarters at those points, as fast as they become vacated, for the married employes, whom it will be necessary to move from Gorgona.

PERSONAL

Lieut.-Col. Chester Harding, U. S. A., assistant division engineer of the Atlantic Division, resigned his position with the Isthmian Canal Commission, effective February 27, and, accompanied by Mrs. Harding, and their daughter, Miss Katherine Harding, sailed for the United States on the *Allianca*, which left Cristobal on Friday, February 28. Effective February 28, 1913, he was appointed the engineer member of the Board of Commissioners, which governs the District of Columbia, succeeding Lieut.-Col. William V. Judson, Corps of Engineers, U. S. A. Lieutenant-Colonel Harding arrived on the Isthmus on August 2, 1907, and, until the creation of the Atlantic Division on July 1, 1908, was division engineer of the old Division of Gatun Lock and Dam Construction. When the Atlantic Division was organized, he became the assistant division engineer in local charge of the designing force of the Atlantic Division, with headquarters at Gatun. With the transfer of Maj. Edgar Jadwin to the United States on June 15, 1911, he was placed in local charge of the Atlantic entrance and Toro Point breakwater work, with headquarters at Dock 13, Cristobal.

Mr. Edward J. Williams returned on Thursday, February 27, on the *Cristobal*, from his annual leave of absence, a part of which he spent in England and France. His wife and children, who accompanied him to Europe, remained in Paris.

Mr. H. A. A. Smith, accompanied by Mrs. Smith, returned from leave of absence on the *Cristobal*, which docked on Thursday, February 27.

Changes in Transisthmian Cables.

The Central and South American Telegraph Company has been granted permission by the Municipal Council of Panama to place its cables underground, in the traverse from its Pacific landing station at Punta Mala to the commercial office on Central Avenue, at the corner of A street. The three strands are now carried like telephone cables, on iron poles, skirting the beach for about a mile and a half. In times of storm they have suffered, and it has happened that hunters have shot holes in the large cables. Permission has been granted by the Isthmian Canal Commission to lay the conduit below the pavements of the streets of the city, which are controlled through the Department of Public Works, by virtue of its having paved the streets.

The only streets affected by this proposed work are Eleventh and A streets, for a distance of about three hundred yards in all, but the permission covers future conduit work on the part of the company, should it desire to place underground the cables from its office to the Panama railroad station, connecting with Colon. From the station to Colon, it is already underground—the longest subterranean cable in the world, 49 miles in

length. As much as possible this cable follows the relocated line of the Panama railroad, and was laid from flat cars. A part of it crosses the Gatun Lake area, and is 50 feet under water. This "amphibious" cable has four insulated cores, and, on account of high inductance, due to the electric power plants along the line, it is necessary to use two cores for each circuit, instead of grounding a single core. The Canal construction has subjected it to many accidents, in slides, dumps, excavation and fires, and the company's repair gang has been kept busy, with from 15 to 40 men, in making repairs and in moving the line out of danger.

A Rivet-Driving Record.

Three gangs employed on the spillway gates at Miraflores drove a total of 22,328 rivets during the month of February, an average of 372 rivets a gang for each working day of eight hours. This is believed to have established a new local rivet-driving record. The maximum day's work for all three gangs was 2,137 rivets, and the maximum day's work for one gang was 1,237. Out of the latter number, 167 rivets were ordered cut out and re-driven, leaving a net total of 1,070 for the day. There is one riveter to each gang, and the workman who made the best record for his gang for one day was a West Indian named Gerald Goodrich. The force was in charge of Superintendent Fred Hutzley.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending March 1:

DATE.	Hours worked.	Cubic yards.
February 24.....	10.00	3,292
February 25.....	9.20	3,040
February 26.....	10.20	3,648
February 27.....	10.25	2,625
February 28.....	10.20	3,833
March 1.....	10.20	3,330
Total.....	60.45	19,768

Balboa Sand Service.

A report of sand shipped from Balboa during February, follows:

DESTINATION.	Number cars.	Cubic yards.
Atlantic Division.....	19	471
Central Division.....	30	450
Mechanical Division.....	2	50
Fifth Division (C. E.).....	1,440	28,496
First Division (C. E.).....	2	30
Civil Administration.....	1	25
Quartermaster's Department.....	1	25
Panama Railroad Company.....	10	250
Fortifications.....	*319	7,365
Private.....	4	100
Total.....	1,828	37,262

*Also three barges.

Record for Ditching Machine.

Panama railroad ditcher, No. 1, working at the stock pile of river gravel across the Chagres from Gamboa, on February 21, loaded 1,203 cubic yards of gravel in seven hours and 38 minutes. This exceeds former high runs of the same machine, and is believed to set a record for $\frac{3}{4}$ -yard clamshell cranes. The engineer was E. Richard.

Mr. G. M. Guerin has been appointed Acting Vice-Consul of Norway in the city of Panama, vice Mr. Edward H. Morrice, resigned.

SOCIAL LIFE OF THE ZONE.

Church Notes.

A series of revival meetings is in progress at the seawall Methodist Episcopal Church, Panama, conducted by the Rev. Hugh Taylor of Knoxville, Tenn. The mission began with an evening service on Tuesday, February 25, and will close on Wednesday, March 12. The Rev. Mr. Taylor is accompanied by Mr. James Reid, cornetist and evangelistic singer; and by Mr. de Russ, a Spanish preacher from San José, Costa Rica. The agent of the American Bible Society for Central America, the Rev. James Hayter, is making his second visit to the Isthmus in connection with this mission. The services, which begin each evening at 7.30 o'clock, are conducted both in Spanish and English. The pastor of the church, the Rev. Harry Compton, conducts the Spanish service, and the Rev. Mr. Taylor, the English.

On Monday evening, February 17, the members of the original ladies' auxiliary to the Gatun Christian League held a rally at the home of the Rev. Stephen and Mrs. Witt, the occasion being a farewell to those of the charter members who are leaving the Isthmus. This auxiliary was organized in 1908, and was disbanded about six months ago. Each of the original members was presented with a souvenir of her work in the auxiliary.

Miscellaneous.

The missionary library of the Gatun study circle has been received, and the books were placed in circulation among the members on February 26. The next meeting of the circle will be held at the home of Mrs. Witt on Friday afternoon, March 7.

The headquarters of Orchid Chapter, No. 1, Order of the Eastern Star, have been moved from Gorgona to Empire. The first meeting at the new place will be held on Saturday evening, March 8. Meetings will be held in the Commission lodge hall, Empire, on the second Saturday evening in each month.

A musical entertainment entitled "The District School" will be given at the Gorgona club house on Monday evening, March 10.

For the Sunday evening service in the clubhouse, the following program has been prepared: March 9, an illustrated lecture on Cuba; March 16, an illustrated lecture on the life of Moses, with special music; on Easter Sunday, March 23, a sacred cantata.

The monthly dance of the Cristobal Dancing Club will be held on Saturday evening, March 8, at the Commission clubhouse. Membership cards or invitations must be presented at entrance of hall.

Public Health Lectures.

On Thursday evening, February 27, a public health lecture was given in the convensorium, corner of Cash and D streets, Colon, the subject being "Tuberculosis, its prevention, treatment and cure." At the close, the speaker, Dr. M. E. Connor, opened a question and discussion class. The lecture was illustrated with lantern slides, a number of new pictures being shown in addition to those already exhibited in connection with these public talks. The series of lectures will be under the direction of, and will be financed by, the philanthropy department of the Cristobal Woman's Club. There is no set schedule, but the lectures will be announced, as arranged for, from time to time. This begins the third series of health lectures to be

given under the auspices of the Cristobal Woman's Club, the first two series having been given in 1910-1912. It is estimated that the total attendance at the ten lectures was more than 2,000.

Obituary.

Charles E. Evans, an employe of the Fifth Division at Corozal, died in Colon hospital on February 16. He was 33 years of age, married, and had been on the Isthmus four months. He is survived by his wife, living at Massillon, Ohio.

Tug Service to Porto Bello and Toro Point.

Following is a revised schedule of Atlantic Division tugs in the service between Dock 13 and Porto Bello, and Dock 13 and Toro Point.

PORTO BELLO.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays.—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m., returning, leave Porto Bello 11 p. m., arrive Dock 13 at 3 a. m.

Saturdays.—Leave Dock 13 at 9 a. m., arrive Porto Bello 11 a. m., returning, leave Porto Bello 2 p. m., arrive pier No. 4, Colon, 4 p. m.

Every Saturday, except the first Saturday after the 20th of each month. *Sailing No. 1.*—Leave Dock 13 at 2 p. m., arrive Porto Bello 4 p. m., returning, leave Porto Bello at 4.30 p. m., arrive at pier No. 4, Colon, 6.30 p. m. *Sailing No. 2.*—Leave Dock 13 at 6 p. m., arrive Porto Bello 11 p. m., returning, leave Porto Bello 12 midnight, arrive Dock 13 at 4 a. m.

Every Sunday.—Leave Dock 13, 7 p. m., arrive Porto Bello 9 p. m., leave Porto Bello 9 p. m., arrive Dock 13, 11 p. m.

Sundays, immediately following the 20th of each month. *ONLY.*—Leave Porto Bello 6 a. m., arrive Dock 13 at 8 a. m.

TORO POINT.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. *Sailing No. 1.*—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2.*—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.

Special, Wednesdays, ONLY.—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m., returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

Saturdays. *Sailing No. 1.*—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2.*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5.30 p. m., arrive Dock 13 at 6 p. m.

Sundays. *Sailing No. 1.*—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. *Sailing No. 2.*—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5 p. m., arrive Dock 13 at 5.30 p. m.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

FOUND.—On tug *Bohio*, Sunday, March 2, on trip to Toro Point, ladies' purse, containing 75 cents, United States currency. Owner can have same by applying to Dock 13 office.

WEATHER CONDITIONS, CANAL ZONE, FEBRUARY, 1913.

Rainfall on the Isthmus during the month of February was generally deficient, except along the Atlantic coast. The monthly totals ranged from .07 inch at Pedro Miguel to 4.20 inches at Brazos Brook.

Approximately normal conditions of temperature, humidity, and atmospheric pressure prevailed.

There was a general deficiency in wind movement over the Isthmus, and the average cloudiness was everywhere below normal.

The decrease in night foginess continued with the advance of the dry season. Of the fogs observed, 73 per cent were dissipated by 6.30 a. m., 95 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

OFFICIAL CIRCULARS.

March 21 (Good Friday, a Holiday.

CULEBRA, C. Z., March 4, 1913.

CIRCULAR No. 478:

So far as consistent with the transaction of public business, Friday, March 21 (Good Friday,) will be observed as a holiday in the Canal Zone.

Good Friday is not included in the list of holidays for which gratuity pay is allowed, and pay for services performed on that day will be calculated the same as for Sundays.

Holy Thursday will be considered an ordinary working day and payment made accordingly.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Eye and Ear Examination of Railway Employees.

CULEBRA, C. Z., February 27, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The examinations of railway employees to determine visual acuity, color perception, and hearing, as prescribed in circular of the 11th instant, will be made by the eye and ear clinics of Ancon and Colon Hospitals.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Shipment of Employees' Personal Effects.

CULEBRA, C. Z., March 3, 1913.

ALL CONCERNED:

Until further notice, the household and personal effects of employees leaving the service, in excess of the regular baggage allowance on first and second-class tickets, will be accepted for shipment as freight from any station of the Panama railroad to Colon or Panama on I. C. C. billing, without expense to the employee.

GEO. W. GOETHALS, Chairman.

Personal Injury Compensation.

CULEBRA, C. Z., March 3, 1913.

CIRCULAR No. 235-G:

On February 26 the President signed an Executive Order, effective March 1, as authorized by Section 5 of the Panama Canal Act, approved August 24, 1912, providing "A method for the determination and adjustment of all claims arising out of personal injuries to employees thereafter occurring while directly engaged in actual work in connection with the construction, maintenance, operation, or sanitation of the Canal, or of the Panama railroad, or of any auxiliary canals, locks, or other works necessary and convenient for the construction, maintenance, operation, or sanitation of the Canal, whether such injuries result in death or not."

The Act also provides that the claims to the extent they are allowed shall be paid out of the moneys appropriated for that purpose, or out of the funds of the Panama Railroad Company, as the case may require, and that the Injury Compensation Act of May 30, 1908, and the act under which meritorious sick leave is now allowed "Shall not apply to personal injuries thereafter received and claims for which are subject to determination and adjustment" as prescribed by the President.

Compensation is payable in case of all injuries to employees whether resulting in death or not, occurring while the employees are directly engaged in actual work, except when the injury is caused by the employee's intention to bring about the injury or death of himself or another, or by his intoxication.

No payment whatever is made at any time for the first five days of disability, except that employees entitled to sick leave may be granted the same.

In determining the amount payable under the terms of the Order the maximum monthly pay of any employee is limited to \$200. The maximum rate at which compensation on account of injury is payable is 50 per cent of the monthly pay, so that no employee would receive more than \$100 per month during the period of his disability.

In cases of total disability, an employee will receive a monthly compensation of 50 per cent of his monthly pay for a period not exceeding six years, and thereafter during the continuance of the disability a monthly compensation equal to not more than 40 per cent and not less than 25 per cent of his monthly pay.

In cases of partial disability, an employee will receive 50 per cent of the difference between his monthly pay and his wage-earning capacity during the period of disability not exceeding six years, and after the expiration of six years a monthly compensation equal to not more than 40 per cent and not less than 25 per cent.

Employees are entitled to medical, surgical, and hospital service, and, in the discretion of the Chairman, may be granted transportation to their homes, if the Chairman is of the opinion that it is not desirable to continue the injured employee in the service.

The regulations provide for increased compensation in case of death, 35 per cent of the monthly pay of a deceased employee being paid to a dependent widow for

a period of six years from date of death, except in case of her death or her remarriage. Ten per cent additional payable for each child, not, however, to exceed a total of 50 per cent for the widow and children.

If the employee left no widow, 25 per cent is payable for one child, and 10 per cent additional for each additional child not exceeding a total of 50 per cent until they reach the age of 18 years, or become capable of self-support.

One dependent parent may be paid not exceeding 25 per cent. If both parents are dependent, not exceeding 20 per cent is payable to each.

Provision is also made for paying a percentage to wholly dependent brothers, sisters, children, grandchildren, or grandparents, if there is no widow, widower, child, or dependent parents.

Until the Isthmian Canal Commission is discontinued as authorized by the Panama Canal Act, the Order provides that "Compensation shall be paid in a lump sum in all cases unless the Chairman of the Isthmian Canal Commission in any case determines that payment in installments for part or all of the period during which compensation is payable is for the best interests of the United States, or of the Panama Railroad Company, or of the beneficiary."

The Order provides that the liability of the United States and the Panama Railroad Company shall be discharged by the payment of a lump sum equal to two-thirds of all future payments of compensation, and that the probability of the beneficiary's death before expiration of the period during which he is entitled to compensation shall be determined according to the American table of mortality.

If an injury, or death, is caused under such circumstances that there is a legal liability against a third party, or in the case of a Commission employee against the Panama Railroad Company, the employee must assign his right of action, and, in the case of the Panama railroad, must release the railroad company from any liability on account of such injury or death before receiving final payment.

The Order requires the making of reports and the filing of claims similar to the requirements at the present time.

The Order will be published in full with instructions in regard to the procedure thereunder as soon as an authenticated copy is received.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Circular No. 45 Cancelled.

PANAMA RAILROAD COMPANY,

COLON, R. P., February 25, 1913.

CIRCULAR No. 30:

All Concerned:—Circular No. 45, dated February 27, 1912, in regard to sightseeing excursion train not being operated on holidays, is hereby cancelled.

J. A. SMITH, General Superintendent.

Prices for Gravel.

PANAMA RAILROAD COMPANY,

COLON, R. P., March 1, 1913.

CIRCULAR No. 31:

All Concerned: Effective February 15, 1913, the price of gravel sold to private parties will be \$1.60 per cubic yard. Gravel will be charged into the work of the Engineering Department at the rate of 75 cents per cubic yard, and bills against the Commission, for gravel used on the relocated line, will also be rendered at the rate of 75 cents per cubic yard.

J. A. SMITH, General Superintendent.

Movement of Trains—Miraflores Tunnel.

PANAMA RAILROAD COMPANY,

COLON, R. P., March 3, 1913.

GENERAL ORDER, G. S. No. 5:

All Concerned: A staff system will soon be placed in service between North Cabin and South Cabin to handle traffic through the Miraflores tunnel. The date will be given in a later bulletin.

The staff is a piece of metal enclosed within a rubber holder for convenience in handling. Its possession by the engineman or conductor on the forward end of a train, gives the right to proceed through the staff system territory only, and supersedes existing orders or time table authority between North Cabin and South Cabin.

The staff must be delivered by the signalman to the forward end of all trains entering the tunnel, and the train crew must throw the staff on the balcony of the opposite cabin when passing that building. A staff must not be given to any train by the crew of another train, or by a signalman without first putting same in the staff instrument and again removing it.

The signalman on duty at North Cabin will have general supervision over traffic movement through this territory.

The book of rules will govern all movements through the interlocking plants at either end of the tunnel.

Signalmen will immediately place signal and master levers normal as soon as rear of train has passed home or dwarf signals when entering the tunnel.

In case of failure of the staff instruments, trains will be brought up to the tunnel under a hand signal, given with a yellow flag, or a yellow lantern, and there given instructions over the signature of the signalman that the staff system is out of order and that they may proceed.

J. A. SMITH,

General Superintendent.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending March 1:

Carrillo, February 23, from New York, with 30 barrels rosin, 215 cases soap, 40 kegs washers, 60 carboys acid, for stock; 10 cases electrical material, 116 bundles steel bars, for Panama Railroad Company; 563 bundles steel bars, for Second Division; 17 cases electrical material, 21 reels electric cable; 28 cases gate machinery, for First Division.

Prinz Eitel Friedrich, February 24, from New York, with six barrels galvanized unions, for stock.

Santa Maria, February 26, from New York, with 51 cases electrical material, 12 reels electric cable, 25 cases fender castings, six bundles steel bars, for First Division; 10 cases electrical material, for Mechanical Division; 125 bundles steel bars, for Second Division; six pieces castings, 18 barrels journal bearings, for Mechanical Division; 85 kegs nails, 16 bales packing, 500 kegs track spikes, 32 kegs washers, for stock.

Abangarez, February 26, from New Orleans, with 10 pieces steamshovel chain, 480 sacks dairy feed, 939 bales prairie hay, 150 cases fire brick, 938 pieces cross-ties, 3,879 pieces yellow pine lumber, 178 pieces piling, for stock; 149 pieces white oak lumber, 321 pieces cypress lumber, 19,336 pieces yellow pine lumber, for Mechanical Division.

Carlago, February 27, from New Orleans, with 2,269 bales hay, five cases paint, 10 rolls cotton duck, 1,408 pieces yellow pine lumber, 400 pieces cross-ties, 33 pieces piling, for stock.

Cristobal, February 27, from New York, with 154,000 bags cement, for Fifth and Atlantic Divisions; 12 pieces steel plates, for Sixth Division; 12 crates generators, for Central Division; eight reels electric cable, 13 cases castings, for First Division; 40 coils wire, 898 pieces iron pipe, 12 cases hardware, for stock.

Colon, February 27, from New York, with 10 barrels fire clay, 22 cases wire, 163 kegs steel pins, 83 cases incandescent lamps, 135 barrels sand, for Mechanical Division; 636 crates tile slabs, 108 packages signal material, for Panama Railroad Company; 250 cases glassware, 60 bags poultry feed, for Sanitary Department; 287 kegs nuts and pins, 50 pieces steel channels, 17 barrels pipe-fittings, 50 barrels flour, 23 cases lantern globes, 80 bales waste, 400 cases linseed oil, 125 cases babbitt metal, 30 cases polish, 1,508 pieces iron pipe, 163 kegs steel pins, 18 cases envelopes, for stock; and a miscellaneous cargo, the whole consisting of 4,720 packages, weighing 640 tons.

Stages of the Chagres.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Schedule of moving picture dates, week March 10 to 15: Monday, Gatun; Tuesday, Culebra; Wednesday, Gorgona; Thursday, Empire; Friday, Corozal; Saturday, Cristobal; Friday, Porto Bello.

Return engagements of the Edith Harris Scott Concert Company are, as follows: Monday, March 10, Empire; Tuesday, Gorgona; Wednesday, Corozal; Thursday, Gatun; Friday, Cristobal; Monday, March 17, Culebra.

Representatives of the various clubhouses met at Cristobal on Saturday night, March 1, and organized the Isthmian Duckpin League for 1913. Mr. Gustavson, Empire, was elected president; Mr. Pinney, Empire, secretary; and Mr. Weston, Cristobal, official scorer. The series will begin March 8, and will continue for 10 weeks. After the meeting, the representatives participated in a two-man team bowling contest.

CULEBRA.

High scores for the week in duckpins were, as follows: Warner, Jr., 106, 119; Palmer, 102, 101; Kersey, 102; Grossberg, 114; Case, 104; Brown, 103; Durand, 120; Dougherty, 106; Kiernan, 103. Brown won the prize for high score during February with 130, and E. P. Case took second prize with a score of 125.

EMPIRE.

The opening game of the Isthmian duckpin tournament will be held at Empire on Saturday evening, March 8, when Culebra will bowl the Empire team.

The boys' bowling tournament has been completed with the following results: High score, Hepler, 109; high two-man team, Hepler and Engelke, score 519; high average, Hepler, average 83; second high average, Engelke, average 80; third high average, Payne, average 80. Silver and bronze medals were given for prizes.

Three hundred people attended the opening concert given by the Edith Harris Scott Concert Company on Friday evening, February 28.

All those wishing to enter a local tenpin bowling tournament should do so on or before March 10. There are twenty entries to date.

The February handicap pool tournament was won by Mr. Donnelly, among sixteen entries.

GORGONA.

The attendance at the gymnasium classes is increasing. These classes meet on Tuesdays and Thursdays.

The Gorgona indoor baseball team went to Camp Elliott on Saturday evening, and won by the score of 28 to 20. Ridge, Hennen, Robitoy, Morrison, Johnson, Christensen, Emery, Edwall, and Lauden were the men that represented Gorgona. The score was a tie until the tenth inning.

A special benefit program will be held on Saturday evening at the clubhouse. Every one is invited.

On Sunday evening, March 9, beginning at seven, there will be a special program, when a lecture on Cuba with illustrated slides, will be given. There will be special music.

Gorgona defeated Gatun in a bowling contest on Saturday evening. Scores follow:

Gatun				Gorgona.			
Harper.....	87	87	79	Dunlap.....	69	94	98
Wulff.....	81	66	77	Denst.....	86	104	89
Carson.....	92	86	82	Seebt.....	87	89	83
Campbell.....	63			Roper.....	81	81	
Gibson.....	79	80	76	King.....	90	83	86
Gebhardt.....		79	92	Ruchte.....			85
Totals.....	492	498	496		413	451	441

High scores for the week in bowling: Denst, 102, 105, 101, 103, 102, 104, Stewart, 103, Lowe, 102; Ruchte, 102, 101, 102; Nowick, 107.

High individual scores for local tournament: Davis, 321, Roper, 307; King, 304; Single—Davis, 125; Stewart, 115; Stoehr, 114. Teams—Davis and Keppler, 612; Nowick and Roper, 597; Sims and Roper, 595.

GATUN.

The Gatun Clubhouse celebrated its third anniversary by a "smoker" on Tuesday evening, March 4. Formal exercises will be held on Wednesday evening, March 5. The programs follow:

Part 1—Selection, Tenth Infantry; "Just a word," W. C. Gayer, vice chairman, executive council; Irish ballads, G. C. Fitzgerald; piano solo, John McMahon; negro songs, Geo. Stokes; marching song, Y. M. C. A. glee club; Scotch songs, Archie Harper.

During an intermission cigars and refreshments were served. Mr. Ward played the piano.

Part 2—Italian selections, Arthur Pazzagli; popular songs, Hintman and Burns; dramatic recitations, E. H. Fenstermacher; "The Musical Tramp," John Kane; Spanish Houdini, handcuff king, Raul Morales;

wrestling matches: (a) Huber (Gatun) vs. Andrews (Empire); (b) "Maroun Rachid" vs. Williams; (c) burlesque; finale, orchestra.

The program for the exercises on Wednesday evening, March 5, is, as follows: Selection, Gray's orchestra; address of welcome, Lieut.-Col. W. L. Sibert, chairman of executive council; selection, tropical quartet, Messrs. Ross, Dickson, Case, and Acher; "As Others See Us," Mr. A. B. Dickson, superintendent of clubhouses; soprano solo, Mrs. C. R. Hughes; a brief retrospect, Mr. F. G. Smith; address, Mr. Justice Thos. E. Brown, Jr., of the Supreme Court, Canal Zone; one-minute speeches, prominent citizens; selection, tropical quartet.

At 9.45 p. m., on the lower floor, will follow a public reception, inspection of the building, orchestra selections, buffet lunch, pool and bowling contests.

The Edith Harris Scott Concert Company will make its first appearance at Gatun on Friday evening, March 7. Those desiring, may reserve seats.

A second game of basketball between teams representing the I. C. C., and the McClintic-Marshall and American Bridge companies was played on Thursday evening, February 27. The score was 27 to 12, in favor of the I. C. C.

The results of the two bowling tournaments recently brought to a close are: *Ragtime tenpin tournament*—First prize, W. J. Humphrey and Chas. G. Wurster; second prize, G. A. Barte and Geo. Miller. *Ragtime duckpin tournament*—First prize, Theo. G. DeMoll and Chas. G. Wurster, second prize, W. A. Wells and C. E. Vierbuchen.

The library of the clubhouse is being entirely overhauled. A new classification has been made, the books renumbered, and catalogues, according to both the book names and the authors, have been compiled. A new set of rules governing the loaning of books has been drawn up and will be rigidly enforced.

CRISTOBAL.

The checker club met on Monday night for a social time and had a number of interesting matches.

There was a large attendance at the closing I. C. C. band concert on Wednesday night, February 26. About 600 people were in the Clubhouse, and about the bandstand and quarters.

The subject of debate for Wednesday night, March 5, will be "Resolved that the Panama Canal should be under civil government."

The regular gymnasium classes will meet on Thursday night at 8 o'clock, instead of Friday night.

The moving pictures will be on Friday night at 8.15 o'clock. Songs and slides will also be given.

All duckpin bowlers are requested to get in shape for the opening of the Isthmian Duckpin League on Saturday night, March 8.

Misdirected Letters.

ANCON, C. Z., March 5, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be secured upon request of the addressees:

Antolin, Antonia (pkg.)	Hewitt, Edward S.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 2 p. m. and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct Tuesdays at 3 p. m.

The Panamanian Steamship Company's steamer *Panama* will sail from Panama for Aguadulce and Pedregal (Boquete) on March 11, and 19.

The following ships arrived at, or departed from, the port of Balboa during the week ending March 1:

Arrivals—February 25, *Palena*, from Valparaiso; February 26, *Urubamba*, from Callao; February 28, *Barracouta*, from Central America.

Departures—February 23, *Huallaga*, to Mollendo; February 24, *Manavi*, to Guayaquil; February 24, *Mexico*, to Valparaiso; February 24, *Santa Rita*, to Port Harford; February 26, *Pennsylvania*, to San Francisco; March 1, *Ecuador*, to Guayaquil.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, MARCH 12, 1913.

No. 29.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Change of Plan for Pacific Entrance Excavation.

Excavation of the Canal channel for about a mile south of Miraflores Locks has been carried on by dredges and hydraulic monitors, followed by steamshovels, in a pit protected against inundation, by the waters of the Pacific, by an earth and rock dike across the channel, which is being excavated to the south by dredges. It has been decided to extend the area of dredge operations, and another dike has been built across the channel 3,300 feet north of the present one, and opposite station No. 2114. In the section between the dikes, all excavation, so far, has been done by monitors and dredges. These have reached a general elevation of about 22 feet below sealevel. Steamshovels will excavate 409,000 cubic yards from this section, carrying the bottom to reference minus 45, for a width of 200 feet, and then the dredges will remove the old dike and enter the area. Their work of completing the channel to 45 feet below mean sealevel, with a bottom width of 500 feet, will entail the removal of about a million cubic yards, principally soft material.

Canal Excavation in February.

The grand total of Canal excavation to March 1 was 192,996,027 cubic yards, leaving to be excavated 25,142,272 cubic yards.

The total excavation for the month of February was 2,108,530 cubic yards, as compared with 2,643,410 cubic yards in the corresponding month last year, and 2,714,174 cubic yards for February, 1911.

The dry excavation last month amounted to 1,390,324 cubic yards, and was entirely by steamshovels. The dredges and monitors removed 718,206 cubic yards. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 315,190 cubic yards. Of this total, 11,241 cubic yards consisted of dry excavation at Gatun Locks, and the remainder

—303,949 cubic yards—was wet excavation from the Atlantic entrance.

The total excavation in the Central Division was 996,800 cubic yards, which includes 6,304 cubic yards from the Culebra Cut section charged to the Obispo Division.

In the Pacific Division, the total excavation was 796,540 cubic yards, 382,283 cubic yards of which consisted of dry excavation. Of the 414,257 cubic yards of wet excavation, 239,032 cubic yards were taken from the Pacific entrance, and 175,225 cubic yards from the site of the Balboa terminals.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follows:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation—			
Locks, dam and spillway	11,241		11,241
Mindi			
Terminal			
Total	11,241		11,241
Wet excavation—			
Atlantic entrance	303,949		303,949
Locks, dam and spillway			
Terminal			
Total	303,949		303,949
Total wet and dry excavation	315,190		315,190

CENTRAL DIVISION.

Dry excavation—		
Culebra Cut	290,496	9 0,496
Chagres section		
Obispo Division	6,304	6,304
Total	996,800	996 8,00

PACIFIC DIVISION.

Dry excavation—		
Locks, dams and spillways	12 980	12,980
Terminals	32,743	36 003
Prism	331,778	332,300
Total	377 501	382,283
Wet excavation—		
Pacific entrance	239,032	239,032
Miraflores Locks

Total wet and dry excavation	791,758	796,540

TOTAL CANAL EXCAVATION.

Dry excavation	1,385,542	1,390,324
Wet excavation	718,206	718,206
Total	2 103,748	2,108,530

LOCKS AND DAMS.

MATERIAL.	Atlantic.	Pacific.	Total.
	Cu. Yds.	Cu. Yds.	Cu. Yds.
Concrete placed in locks	30,780	39,273	70,053
Concrete placed in dams and spillways	3,028	4,403	7,436
Fill placed in dams	55 752	55 000	123 752

Mean rainfall along Canal (ten stations) 1.09 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal such as prism, diversions, or locks, etc.; that is, it

represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Terracing Canal Bank Opposite Empire.

Two steamshovels will be set at work in a few days terracing the east bank of the Canal for a distance of about 3,000 feet south of the Empire suspension bridge. A break in the Canal bank has developed in this section, and five terraces, involving the removal of approximately 400,000 cubic yards of material, will be excavated for the purpose of lessening the weight. Each terrace will represent about the width and depth of the average steamshovel cut.

Peninsulas and Islands in Gatun Lake.

Decree 46, of the Republic of Panama, dated May 17, 1912, temporarily withdrew from entry all public lands within the 3-mile belt surrounding the 85-foot Gatun lake level, with the object, as set forth in the preamble of the decree, of "Preventing any claim against the nation on the part of private parties, and to avoid any differences with the Government of the United States." The text of the decree, follows:

"Article 1. The right of the United States to use, occupy, and control the area of land to be covered by Gatun Lake, and that part of the shores of the lake rising to an elevation of 100 feet above mean sealevel for the purpose hereinbefore indicated is hereby recognized in pursuance of Article 2 of the (Hay-Bunau-Varilla) Treaty.

"Article 2. There are hereby temporarily withdrawn from public entry, or otherwise, the national lands included in a belt three miles in width, surrounding, and immediately contiguous to the 100-foot contour line above indicated.

"Article 3. The 100-foot contour line above mentioned shall be provisionally established upon a survey to be made by competent engineers, one to be appointed by the Republic of Panama, and one by the Isthmian Canal Commission authorities, which said engineers shall make a joint report of their work to the Government of the Republic of Panama, and the Canal Zone authorities, such report to be accompanied by maps and data fully elucidating the survey.

"Article 4. The rights of persons already legitimately acquired shall not in any way be prejudiced thereby."

When the waters of Gatun Lake rise to the 85-foot, or normal lake level, they will form a great many peninsulas and small islands, some lying within, others outside, the 10-mile strip. There will be 30, or more, small islands in the lake, west of the Canal, and

NOTES OF PROGRESS.

(Continued.)

about 20 to the east of it, outside the Canal Zone boundary lines. The United States proposes to exercise jurisdiction over every part of these islands, and also over two peninsulas, one on each side of the Canal, egress from which cannot be had, except over land in the Canal Zone, or by crossing the waters of the lake. The peninsula to the east of the Canal will form part of the permanent coast line in the Gatun River valley, while the one on the west will be a part of the coast line of the valley of the Trinidad and Siri rivers.

The shores of the lake, above the 100-foot contour line, will remain in the jurisdiction of the Republic of Panama. No steps have as yet been taken toward making the survey mentioned in the above decree.

Filling for Balboa Townsite.

Spoil from pipeline suction dredge No. 85, at work in the approach to the projected new piers in Balboa harbor, is being pumped through a relay station into the triangular area between the Balboa branch of the Panama railroad, the track to the Balboa commissary store, and Sosa Hill. The area contains about 66 acres and was reclaimed from swamp with

spoils from Culebra Cut. The hydraulic filling will raise it to a more nearly even surface, with an elevation of at least 20 feet above sealevel. On the south side of the track to the commissary, dry filling is being carried toward the base of Ancon Hill, for the elimination of a lake formed by the cutting off of an estuary from the bay. The made land between Ancon and Sosa hills will be the site of Government employees' residences in the permanent town of Balboa, though definite plans for the layout have not been fixed.

Reclaiming Swamp Between Ancon and El Diablo.

In the reclamation of the 400-acre swamp lying between Ancon and Diablo hills, and the east toe of Sosa Dam and the Panama railroad, a track is being laid along the south side of the main drainage ditch to allow the dumping of dry spoil for the construction of a retaining wall. The swamp is being filled with material pumped in from pipeline suction dredge No. 85, and the retaining wall will be built to a height of about six feet above the level of the earth, or 15 feet above sealevel, to regulate the flow of the hydraulic spoil. The track is about 3,000 feet long. The filling of the swamp is proceeding satisfactorily, though not as rapidly as anticipated, since the dredge discharges by day into the Balboa townsite, and fills the swamp only at night.

Transfer of Stores at Balboa.

The construction of the foundations for the permanent machine shop, and other buildings, has required that a large part of the goods in the quartermaster's storehouse at Balboa be moved. The pipes, oils, greases, heavy spare parts for floating equipment, bar iron and steel, lumber, cement, fire brick, and cable, constituting more than half the value of the stores, have been transferred to dump No. 1, almost opposite the Panama railroad yardmaster's office at the north toe of Sosa Hill. Buildings and racks are being erected for their temporary sorting and protection, pending their removal to the permanent storehouse, which will be the largest of the Balboa terminal buildings. The small stores in the present storehouse proper will not be moved, as the building is not in the way of buildings proposed at present, though a platform at the rear will be torn away. The oil house and rope shed, the pipe and steel racks, and a house for cement, adjacent to the storehouse, have been demolished.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 98 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on March 8, the amount in place being 4,367,897 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 96 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 8, being 1,978,753 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 220,520 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending March 8, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone.	Total.				
	Concrete placed.	Hours worked.	No. of mixer.		Cu. Yds.	Cu. Yds.	Concrete placed.	Hours worked.	No. mixers used.

*Includes 204 cubic yards laid by the Miraflores Locks construction plant—2 cubic-yard mixers.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of February.

During the month of February, the total amount of material excavated in the Central Division was 996,800 cubic yards, of which 190,131 cubic yards were classified as earth, and 806,669 cubic yards as rock.

Of the total, 990,496 cubic yards were primary excavation in the Canal prism, and 6,304 cubic yards were from the Obispo Diversion.

The total—996,800 cubic yards—was removed by steamshovels.

The high record for the month was made by shovel No. 206, working 44½ days (*) in the Culebra district, which excavated 54,500 cubic yards of rock.

The second best record for the month was made by shovel No. 260, working 43 days (*) in the Culebra district, which excavated 50,756 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 23 days in the Culebra district, which excavated 31,580 cubic yards of earth.

Shovel No. 205, working in the Empire district, made a high record for one day by excavating 2,831 cubic yards of earth on February 20.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best record for the month, and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.

207	Culebra.....	Feb. 26	Rock.....	2,440

*The excess number of days over and above the actual number of working days in the month of February (23) is due to double shift and night work.

Obituary.

Mr. H. B. Mattimore, an employee of the Mechanical Division at Gorgona, died in Colon Hospital on March 8. He was 49 years of age, a widower, and had been on the Isthmus eight years. He is survived by a brother, Joseph Mattimore, living at Gorgona.

Matron for Palo Seco Leper Asylum.

A matron has been appointed at the Palo Seco leper asylum, effective Monday, March 10. She is the wife of the superintendent in charge, and will have supervision over the women and children in the institution. The inmates now number 50, and, although this number has been equalled once or twice before, it has never been exceeded. The mem-

bers of the colony are usually tractable, and live up to the regulations of the institution. Occasionally, however, there is one that becomes discontented with the isolated life, and oversteps the bounds. The discipline in these cases usually consists of confinement for a short period, deprivation of their tobacco, or stopping privileges for a certain period. Once in a while, an inmate effects an escape, but he generally voluntarily returns.

Contest Among Gatun Volunteer Firemen.

For the purposes of fire protection at Gatun, the district is divided into three sections, namely, that situated east of the locks; that situated between the locks and the French canal, and that west of the canal, which includes the spillway. The section east of the locks is accessible to the hose wagon, but for the immediate protection of the middle and west sections, there are two volunteer companies, Nos. 2 and 3, respectively. There has always been a friendly rivalry between the two companies, especially since the spillway, or No. 3 company, won the flag two years ago.

On March 2, a tournament was held in front of the Gatun fire station, consisting of four events. A corps of judges and timekeepers was chosen, and the official results, as announced, were as follows:

Event No. 1—Run with cart and laying three lengths of hose, connecting up and getting water. Time of No. 2 company, 37-1/10 seconds; No. 3 company, 36-2/5 seconds.

Event No. 2—Making running connections with four lengths of hose laid parallel, connecting up and getting water. Time of No. 2 company, 24-4/5 seconds; No. 3 company, 27 seconds.

Event No. 3—Replacing middle section of live line of hose, with one from hose reel, water at full head. Time of No. 2 company, 20-3/10 seconds; No. 3 company, 23-4/5 seconds.

Event No. 4—Individual contest, consisting of running 50 feet, breaking coupling, and connecting nozzle. Time of No. 2 company, nine seconds; No. 3 company, 12-3/5 seconds.

Total time—No. 2 company, 91-1/5 seconds; No. 3 company, 99-4/5 seconds. This gave No. 2 company a margin of eight and three-fifths seconds; it was declared the winner, and was presented with a flag and \$100 in gold. It is probable that a banquet will be held shortly, at which the officials and the Gatun volunteer firemen will be the guests of No. 3 company.

Manganese Steel Buckets for Dredge Corozal.

The hard digging which the ladder dredge Corozal has been doing in rock in the Pacific entrance channel has caused severe wear on its buckets, and the lips, which make the cutting contact, are worn and jagged. The buckets have shown some weakness in the back, and an order has been placed with the Taylor-Wharton Iron and Steel Company of High Bridge, New Jersey, for six buckets with body, lip, and bushings of manganese steel, ready for use; and six lips of manganese steel, for use interchangeably on the buckets. These are for experimental purposes, and if they should be superior to the present carbon steel buckets, the latter will be supplanted throughout. These buckets have a capacity of 35 cubic feet each, and as made of carbon steel, weigh 5,400 pounds. The dredge operates 39 of them on a chain.

EXECUTIVE ORDER

Relating to Entry of Alien Laborers Into Continental United States.

Whereas, by the Act entitled; "An Act to regulate the immigration of aliens into the United States," approved February 20, 1907, whenever the President is satisfied that passports issued by any foreign government to its citizens to go to any country other than the United States or to any insular possession of the United States or to the Canal Zone, are being used for the purpose of enabling the holders to come to the continental territory of the United States to the detriment of labor conditions therein, it is made the duty of the President to refuse to permit such citizens of the country issuing such passports to enter the continental territory of the United States from such country or from such insular possession or from the Canal Zone;

And Whereas, upon sufficient evidence produced before me by the Department of Commerce and Labor, I am satisfied that passports issued by certain foreign governments to their citizens or subjects who are laborers, skilled or unskilled, to proceed to countries or places other than the continental territory of the United States, are being used for the purpose of enabling the holders thereof to come to the continental territory of the United States to the detriment of labor conditions therein;

I hereby order that such alien laborers, skilled or unskilled, be refused permission to enter the continental territory of the United States.

It is further ordered that the Secretary of Commerce and Labor be, and he hereby is, directed to take, through the Bureau of Immigration and Naturalization, such measures, and to make and enforce such rules and regulations as may be necessary to carry this Order into effect.

WM. H. TAFT.

THE WHITE HOUSE,
February 24, 1913.

[No. 1712.]

Work of Lidgerwood Unloaders in February.

During the month of February, the following Lidgerwood trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.....	5	1,033	20,660
Miraflores.....	2	298	6,258
Gamboa.....	3	860	18,030
Total.....	10	2,191	44,948

I. B. of S. S. and D. M.

The next regular meeting of Local No. 19, I. B. of S. S. and D. M., will be held at the Empire lodge hall, Sunday, March 16, at 12.15 p. m. All members are requested to be present.

Revenue Collections for February.

Revenue collections other than postal collections for the month of February, follows:

Bicycle, chauffeur and navigator licenses.....	\$101.00
Motor vehicle licenses.....	186.00
Steamboat inspection.....	259.05
Insurance collections.....	821.66
Taxes, licenses, etc., (deputy collectors of revenues).....	4,887.87
Cash received from estates.....	893.21
Value of estates closed.....	2,389.72

LOCAL MARKET PURCHASES.

Increased Sales to Commissary-Subsistence Department of Fish, Fruits, and Vegetables.

Since the issuance of the Chairman's circular in September, 1908, authorizing the Commissary-Subsistence Department to purchase food supplies in the open markets of Panama, without advertising, the quantity so procured has increased about 400 per cent, though at present, approximately ten times as much green food is imported by the department as is bought on the Isthmus. In the early days, the local market supply was small and poor, but in response to steady demand, there has been great improvement in the quantity, quality, and variety of its goods, especially vegetables.

Formerly, it was almost impossible to obtain American vegetables, but now a number of Italian and Chinese truck gardeners are raising cabbage, okra, lettuce, string beans, tomatoes, radishes, onions, egg plant, parsley and spinach, as well as chayote, and other local vegetables which have found favor among the commissary stores, and the government hotels and messes. Practically all of the local buying of vegetables is in the city of Panama, at the public market wharf, or at the gardens of the truckers. About 10,000 pounds are purchased each month.

Panama is also the exclusive fish market, except for a small quantity of sea turtle—classified as fish in the buyers' categories—which is grown and sold at Colon. The local purchasing agent, or a representative, visits the Panama fish market each morning about the time of high tide. The best catches are made at night, and the fishing boats come in with the tide, which enables them to moor close by the wharf. The fish are brought ashore in baskets. Spanish mackerel, corbina, and red snapper are regarded by the Commission buyers as first grade fish, and are the only ones bought for sale to Americans. The flounder and the bobo, second grade fish, are exposed in large quantities, and were formerly supplied to West Indian and European laborers' messes, but importations of fish from the United States have been substituted for them. In all, about 15,000 pounds of fish are taken each month.

The market is quick for first grade fish, oysters, lobsters, and shrimp. Sometimes no lobsters, always in demand, will be brought in; and recently a Commission buyer, returning with a special order to a table on which he had seen a thousand shrimp twenty minutes earlier, found it bare. The department maintains a steady supply of first grade fish by means of a reserve in storage; auxiliary to this, it makes most of its purchases from the principal fish dealer in the city.

Usually, the buyer can obtain all he needs at the morning market; if not, or in response to a special order from a commissary store, hotel, or government employe, who has a charge account with the department, he visits the market at the coming of the afternoon tide.

A hundred yards north of the fish market is a ramp, leading to the beach and known as the "Playa de Frutas." Square sterned, two-masted boats, considerably larger than the 20-foot "bug-eyes" of the fishermen, sail to the foot of the ramp at high tide, bringing from up and down the bay cargoes of coconuts, bananas, oranges, watermelons,

papayas, pineapples, plantains, and other indigenous fruits in season. The fruit purchased has increased in quantity, but not in quality, as slight effort is made at cultivation.

The department buys most of its bananas at Matachin and Monte Lirio, where they are brought to the railroad in cayucos plying the Chagres and Gatun rivers. It employs a riverman to visit the natives up the Chagres valley and stimulate the trade. About 500 bunches are bought each week, and distributed every Monday. Recently, the purchase of sugar cane for the West Indian laborers has been resumed. Earlier purchases were made from natives in the Gatun Lake area, but, following its depopulation, there was a lull in the market, until fresh patches were planted around the new homes. About a thousand stalks of cane are distributed each week, and eaten raw. A Colon dealer has applied for permission to erect a shack at Monte Lirio for handling coconuts; and there are others in the produce business on a small scale, but at present, the Commission is, by far, the largest single buyer of fruits, vegetables, and fish on the Isthmus.

Empire-Gamboa Wagon Road.

Work on the new Empire-Gamboa highway was begun in January, and a section of it, about a mile long, has been subgraded. In order to avoid changes in the route, which might be made necessary by the relocation of railroad tracks in the vicinity of Tower "R," it was decided to postpone the construction of that part of the road between Tower "R," and the old engine house until later. This section comprises a detour of about 1,900 feet, swinging to the north, so that the road for a short distance will traverse the bank of the Chagres River. The engine house was used as a starting point, and the operations are being extended south from there. The road will be 16 feet in width, and will conform in all essential respects to the specifications governing the construction of the Empire-Chorrera road, which is generally regarded as one of the best examples of roadbuilding undertaken, so far, in the Canal Zone. According to the route planned, the highway, from Tower "R" to its intersection with the Las Cascadas plantation road, will be five miles and 350 feet in length, as compared with an air line distance of about four miles. The saddles between hills, and other natural aids, are taken advantage of, and, although there will be a number of curves, none of them will be sharp. At only one place will the gradients exceed six per cent, the exception being a hill, where, for a distance of about 700 feet, the grade will be 7.5 per cent. The heaviest excavation work is at the Gamboa end, and the section of least excavation is on the Gamboa dump, which will be utilized for the distance of about a mile. The original survey provides for crossing the Panama railroad relocation at the Obispo junction, and for recrossing it again farther on, but a plan is being considered of widening the right-of-way of the railroad relocation, and building the highway parallel with it for a distance of about 1,800 feet, which will do away with one crossing, and reduce the total length to less than five miles. There are a number of culverts to be built, but only two of size, namely, over the Obispo Diversion, and the Rio Sardinilla. The road will be constructed wholly by prison labor, the force at present numbering about 125. The prisoners are

housed in a stockade, converted from a French building, formerly used as a mess hall, situated at the old Greek camp at Gamboa. This site is also the headquarters at the present time of the deputy warden and guards of the Zone penitentiary, who occupy the old silver quarters nearby. The cost of the road is estimated at \$17,952.98, exclusive of prison labor.

Structural Steel for Balboa Shops.

The United States Steel Products Company, which has the contract for the fabrication of all of the structural steel framework for the permanent shop buildings at Balboa, has advised the Canal Commission that delivery of the order will be expedited, and that it has made special arrangements for the water transportation. When the vessels carrying the material arrive at Cristobal, they will berth at a dock where the cargo can be unloaded with the most facility.

PERSONAL.

Col. John L. Phillips, and Lieut.-Col. Charles F. Mason, departed for the United States, on their annual leaves of absence, on the *Cristobal*, which sailed on Monday, March 10.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter, American National Red Cross, for the month of February, follows:

RECEIPTS.	
February 1. On hand.....	\$2,520.96
February 11. Membership dues.....	4.00
February 13. Membership dues.....	3.00
February 20. Sale of Christmas seals.....	155.17
February 28. Sale of Christmas seals.....	39.30
Total receipts.....	\$2,722.43
DISBURSEMENTS.	
February 15. Relief of wife of 'Zone prisoner.....	\$5.00
February 20. Relief of American family at Panama.....	10.00
February 24. Board of American family at Station Hotel, Panama.....	73.50
Total disbursements.....	\$88.50
February 28. Balance on hand.....	\$2,633.93
JOHN L. PHILLIPS, Treasurer.	
Approved: EDW. SCHILDHAUER, Vice-Chairman.	

Visit of House Committee on Naval Affairs.

The House Committee on Naval Affairs sailed for the Isthmus on the gunboat *Dolphin* and converted yacht *Maryflower*, on Thursday, March 6, and is scheduled to arrive at Colon on Friday, March 14. The party consists of eleven gentlemen, nine ladies, and a messenger. It will make a stay of about six days.

Immigration at Port of Ancon.

According to the figures of the quarantine service, the number of persons who landed at the port of Ancon from foreign ports during February was 451, consisting of 361 cabin, and 90 steerage passengers. The number of persons leaving for foreign ports in the same month was 575, consisting of 468 cabin, and 107 steerage passengers. The number of persons who embarked over those who landed was 124. The total number of persons who landed on the Isthmus during February over those who embarked was 1,536.

Missing Man.

Any one having information regarding the whereabouts of Mr. John A. Miller of Philadelphia, Pa., who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

SOCIAL LIFE OF THE ZONE.

Women's Clubs—Miscellaneous Notes.

At the meeting of the Cristobal Woman's Club on Wednesday afternoon, March 5, a program on woman suffrage was given for the first time in the history of the Zone clubs. Two papers, one for, and the other against the idea, were read, and a lively discussion followed. There was a good attendance.

At the meeting of the Gatun Sunshine Society, held on Monday, February 24, it was decided to disband on July 1, the end of the society's year, in view of the departure of so many of the members from the Isthmus.

Panama Auxiliary, No. 1, of the United Spanish War Veterans, held a meeting in the Empire lodge hall, on Sunday evening, February 9, in commemoration of the birthdays of Washington, Lincoln, and McKinley. An appropriate program was given by the members, at the close of which, refreshments were served.

A joint meeting of Panama Auxiliary, No. 1, and of Chagres Camp, No. 1, United Spanish War Veterans, was held at the Gorgona lodge hall, on Sunday evening, March 2. On this occasion, the camp, through its commander, presented the ladies of the auxiliary with a flag, ballot box, and gavel. The gifts were suitably acknowledged by the president of the auxiliary, Mrs. Ruth Purdue. A program was then given, during which, the president presented a gold badge to Mrs. Anna Hoffman, the past president, on behalf of the auxiliary. The auxiliary held a meeting in the Gatun lodge hall, on Sunday evening, March 9, to commemorate the Spanish-American War.

Church Notes.

The corner stone of the new Baptist church building in Colon will be laid on Good Friday, March 21, at 3.30 p. m. The new building will occupy a site on Canal Zone territory, directly opposite the concrete building destroyed by fire on March 23, 1911. It will be a frame structure 40 by 60 feet, in size, with a seating capacity of about 200. The old church was erected in 1909, at a cost of \$7,500, a part of this sum having been furnished by the Southern Baptist Mission Board, and the remainder, through subscriptions, by the local church. Following the loss of the building, the congregation purchased a tent, where services have been conducted regularly. The congregation now numbers 130.

The month's mission, conducted in the Roman Catholic churches of the Canal Zone, was closed on Sunday morning, March 2, with the celebration of mass at the church of the Immaculate Conception in Colon. The missioner, the Rev. Father Molyneux, C. M., of Germantown, Pa., sailed for the United States, on Thursday, March 6. The mission was begun with solemn evensong at St. Ferdinand's Church, Empire, and was continued with daily services until Sunday morning, February 16. On the evening of that day, Father Molyneux opened the mission at the church of St. Categan, Gorgona, which was closed with the celebration of mass on Saturday morning, February 22. A feature of the mission was a question box, which was opened to all. On Sunday evening, February 23, the missioner began a series of services at the church of the Immaculate Conception, Colon. During the week, more than 500 persons attended mass. Special services were held for

the children of the parish. This is the second mission that has been held in the churches of the Roman Catholic faith in the Canal Zone since the American occupation.

The monthly meeting of the Isthmian Ministers' Association was held at the seawall Methodist Episcopal Church, Panama, on Monday, March 3. The principal paper was read by the Rev. Carl H. Elliott, pastor of the Union Church, Cristobal; subject, "The religion of Henry James."

About 16 women of the Episcopal church attended the retreat at Christ Church, on Colon Beach, on Thursday, March 6.

On Monday evening, March 17, at 7.30 o'clock, the ceremony connected with the opening of the new hall, built by the Wesleyan Methodist Church, Panama, will take place. The President of Panama is expected to open the doors, and the British Minister, Sir. Claude Mallet, and Mr. Maurice H. Thatcher will take part in the program. The new hall is a concrete building, similar in type to the church adjoining. It will be used as a school-room, entertainment hall, and parsonage.

Canal Zone Postal Savings Bank Transactions.

A statement of Canal Zone postal savings bank transactions at Canal Zone postoffices for the month of February, follows:

NAME OF OFFICE.	Postal savings certificates issued.	Postal savings certificates paid.
Ancon.....	7,426.00	4,679.00
Balboa.....	8,643.00	4,084.00
Bas Obispo.....	1,145.00	955.00
Corozal.....	19,932.00	12,037.00
Cristobal.....	12,842.00	9,944.00
Culebra.....	10,881.00	5,682.00
Empire.....	8,120.00	3,509.00
Gatun.....	18,498.00	9,983.00
Gorgona.....	18,795.00	12,993.00
Las Cascadas.....	6,429.00	3,131.00
Matachin.....	1,165.00	444.00
Miraflores.....	6,892.00	3,493.00
Pariso.....	9,730.00	4,484.00

Cristobal, Sta. "B".....	1,693.00	656.00
Total.....	\$144,435.00	\$84,358.00
Deposits on hand February 1, 1913.....	\$517,773.00	
Amount deposited in February.....	144,435.00	
Amount withdrawn in February.....		\$84,358.00
Balance on hand March 1, 1913.....		577,850.00
	\$662,208.00	\$662,208.00

A benefit baseball game will be played at the Empire park on Sunday, March 16, beginning at 3.30 p. m., between the Culebra and Gorgona teams. The band of the United States Marine Corps will furnish music.

Married.

HOEHNE-TEEMAN—At Empire, on February 27, Miss Helen Elizabeth Teeman to Mr. Adelbert Hoehne, the Rev. A. A. Nellis officiating. Isthmian residence, Porto Bello.

MARSHALL-DAVIES—At Empire, on March 6, Miss Mary A. Davies to Mr. William J. Marshall, the Rev. A. A. Nellis officiating. Canal Zone residence, Culebra.

PARROTT-PERRY—At Ancon, on November 9, 1912, Miss Mamie J. Perry of Washington, D. C., to Mr. Joseph N. Parrott of Worcester, Mass., the Rev. H. A. Brown officiating. Canal Zone residence, Ancon.

Acting Assistant Chief Sanitary Officer.

ANCON, C. Z., March 8, 1913.

SPECIAL ORDER:

During the absence on leave of Col. John L. Phillips, Assistant Chief Sanitary Officer, Maj. Robert E. Noble is assigned as Acting Assistant Chief Sanitary Officer, and as such, in accordance with Paragraph 2, Minutes of the 119th meeting of the Isthmian Canal Commission, held in Washington, D. C., January 21, 1907, is authorized to approve for payment all vouchers, payrolls, and public bills, relating to this department. "By direction of the Chief Sanitary Officer."

W. C. GORGAS, Chief Sanitary Officer.

OFFICIAL CIRCULARS.

Reduced Rate Transportation.

CULEBRA, C. Z., March 7, 1913.

CIRCULAR No. 175-L:

Effective March 31, 1913, and, thereafter, until further notice, no reduced rate transportation to the Isthmus, will be granted to employees in advance of the assignment of nonhousekeeping or housekeeping quarters, except that the intermediate rate of forty-five dollars on Panama Railroad Steamship Line boats will be granted as heretofore, to relatives of employees visiting the Isthmus.

Any employee who brings his family to the Isthmus after March 31, 1913, in advance of a regular assignment to family quarters, will do so at his own risk, and no refund on regular tariff rates paid on the steamship line will be granted under such circumstances.

This action has become necessary on account of the large number of employees who have brought their families to the Isthmus without making provision for quarters, and the further fact that no assignments to family quarters will be made at Bas Obispo, Las Cascadas, Empire, or Culebra after March 31, 1913.

GEO. W. GOETHALS, Chairman.

Personal Injury Compensation.

CULEBRA, C. Z., March 8, 1913.

CIRCULAR No. 235-H.

The Executive Order effective March 1, 1913, issued by the President in accordance with the authority contained in Section 5 of the Panama Canal Act, provided a new method for the payment of compensation on account of injuries sustained by employees of the Isthmian Canal Commission, whether resulting in death or not. Approval was not given to the Sundry Civil Appropriation Act which contained the authority for making payments under this Order for injuries sustained on or subsequent to March 1, 1913, or for deaths resulting from such injuries, and until funds are provided by Congress no payments can be made on account of such injuries or deaths.

In order that no delay may occur in making payments after funds are provided, the same procedure in regard to the preparation of injury claims under the Act of May 30, 1908, as amended by the Act of March 4, 1911, and of recommendations for meritorious sick leave under the Act of February 24, 1909, will be followed in the case of all injuries sustained on or subsequent to March 1, 1913, whether resulting in death or not.

All claims for injury compensation, and all recommendations for meritorious sick leave will be held by the Examiner of Accounts until provision is made for payment.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Disposition of Official Records.

CULEBRA, C. Z., March 11, 1913.

CIRCULAR No. 479:

In accordance with Section 5 of the Sundry Civil Act, approved August 24, 1912, a committee has been appointed for the purpose of recommending the disposition of official records which have no permanent or historical value and will not be required for the permanent consolidated records.

This committee will pass on any papers which any department or division may recommend to this office as valueless. Form C. E. 402 has been provided for this purpose. A supply is forwarded herewith, and additional blanks may be obtained upon application to this office. This form should be submitted in duplicate, in order that the original bearing the approval of this office may be returned to the department or division concerned, after the committee has reviewed the papers recommended for destruction. Under no circumstances, however, should any records be destroyed without prior authority from this office.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Circular 159, Limiting Overtime, Cancelled.

CULEBRA, C. Z., March 7, 1913.

CIRCULAR No. 159-B:

Circular No. 159, limiting overtime to 50 hours for any employee in any one month, is hereby cancelled. Officials in charge of work will, however, be held responsible for working employees overtime in any case not an emergency. Overtime work, of course, increases the cost of any job upon which it is employed and will be considered a mark of inefficiency on the part of any official or employee authorizing it in other than absolutely necessary cases.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Chief Dispatcher.

PANAMA RAILROAD COMPANY,
COLON, R. P., March 5, 1913.

CIRCULAR No. 33:

All Concerned.—During the absence of Mr. L. B. Maggard on leave, effective March 6, 1913, Mr. C. W. Northrop is appointed acting chief dispatcher.

J. A. SMITH, General Superintendent.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the teams in the Isthmian Duckpin League on March 10, was, as follows:

Team.	Won.	Lost.	P. C.
Gorgona.....	3	0	1.000
Culebra.....	2	1	.666
Cristobal.....	2	1	.666
Empire.....	1	2	.333
Gatun.....	1	2	.333
Corozal.....	0	3	.000

The moving picture schedule for the coming week, March 17 to 22, is, as follows: Monday, Cristobal; Tuesday, Gorgona; Wednesday, Gatun; Thursday, Culebra; Friday, Empire; Saturday, Corozal; Friday, Porto Bello.

There will be an Isthmian wrestling contest held at the Gorgona clubhouse on April 12. Amateur rules will govern the contest. There will be two classes, the novice and the open.

COROZAL.

There will be a sacred concert by the members of the Edith Harris Scott concert party, at the clubhouse on Sunday night, March 16.

A temporary stage, formerly used at the Las Cascadas hall for minstrel shows, and other entertainments, will be moved to Corozal for use during the stay of the Tenth Infantry. It is planned to give a local entertainment during the stay of the soldiers.

Corozal lost three games to Gorgona on the local alleys, Saturday evening, March 8.

EMPIRE.

Culebra won two games out of three in the opening games of the Isthmian duckpin tournament. Scores:

Empire.	Culebra.
Pinney..... 82 82 92	Palmer..... 82 82 92
Potter..... 101 81 87	Steele..... 93 88 85
Gustavson..... 92 97 99	Brown..... 89 82 104
Gorham..... 85 90 92	Anderson..... 99 77 86
Henry..... 85 105 82	Kiernan..... 82 105 108

Totals.... 445 455 452 445 434 475

On Saturday, March 15, the Empire team will bowl Gatun, at Gatun.

The local tenpin bowling tournament, which will start during the week of March 10, has 25 men entered to date. They will be divided into teams of six men each. Medals will be given the winning team.

The March pool tournament will differ from the regular monthly tournament, in that each man will play each other man until a player loses three games, when he will be out of the tournament. Medals will be given for prizes. Twenty-nine men are registered in the gymnasium class with a regular attendance of 19. The class meets twice weekly. After the regular class work, the indoor baseball squad practices for the coming league. All are invited to join this class.

GORGONA.

Sunday evening, March 16, there will be an illustrated lecture on the life of Moses. Special music will be furnished.

The "Country School" entertainment will be given on Friday evening, March 14. It will open at 7.45.

The indoor baseball game between Gorgona and Camp Elliott resulted in a score of 9 to 11 in favor of Gorgona.

The following is the high scores in bowling for the week:

Dent, 102, 102, 105, 104, 113; Keppler, 101; Davis, 118; King, 109, 103; Seeb, 106, 101; Gebhardt, 103, 105; Lowe, 100; Ruchte, 112.

Culebra will bowl at Gorgona on Saturday evening, March 15. The public is invited.

Twenty new records were bought on Friday, all late music.

Twenty-two new books were added to the library last week.

CRISTOBAL.

The Edith Harris Scott Concert Company will play a return engagement at the Cristobal clubhouse on Friday night, March 14. Reserved seats will be on sale at the desk on March 12. Members free; nonmembers, 50 cents.

The gymnasium class, under the direction of Physical Director Schulte, is increasing in size. All members are urged to take advantage of this feature of clubhouse work.

The Isthmian duckpin tournament started with the Cristobal duckpin team, taking two out of three games from the Gatun team on the home alleys, on Saturday night, March 8. Team scores:

Cristobal.....	488 474 482
Gatun.....	436 491 412

PORTO BELLO.

Parties from Cristobal, Gatun, Culebra, and Empire spent Saturday and Sunday, February 22 and 23, at

Porto Bello, in boating, swimming, and exploring the rivers and forts. An informal dance was held Saturday evening, and on Sunday, a train took the visitors for a swim at Powder Beach. On Sunday evening, many attended the song service.

Mr. Porter F. Woolworth, physical director at the Gatun clubhouse, piloted a party of 25 Gatun boys to Porto Bello, on Saturday, March 1, to see the old ruins, and enjoy a swim in the sea.

A reception will be tendered Mr. and Mrs. Ad. Hoehne on Wednesday night, March 12. After luncheon, to be served by the Porto Bello ladies, they will be presented with a carving set.

Thirty-five of the new Y. M. C. A. hymn books for the Sunday night song service have been received.

After the entertainment given by the Edith Harris Scott Concert Company, on Saturday evening, March 8, a reception was tendered the members of the company, during which refreshments were served. Mrs. Scott was the first entertainer from the United States to give a concert at the Porto Bello clubhouse, when the building was opened three years ago.

On Sunday evening, March 9, the regular song service was led by Mr. McAfee of the Edith Harris Scott Concert Company. Miss Ruth Thoburn gave a violin solo, "Scotch lullaby," by Von Kunitz; Miss Lucille Miller sang two solos "I think when I read the sweet story of old," and "The rosary"; and Mrs. Scott, the "The last hymn." Mr. Case of Culebra, sang "The perfect day." Mrs. S. G. Allen was the piano accompanist.

Misdirected Letters.

ANCON, C. Z., March 12, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be secured upon request of the addressees:

Abell, Albert	Lucas, Johan
Barker, S. N.	Matheson, Mrs. A. J.
Balnel, Emmanuel, B. 403	Miner, Mrs. Arthur
Burrows, Samuel	Mittinright, Joseph R.
Castro, Domingo	Moore, Miss Kathryn
Cunningham, S. A.	Nelson, Hans P.
Earl, John	Paris, B.
Emmons, Nye	Queeley, John T.
Fitzpatrick, W.	Reeve, A. B.
Goldberg, F.	Reisener, Waldo
Graff, Chas. H.	Rose, Charles
Grossberg, Arthur	Russell, John D.
Hall, Elliott L.	Rupp, Miss Meta N.
Hanlon, M. T.	Sapley, H. A.
Hans, J. Vander	Skinner, A. H.
Haussman, Mrs. Chas.	Slater, J. H.
Heissler, L. J.	Stafford, Mrs. Bertha
Hines, Mrs. W. J. (W. P.)	Stevens, Miss Helen C.
Hoke, Jacob	Thorp, Mrs. Dean
Holemlin, Miss Mamie	Walker, Richard H.
Jackson, W. T.	Williams, Mike
Katz, Mrs. Backy	

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending March 8:

Pastores, March 2, from New York, with 51 reels electric cable, 30 cases electrical machinery, for First Division; 217 bundles iron pipe, for Mechanical Division; 60 cases machinery, emergency dams; 400 coils steel wire, 48 kegs nails, 10 crates stove pipe, 44 crates fibre brushes, for stock.

Heredia, March 3, from New Orleans, with 5,225 pieces yellow pine lumber, for Mechanical Division; 150 cases fire brick, 1,863 bales hay; 162 pieces piling, 1,916 cross-ties, 1,316 pieces yellow pine lumber, for stock.

Prins August Wilhelm, March 3, from New York, with 66 cases machinery, for emergency dams; 20 kegs rivets, 210 kegs bolts, 6 cases paper, 50 cases metal paint, 49 pieces steel beams, for stock.

Aztec, March 3, from San Francisco, with 3 pieces spud timbers, for Sixth Division.

Eastwood, March 4, from New York, with 111 cases blasting caps, for stock; 120,980 bags cement, for Atlantic and Fifth Divisions.

Nicosian, March 4, from Liverpool, with 210 barrels carbonic acid, for stock; 7 pieces machinery, for Sixth Division.

Metapan, March 6, from New Orleans, with 36 pieces steel beams, 100 coils rope, 36 crates water closets, 1,115 pieces steel bars, 13 cases tape fuse, 8 cases hardware, for stock; 76 pieces structural steel, 20 cases castings, for First Division.

Atenas, March 6, from New Orleans, with 6,000 pieces lumber, 566 bundles castings, for Mechanical Division; 7,825 pieces lumber, 332 pieces cross-ties, 96 pieces piling, 300 cases fire brick, 200 drums kerosene, 500 cases kerosene, 440 cases grease, 415 drums engine oils, for stock.

Advance, March 7, from New York, with 142 barrels sand, 31 cases electric globes, 37 cases brake shoes, 18 cases fire brick, 10 reels wire, 196 packages car couplers, for Mechanical Division; 8 barrels batteries, 46 cases

signal material, 10 cases drinking cups, for Panama Railroad Company; 19 cases castings, for First Division; 41 rolls wire fencing, 50 cases lanterns, 350 packages garbage cans, 50 cases lye, 50 cases varnish, 2,501 bundles track spikes, 1,250 kegs tie plates, 327 pigs tin, 140 pieces oak lumber, 200 kegs paint, 334 bundles iron pipe, 94 pieces steel plates, 30 rolls cotton duck, for stock; and a miscellaneous cargo, the whole consisting of 6,320 packages, weighing 650 tons.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Changes in Cold Storage Price List.

The following changes have been made in the list of cold storage articles, as of March 11:

Eggs, reduced from 32 to 29 cents a dozen, 15 cents by the half-dozen.

Butter, creamery special, advanced from 40 to 42 cents a pound.

Cucumbers advanced from 14 to 18 cents a pound.

Rainfall from March 1 to 8, 1913, Inclusive.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 4.25 train at Panama.

JOINT LAND COMMISSION.

Notice to Persons Having Title or Claim to Canal Zone Lands.

Notice is hereby given to all land owners and land holders and to all persons having any title, claim, or interest in any land, or land under water, situated in any part of the Canal Zone, except in the region known as Las Sabanas, that it is the intention of the Government of the United States to acquire for its own use all land and land under water located within the area named.

By Act of Congress, approved August 24, 1912, it is provided:

"The President is authorized to declare by Executive Order that all land and land under water within the limits of the Canal Zone is necessary for the construction, maintenance, operation, sanitation, or protection of the Panama Canal, and to extinguish, by agreement, when advisable, all claims and titles of adverse claimants and occupants. Upon failure to secure by agreement title to any such parcel of land or land under water the adverse claim or occupancy shall be disposed of and title thereto secured in the United States and compensation therefor fixed and paid in the manner provided in the aforesaid Treaty with the Republic of Panama, or such modification of such Treaty as may hereafter be made."

By Executive Order, dated December 5, 1912, the President of the United States declared:

"That all land and land under water within the limits of the Canal Zone are necessary for the construction, maintenance, operation, protection, and sanitation of the Panama Canal," and in the same Order directed the Chairman of the Isthmian Canal Commission: "To take possession on behalf of the United States, of all such land and land under water."

By further Executive Order of February 18, 1913, the land situated within the area known as Las Sabanas was exempted from the operation of the Order of December 5, 1912. This area is more particularly described as follows:

"The said area being bounded on the south by the present limits of the city of Panama, on the southeast by the Pacific Ocean, on the northeast by the boundary line of the Canal Zone from monument 99 for a distance of four thousand seven hundred and forty-four and five-tenths (4,744-5/10) meters to monument marked "F," on the northwest by a line extending from said monument F south 63 degrees 32 minutes west for a distance of two thousand and eight and six-tenths (2,008-6/10) meters to the intersection of said line with the Curundú River, and on the west by the Curundú River from said point of intersection to the point where said river crosses the present boundary line of the city of Panama."

For the purpose of carrying out the Order of December 5, 1912, and, insofar as claims within the Canal Zone are not extinguished by agreement entered into directly by the said claimants with the Isthmian Canal Commission, recourse will be had to the procedure provided by Article 6 and 15 of the Treaty concluded November 18, 1903, between the United States of America and the Republic of Panama, which read, as follows:

"Article 6. The grants herein contained shall in no manner invalidate the titles or rights of private land holders or owners of private property in the said Zone or in or to any of the lands or waters granted to the United States by the provisions of any Article of this Treaty, nor shall they interfere with the rights of way over the public roads passing through the said Zone or over any of the said lands or waters unless said rights of way or private rights shall conflict with rights, herein granted to the United States, in which case the rights of the United States shall be superior. All damages caused to the owners of private lands or private property of any kind by reason of the grants contained in this Treaty, or by reason of the operations of the United States, its agents or employees, or by reason of the construction, maintenance, operation, sanitation and protection of the said Canal, or of the works of sanitation and protection herein provided for, shall be appraised and settled by a joint commission appointed by the Governments of the United States and the Republic of Panama, whose decisions as to such damages shall be final and whose awards as to such damages shall be paid solely by the United States. No part of the work on said Canal or the Panama railroad or on any auxiliary works relating thereto and authorized by the terms of this Treaty, shall be prevented, delayed or impeded by or pending such proceedings to ascertain such damages. The appraisal of said private lands and private property and the assessment of damages to them shall be based upon their value before the date of this convention.

"Article 15. The joint commission referred to in Article 6 shall be established, as follows:

The President of the United States shall nominate two persons and the President of the Republic of Panama shall nominate two persons and they shall pro-

ceed to a decision, but in case of disagreement of the commission (by reason of their being equally divided in conclusion) an umpire shall be appointed by the two Governments, who shall render the decision. In the event of the death, absence, or incapacity of a commissioner or umpire, or of his omitting, declining, or ceasing to act, his place shall be filled by the appointment of another person in the manner above indicated. All decisions by a majority of the commission or by the umpire shall be final."

All persons, therefore, having title or claim to, or interest in lands, or lands under water, situated in any part of the Canal Zone, except in the exempted area, or who have suffered damages of any kind by reason of the grants contained in the Treaty, or by reason of the operations of the United States, its agents or employees, or by reason of the construction, maintenance, operation, sanitation, or protection of the said Canal, shall file with the joint land commission, a statement of the entire extent of their property rights and interests. Such statement should include the name, residence, and postoffice address of the claimant, the amount of the claim, the location and extent of the property indicated, wherever practicable, by maps or drawings, the uses to which such property is put and a description of the improvements which have been made thereon, and should be accompanied by a statement of the title and rights of the claimant thereto, supported by all existing documentary proofs of title.

Statements referring to claims of ownership to land or land under water, together with accompanying documents, should be filed in FOUR copies, but of the legal documents submitted as proofs, one copy only need be attested. All other claims presented to the commission should be filed in at least two copies. All claims shall be submitted on a form supplied by the commission. Such statements of claim and all other forms required by the commission can be obtained on and after March 14, 1913, from the secretary of the commission, at the several police stations in the Canal Zone, or at the office of the secretary of the municipal council of the city of Panama.

The statements above described, to be presented by all claimants to private property, should be filed with the secretary of the joint land commission, National Palace, Panama, with as little delay as possible. Claimants to land located in the area between Gatun and Pedro Miguel should file their statements not later than March 31, 1913, and claimants to land located in the remainder of the Canal Zone should file their statements not later than April 15, 1913.

Failure on the part of claimants to file the required statement will not preclude the joint land commission from acting upon all cases properly coming before it, without the cooperation of the persons most directly interested.

After an examination of the papers filed with the joint land commission, an opportunity will be given to all claimants to present further evidence in public hearings. The joint land commission reserves the right to call upon claimants for further information and for documents supplementary to those filed with the original statement.

The commission will begin hearings upon claims which are ready for adjudication, relating to any lands, in the district between Gamboa and Gatun, excepting town sites, on Monday, March 17, 1913, in the Assembly Hall, National Palace, Panama. Due notice of further hearings will be given from time to time.

Proceedings before the commission may be instituted by the claimant in person, or through his or her attorney in fact or agent. If the claimant is represented by an attorney in fact or agent, a written declaration designating the person to represent the claimant must be filed with the secretary of the joint land commission. Claimants presenting such a declaration in person should sign the same in the presence of the secretary. In case such declarations are not presented in person, the signature of the claimant should be attested in the Republic of Panama by a municipal official, or in the Canal Zone by the agent in charge of any police station. Forms for the designation of attorneys or agents can be obtained from the secretary of the commission, and within the Canal Zone, at the several police stations, and at the office of the secretary of the municipal council of the city of Panama.

All documents required by the commission, as well as proceedings before the commission, may be in either Spanish or English.

By order of the joint land commission.

J. C. LUTWIELER, Secretary.
Panama, R. P., March 8, 1913.

FOUND—A sum of money on the steps of the Gatun clubhouse, on Sunday, February 23. Owner can obtain same by applying to Mr. P. T. Woolworth, assistant secretary at Gatun clubhouse, and describing property.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prinz Sigismund* and the *Prinz Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m., ships for New York via Kingston, on Tuesdays, at 2 p. m. and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The Panamanian Steamship Company's steamer Panama will sail from Panama for Aguadulce and Pedregal (Boquete) on March 19.

The following ships arrived at, or departed from, the port of Balboa during the week ending March 8:

Arrivals—March 2, *Asteo*, from San Francisco; March 3, *Guatemala*, from Callao; March 4, *Quito*, from Guayaquil; March 4, *Arica*, from Buenaventura; March 4, *Peru*, from Guayaquil; March 7, *Morales* (Mexican warship), from Mexico.

Departures—March 3, *San Juan*, to San Francisco; March 3, *Palena*, to Valparaiso; March 3, *Urubamba*, to Valparaiso; March 8, *Lewis Luckenbach*, to San Francisco.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, MARCH 19, 1913.

No. 30.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Advance in Lock Gate Construction.

With the completion of the skeleton of the lower gate in the east chamber of the middle lock at Gatun on March 13, all the gates there were brought to their full height. The remainder of the work on them will be sheathing, riveting, and finishing. Seven of the 20 gates in Gatun Locks are practically completed.

Work will be pushed on the lower guard gates and the gates in the west chambers, in order to have all the gates on one side of the locks completed as soon as possible. This will make possible the passage of ships before all gates are completed, as the other side of the locks can be kept dry. The same plan is being followed at Pedro Miguel and Miraflores locks, and it is expected all gates in the west chambers will be completed by October 1, 1913.

New Movement in Break on East Bank at Culebra.

On the night of March 12-13, the break on the east bank of the Canal, opposite Culebra, which first moved into the Canal on the night of February 5, again made another rapid movement downward and toward the Canal. The bottom of the Canal, near the center, was heaved up for a distance of about 1,000 feet, and to a maximum vertical height of about 30 feet, destroying five tracks in the bottom of the Canal, overturning steamshovel No. 220, and partly tipping over steamshovel No. 205. Only one track remained in commission after the break had ceased moving, but a second one has since been connected, so that there are now two tracks in use on the west side of the Canal.

Two steamshovels were set to work at once removing that part of the slide which had heaved up at the bottom, and satisfactory communication was again restored on Monday, March 17.

Agricultural and Building Lot Leases.

In furtherance of the Executive Order of December 5, 1912, in which the President declared "That all lands and lands under water

within the limits of the Canal Zone are necessary for the construction, maintenance, operation, protection, and sanitation of the Panama Canal," and directed the Chairman to take possession of such land and extinguish titles, the Department of Law will proceed to cancel all unexpired agricultural and building lot leases in the Canal Zone. No rent thereon will be collected after March 31, 1913.

Formal Opening of Hotel Washington.

The Hotel Washington, in Colon, will be formally opened to the traveling public on Sunday, March 23, on which date all *a la carte* service in the present Washington House will be discontinued.

Work on Permanent Administration Building.

Bids were opened in Washington on March 6, under circular No. 760, for the fabrication and erection of the structural steel framework required in the construction of the permanent Administration Building, which will be situated on a knoll, west of Ancon Hill, overlooking the new Balboa townsite. Award for the material, and its erection, has been made to the United States Steel Products Company, who have agreed to begin work in 105 days, and to complete the contract in 180 days. About 1,250 tons of steel will be used in the framework of the building.

The work of preparing the site and placing the foundations for the structure has already been begun, and will be hastened as much as possible, in order to have everything ready for the steel contractors by July 1. It will be in charge of the Fifth Division of the Chief Engineer's office, and the Ancon quarry force will be used in the operations to some extent.

Sosa Rock for Paving Gatun Dam.

The borrow pit near Quebrancha Siding, two miles north of Monte Lirio and five and a half miles south of Gatun, was closed down on March 12, after two months' operations. During this time, about 14,000 cubic yards of basaltic rock were excavated and placed on Gatun Dam, for paving the lake side ten feet above and below the normal lake level. About 60,000 cubic yards yet required will be taken from the Balboa terminal excavation at Sosa Hills, which rock would otherwise have been wasted. The rock used for this paving is a hard, blue basalt, specimens of which have been examined by the Commission geologist, and found to be satisfactory for the purpose.

Tug "Bolivar" Out of Service.

The Panama railroad tug *Bolivar*, in use at the Balboa port terminal for many years, has been retired from service. It was built in 1885 by the firm of Neafie and Levy of Philadelphia, now out of existence, and came around South America under its own steam. It has a length of 127 feet, beam of 23 feet, depth of 9.5 feet, and cost \$52,000. It has been in constant use since it was built. In

1901, it was thoroughly overhauled, and part of its hull, frames, and deckhouse were rebuilt. At the same time, a new boiler was installed, and its engines renovated. In 1906, another new boiler was installed. The tug is fitted with an upper passenger deck, with a sun deck over it, and has been used for the transfer of passengers, in towing, etc. It will be out of service, pending its final disposition.

Dynamite for Canal Work.

Bids were opened in Washington on February 26, under circular 761, for an additional supply of dynamite to meet the requirements of the Canal work up to July 1, 1913. The Keystone National Powder Company was the lowest bidder, and was awarded the contract for supplying 550,000 pounds of 45 per cent dynamite, 1½ by 8-inch cartridges; 300,000 pounds of 60 per cent dynamite, 1½ by 8-inch cartridges, and 125,000 pounds of 60 per cent dynamite, 2 by 8-inch cartridges, based upon a price of \$11.25 per 100 pounds on the 45 per cent dynamite, and \$12.45 per 100 pounds on the 60 per cent dynamite. The present contract with the same firm is on the basis of \$11.30 per 100 pounds for the 45 per cent, and \$12.50 per 100 pounds on the 60 per cent dynamite.

Reorganization at Balboa Wharves.

Since January 1, when the Quartermaster's Department took over the cargo-handling operations at the Balboa agency of the Panama Railroad Company, a number of changes have been instituted for facilitating the work. Effective January 16, a regular day and night force was established, each with day and night foremen and checkers. Regular gangs have been organized, numbered, and assigned to these several foremen. Foremen are required to keep their own time books, and to distribute their labor for costkeeping purposes. One extragang has been formed, and placed under the control of the chief stevedore. A 9-hour working day has superseded the former 10-hour working day. The working day now begins at 7, instead of 6 a. m. The night force formerly stopped work at 5 a. m., and, as only an hour intervened before the resumption of work by the day force, it was difficult for the yardmaster to make the switch. The results, so far, show that the men are doing about as much work under the present schedule, as during the 10-hour day. Ships were formerly worked a part of the night, or from 8 to 11 p. m., or when they worked all night, the hours were from 8 p. m. to 12 midnight, and from 1 to 5 a. m. The custom of working the men from 8 to 11 p. m. has been abolished, and the unloading of vessels is carried on all night, or no night work is done. The rate of pay for the day men is 11 cents gold per hour, as compared with 12 cents paid by the contractors. The office hours of the Balboa agency, formerly 8 to 11 a. m.,

and from 1 to 5 p. m., have been changed to 7 to 11 a. m., and from 1 to 5 p. m., in keeping with the hours in force at the other offices in Balboa. So far, there has been plenty of labor available, and when any temporary shortage develops, the vacancies will be filled from the district quartermaster's utility gangs at Ancon and Balboa stores. An improvement has been made with reference to the quantity of short-shipped cargo left on the docks, some of which, previous to its shipment to destination had been on the docks for from 30 days to eight months. Practically all of this old cargo had been cleared up on March 1.

Cost of operation has been materially re-

duced. The cost per ton for handling cargo at Balboa docks for the calendar year 1912, was \$0.3647; for the month of January, \$0.3244; for the month of February \$0.2740.

A number of changes have been made in the office personnel. Mr. Harry Wilson, chief clerk, and Mr. T. C. Clark, wharf superintendent, have resigned. Mr. C. H. Mann has been appointed receiving and forwarding agent.

Visiting Congressmen.

Fourteen members of the House of Representatives arrived on the Isthmus, on the *Panama*, on March 12, on a tour of inspection of the Canal. The party was composed

of the following: Charles W. Bell, and son; Julius Kahn, Mrs. Kahn and two sons; William Kent, Mrs. Kent and three sons, California; James A. Frear, and Mrs. Frear; I. L. Lenroot, Mrs. Lenroot and son; John M. Nelson, and Mrs. Nelson, Wisconsin; Fred A. Britton, and Mrs. Britton, Illinois; L. C. Dyer, Mrs. Dyer, Miss Martha Dyer, and Miss Catherine Dyer, Missouri; Robert H. Gittins, Mrs. Gittins, and Miss Clara M. Gittins, New York; Edwin S. Underhill, Mrs. Underhill and son, New York; Charles E. Patton, and Mrs. Patton, Pennsylvania; Charles R. Davis, and Mrs. Davis; and Sydney Anderson, Minnesota; P. D. Norton, North Dakota.

In addition to the above, there arrived on the *Ancon*, on March 16, Representative George F. O'Shaunessy, and Mrs. O'Shaunessy of Rhode Island; and Carl Hayden and Mrs. Hayden of Arizona; and the *Alliance*, on March 19, Senator Porter J. McCumber of North Dakota, accompanied by his secretary; Representative William E. Cox, and Mrs. Cox of Indiana; David J. Lewis, and Mrs. Lewis of Maryland; D. J. O'Leary, and Mrs. O'Leary of New York, S. D. Fess, and son.

Examinations by Board of Local Inspectors.

Examinations for pilots, masters, mates, engineers, chauffeurs, and navigators of motor boats, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, March 26, 1913, beginning promptly at 8 a. m. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to operate same.

Knights of Columbus Meeting.

All members of the Knights of Columbus that are interested in the forming of the new council at Cristobal are requested to attend the meeting on Sunday, March 30, in the lodge hall, building No. 1, Cristobal. Nominations of officers will take place at this meeting.

Sailing of the "Ancon."

The sailing date of the steamship *Ancon* has been set for Wednesday, March 26, at 3 p. m., from pier 11, Cristobal.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 98 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on March 15, the amount in place being 4,382,661 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 97 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 15, being 1,986,905 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 221,314 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending March 15, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone.	Total.	SPILLWAY.

*Includes 1,364 cubic yards laid by the Miraflores Locks construction plant—2 cubic-yard mixers.

EASTER IN ZONE CHURCHES.

Special Services Will be Held by Many of the Churches and Sunday Schools.

Easter Sunday, March 23, will be observed by special services in the churches of the Canal Zone, and in some instances, musical programs have been arranged. The Sunday schools will contribute their share to the celebration of the day, and throughout the following week, the services conducted by the Commission chaplains in the various villages will partake of the Easter spirit.

EPISCOPAL CHURCHES — GOOD FRIDAY AND EASTER.

At Christ Church, Colon, there will be the usual Good Friday service in the morning at 10.30 o'clock, followed by the three hour service, from 12 to 3 p. m. In the evening, the story of the Cross will be shown in a series of stereopticon views. On Easter Sunday, there will be celebrations of the Holy Communion at 5.30 and 7.30 a. m.; divine service at 10.30 a. m.; choral vespers, with sermon, at 4 p. m., and evensong at 7.30 p. m.

At St. Mary's, Empire, there will be service on Good Friday at 10.45 a. m. On Easter Sunday, there will be service, with special music, at 10.45 a. m.

On Good Friday, there will be service at St. Luke's Hospital Chapel, Ancon, at 10 a. m. On Easter Sunday, there will be a celebration of the Holy Communion at 7 a. m., and second celebration, with sermon, by the Rt. Rev. Albion W. Knight, the Bishop of Cuba.

The various Episcopal churches for West Indians throughout the Canal Zone will celebrate Good Friday and Easter Day with appropriate services, and programs of music will be given.

ROMAN CATHOLIC CHURCHES.

In the Roman Catholic churches at Culebra, Empire, Gorgona, and Gatun, there will be services on Good Friday, Easter Eve, and Easter Day, beginning with the celebration of mass in the morning and ending with benediction in the evening.

A Commission brake will run from Culebra to Empire on Easter morning, leaving Culebra at 10.30 o'clock, and returning after the service, for the convenience of those wishing to attend the services at St. Mary's Church.

OTHER CHURCHES AND SUNDAY SCHOOLS.

Some of the congregations of the Union churches, with their Sunday schools, will celebrate according to the following program:

The Union Church Sunday school, Cristobal, will hold appropriate exercises at 10 a. m. The Easter service, with a sermon by Chaplain C. H. Elliott on "The Risen Christ," will be at 7.45 p. m. Special music will be given by a quartet composed of Mrs. Lynn, Mrs. Butters, and Messrs. Butters and Bennyhoff, with Mrs. Harry Clark, accompanist.

At Gatun, the morning service will be held in the Commission chapel at 10.30 o'clock, with special music and a sermon by Chaplain Charles O. Purdy. In the evening, a concert will be given under the auspices of the ladies' auxiliary to the Christian League. The program will be, as follows: Voluntary, piano, by Mrs. Gilbert; hymn, "Now the day is over," Mrs. Palm and chorus; hymn, "Low in the grave He lay," chorus; trio, "My God and Father," women's voices; vocal solo, Mrs. Purdy, assisted by the chorus; trio,

"Father take my hand," Mrs. McFarland and choir; solo, Mr. Ourand; ten minute address by the chaplain; offertory, piano solo, Mrs. Gilbert; quartet, "Draw me to Thee," Mrs. McFarland, Mrs. Purdy, Messrs. Arthur and Ourand; chorus, "Song of triumph," piano solo, Mrs. Gilbert; vocal solo, Mrs. Logan; anthem, "Awakened Lord," chorus. The league chorus is composed of the following ladies and gentlemen: Soprano, Mrs. McFarland, Mrs. Logan, Mrs. Smith, Mrs. Duckworth, Mrs. Palm; altos, Mrs. Purdy, and Mrs. Cooper; tenors, Mr. Mitchell and Mr. Arthur; basses, Mr. Gilbert, Mr. Ourand, C. Dewy, and William Dewy.

At Gorgona, a simple program will be carried out by the children of the Sunday school, at the regular morning session.

The Empire Sunday school will present a double commemoration program in the morning at 9.30 o'clock, the day being the one-hundredth anniversary of the birth of the missionary explorer of Africa, David Livingstone, as well as Easter Day. A program has been arranged for churches throughout the Christian world, and this will be used in the Empire school, with some slight variations. An orchestra of seven pieces will play. A feature of the program will be the unveiling by a member of the school of a portrait of Livingston, which will have a permanent place in the chapel. The Easter service of the Christian League will be held immediately following the school exercises. Chaplain Nellis will preach. There will be special music, assisted by the orchestra.

An Easter service, with sermon, will be held at Culebra in the evening at 7.30 o'clock.

At the Methodist church in Panama, there will be a short exercise by the children of the Sunday school, consisting of processions, songs, and Easter carols, which will take the place of the regular lesson period. The Easter service will follow.

On Good Friday, there will be a baptism at the mission Baptist Church in Culebra, at 6.30 a. m.

Easter services will be held on Sunday in all the missions of the Baptist church in the Canal Zone.

Panama Baptists to Have New Building.

The Baptist Church in the district of Guachapali, Panama, constructed in 1908, is to be replaced by a new building, the present one being inadequate for the growing needs of the congregation. It is proposed to erect a \$3,000 building containing an auditorium and baptistery on the first floor, with a Sunday school room above. The present congregation numbers 400, and the Sunday school has an enrollment of 200. The work of this church was established five years ago and has steadily grown since that time.

Bishop Knight's Visitations.

The following itinerary has been arranged for the visitations of Bishop Albion W. Knight, who is expected to arrive at Colon on the steamship *Evangeline* on Saturday, March 22:

Easter Sunday, March 23—Celebration of the Holy Communion in the chapel at Culebra at 7 a. m.; at St. Luke's Hospital chapel, Ancon, at 10 a. m.; at St. Paul's, Panama, at 7.30 p. m.; Monday evening, March 24, at St. Augustine's, Paraiso; Tuesday evening, March 25, at St. Michael's, Pedro Miguel; Wednesday evening, March 26, at St. Phil-

ip's, Las Cascadas; Thursday evening, March 27, at St. James, Empire; Friday evening, March 28, at St. Mary's, Empire; Saturday, March 29, conference of clergy and catechists at St. Mary's Church, Empire, at 8 a. m.; Sunday morning, March 30, at St. Mark's, Culebra; at St. Stephen's, New Gatun, at 3.30 p. m.; at Christ Church, Colon Beach, at 7.30 p. m.; Monday, March 31, at St. Andrew's, Gorgona, at 7.30 p. m.

Bishop Knight will leave the Isthmus on Tuesday, April 1.

School Notes.

The Canal Zone schools are closed this week for the Easter holidays, and will reopen on Monday, March 31.

At the monthly meeting of the white teachers at Ancon schoolhouse on March 8, an address on the geology of the Isthmus was made by Mr. D. F. McDonald, Commission geologist at Culebra.

During the past two months the Division of Schools has received an average of five applications daily for positions as teachers in the white schools. About 1,500 such applications are now on file; as many as 500 of these are from teachers who are graduates of normal schools or universities, who have had at least the required two years of experience, and all highly recommended. This condition affords unusual opportunities of selection, and it is the intention of the superintendent of schools to appoint only those who have the highest qualifications.

PERSONAL.

The nomination of Col. Carroll A. Devol to be brigadier-general in the United States Army was confirmed by the Senate on March 3.

Gen. S. M. B. Young was a passenger on the *Panama*, which arrived at Cristobal on March 12. Lieut.-Col. William V. Judson, formerly engineer-commissioner of the District of Columbia, accompanied by Mrs. Judson, arrived on the *Ancon*, on March 16.

Civil Service Examinations.

Examinations will be held, probably on April 27, for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Applications will not be received after April 5; this date may be changed if necessary. Persons interested should request a copy of Form 1424, which contains information in regard to the abovenamed examinations.

Competitors in the abovenamed examinations must bring their own typewriting machines to the examination room.

The examinations will be held in the Commission clubhouse at Empire, but the place and date should be omitted in applications.

A card of admission will be sent just before the examination to those found eligible to be admitted.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., March 17, 1913.

The following officers were chosen at the annual election of the Canal Zone Medical Society, held on March 15: President, Dr. William M. James, Ancon; vice-president, Dr. Lewis B. Bates, Ancon; secretary and treasurer, Dr. D. F. Reeder, Ancon.

ANCON AND BALBOA ROADS.

Maintenance and Construction of Highways Between Terminal Towns.

The Zone Line road between Ancon post-office and the Panama-Balboa road is being resurfaced, and the Panama-Balboa road has been resurfaced from its junction with the Zone Line road to the iron bridge spanning an estuary north of the Balboa hotel. The work of resurfacing involves ploughing the road with a heavy metal plough drawn by a road roller and laying on this, as a grade base, a new macadam surface. No. 2 rock is spread in a layer four inches thick, rolled slightly and treated with oil, one gallon to the square yard; screenings are spread on this, sprinkled with crude oil, and rolled; and a top of dry screenings is thoroughly rolled, to absorb the oil and form a spongy, elastic surface. When properly laid such road is smooth and firm, resembling asphalt, and almost dustless.

The Zone Line road does not follow the boundary closely between Ancon postoffice and its junction, at the foot of the hill on which the Hotel Tivoli stands, with the road skirting De Lesseps Plaza. Through part of this distance, from the animal hospital at the old corral to the foot of the hill, it is being relocated slightly to the east, and exactly along the boundary line. In its new location the road will border the lot on which President Porras of Panama is building his residence, and it is largely as a courtesy to him that the line is being changed and the grade reduced from approximately $7\frac{1}{2}$ to six per cent. The new road crosses the site of the old animal hospital, which has been removed.

Beyond the bridge north of the Balboa hotel, the road, as built at present, skirts Sosa Hills on the east and north on its way to the wharves at Balboa. In so doing it passes into the midst of the projected terminal buildings and a number of railway tracks. It is proposed to construct a more direct route from the bridge around the other side of the hills, crossing the dumps, and passing by the Commission electric plant in a route approximately parallel to that of the street railway line to Balboa. This project is still under advisement; and, in any event, the present road would be maintained for its usefulness about the terminals.

Connecting with this road, a road is projected to El Diablo, across fill to be made in the rear of the new piers. Plans for this have not been determined, other than that it would connect near El Diablo with the road which is being constructed from that point to Ancon, parallel to the main line of the Panama railroad into Panama. In this work the grade cuts and embankments have been completed from El Diablo crossing to the point at which the embankment of the old Panama railroad joins that of the relocated line. Over this length it rests on the old embankment; the rest of the way to the point at which it will cross the railroad, a hundred yards south of Balboa Junction, it will be built partly on natural earth and partly on fill. One 4-by-4 foot concrete culvert has been constructed, and a 20-foot bridge will be built across the Curundú River, near Bridge 65 of the Panama railroad. The grade embankment will be completed over practically the entire length before the macadamizing is begun. The labor force on this highway consists of prisoners from Ancon judicial district; 40 are engaged in actual construction, and four in work about the mess

and barracks at Corozal. It is anticipated that this road will be opened for use within four months.

Fires.

Sparks from a locomotive set fire to a lumber pile north of the Balboa wharves on Sunday, March 16, about 2.20 p. m.. The heat burst a 4-inch oil pipe belonging to the Panama Railroad Company, and the burning

oil flowed along a drain igniting a number of box cars in places. The damage to lumber etc., amounted to about \$200.

A Panama railroad box car standing in the yard at Miraflores, containing empty cement sacks, was discovered to be on fire at about 11.40 p. m., on Saturday, March 15. The upper part of the car was destroyed, and the flooring and sills were partly burned.

LABOR FORCE AND QUARTERS IN FEBRUARY.

The total force at work on the Canal and the Panama railroad on February 26, was 38,299. Of this number, 26,912 were employed on the Canal by the Commission. 5,112 composed the contractors' forces, and 6,275 were in the service of the Panama railroad. The gold force on the Canal work, composed almost exclusively of white Americans, numbered 4,484, a decrease of 17, as compared with the previous month. The total Government force was, as follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*										Total silver.	Total gold.	Grand total.		
	Artisans.					European laborers.		West Indian laborers.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco and Naos Island. (2) Includes Europeans and Asiatics (3) Includes 75 Panamanians. (4) Includes 31 East Indians. (5) Includes 102 Panamanians. (6) Includes Matachin. (7) Includes Colon Hospital. (8) Includes four Asiatics. Included in the above are 47 families, and 614 bachelors, belonging to the gold force of contractors.

LOCK MATERIAL CONTRACTS.

Deliveries Well Advanced, on March 1, on Nearly All Large Orders.

Out of a total of 153 contracts for structural material, machinery, valves, etc., including one for 39 towing locomotives let conditionally and pending trial of sample, for the locks and spillways of the Canal, under the First Division of the Chief Engineer's office, the erection or installation of which, on the Isthmus, is being performed by the Canal Commission, deliveries had been entirely completed on 102, on March 1.

Deliveries of material on five of the contracts, on the date mentioned, were less than 100 and more than 90 per cent completed; on four, less than 90 and more than 75 per cent; on seven, less than 75 and more than 50 per cent; on five, less than 50 and more than 25 per cent, and on five, less than 25 per cent. This left 23 contracts on which no material had been delivered. The above does not include material supplied through the Quartermaster's Department on stock requisitions, but includes material being received and installed by the construction divisions, notably, the vitrified tile, etc., furnished by the Shawmut Clay Manufacturing Company.

The delivery of the rising stem and cylindrical valve machinery is 100 per cent completed, with the exception of the main order for 118 cylindrical valves on which deliveries were 98 per cent complete on March 1; and the order for 114 rising stem gate valves, which was also 98 per cent delivered on that date. No deliveries had been made, up to March 1, on the order for 12 auxiliary valve machines.

The class of material on which only few deliveries have been made, consists principally of spare parts, and of insulated cable, starting panels, limit switches, motors and pumps, and miscellaneous material for the operating mechanism of the locks. Four per cent of the order for fender chains had been received up to March 1, but no deliveries had been made on the order for buffer fenders, or for structural steel for the Gatun hydro-electric plant. The total value of the contracts in the above class, including miscellaneous articles and equipment purchased in the United States for use in connection with the erection of machinery, etc., aggregating approximately \$30,000, is \$7,215,185.38.

The status, on March 1, of all contracts for structural material, machinery, valves, etc., for the locks and spillways, under the First Division of the Chief Engineer's office, the erection or installation of which, on the Isthmus, is being performed by contractors, is, as follows:

Contract with the McClintic-Marshall Construction Company for the fabrication and erection of all of the lock gates at \$5,536,000, delivery 99 per cent completed; erection, 73 per cent completed.

Contract with the United States Steel Products Company for six emergency dams at \$2,243,068.38, delivery 55 per cent completed; erection, 30 per cent completed.

Contract with the McClintic-Marshall Construction Company for spillway gates and caissons at \$90,136.94, delivery 100 per cent completed; erection, 94 per cent completed.

Contract with the McClintic-Marshall Construction Company for erection of lock gate recess covers at \$30,000, 95 per cent completed.

The value of these four contracts aggregates \$7,899,205.32.

The total value of the contracts made up to March 1, in connection with the furnishing and erection of structural material, machinery, valves, etc., for the locks and spillways of the Canal, both by contractors, and by the Canal Commission, amounts to \$15,114,390.70.

House Committee on Naval Affairs.

Eight members of the House Committee on Naval Affairs arrived on the Isthmus, on Friday, March 14, on the gunboat *Dolphin* and the converted yacht *Mayflower*. The party consisted of Lemuel P. Padgett of Tennessee, chairman, and Mrs. Padgett; Ernest W. Roberts of Massachusetts, and Mrs. Roberts; Thomas S. Butler of Pennsylvania, and Mrs. Butler; Walter L. Hensley of Missouri, Mrs. Hensley and son; E. P. Bathrick of Ohio, and Mrs. Bathrick; Samuel J. Tribble of Georgia, and Mrs. Tribble; Samuel A. Witherspoon of Mississippi, Mrs. Witherspoon, and daughter; E. S. Theall, clerk; William Padgett, assistant clerk; R. O. Sampson, stenographer, and Frank Byron, messenger.

The members of the party are quartered at Camp Elliott, the men in service tents and the women with the families of the officers. The purpose of their visit is to inspect the Canal construction, the work of sanitation, and the fortifications. The party will sail for the United States on March 20.

Hotel Washington Telephone Service.

Local climatic conditions are particularly severe on the more easily destructible parts of telephone equipment, but experience has suggested several precautionary improvements, which have been incorporated in the private branch exchange at the Hotel Washington, now practically installed. The equipment was manufactured in accordance with the specifications of the telegraph and telephone department of the Panama railroad, and some of the improvements provided for have been adopted by the manufacturers. The private branch exchange in the Hotel McAlpin, New York City, recently installed, is of the same type.

The switchboard in the new Hotel Washington private branch exchange was furnished by the Western Electric Company, is of the lamp signal type, is equipped with 140 subscribers' lines, with an ultimate capacity of 200, has 10 plug-ended trunk circuits, and 10 cord circuits. The equipment in this board is especially treated to withstand climatic conditions. All iron work, as far as possible, is galvanized. All interior woodwork was given two coats of shellac, and all cables, and the wiring of the board was done with tinned copper wire, with enameled insulation, protected by two wrappings of silk and one of cotton, made in variegated colors, twisted in pairs, to designate circuits. All the cables were boiled in an impregnating compound, and given three coats of shellac, two thin and one thick.

The telephone instruments are of the flush type, made from phosphor bronze. The induction coils are boiled in a wax compound, and then covered with two coats of shellac, thus making them impervious to moisture. All iron parts are sheridanized, a special process, resembling to some extent galvanized metal. All woodwork in the

instruments is boiled in compound and shellacked. The wiring is done with tinned copper wire, rubber covered and braided, and made in different colors, in order to identify the circuits. A new departure in this type of telephone is a jack in the lower face of the wall plate, so arranged and connected that a guest requiring a desk set in a room may obtain this service without the necessity of altering the wiring of the set. The bellboy has only to bring the desk set to the guest's room, and insert a plug in the jack, which will connect the desk set with the private branch exchange board.

During the construction of the hotel, galvanized outlet boxes were placed in the walls, and after the plastering had been finished, the telephones were secured in place. This was done by removing four screws in the face plate of the instrument, which allowed it to swing open on hinges fastened to a $\frac{3}{4}$ -inch molding surrounding the plate. The molding was then fastened to the galvanized wall box by machine screws. The wire connection was next made to suitable binding posts, the doors were closed, and screws tightened, thus holding the face plate in its normal position.

The transmitter is of an approved insulated pattern, with a weatherproof granular button treated to exclude moisture. The receiver is also of a new type. The coils are treated with wax compound, shellacked, and the entire exposed magnet of the receiver is given a coat of thin enamel by which it is hoped to overcome one of the chief drawbacks to its use on the Isthmus, namely, that caused by rust forming on the end of the magnet and filling the space between it and the diaphragm.

The interior wiring of the building is divided into three sections, the east, central, and west wings. Conduit is run to three main distributing boxes on the first floor, thence to three distributing boxes on the second floor, and lastly, to three more boxes on the third floor. From each of these distributing boxes, a conduit is run to intermediate distributing boxes, situated in the halls, and from these, a conduit is run to each room. All house distributing cables are of No. 22 B. and S. gage tinned copper wire, with enameled insulation, protected with two wrappings of silk and one of cotton, twisted in pairs, and encased in lead sheath. Cables of suitable size are run to the main distributing boxes, and from there to the intermediate boxes. From the intermediate boxes to the rooms, a No. 18 tinned copper, rubber insulated and dry braided interior wire is used. At the terminals of all cables, lock nut strips are employed in connecting the distributing wires.

The telephone room is situated on the first floor of the hotel, near the rotunda, and contains five modern sound-proof telephone booths equipped with electric lights and fans. There will also be a telegraph operator stationed in this room, who will have direct connection with the cable and radio offices, by which means messages can be received at or dispatched from the hotel. This is expected to be especially valuable to incoming passengers, who will be able to make their arrangements for accommodations; while at sea, directly with the hotel management.

A report on the methods of using explosives on the Canal work is being prepared by Mr. Spencer P. Howell, of the United States Bureau of Mines, who will spend about six months on the Isthmus in investigation.

JOINT LAND COMMISSION.

Rules of Procedure for Filing of Claims and Conduct of Hearings.

The Joint Land Commission has adopted the following rules of procedure for the filing of claims and the conduct of its hearings:

I. All persons, having title or claim to, or interest in lands, or lands under water, situated in any part of the Canal Zone, except in the exempted area, or who have suffered damages of any kind by reason of the grants contained in the Treaty, or by reason of the operations of the United States, its agents or employees, or by reason of the construction, maintenance, operation, sanitation or protection of the said Canal, shall file with the Joint Land Commission, a statement of the entire extent of their property rights and interests. Such statement should include the name, residence, and post-office address of the claimant, the amount of the claim, the location and extent of the property, indicated wherever practicable by maps or drawings, the uses to which such property is put and a description of the improvements which have been made thereon, and should be accompanied by a statement of the title and rights of the claimant thereto, supported by all existing documentary proofs of title.

Statements referring to claims of ownership to land or land under water, together with accompanying documents, should be filed in FOUR copies, but of the legal documents submitted as proofs, one copy only need be attested. All other claims presented to the commission should be filed in at least two copies. All claims shall be submitted on a form supplied by the commission. Such statements of claim and all other forms required by the commission can be obtained on and after March 14, 1913, from the secretary of the commission, at the several police stations in the Canal Zone, or at the office of the secretary of the municipal council of the city of Panama.

II. The statements above described, to be presented by all claimants to private property, should be filed with the secretary of the Joint Land Commission, National Palace, Panama, with as little delay as possible. Claimants to land located in the area between Gatun and Pedro Miguel should file their statements not later than March 31, 1913, and claimants to land located in the remainder of the Canal Zone should file their statements not later than April 15, 1913.

III. Failure on the part of claimants to file the required statement will not preclude the Joint Land Commission from acting upon all cases properly coming before it, without the cooperation of the persons most directly interested.

IV. After an examination of the papers filed with the Joint Land Commission, an opportunity will be given to all claimants to present further evidence in public hearings. The Joint Land Commission reserves the right to call upon claimants for further information and for documents supplementary to those filed with the original statement.

V. The commission will begin hearings upon claims which are ready for adjudication, relating to any lands, in the district between Gamboa and Gatun, excepting townships, on Monday, March 17, 1913, in the Assembly Hall, National Palace, Panama. Due notice of further hearings will be given from time to time.

VI. Proceedings before the Commission may be instituted by the claimant in person, or through his or her attorney in fact or agent. If the claimant is represented by an attorney in fact or agent, a written declaration designating the person to represent the claimant must be filed with the secretary of the Joint Land Commission. Claimants presenting such a declaration in person should sign the same in the presence of the secretary. In case such declarations are not presented in person, the signature of the claimant should be attested in the Republic of Panama, by a municipal official, or in the Canal Zone by the agent in charge of any police station. Forms for the designation of attorneys or agents can be obtained from the secretary of the commission, and within the Canal Zone at the several police stations, and at the office of the secretary of the municipal council of the city of Panama.

VII. All documents required by the Commission, as well as proceedings before the commission, may be in either Spanish or English.

VIII. With reference to the admissibility of evidence, the commission will follow the procedure of a commission of inquiry rather than the technical rules of evidence.

IX. If the claimant be an executor, administrator, guardian, or representative appointed by a judicial tribunal, a duly authenticated copy of the record of the appointment must be filed with the secretary of the commission.

X. The commission reserves the right to require that motions submitted be put in writing.

XI. All expenses incident to the presentation of

witnesses shall be paid by the party at whose motion the witnesses appear.

XII. Upon the filing of claims, notice thereof will be served on the counsel for the United States. The commission will, in each case, fix a time for the filing of an answer, and will then proceed to fix a time for hearing. Notice of such hearing will be served on the claimant, or his representative, and on counsel for the United States.

Such notice shall be signed by the secretary of the commission and shall recite the time when such cause shall be called up for hearing and be served upon the parties affected thereby by sending the same through the mail or otherwise, as the commission shall determine. Such notice so sent shall be deemed sufficient notice to said parties, unless it shall later appear that it has not as a fact been received; and, in that event, further notice may be given, if it appears necessary to the commission.

XIII. At the time fixed for the hearing (or at a later date, if so determined by the commission) any party possessing an interest in the land or improvements thereon may appear and enter a plea in writing, or orally, to be set forth in the record, stating the nature and extent of interest, the amount of damages, and any other matter which the party may desire to have considered in the premises.

If more than one party claiming damages shall appear, they may plead jointly or separately as they may elect.

XIV. The counsel for the United States shall, at the time of the entry of such pleadings provided for in Rule XIII, or later, if the commission so determine, file an answer in writing, or verbally, to be entered upon the record, joining issue in the premises.

XV. In all cases in which the claimant, or his representative, and counsel for the United States are agreed on all questions of title, area, and boundaries, a stated case may be presented to the commission, which will enable the commission immediately to proceed to a hearing of the case and the valuation of the property.

XVI. In all public hearings, as preliminary, the claimant, or his representative, will make a brief but substantial statement of the claim, in which he will embrace the material facts which, in his opinion, are established by the evidence. After the statement on behalf of the claimant, counsel for the Government of the United States, will, in like manner, make a statement of the Government's position. Witnesses will then be called by the claimant for direct and cross examination, to be followed by witnesses for the Government of the United States for direct and cross examination. The claimant, or his representative, may then call witnesses in rebuttal, but the commission reserves the right to fix the time allotted to such rebuttal.

At the conclusion of the testimony, the claimant, or his representative, and counsel for the Government of the United States will proceed to argue the case in detail. Arguments will be limited to one-half hour on a side. When additional time is necessary on either side, application therefor must be made in writing before the hearing begins.

XVII. If a claimant fails to appear after due notice has been given, the commission reserves the right to consider such evidence as may be available. The claimant may, however, appear at any time prior to the final award.

XVIII. If the commissioners, or a majority thereof, shall agree upon a decision in any cause heard before it, it shall make the same a part of the record of the proceedings and send a certified copy of the same to the Government of the United States, and of the Republic of Panama, and any party affected by such decision shall have a right to take a copy of the same.

XIX. In the event of a disagreement of the commission, such disagreement shall be certified to and forwarded to both of said governments.

XX. These rules may be repealed or amended by the commission at any time hereafter as it may determine.

The commission furthermore reserves the right to modify the application of these rules to any particular case if, in the opinion of the commission, the interests of justice are promoted thereby.

By order of the Joint Land Commission.

J. C. LUTTWIELER, Secretary.

Panama, R. P., March 18, 1913.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon and Balboa during the week ending March 15:

Tagus, March 9, from New York, with 2,060 kegs nails, three cases hardware, for stock.

Trivies, March 9, from New York, with 49 reels electric cable, 40 cases electrical material, 21 cases pump machinery, for First Division; 25 cases castings, for emergency dams; 10 cases telephones, for Panama Railroad Company; 16 barrels lime, seven cases copper tacks, for stock.

Parismina, March 11, from New Orleans, with six

cases fire brick, 3,028 pieces yellow pine lumber, for Mechanical Division; 62 pieces dipper tooth points, 500 cases fire brick, 120 barrels fire clay, 150 sacks dairy feed, 12,385 pieces yellow pine lumber, 1,009 pieces cross-ties, 37 pieces piling, for stock.

Seward, March 11, from San Francisco, with 3,347 pieces white pine lumber, 3,000 cases Trojan powder, for stock; 21 bales dredging sleeves, for Sixth Division; two pieces spud timbers, for Atlantic Division.

Prins Sigismund, March 11, from New York, with 10 pieces steel beams, for Panama Railroad Company; 121 pieces steel plates, for stock.

Chr. Knudsen, March 11, from New York, with 131,255 bags cement, for Atlantic and Fifth Divisions.

Panama, March 12, from New York, with 10 cases incandescent lamps, 1,725 pieces pig iron, 401 bags sand, for Mechanical Division; 25 cases drugs and sundries, for Sanitary Department; 11 cases bath tubs, 318 crates tile, for Panama Railroad Company; 13 cases electrical material, 13 reels electric cable, 155 pieces structural steel, 37 crates structural steel, for First Division; 156 pieces structural steel, 18 pieces sewer pipe, for Atlantic Division; 18 bags cork, 17 cases books, 23 bundles galvanized iron sheets, 35 pieces railroad frogs, 10 cases pipe-fittings, 200 cases turpentine, 300 cases linseed oil, 124 pieces steel plates, 20 drums zinc oxide, 100 drums calcium carbide, 667 bundles shovels, 20 cases files, 18 bales sand paper, for stock; and a miscellaneous cargo, the whole consisting of 4,650 packages, weighing 500 tons.

Zacapa, March 12, from New York, with 44 cases castings, 31 cases electrical material, 17 reels electric cable, for First Division; 34 barrel lime, for stock; nine cases chaplets, for Mechanical Division; 30 cases spring beds, for Panama Railroad Company.

Turrialba, March 15, from New Orleans, with 82 pieces lumber, for Mechanical Division; 566 pieces cross-ties, 100 pieces piling, 18,740 pieces lumber, 150 cases fire brick, 417 bales rice straw, for stock.

Asian, March 15, from Liverpool, with 70 packages winch parts, for Sixth Division.

Rainfall from March 1 to 15, 1913, Inclusive.

OFFICIAL CIRCULARS.

Limit Removed in Accumulating Leave.

CULEBRA, C. Z., March 17, 1913.

CIRCULAR No. 132-N. (Cross 297-F.):

The following resolution adopted by the Commission, removing the limit on the amount of leave which may be accumulated by an employee, is published for the information of all concerned:

Whereas it is desired to keep intact such of the Canal organization as will be needed during the remainder of the construction period and to encourage employees to remain on the work so long as their services may be needed by it

Resolved, That, effective April 1, 1913, the limit on the amount of leave which may be accumulated by an employee shall be removed, and thereafter leave may be accumulated up to the time the employee's service is terminated or until he is transferred to the permanent organization for the completion and operation of the Canal. Provided, however, that the rules heretofore governing the forfeiture of leave for unsatisfactory workmanship or conduct shall continue unchanged. An employee who has prior to April 1, 1913, accumulated the maximum leave allowed under the present rules will earn additional leave for service performed on and after that date, to be computed under the rules as at present in force.

The time of taking leave will be governed by paragraphs 10, 11, and 12 of Circular No. 132-L, reading, as follows:

10. Monthly employees may enter on leave within four months after it becomes due, at the convenience of the head of the department or division. Exceptions to this rule may be made only by the Chairman and will be limited to cases of necessity.

11. Hourly employees may enter on leave at any time after it becomes due, subject to the approval of the head of the department or division.

12. Except at termination of an employee's service, leave only becomes due him once a year: *i. e.*, he must complete ten months' service each year before leave becomes due.

GEO. W. GOETHALS, Chairman.

Destruction of Fruit Trees and Crops.

CULEBRA, C. Z., March 12, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

A number of complaints having recently been received regarding the destruction of fruit trees and growing crops by surveying parties, attention is invited to the following circular, No. 193, issued under date of August 6, 1908:

"In cases where it becomes necessary, in order to best promote the construction of the Canal, to enter upon, interfere with, damage or destroy property owned by private individuals or companies, such as buildings, growing crops, fences, or other improvements, written authority must first be secured from the head of the department or division in charge of the work and advance notice given to owners, except in cases of extraordinary emergency requiring immediate action.

In order that a uniform policy may be carried out in adjusting these cases, the head of the department or division will refer all settlements to the Department of Law, giving accurate and detailed information regarding the location of the property and a careful appraisal of the improvements destroyed or expropriated, with dates, names, and places.

The Department of Law will thereupon effect a settlement with the owner within the limits of the appraisal and will communicate the terms agreed upon to the head of the department or division. The latter will then prepare a voucher (Form D. O. 309 Rev.) covering the agreed payment to the owner, this voucher, after being properly signed, to be approved by the Attorney on the Isthmus and the Chairman of the Commission.

"This procedure applies only to improvements such as mentioned and not to land titles."

Please see that this circular is brought to the attention of all employees engaged on survey work.

GEO. W. GOETHALS, Chairman.

Silver Employee's Service Slip.

CULEBRA, C. Z., March 11, 1913.

CIRCULAR No. 229-Z-2:

Hereafter, new Silver Employee's Service Slip (Revised) Form C. E. 262-2, must be used for all clearances by all departments and divisions, and employing offices will accept no clearance unless this form is used. Roll timekeepers will be held responsible for the rate given to employees presenting clearances, and will not enter the names on time rolls at the former rate of pay unless the clearance shows that the reason for leaving former service is one provided in Circular 229-Z. If he quits of his own accord or is discharged he must be rated as provided in Circular 229-Z-1.

If there is any reason to lead the employing office or roll timekeeper to believe the clearance is not entirely

regular the issuing office must be questioned regarding its validity.

All obsolete service slip forms must be immediately destroyed.

GEO. W. GOETHALS, Chairman.

Ratings and Rates of Pay.

CULEBRA, C. Z., March 14, 1913.

CIRCULAR No. 299-R:

In addition to the rates of pay for the position of rigger, shown in Circular No. 299, the rate of 50 cents an hour is hereby established.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Objection to Reemployment of Striking Waiters.

CULEBRA, C. Z., March 14, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The following waiters went on strike at the Tivoli Hotel on February 22, 1913, and the Subsistence Department has entered objections to their reemployment:

Economy in Use of Ice.

CRISTOBAL, C. Z. March 12, 1913.

CIRCULAR No. 207-B.

To Heads of Departments and Divisions and All Concerned: The consumption of ice at the present time is greater than the capacity of the ice plant. It is requested that ice requisitions be revised by heads of departments and divisions and that as great economy as possible be practised by individuals in order that the consumption may be lessened.

EUGENE T. WILSON, Subsistence Officer.

*Indicates reductions from last list.

**Indicates 4 cents allowed for return of bottle.

†Indicates advances on last list.

††Fowls weigh each about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock supply next lightest weight is supplied and refund note sent for difference.

‡Sold only from Commissaries; no orders take for delivery.

Lost—On evening train, on Saturday, March 15, between Gatun and Culebra, a book by Jane Addams, "The Spirit of youth in city streets." The finder will please communicate with THE CANAL RECORD and necessary postage will be forwarded for its return.

Lost—Sunday, March 16, on first train from Panama to Colon, an Eastman 1-A kodak. Finder will please return to, or communicate with, William Kenealy, Ancon.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the clubs in the Isthmian duckpin bowling league on March 17 was, as follows:

Team.	Won.	Lost.	P. C.
Gorgona.....	4	2	.666
Culebra.....	4	2	.666
Cristobal.....	4	2	.666
Empire.....	3	3	.500
Gatun.....	2	4	.333
Corozal.....	1	5	.166

An "American League" Y. M. C. A. duckpin bowling tournament was organized at Gatun on Saturday, evening, March 15. Mr. Hill of Empire was chosen president, and Mr. Cotton of Cristobal, secretary. This league will play a regular schedule of games, and it is quite likely that a post series of games will be arranged between the team winning the tournament, and the team winning the tournament in the regular Isthmian Y. M. C. A. duckpin league.

COROZAL.

There was an attendance of 600 at the open air concert given on Sunday night, March 16, by the Tenth Infantry band and the Edith Harris Scott Concert party. A temporary platform, lighted by electricity, was erected directly in front of the clubhouse for the use of the musicians. There were several selections by the band under the direction of Mr. Coe, and appropriate numbers by the concert company. Lieutenant Hoehl of the Tenth Infantry and Secretary Dwell are planning a series of athletic and musical events that will include both the talent from the Corozal clubhouse and the Tenth Infantry. The band will give several more concerts during the stay of the regiment at Corozal.

CULEBRA.

On Saturday night, March 22, "Atop of the world in motion," a series of moving picture films, showing Alaska and Siberia will be shown under the patronage of the National Geographic Society, accompanied by a descriptive lecture of the Arctic region written by Beverly B. Dobbs. Admission will be charged, as follows: members, free; nonmembers—adults 25 cents; children 15 cents.

The following high scores were made during the past week in duckpins: Cae, 104, 108, 106, 101, 109; Steel, 103; Silver, 110, 114; Brown, 109; Palmer, 102.

EMPIRE.

On Friday, March 21, the regular picture show will take place.

The local handicap pool tournament, which started last week, has 21 entries. Thirty-two games have already been played.

Empire will enter a team in the "American" Isthmian duckpin league which will open on Saturday, March 22, when Empire will bowl at Corozal.

At the present time there are five Spanish classes under Professor Gomez, with an enrollment of 65. Any one interested may obtain information at the desk.

The members of the boys' department were taken on an outing to the Las Cascadas plantation on Saturday, March 15.

GORGONA.

The following are the results of the February local tournament in duckpins:

Doubles—1. Davis and Keppler, three games, 612. 2. Denst and Sims, three games, 608. 3. Nowick and Roper, three games, 597.

Singles—1 Davis, three games, 321. 2. Denst, three games, 314.

High score—Davis, one game, 125.

High average—Roper, all games, 95-2.

High scores for the past week: Davis, 100, 105; Arnold, 100; Ruchte, 101; Gebhardt, 105; Sims, 103, 118; Powell, 109; Seebt, 107.

Culebra took two out of three games with Gorgona in the duckpin bowling tournament, with scores, as follows:

Gorgona.	Culebra.
Sims.....	81 94 118
Denst.....	83 88 97
Dunlap.....	78 93 86
King.....	87 89 99
Davis.....	104 88 96
	Brown..... 93 81 90
	Steele..... 81 85 78
	Warner..... 103 118 85
	Anderson..... 87 97 91
	Kiernan..... 89 94 82

Totals.... 433 452 496 453 475 426

A handicap local tournament in duckpins, for singles and doubles, will be held on Good Friday, to be followed by an entertainment in the evening.

The school entertainment was postponed on account of the crowded program during the week.

The gymnasium classes are growing.

Monday evening, the baseball team went to Camp Elliott. The regular gymnasium class will meet on Thursday evening.

The Sunday evening service at the Y. M. C. A., when Mr. Verner gave an illustrated talk on the "Life of

Moses," was well attended. Mrs. Pierson furnished special music.

The Gorgona chorus is rehearsing for an entertainment to be given at Cristobal on Saturday evening, March 22.

GATUN.

Empire defeated Gatun two games out of three in duckpins on Saturday evening, March 15.

The Gatun members meet several times each week to practise for the Isthmian wrestling tournament to be held at Gorgona in the near future.

Several new phonograph records were purchased during the past week.

Despite many transfers, the Gatun clubhouse still holds its membership of 500. The junior department numbers 30, the highest ever reported.

The rearrangement of the library and the cataloguing of the books, according to authors as well as the book names, makes the library one of the most popular features of the clubhouse.

CRISTOBAL.

On Thursday night, there will be special moving picture feature of a set of films known as "Atop of the world in motion."

On Saturday night, March 22, there will be a musical entertainment at the Cristobal clubhouse, given by the Gorgona chorus, with solos, duets, and choruses. All seats will be reserved and on sale, Wednesday, March 19. Admission, 50 cents; members free.

A "smoker," with program of entertainment, is planned for Friday night, March 28.

On Saturday night, March 15, the Cristobal bowling team took two out of three games from the team from Corozal. Scores follow:

Corozal... 442 440 456 Cristobal... 435 450 479

Misdirected Letters.

ANCON, C. Z., March 19, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Blades, George H.	Henry, Mrs. E. U.
Brooks, T. A.	Hinselmann, A. (photo)
Burke, Andrew	Lewis, David
Carcaud, Miss Erna	Lloyd, Howard
Davis, Duncan	McDonough, Mrs. Joe
Duverney, O.	McGinty, Neal L.
Estwick, Sam'l.	Mahlun, C.
Forbes, Tremague	Oglesby, C. A.
Frederickson, Ramon	Oliver, Lande
Grove, R. A.	Phillips, J. S.
Guild, Charles	Saiger, Harry
Hardy, Miss Mary E. S.	Yount, Dr. Carl C.
Hauton, Dr. A. C.	

Family Quarters.

Applications for family quarters on file February 28, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Balboa.....	1 (1)	49 (6)
Ancon.....	13 (7)	93 (21)
Ancon Hospital.....	1 (1)	2

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York, via Kingston and Santiago de Cuba, sail thus: the *Prins Joachim* and the *Prins August Wilhelm* on alternate Tuesdays at 10 a. m., and the *Prins Sigismund* and the *Prins Eitel Friedrich* on alternate Mondays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m., ships for New York via Kingston, on Tuesdays, at 2 p. m. and Thursdays at 2 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending March 15:

Arrivals—March 10, *Ucayali*, from Mollendo; March 11, *Seward*, from San Francisco; March 12, *Huasco*, from Valparaiso; March 13, *Ecuador*, from Guayaquil.

Departures—March 10, *Peru*, to Guayaquil; March 10, *Guatemala*, to Callao; March 11, *Quito*, to Guayaquil; March 13, *Arica*, to Tumaco; March 15, *Barracouta*, to Central America; March 15, *Morelos*, (Mexican gunboat), to Mexico.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission for the month of February is published in full on Pages 253, 254, 255, 256, and 257 of this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Coal Space for German Company.

A formal application for coal space has been made by Mr. O. Godeffrey, representing the Deutsches Kohlen Depot Gesellschaft mit beschränkter Haftung of Hamburg, Germany, which, in turn, represents the associated German steamship lines to the number of about fifteen. Mr. Godeffrey was on the Isthmus a few days ago and looked into the matter personally. His application calls for sufficient space to store about 15,000 tons of coal, with a possible increase later as conditions might warrant.

Extension of Crude Oil Contract.

The present contract with the Union Oil Company of California for supplying the crude oil used by the Canal Commission and Panama railroad expires on March 31 of this year, and on March 4, the Secretary of War approved the extension of the existing agreement until June 30, 1914, in effect, without change. The Union Oil Company has been supplying its product to the Commission since August, 1907, although it was not until November 14, 1907 that its pipe line across the Isthmus was in complete operation. The revocable license granted it on January 10, 1906 was superseded on April 1, 1909, by a contract for one year, extendible for three years, or until April 1, 1913. Under the former license the company delivered oil on the Isthmus at the rate of 90 cents a barrel; under the succeeding agreement, the price was advanced 20 cents a barrel, which price still obtains. The maximum amount of oil that can be purchased in any one month at the present time is 100,000 barrels. The annual

consumption has steadily increased as noted in the following table showing the sales to the Commission by years and parts of years to March 1, 1913, together with the average by months:

YEAR.	Annual Barrels.	Monthly Average Barrels.
1907*.....	6,919	1,384
1908.....	154,817	12,901
1909.....	534,958	44,580
1910.....	652,022	54,355
1911.....	854,719.19	71,226.60
1912.....	913,722.96	76,143.58
1913—		
January.....		78,537.17
February.....		66,048.32

*Five months.

Settlement of Estates of Americans, not Employees.

The Chairman of the Canal Commission has approved an arrangement in which the Collector of Revenues will administrate the estates, consisting entirely of personal property, of Americans, not employed by the Canal Commission or Panama railroad, who die in the Canal Zone. The Collector of Revenues will act in these cases under appointment in each instance by the Courts, and no fee will be exacted by him for services performed. The three Circuit Court justices have also agreed to remit the Court costs in each case. All other charges will, however, be charged against the estate to be administrated.

Rest Room for Women at Balboa.

A small rest house for women shoppers at the Balboa commissary is being constructed on the lot facing the commissary building. The room will also be used by the saleswomen of the commissary who remain in Balboa during the noon hours. The building will be of one story, 18 by 12 feet in size, and will contain one public room and a toilet room. It will be furnished with chairs and a table.

Removal of Buildings.

The building at Bas Obispo, formerly used as a quartermaster's storehouse, will be dismantled and moved to Corozal, where it will be reerected and used as an office and storehouse by the district quartermaster at that point. The present office and storehouse at Corozal is in two silver laborers' barracks, which, when vacated, will again be converted into laborers' quarters.

Work has been begun at Gorgona on the demolition of two Type 5 quarters, which will be reerected at Corozal. There were 56 American built quarters at Gorgona, 40 of which were for use of married employees, and 16 for bachelor employees.

Use of Lubricants on Floating Equipment.

A committee, consisting of Messrs. James Macfarlane, W. J. White, and J. E. Johnson, appointed by the Chairman to investigate the reports of lubricant consumption, on Com-

mission tugboats, has recommended the following:

That revolution counters be placed on all self-propelling craft that will be held in service on the completed Canal. That on nonpropelling craft this data should be computed on service hours only. That on tugboats this data should be computed on service hours and engine miles. That all lubricants and waste used on floating equipment, when under repairs, should be charged to "Repairs" and not to "Operation," as has been the practice in the past.

The recommendations of the committee have been approved.

Disposal of Sewage.

The disposal of sewage from the villages in the Canal Zone, and from Panama and Colon, was a problem of primary importance in making healthful the environment of the Canal workers. Withal that a country of perennial warmth, abounding in insect carriers, and in which contagious diseases were notoriously endemic, seemed a location in which the disposal of sewage would be a matter of great care and expense, the arrangements which have been in successful operation are relatively simple. The seaport towns have sewer mains leading out into the respective bays, emptying well beyond the line of low tide. The inland towns discharge their sewage into streams, with which the broken topography is well supplied, and the streams lose it in the sea, or in Gatun Lake. This, in connection with the typical sewer system of trunk pipes through the streets, is the method for all Canal Zone villages occupied by Americans. Such provision is made at Balboa, Ancon, Corozal, Miraflores, Pedro Miguel, Paraiso, Culebra, Empire, Las Cascadas, and Bas Obispo; at Camps Otis and Elliott, respectively, and in the American section of Matachin, Gorgona, Gatun, and Cristobal.

Certain native villages and outlying sections of American villages have no sewer systems. Among the larger villages of this kind are Cartagenita, New Paraiso, Golden Green, Mandingo, Gamboa, Frioles, and Stillsonville. In such places are pit closets, disinfected every week, while the waste water from household operations is thrown into surface drains.

At Culebra, nine houses, out of reach of the sewer system, are connected with a septic tank, a waterproof, airtight cement container in which the sewage putrefies and liquefies. In the process the bacteria of putrefaction destroy the bacteria of disease, so that as the liquid flows from the tank it is clear and harmless.

The passage of sewage from villages on the north side of the continental divide, south of Gatun, into Gatun Lake, will have no effect on the use of the lake water as an auxiliary supply for Colon and Cristobal. Practically all of the villages in this area will be removed at

the completion of the Canal. The only diseases met with on the Canal Zone which can be transmitted through the water supply are dysentery and typhoid fever, and they are infrequent. The filters will be relied upon to remove these and other pathogenic bacteria.

The sewer system of the city of Panama was described in THE CANAL RECORD of January 15, 1913. In its general plan, the system for Colon is the same. The low elevation of the latter city, which is founded on a fill on coral reef, makes it necessary to pump part of the sewage out to sea. It flows into a sump located at the corner of Eighth and D streets, and is pumped out through an 8-inch discharge pipe into the sea on the east side of the city. The plant is equipped with two 12-inch centrifugal pumps, driven by direct-connected motors. On D street is a closed concrete storm sewer which has to be cleaned twice a year, by means of a motor-driven centrifugal pump, mounted on a truck, which is moved from point to point as needed. The storm sewer is 17,373 feet, or 3.3 miles in length, and the city has 32,464 feet, or 6.1 miles of sanitary sewer.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the three weeks ending March 22:

DATE.	Hours worked.	Cubic yards.
March 3.....	8.55	2,025
March 4.....	7.20	2,929

Salvation Army Notes.

The Salvation Army has obtained a lot in New Gatun adjoining the Commission public school for colored children for the purpose of erecting a mission hall or barracks. The building will contain quarters for officers, and is to cost about \$3,000.

During the month of May, the annual season of self-denial will be observed, terminating with the last week in the month. In 1912, the self-denial offering amounted to \$835. The mission will endeavor to raise the sum of \$1,000 this year.

In company with the territorial commander, Colonel Rothewell of Jamaica, Adjutant Catlin, the head of the work in Panama, has just returned from a ten days' mission to the Salvation Army quarters at Bocas del Toro. The territory under Colonel Rothewell includes Jamaica, Costa Rica, Trinidad, Barbados, British Guiana, and Panama. There are 71 officers stationed in those countries.

Change in Sailing Date of the "Ancon."

The sailing date of the steamship *Ancon* has been changed from 3 p. m., Wednesday, March 26, to 3 p. m., Friday, March 28.

EXECUTIVE ORDER.

Compensation for Personal Injuries—New Regulation in Effect March 1, 1913.

The President has signed an Executive Order prescribing the terms under which compensation for personal injuries to employees of the United States and employees of the Panama railroad may be granted after March 1, 1913, as follows:

By virtue of the authority, vested in me by Section 5 of the Panama Canal Act, approved August 24, 1912, directing the President to "provide a method for the determination and adjustment of all claims arising out of personal injuries to employees thereafter occurring while directly engaged in actual work in connection with the construction, maintenance, operation or sanitation of the Canal, or of the Panama railroad, or of any auxiliary canals, locks or other works necessary and convenient for the construction, maintenance, operation or sanitation of the Canal, whether such injuries result in death or not, and prescribe a schedule of compensation therefor," I hereby establish the following Order for the Canal Zone:

Section 1. The United States or the Panama Railroad Company shall pay compensation as hereinafter specified for personal injuries to their respective employees occurring after March 1, 1913, while such employees are directly engaged in actual work in connection with the construction, maintenance, operation or sanitation of the Canal, or of the Panama railroad, or of any auxiliary canals, locks or other works necessary and convenient for the construction, maintenance, operation or sanitation of the Canal, whether such injuries result in death or not; but no compensation shall be paid, if the injury is caused (1) by the employee's intention to bring about the injury or death of himself or of another, or (2) by his intoxication.

Section 2. *Compensation the exclusive remedy.*—Except as provided in this Order, the United States and the Panama Railroad Company shall not be liable for personal injury to or the death of an employee for which compensation is provided in Section 1 hereof.

Section 3. *Waiting period.*—During the first five days of disability resulting from the injury the employee shall not be entitled to compensation, except as provided in Section 9. No compensation shall at any time be paid for such period.

Section 4. *Total disability.*—If the injury results in total disability, there shall be paid to the employee a monthly compensation equal to 50 per cent of his monthly pay. This compensation shall be paid during such disability, not exceeding a period of six years from the fifth day of disability of any kind resulting from the injury. After such period of six years there shall be paid to the employee during such disability a monthly compensation equal to not more than 40 per cent and not less than 25 per cent of his monthly pay.

Section 5. *Partial disability.*—If the injury results in partial disability, there shall be paid to the employee a monthly compensation equal to 50 per cent of the difference between his monthly pay and his wage earning capacity per month after the beginning of such partial disability. This compensation shall be paid during such disability for a period not exceeding six years from the fifth day of disability of any kind resulting from the injury. After such period of six years, there shall be paid to the employee during such disability a monthly compensation equal to not more than 40 per cent and not less than 25 per cent of the difference between his monthly pay and his wage earning capacity per month after such period of six years.

Section 6. *Affidavit as to wages.*—After the beginning of partial disability the Gover-

nor of the Panama Canal may, from time to time, require the injured employee to make an affidavit as to the wages per month which he is receiving. In the statement of the wages the value of rent, board, lodging and other advantages received from the employer, which can be estimated in money, shall be taken into account. If the employee at any time fails to make such affidavit, he shall not be entitled to any compensation while such failure continues, and the period of such failure shall be deducted from the period during which compensation is payable to the employee.

Section 7. *Refusal to work.*—If the employee refuses to work after suitable work is furnished to or secured for him by the United States or the Panama Railroad Company he shall not be entitled to any compensation while such refusal continues, and the period of such refusal shall be deducted from the period during which compensation is payable to the employee.

Section 8. *Sick leave.*—If at the time disability begins the employee has to his credit any unused sick leave, he may, at his option, subject to the approval of the Governor of the Panama Canal, use such leave until exhausted. During such time no compensation shall accrue, and any period of sick leave allowed on account of such disability after the first five days of disability shall be deducted from the period of six years referred to in Sections 4 and 5.

Section 9. *Medical, etc., attendance.*—There shall be furnished to the injured employee reasonable medical, surgical and hospital services and supplies, unless the employee elects to furnish his own physician or to care for himself. If in the opinion of the Governor of the Panama Canal a surgical operation is necessary, either to save the life of the injured employee or to render the disability less serious, and the employee refuses to submit to such operation, he shall not be entitled to any compensation thereafter, but in case of his death, compensation shall be paid as hereinafter provided.

Section 10. *Transportation of injured employees.*—If in the opinion of the Governor of the Panama Canal it is not desirable to continue the injured employee in the service, such employee, as soon as he is able to travel, shall, in the discretion of the Governor of the Panama Canal, be furnished transportation to his home. If at the time of the injury the employee is on the Isthmus, the Governor of the Panama Canal may, in his discretion, suspend, for such period as such employee remains on the Isthmus after free transportation has been offered to him as herein provided, the compensation payable to such employee.

Section 11. *Death payments.*—If the injury results in death within six years, there shall be paid to the following persons for the following periods a monthly compensation equal to the following percentages of the deceased employee's monthly pay:

A. *To the widow or widower if there is no child:* If wholly dependent for support upon the deceased employee at the time of the death, 35 per cent for a period of six years from the date of the death, unless before that time such widow or widower dies or marries; after such period of six years not less than 20 per cent nor more than 30 per cent until death or marriage; if partly dependent, the compensation shall be a proportionate amount of the above compensation.

B. *To the widow or widower if there is a child:* The compensation payable under Clause A, and in addition thereto 10 per cent for each child, not to exceed a total of 50 per cent for self and children; after the expiration of six years from the date of the death the total for self and children shall not exceed 25 per cent to

40 per cent. Compensation payable on account of any child shall cease when he dies, marries, or reaches the age of eighteen, or if over the age of eighteen and incapable of self-support, becomes capable of self-support.

C. *To the children if there is no widow or widower.*—Twenty-five per cent for one child and 10 per cent additional for each additional child not to exceed a total of 50 per cent divided among such children share and share alike. After the expiration of six years from the date of the death of the deceased employee, the total shall not exceed 25 to 40 per cent. The compensation of each child shall be paid until he dies, marries or reaches the age of eighteen years, or if over the age of eighteen and incapable of self-support, becomes capable of self-support.

D. *To the parents, if there is no widow, widower or child:* If one is wholly dependent for support upon the deceased employee at the time of his death and the other is not dependent to any extent, 25 per cent; if both are wholly dependent, 20 per cent to each; if one is or both are partly dependent a proportionate amount in the discretion of the Governor of the Panama Canal. This compensation shall be paid for a period of eight years from the time of the death, unless before that time the parent dies, marries or ceases to be dependent.

E. *To the brothers, sisters, grandchildren, and grandparents, if there is no widow, widower, child or dependent parent:* If one is wholly dependent upon the deceased employee for support at the time of the death, 20 per cent; if more than one are wholly dependent, 30 per cent, divided among them share and share alike. If there is no one of them wholly dependent, but one or more are partly dependent, 10 per cent, divided among them share and share alike. The compensation of each beneficiary shall be paid for a period of eight years from the time of the death unless before that time he, if a grandparent dies, marries or ceases to be dependent, or, if a brother, sister or grandchild, dies, marries or reaches the age of eighteen years, or if over that age and incapable of self-support becomes capable of self-support.

F. As used in this section, the terms "child" and "children" include stepchildren, adopted children, posthumous children and illegitimate children, but do not include married children. The terms "brother" and "sister" and their plurals include stepbrothers, and stepsisters, half-brothers and half-sisters, and brothers and sisters adopted by the parent of the deceased employee, but do not include married brothers and married sisters. The terms "grandchild" and "grandchildren" include children of adopted children, and children of stepchildren, but do not include stepchildren of children, stepchildren of stepchildren, stepchildren of adopted children or married grandchildren. All of the above terms include only persons under eighteen years of age or over that age and incapable of self-support. The terms "parent" and "parents" include stepparents and the parents by whom the deceased was adopted. The terms "grandparent" and "grandparents" include the parents of the parents by whom the deceased employee was adopted, but do not include parents of stepparents, stepparents of parents, or stepparents of stepparents. The terms "widow" and "widower" include only the decedent's wife or husband actually

dependent upon him or her for support at the time of the death.

G. The period during which compensation was payable to the deceased employee before his death shall be deducted from the period of six years referred to in Clauses A, B, and C, and from the period of eight years referred to in Clauses D and E.

H. Upon the cessation of compensation under this section to or on account of any person, the compensation of the remaining persons entitled to compensation for the unexpired part of the period during which their compensation is payable, shall be that which such persons would have received if they had been the only persons entitled to compensation at the time of the decedent's death.

Section 12. *Burial expenses.*—If the employee dies as a result of the injury away from his home office or outside of the United States and compensation has not ceased, his body shall, if practicable, or if desired by his relatives, and if transportation has not been furnished the employee under Section 10 before his death, be embalmed and transported in a hermetically sealed casket to the home of the employee if such home is within the United States. If death occurs on the Isthmus and the body is not transported away from the Isthmus, the body shall be interred on the Isthmus at the expense of the United States or of the Panama railroad.

Section 13. *Computation of pay.*—If the monthly pay of the employee is over two hundred dollars a month, the monthly pay shall be considered to be two hundred dollars. Subject to this maximum, the monthly pay shall be computed, as follows:

(a) If the employee is paid by the year divide his yearly pay at the time of the injury by twelve;

(b) If the employee is paid by the month, take his monthly pay at the time of the injury;

(c) If the employee is paid by the week, multiply his weekly pay at the time of the injury by fifty-two and divide the result by twelve;

(d) If the employee is paid by the day, multiply his daily pay at the time of the injury by twenty-six;

(e) If the employee is paid by the hour, multiply his hourly pay at the time of the injury by the number of hours constituting a day's work and multiply the result by twenty-six;

(f) If the employee is paid by his output, find his hourly pay at the time of the injury by dividing the total amount earned by him in the employment in which and at the rate of pay at which he was employed at the time of the injury, during so much of the 30 days next preceding the injury including the day of the injury, as he was so employed, by the number of hours so employed during such 30 days, then proceed as in (e);

(g) In making the computation provided in Clauses (e) and (f) of this section, overtime shall not be taken into account;

(h) Subsistence shall be included as part of the pay.

Section 14. *Commutation of periodical payments.*—If the monthly payments to the beneficiary are less than \$5 per month, or if the beneficiary is not a citizen of the United States, or is, or is about to become a nonresident of the United States, or if the Governor of the Panama Canal determines that it is for the best interests of the beneficiary, the liability of the United States or of the Panama Railroad Company for compensation to such beneficiary shall be discharged by the payment of a lump sum equal to two-thirds of all future payments of compensation. The probability of the beneficiary's death before

the expiration of the period during which he is entitled to compensation, shall be determined according to the American Table of Mortality. The probability of the happening of any other contingency affecting the amount or duration of the compensation shall be disregarded.

Until such time as the President, under the authority of Section 4 of the Act of August 24, 1912, entitled "An Act to provide for the opening, maintenance, protection and operation of the Panama Canal and the sanitation and government of the Canal Zone," shall discontinue the Isthmian Canal Commission, compensation shall be paid in a lump sum in all cases, unless the Chairman of the Isthmian Canal Commission in any case determines that payment in installments for any part or all of the period during which compensation is payable is for the best interests of the United States or of the Panama Railroad Company or of the beneficiary.

Section 15. Payment of the compensation shall be made to the beneficiary or to such representative as the Governor of the Panama Canal may determine.

Section 16. *Determination of wage earning capacity.*—In the determination of the employee's wage earning capacity after the beginning of partial disability the value of rent, board, lodging and other advantages which are received from his employer and which can be estimated in money, shall be taken into account.

Section 17. *Notice of injury or death.*—Immediately after the injury, the injured employee or some one on his behalf shall give to the immediate superior of such employee a written notice of the injury, and if the injury results in the death of the employee, one of the persons entitled to compensation or some person on his behalf, within 90 days thereafter, shall give to the immediate superior of such employee or to the Governor of the Panama Canal a written notice of such death. The notice shall state the name of the employee, his class of service, the year, month, day, and hour when and the particular locality where the injury or death occurred, the cause of the injury or death, the nature of the injury, the nature and extent of the disability resulting therefrom and the address of the employee and of the person giving the notice. The notice may be given personally or sent by mail. The Governor of the Panama Canal may, in his discretion, waive the giving of a notice.

Section 18. *Report of injury or death.*—Immediately after an injury to an employee resulting in his death or in his probable disability, the immediate superior of the employee shall at once make a report to the Governor of the Panama Canal, containing such information as the Governor of the Panama Canal may, by regulation, require.

Section 19. *Claim for compensation.*—No compensation under this Order shall be allowed to any person unless he, or some one on his behalf, shall make a written claim therefor upon the Governor of the Panama Canal within the time specified in Section 21. The claim may be served personally upon, or sent by mail to the Governor of the Panama Canal or to such person as he may, by regulation, require.

Section 20. *Contents of claim.*—The claim shall be signed by the person making the claim, and shall state the name of the employee, his age, sex, nationality and class of service, the year, month, day, and hour when and the particular locality where the injury or death occurred, the cause of the injury or death, the nature of the injury, the nature and extent of the disability resulting therefrom; the monthly pay of the employee at the time of the injury, the relationship of the person entitled to compensation to the employee, the names and addresses of all persons entitled

to compensation on account of such injury or death, the amount and duration of the compensation claimed, and the address of the person making the claim. The claim shall be sworn to by the person entitled to compensation or by the person acting on his behalf, and, except in case of death, or as otherwise provided in regulations prescribed by the Governor of the Panama Canal, shall be accompanied by a certificate of the employee's physician, if any, stating the nature of the injury, and the nature and extent of the disability. The claim shall, wherever possible, be made on forms furnished by the Governor of the Panama Canal, and in addition to the statements above required, shall contain such other information as the Governor of the Panama Canal may require.

The Governor of the Panama Canal may waive the making of and swearing to claims and the inclusion therein of any of the above requirements in such cases as he may deem proper.

Section 21. Time within which claim must be made.—Claims for compensation shall be made within 60 days after the injury, or, in case of death, within one year after the death. For any reasonable cause shown, the Governor of the Panama Canal may allow claim for injury to be filed within one year after the injury.

Section 22. Amendment of Claim.—The Governor of the Panama Canal may, after receipt of the claim, demand a further claim specifying in the demand in what particular the claim is defective. Failure to make such demand shall constitute a waiver by the United States or by the Panama Railroad Company, as the case may be, of all defects which the claim may contain. After receipt of such demand, the person making the claim may, at any time within 60 days, make an amended claim which shall supersede the first claim and have the same effect as an original claim.

Section 23. Medical examination.—After the injury and during disability the employee shall as frequently and at such times and places as may be reasonably required submit himself to examination by a medical officer of the United States or by a duly qualified physician designated by the Governor of the Panama Canal and paid by the United States or by the Panama Railroad Company, as the case may be. The employee may have a duly qualified physician designated and paid by him present to participate in such examination. For all examinations after the first, the employee shall, in the discretion of the Governor of the Panama Canal, be paid his reasonable traveling and other expenses and loss of wages incurred in order to submit to such examination. If the employee refuses to submit himself for or in any way obstructs any examination, his right to claim compensation under this Order shall be suspended until such refusal or obstruction ceases. No compensation shall be payable while such refusal or obstruction continues and such period shall be deducted from the period for which compensation would otherwise be payable.

Section 24. Disagreement between physicians.—In case of any disagreement between the physician making an examination on the part of the United States or the Panama Railroad Company and the employee's physician, the Governor of the Panama Canal shall appoint a third physician, duly qualified. The decision of the majority shall be final. A reasonable fee shall be allowed and paid by the United States or by the Panama Railroad Company, as the case may be, to such third physician if he is not a medical officer of the United States.

Section 25. Assignment of right against third person.—If an injury or death for which compensation is payable under this Order is

caused under circumstances creating a legal liability in some person other than the United States or the Panama Railroad Company to pay damages therefor, no compensation shall be payable to any beneficiary for such injury or death until he assigns to the United States or to the Panama Railroad Company, as the case may be, any right of action which he may have to enforce such liability of such other person, or any right which he may have to share in any money (or other property) received in satisfaction of such liability of such other person. The United States or the Panama Railroad Company, as the case may be, if it prosecutes such right to judgment or settlement shall after deducting the amount of any compensation already paid to the beneficiary and the costs of such prosecution, pay over to the beneficiary any surplus remaining. Such surplus so paid over shall be credited on future installments of compensation as they become due. The Governor of the Panama Canal may waive the requirement of such assignment or may waive it for such period as he may deem proper.

Section 26. Assignment of right against Panama Railroad Company.—If an injury or death for which compensation is payable under this Order is caused under circumstances creating a legal liability in the Panama Railroad Company to pay damages therefor under the laws of any State, Territory or possession of the United States or of the District of Columbia or of any foreign country, no compensation shall be payable to any beneficiary for such injury or death until he releases to the Panama Railroad Company, any right of action which he may have to enforce such liability of the Panama railroad or until he assigns to the United States or to the Panama Railroad Company, as the case may be, any right which he may have to share in any money (or other property) received in satisfaction of such liability of the Panama Railroad Company. The Governor of the Panama Canal may waive the requirement of such assignment or release for such period as he may deem proper.

Section 27. Assignments and attachments.—No claims for compensation under this Order shall be assignable, and all compensation and claims therefor shall be exempt from all claims of creditors. This section is hereby constituted a part of the Laws of the Canal Zone.

Section 28. Attorneys' fees.—No claim for legal services in connection with any claim arising under this Order shall be enforceable unless approved by the Governor of the Panama Canal. This section is hereby constituted a part of the Laws of the Canal Zone.

Section 29. Modification of allowance of compensation.—The Governor of the Panama Canal may at any time review, and in accordance with the facts found in such review, end, diminish, or increase any compensation previously fixed or determined.

Section 30. Recovery of compensation erroneously paid.—If any compensation is paid under mistake of law or of fact the Governor of the Panama Canal shall immediately cancel any order under which such compensation has been paid, and shall recover, as far as practicable, any amount which has been so paid.

Section 31. Powers of Governor of the Panama Canal.—The Governor of the Panama Canal shall make all necessary rules and regulations for the proper, effective, and economical enforcement of this Order, and shall decide all questions arising under this Order or in regard to the interpretation thereof. His determination of any fact necessary to or underlying any claim hereunder shall be final and conclusive upon all parties and claimants or beneficiaries.

Section 32. Powers of Chairman of Isthmian Canal Commission.—Until such time as the President, under the authority of Section

4 of the Act of August 24, 1912, entitled "An Act to provide for the opening, maintenance, protection and operation of the Panama Canal, and the sanitation and government of the Canal Zone" shall discontinue the Isthmian Canal Commission, and until the Governor of the Panama Canal is appointed and has qualified, all the rights, powers and duties vested in the Governor of the Panama Canal by this Order shall be exercised by the Chairman of the Isthmian Canal Commission.

Section 33. Penalty for false swearing.—Whoever shall make in any affidavit required under Section 6 or in any claim required by Section 19, any statement, knowing it to be false, shall be deemed guilty of perjury and shall be punished by a fine of not more than \$5,000 or by imprisonment for not more than two years, or by both such fine and imprisonment. This section is hereby constituted a part of the Laws of the Canal Zone.

Section 34. Singular and masculine.—Wherever used in this Order the singular includes the plural and the masculine gender includes the feminine and neuter.

Section 35. Liability of United States and of Panama Railroad Company.—If the payment of compensation under this Order on account of an injury or death is to be made from the funds of the United States, the Panama Railroad Company shall be released and discharged from all liability on account of such injury or death, and if it is to be made from the funds of the Panama Railroad Company, the United States shall be released and discharged from all liability on account of such injury or death. This section is hereby constituted a part of the Laws of the Canal Zone.

Section 36. Repeal of Laws of Canal Zone.—All laws of the Canal Zone inconsistent with any of the provisions of this Order are hereby repealed. This section is hereby constituted a part of the Laws of the Canal Zone.

Section 37. Time of taking effect.—This Order shall take effect March 1, 1913.

WM. H. TAFT.

THE WHITE HOUSE,
February 26, 1913.

[No. 1722½]

Levelman and Transitman Examination.

Examination for promotion to the positions of levelman and transitman is scheduled to be held in the Commission clubhouse at Empire, on Sunday, April 20.

The examination will commence promptly at 9 a. m., and will be divided into three parts, which will be given in the order indicated, viz: Written and oral examination, and a statement of education and experience. Competitors will be required to complete the written portion of the examination before 1 p. m.

Applications for examination should be addressed to the undersigned, through the head of the department or division, before the close of business on Thursday, April 17.

Applicants should bring to the examination room pens, pencils, triangles, and tables of circular functions, but no paper, ink, or blotters.

Applicants who fail to appear for examination before 9 a. m., or who do not apply for examination through the proper channels before the close of business on Thursday, April 17, will not be admitted to the examination.

No card of admission will be needed.

A. B. NICHOLS,

Chairman, Examining Board.

Culebra, C. Z., March 22, 1913.

Lost—On March 12, at Naos Island, Canal Zone service medal No. 1404, issued to Mr. Samuel W. Jennings. Finder please communicate with Ancon police station.

CANAL WORK IN FEBRUARY.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., March 15, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of February, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d. Div.	5th Div.	6th Div.	Total.
Work excavation, dry	Cubic yards	11,24	996,800	32,43	344,758		1,38,542
Work excavation, wet	Cubic yards	305,949		*175,225		239,022	718,216
Total work excavation	Cubic yards..	315,100	996,800	207,968	344,758	239,032	2,103,748
Plant excavation, dry	Cubic yards.			4,752			4,752
Plant excavation, wet	Cubic yards.						
Total plant excavation	Cubic yards..						
Total Canal excavation	Cubic yards..	315,190	996,800	222,720	344,758	239,032	2,108,530
Material placed in dams.	Cubic yards..	88,792			35,000		123,792
Concrete placed, locks dams and spillways	Cubic yards..	33,808			43,681		77,489
Explosives used.....	Tons (Gross)	48.14	120.33	7.97	60.89	10.60	247.33
Rock drilled.....	Feet.....	22,559	310,215	11,939	96,763	4,573	436,046
Tracks removed.....	Miles.....		7.84				7.84

Average rainfall.....	Inches.....	2.33	1.00	.19	0.07	0.19	1.09

*Accomplished by 6th division for the 2nd division

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineer of the Atlantic Division, Resident Engineer Cole, and the erection subdivision of this office. The inspection of this work is being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

Work was continued on the erection of the eight spillway gates at Miraflores, which was about 80 per cent completed at the close of the month.

There was no work done on the caisson for Miraflores.

Work on the preparation of rising stem gate valve machinery chambers was continued at Gatun, Pedro Miguel, and Miraflores; at the end of the month it was 94 per cent completed at Gatun, 70 per cent completed at Pedro Miguel and 25 per cent completed at Miraflores.

Inspection of the assembly and riveting of the draft tubes for Gatun hydroelectric station was continued.

LOCK GATES AND PROTECTIVE DEVICES.

Up to February 20, a total of 62,178 tons of steel plates and shapes had been accepted at the rolling mills. Shipments of riveted

structural steel from the Rankin shops totaled 51,487 tons, which is practically the contract weight required for the 92 leaves to be erected. Of this total, 113 tons were shipped during the month. There were also 642 tons of spare parts shipped during February. So far as erection, reaming and riveting are concerned, the contractors progressed satisfactorily, but the finishing of the leaves was not pushed as it should have been. The status of the work in the several locks may be summarized, as follows:

Gatun—Work was in progress on all the leaves, 40 in number. Erection, 81 per cent completed; reaming, 83 per cent completed;

riveting, 72 per cent completed; finishing, 10 per cent completed.

Pedro Miguel—Erection, 82 per cent completed; reaming, 92 per cent completed; riveting, 80 per cent completed.

Miraflores—Work was in progress on 20 of the 28 leaves. Erection, 55 per cent completed; reaming, 29 per cent complete; riveting, 20 per cent completed.

LOCK GATE RECESS COVERS.

There was no work done on recess covers at Gatun. At Pedro Miguel, the fitting in place of four covers was completed. At Miraflores, five covers were aligned and grouted.

CHAIN FENDERS.

Work in the field consisted of completing the concreting in the first chain fender pits Nos. 812 and 813. These chain fenders are completed, except work in connection with the auxiliary equipment, and the placing of the stairways and platforms.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

The inspection force in the United States is being reduced as contracts are completed. The contractors are generally behindhand, but progress is being made in the rates of delivery. The rate of installing the machines keeps pace with the receipt of the various parts. The following tabulations are given as a summary of the work:

ELECTRICAL WORK—ATLANTIC LOCKS.

Conductor rails, insulators, brackets, and cover plates were installed on 3,960 feet of straight track, making a total of 23,006 feet. Of this, 10,806 feet have been equipped with steel conductor bar, and 12,200 feet with copper conductor bar. There were 9,789 feet of cable pulled into the conduit system, a total of 298,273 feet having been pulled at the end of the month. Cable pulling at the Gatun locks was discontinued and the cable pulling gang at that point disbanded. Nearly all of the cable pulled has been protected with tile in the manholes. Sixty-nine cable splices were made. Limit switches were installed on 43 rising stem gate valve machines, 17 miter gate moving machines, six handrail machines, four auxiliary culvert valve machines, and 56 cylindrical valve machines. Commutator switches were installed on 10 miter gate moving machines. Control boxes and conduit for nine handrail machines were installed. Conduit connections from limit switches to control panels are complete for 39 rising stem valve machines. Conduit was installed for power and control wire for 51 cylindrical valve machines; also, for four miter gate panels, and conduit made up for all auxiliary culvert valve panels. There were 18 rising stem valve motor control panels installed and conduit support slotted for control wire. Bed plates for 43 rising stem valve machines were drilled for supporting control conduits, transmitter, and control cable; also, the 4-inch hole for power cables. Slots were cut for power cable and cable drawn into 14 rising stem valve machine bases. Panels were installed for seven cylindrical valve motors and two auxiliary culvert valve motors. Work was started on installing the end bells for motor control panels. The following tests were made on sample towing locomotive No. 640: Electrical circuits checked out and locomotive put into operation; tests made of the power required by the locomotive on the incline and when towing one-third of the rated load; put on service test raising and lowering this load, alternating with trips up the incline. During the month, approximately 6,000 trips were made. Tests were made on nine rising stem valve machines, two miter gate moving machines, and one handrail machine, and all were operated in a satisfactory manner. This makes a total of 31 rising stem valve machines, 36 cylindrical valve machines, four auxiliary culvert valve machines, four miter gate moving machines, and one handrail machine which had been tested on February 28.

ELECTRICAL WORK—PACIFIC LOCKS.

Pedro Miguel—Conductor rails, insulators, brackets, and copper plates were installed on 3,047 feet of track, making a total of 11,477 feet. Of this amount, 5,176 feet have been equipped with steel, and 6,301 feet with copper conductor rail. There were 2,400 feet of fibre conduit installed during the month. There were 1,000 feet of this conduit prepared for the reception of cable. Four control panels for auxiliary culvert valve machines and three control boxes for handrail machines were installed.

Miraflres—Steel conductor bar, insulator brackets, and plates, were installed on 1,320 feet of track. There were 8,740 feet of duct rodged, cleaned, and wired preparatory to pulling cable. One test panel was mounted. Tests were made on 13 cylindrical valve machines at Miraflres, 12 of which operated satisfactorily. Experiments were continued on the waterproofing of tunnels.

Tests were made on six rising stem gate valve machines at Pedro Miguel.

EMERGENCY DAMS.

Inspection was in progress at four localities in the United States and 593 tons of material were accepted. At the end of the month 12,447 tons had been fabricated and accepted. About 721 tons were delivered on the Isthmus during the month and approximately 445 tons were erected. On February 28, a total of 7,933 tons had been delivered, and 4,058 tons erected. Approximately 55 per cent of the material required for all emergency dams has been received, of which about 30 per cent has been erected. Work was in progress on the east and west dams at Gatun, and the west dam at Pedro Miguel.

AIDS TO NAVIGATION.

At the close of the month, 11 towers of the Atlantic and Pacific type were completed, except that one steel lantern door remained to be hung, stair railings erected and permanent lights installed; the circular stairway of one tower also remained to be completed. Ten range towers of the Gatun Lake section type, with foundations, were completed, except that doors were still to be hung, steel ladders erected, lantern glass set in place in four towers, painting in seven towers, and permanent lights installed in all. One foundation was completed for tower of the Atlantic and Pacific type. Three skeleton tower beacons, including foundations, for the Pacific end, were completed, except that permanent lights remained to be installed. Three additional concrete steel reference targets 20 feet high were completely erected, a total of nine. Electric fittings were placed in the towers and beacons of the electric light line between the Aguadulce pumping station and range No. 1-2 and beacons Nos. 5 and 7, Pacific end; electric lights were placed in these structures. Work was in progress on range towers Nos. 2 and 16 Gatun lake section, wiring electric light line Pacific end, and making the necessary surveys and reconnaissances. Six gas buoys were also assembled at Balboa.

Second Division—Office of the Chief Engineer.

BALBOA TERMINALS.

The following work was accomplished during the month:

EXCAVATION.	Cu. Yds.
Preparing site	11,842
Drydock No. 1	15,572
Drydock No. 1, approach	3,210
Shop foundations	3,134
Test pit foundations	50
Quay wall	1,692
Pier No. 1	521
Total	36,003

FILLING AND EMBANKMENT.	Cu. Yds.
Preparing site	32,274
Dikes	6,187
Sand line	1,796
Townsite dike (Sixth Division)	1,580
Fifth Division	1,400
Total	43,237

CONCRETE PLACED.	Cu. Yds.
Caissons, reinforced shells	1,277
Caissons, reinforced filler	85
Shop foundations	282
Shop foundations, test pits	11
Total	1,655

General Remarks—Approximately 197,000 pounds of reinforcing were placed. Work was continued on the quay wall and begun on pier No. 1. There were 11,939 lineal feet of rock drilled, 17,850 pounds of dynamite used, 29,435 lineal feet of piling driven, 10,658 feet of track laid, 1,800 feet of road built, 4,625 feet of ditches dug and one trestle bent.

METEOROLOGY AND HYDROGRAPHY.

The usual observations and measurements were made and taken.

Fifth Division—Office of the Chief Engineer

DISTRICT NO. 1, LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation during the month amounted to 346,280 cubic yards, of which 238,006 cubic yards were classified as rock and 108,274 cubic yards as earth.

Filling and embankment—The backfill at Pedro Miguel was increased by 52,818 cubic yards, the total quantity in place at the close of the month being 854,236 cubic yards.

At Miraflores, the dry filling in the toes of the west dam was increased by 35,000 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,575,614 cubic yards, and 661,048 cubic yards, respectively. The backfill was increased by 77,951 cubic yards, the total amount in place at the close of the month being 1,256,547 cubic yards.

Pedro Miguel Locks—Excavation was continued in the Canal prism, south of the locks, and in the foundation of the lower guide wall. Backfilling of the two side walls and north wing walls was continued. Concrete work consisted of the construction of the south wing wall extension, installation of towing and return tracks, drainage tunnel and electric cable ducts. The total amount of concrete laid was 4,294 cubic yards placed, as follows: Two hundred and sixty-seven cubic yards in the walls, 33 cubic yards in the floor, 3,883 cubic yards in the south approach wall, 22 cubic yards in the east intake bridge, and 89 cubic yards in the operating tunnel.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8 00
Average number of hours per day worked laying concrete (actual working time).....	4.88
Average number of mixers per day.....	3.00
Average hourly output per mixer, actual working time (cubic yards).....	12.76
Concrete laid (cubic yards).....	4,294.00

Plant consisted of three $\frac{1}{2}$ -cubic yard mixers, the output of which was discharged by mixers directly into forms, or handled to forms by Decauville equipment.

Miraflores Locks—Dry excavation was continued in the Canal prism, south of the locks, the material being used for backfilling the locks, filling on the west dam, and for swamp reclamation. Excavation of the spillway was continued. Concrete work consisted of the construction of north wing walls, spillway dam, and the extension of west wall, south guide wall, operating tunnels, floor of lower west chamber, and northeast core wall. Fixed irons aggregating 203,380 pounds were placed in the masonry. The total amount of concrete laid was 39,510 cubic yards placed, as follows: Twenty-nine thousand one hundred and five cubic yards in the walls, 2,426 cubic yards in the floors, 755 cubic yards in the east core wall, 2,349 cubic yards in the operating tunnel, 562 cubic yards in the northwest wing wall, 376 cubic yards in the northeast wing wall, 161 cubic yards in the east intake bridge, 123 cubic yards in

the emergency dam quadrant, and 3,653 cubic yards in the spillway.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant
Length of working day (hours).....	8 00	8 00
Average number of hours per day worked laying concrete (actual working time).....	4 34	7 68
Average number of mixers per day.....	7 65	3 39
Average hourly output per mixer, actual working time (cubic yards).....	40 37	15 53
Average amount of concrete laid per hour per berm or chamber crane, actual working time (cubic yards)....	59 85
Concrete laid (cubic yards)....	28,519.00	10,991.00

Auxiliary plant consisted of a daily average of 1.47 $\frac{1}{2}$ -cubic yard mixers and a daily average of 1.92 $\frac{1}{2}$ -cubic yard mixers, the output of which was discharged directly into forms, or placed by derricks and locomotive cranes. Permanent plant consisted of four berm and four chamber cranes.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers, and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT

Length of working day (hours).....	12.00
Average number of hours per day, actual working time.....	9.56
Average number of cubic yards crushed per hour per working day.....	222.99
Average number of cubic yards crushed per working hour.....	279.86
Total output for the month (cubic yards)....	61,544.00

Sixth Division—Office of the Chief Engineer.

The following is a statement of the output of the six dredges which were in operation during the month:

DREDGE.	Type.	WORK.			PLANT.		Total.	Remarks.
		Earth.	Clay.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	
Badger.....	Ladder.....	5,453	22,145	22,698	50,346	Place measurement
Cardenas.....	Dipper.....	17,243	8,622	25,865	Place measurement

CHAMÉ SAND EXCAVATION.

Approximately 35,100 cubic yards of sand were excavated at Punta Chame and delivered to the Balboa sand bins.

BALBOA SHOPS.

The manufacturing and repair work in the shops and shipways was satisfactorily performed during the month.

Atlantic Division.

GATUN LOCKS.

Excavation—There were 47,142 cubic yards excavated during the month. Of this amount, 11,211 cubic yards were removed from the lock site in the preparation of foundations for the north approach walls; the balance was borrow pit excavation for backfill and construction tracks.

Backfill—Backfilling behind the side walls was continued, the quantity placed during the month aggregating 34,498 cubic yards. The total amount placed to March 1 was 2,009,496 cubic yards. On that date the work was 96.94 per cent completed.

Receiving and issuing material—The issues of rock for the month amounted to 28,922 cubic yards. There were 15,686 cubic yards of sand issued. Cement receipts totaled

38,571 $\frac{1}{2}$ barrels and the issues amounted to 35,214 $\frac{3}{4}$ barrels.

Mixing and placing plants—Mixer No. 1 and the portable mixers were kept in satisfactory operation during the month, but, owing to shortage of cement, mixer No. 1 could not be operated to its full capacity from the 11th to the 15th of the month.

Concrete work—A total of 30,680 cubic yards of concrete was laid, distributed, as follows: Upper lock, six cubic yards; middle lock, eight cubic yards; lower lock, 30,666 cubic yards. On February 28 the concrete work was 96 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	9.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	5 80
Average number of mixers per day.....	4.00
Average hourly output per mixer, actual working time (cubic yards).....	60.12
Average amount of concrete laid per hour, per strand of cableway.....	28.60

Concrete laid (cu. yds.) derricks.....	174
Concrete laid (cu. yds.) portable mixers.....	244
Concrete laid (cu. yds.) hand mixed.....	127

Total amount of concrete laid (cu. yds.)... 31,141.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement and borrow pit cross-section, by 104,968 cubic yards, making the total amount in place 21,326,377 cubic yards. On March 1, the Dam was 96.8 per cent completed.

Hydraulic fill—There was no increase made in the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry fill—There were added to the dry fill 88,792 cubic yards of material received from

steamshovels; this was placed on the north and south toes of the Dam, east and west of the spillway, making the total dry fill in place 11,182,399 cubic yards.

Hydroelectric plant—During the month, 30 cubic yards of rock were removed by hand in the preparation of foundations, making a total excavation of 97,991 cubic yards. There were 351 cubic yards of concrete placed, making a total of 1,163 cubic yards.

GATUN SPILLWAY.

Backfill—No backfilling behind the spillway walls was done, the total on February 28, remaining at 16,495 cubic yards.

Concrete—A total of 3,028 cubic yards of concrete was laid during the month. Concrete work for the spillway is 97.2 per cent completed.

Excavation—There was no material excavated during the month, the total remaining at 1,591,261 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the ocean to Mindi—Seven dredges removed 250,491 cubic yards of earth, and 53,458 cubic yards of rock from the Canal prism. In addition, the dredge *Caribbean* removed 248,873 cubic yards of earth from the

Cristobal approach channel. On February 28, forty feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,400 feet, 30 feet to mile post 6 plus 2,300 feet, 20 feet to mile post 6 plus 2,350 feet, 10 feet to mile post 6 plus 2,800 feet. The *Terrier* drilled 2,290 feet, used 21,095 pounds of dynamite and shot 16,290 cubic yards of rock to minus 45 feet, mean sealevel.

West breakwater, Colon—There were 17,633 cubic yards of Porto Bello rock unloaded, of which 11,158 cubic yards were handled by cranes, and 6,475 cubic yards by the derrick barges, making the total amount unloaded to March 1st, 170,606 cubic yards.

MUNICIPAL ENGINEERING.

New Colon waterworks—Excavation for the sedimentation basin was commenced, and 1,154 cubic yards of material were removed. The walls of the clear water basin were constructed to elevations plus 16 and plus 11. The foundations were laid for the walls and pumps in the pump station, and the floor of the sump in this building was completed. A total of 367 cubic yards of concrete was laid.

The reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended as required to facilitate construction work.

Central Division.

During the month, the total amount of material excavated was 996,800 cubic yards, of which 190,131 cubic yards were classified as earth, and 806,669 cubic yards as rock. The entire amount was removed by steamshovels. Of this total, 990,496 cubic yards were primary excavation in the Canal prism, and 6,304 cubic yards were from the Obispo Division.

The daily average number of steamshovels at work was 38.8, and the total number of shovel days was 892½, as compared with 35.44 shovels at work, and 921½ shovel days in January. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	No. of steamshovels.	Classification of material		Av. No. of shovels at work	Work days	Av. Yards per shovel day
		Rock.	Earth.			
		Cu. Yds.	Cu. Yds.			C. Y.
Feb. 1913.	1,392.455	1,158.89	163,126	43.7	24	1,326.15
Jan. 1912.	888.8	888.8	1,111	38.8	23	1,111.00

Rainfall at Empire 1912, 34 ins.; 1913, 77 ins.

The above table shows the average output per shovel to be 15.77 per cent less in February, 1913, than in the corresponding month of 1912.

The total amount of material excavated from Culebra Cut in February, 1913—996,800 cubic yards—is the lowest record in that section for the month of February since 1907; in February of that year 646,806 cubic yards were removed.

The entire amount of material removed, and to be removed, in the Central Division, according to estimate of July 1, 1912, was 106,416,221 cubic yards. Owing to the development of new slides and the renewed activity of others which had for many months been at rest, a large amount of material has recently been brought into the Canal prism, as a result of which it became necessary on February 1 to revise this estimate by adding 5,635,251 cubic yards, making a total of

112,051,472 cubic yards removed and to be removed, which includes approximately 300,000 cubic yards of wet excavation in the Chagres section.

The estimated amount of dry material removed, and to be removed, according to the revision of February 1, is 111,751,472 cubic yards. Up to March 1, 1913, 103,048,272 cubic yards had been removed, leaving 8,703,200 cubic yards to be removed, in order to complete all dry excavation in this division. At the close of the month 92.21 per cent of all dry excavation was completed. On February 28, the status of the work in the two sections which compose this division was, as follows:

Culebra Cut	Chagres Section
Completed 100 per cent	Completed 95 per cent
Excavation is completed	Excavation is completed

There were furnished during the month to the Panama Railroad Company, for the Cristobal mole, 22,743 cubic yards of stone, the total amount furnished to February 28 for this purpose being 212,099 cubic yards.

There were 45,513 cubic yards of material dumped from Naos Island trestle, making a total of 1,223,080 cubic yards. Work was continued on the double track trestle, 416 lineal feet being driven during the month.

There was employed a daily average of 6,205 laborers, while the average number of gold men working was 589.

Quartermaster's Department.

Labor—The force report of February 26 showed 38,299 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 5,112 men. The arrival early in the month of the 428 laborers from Barbados relieved the shortage in unskilled labor, although there is still an unsatisfied demand for 10-cent laborers.

Buildings—Two type 5 houses were removed from Gorgona and reerected at Corozal. The construction of a new radiostation Balboa was begun.

Quarters—In spite of the erection of two bachelor quarters at Corozal, congestion in quarters continues at that point. This crowded condition is due to the fact that the contractors are now transferring their men from Gatun to the Pacific locks. On February 28, there were in all Commission quarters approximately 1,400 more people than in July, 1912, the greatest increase being in the Corozal district.

Material and supplies—The value of material received was \$1,160,031.96. This material came forward in 36 steamers, the total weight of cargo, exclusive of lumber, piling, and ties, being 34,235 tons.

Subsistence Department.

The Hotel Tivoli showed a net profit of \$23,994.82. The operation of the line hotels, European laborers' messes, colored laborers' kitchens, restaurants, tugs, and dredges returned a net profit of \$2,475.61. The total net profit on subsistence operations during the month was \$26,470.43.

Department of Civil Administration.

COURTS.

During the month, 60 civil and 42 criminal cases were disposed of in the Circuit Courts, and 81 civil and 503 criminal cases in the District Courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$428,241.99, and the fees to \$2,021.89. Receipts from

stamp and card sales and newspaper postage aggregated \$8,851.52. The total collection of revenues made was \$17,128.99, and the collections on account of court fines, costs, and fees \$2,748.89. A total of \$144,405 was deposited in postal savings accounts and a total of \$84,290 was withdrawn. At the port of Ancon, 20 vessels entered and 17 cleared; at the port of Cristobal 34 entered and 38 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 536, of whom 470 were men and 66 women. Twenty-one nations, or 44 separate states and dependencies, were represented. There were six convicts committed to the penitentiary, and eleven were discharged, leaving 119 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,738.03 and the value of the work performed by them on the roads of the Canal Zone was \$2,042.40.

FIRE PROTECTION.

There were 33 fires reported in the Canal Zone. The total damage occasioned by these fires was \$20,415.98.

PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 2,002,821 gallons, and in Colon, 1,280,578 gallons. The usual inspection and maintenance work in this division was performed.

SCHOOLS.

The net enrollment in the white schools was 1,319, the average number of pupils belonging was 1,122.2, and the average daily attendance 1,046.6. In the colored schools the net enrollment was 1,417, the average number belonging was 1,005.9, and the average daily attendance 809.6. At the close of the month, there were employed in the white schools 47 teachers and in the colored schools 31 teachers, the total being the same as employed at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 42, divided, as follows: From disease 27, and from violence 15, giving an annual average per thousand of 5.86 and 3.25, respectively. The annual death rate per thousand among employes for the month of February, 1912, was 10.57.

The annual average death rate per thousand in the Canal Zone and in the cities of Colon and Panama, including both employes and nonemployes was 21.10. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and populations in Colon and Panama, respectively, of 20,232 and 47,172, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of February, 1912, was 16.33.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites, 6.52; blacks, 5.65, giving a general average for disease of 5.86. For the same month during 1911 the annual average death rate per thousand from disease among whites was 5.67; blacks, 6.47, giving a general average of 6.27; and for the same month during 1912, whites, 4.61; blacks, 7.34, giving a general average of 6.66.

Among employes, deaths from the principal diseases were, as follows: Abscess of liver,

entamoebic, one; hæmoglobinuric fever, one; pneumonia, four; malaria, one; tuberculosis, five, leaving 15 deaths from all other diseases, and 15 deaths from external violence. On December 15, 1912, all the sick camps were closed, except those at Culebra, Toro Point, and Porto Bello.

No case of yellow fever, smallpox or plague, originated on, or was brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman and Chief Engineer.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The last of the weekly meetings of the Woman's Altar Guild of St. Luke's Hospital Chapel was held at the home of Mrs. Frank Feuille, on Tuesday morning, March 18, at which time it was decided to hold further meetings on the first and third Tuesdays in each month at 9.30 a. m. These meetings will be devoted to sewing for charitable purposes.

A brake will be run from Culebra to Empire on Friday evening, March 28, leaving at 7.30 o'clock, for the convenience of those

who may desire to attend services at St. Mary's Church.

Gatun Basketball Club.

The Gatun basketball club gave an entertainment at the Commission clubhouse on Saturday evening, March 15, which consisted of a burlesque basketball game, ladies vs. men, followed by a masquerade ball. Prizes were awarded, as follows: For the most attractive costume, Mrs. E. McTucker, "Quaker girl," for the most original costume, Mrs. J. Ward, "Sunflower girl," for the best men's costume, W. J. Humphreys, "Spanish cavalier," for the most original costume, C. V. O'Meara, "Irish gentleman."

Girls' Athletic Club.

A girls' athletic club of about 18 members meets at the Commission clubhouse, Gorgona, on Saturday afternoons from 5.15 to 6.30 for physical culture training. Following the class work, under the physical director of the clubhouse, the girls play basketball for a half hour.

Married.

CLEGHORN-WITMER—At the Union Church, Cristobal, on March 24, Miss Jennie Esler Witmer of Pittsburgh, Pa., to Mr. Robert John Levy Cleghorn of Barnstable, England, the Rev. Carl H. Elliott officiating. Residence, New Jersey.

FOX-GEHRKE—At the Union Church, Cristobal, on March 25, Miss Esther Amelia Minnie Gehrke of La Porte, Ind., to Mr. Maurice Winslow Fox of Detroit, Mich., the Rev. Carl H. Elliott officiating. Canal Zone residence, Culebra.

SNYDER-BEELER—At the Union Church, Cristobal, on March 20, Miss Lydia Alice Beeler of Greencastle, Ind., to Mr. Hubert Earl Snyder of Hagerstown, Md., Rev. Carl H. Elliott officiating.

Misdirected Letters.

ANCON, C. Z., March 26, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Baker, Miss Bessie R.	Knapp, G. E.
Barrow, Fred W.	Lingerfelt, Jake
Becker, J. G.	Miller, Mrs. Clara
Bennett, Samuel	O'Shea, Val E.
Burns, Robert	Reynolds, James
Byrnes, L. J.	Roberts, C. W.
Daughtery, Mrs. W. W.	Ross, Mrs. Chase C.
DuLude, L.	Reise, Geo. F.
Dunlop, Andrew	Schneider, Rev. F. M.
Entrikin, Herman	Taylor, N. S.
Fahey, M. J.	Thomas, James
Fitzpatrick, John	Todak, John
Foster, Mrs. R.	Tomy, Master William
Frye, Mr. and Mrs.	Van Ness, Albert
Hartman, Mrs. Galen C.	Vassan, Johan
Hudson, William I.	Viberg, George L.
Hyder, F.	West, Mrs. Ida
Jordan, James	White, C. J.
Kennedy, Edward	Williams, John William
Killingbeck, Arthur A.	

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

About 99 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on March 22, the amount in place being 4,392,940 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 97 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 22, being 1,993,421 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 221,996 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending March 22, and of the total follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone.	Total.	SPILLWAY.		
	Concrete placed	Hours worked.	No. of mixer.			Concrete laid	Hours worked	No mixers used.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is almost completed, 916,883 cubic yards, having been placed at the close of work on March 22. The record for each working day of last week, follows:

DATE.	AUXILIARY PLANT.						Mixed by hand	Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.

MIRAFLORES LOCKS AND SPILLWAY.

About 99 per cent of the concrete for the system of two twin locks at Miraflores was in place on March 22, the total amount on that date being 1,482,636 cubic yards, bucket measurement, out of a total of approximately 1,499,800. The record for each working day last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers			AUXILIARY PLANT. ½-cubic yard mixers.			Mixed by hand.	Large stone.	Total.	SPILLWAY. AUXILIARY PLANT.						Total.

*Includes 1,716 cubic yards laid by the Miraflores Locks construction plant—2 cubic-yard mixers; time included under locks.

PERMANENT WATER SUPPLY.

Gatun Lake Water to be Used as Auxiliary to Rio Grande in Pacific Section.

The committee, consisting of Mr. H. H. Rousseau, chairman; H. O. Cole, George M. Wells, James T. B. Bowles, and Luis Ernst, appointed to consider plans and make recommendations for a permanent water supply for the Pacific end of the Canal, has submitted its report, and same has been approved by the Chairman.

The plans contemplate the continued use of the Rio Grande reservoir, and the increasing of its capacity by raising the dam to elevation 265 feet, or 27 feet above the present crest. It is believed that with the increased capacity the reservoir will supply at least 6,000,000 gallons of water a day, except in years of minimum rainfall, such as 1888 and 1912.

It is further proposed to use the Camacho reservoir as an auxiliary supply. The surface of the water in this reservoir at high level is 100 feet above that in the Rio Grande, so that a gravity flow between the two reservoirs could be maintained by means of a pipe line, or by a small concrete-lined aqueduct laid around the main hills for a distance of about 13,000 feet. It is estimated that about 1,500,000 gallons of water a day would be added to the Rio Grande supply in this manner. Before final adoption of the Camacho pipe line, the committee recommended that an estimate be made of the cost of laying the line, as compared with an estimate of the cost of pumping the same amount of water a day from Gatun Lake.

Assuming that 7,500,000 gallons of water a day might be obtained from the above sources, the committee turned its attention to the matter of a further supply. The possibility of procuring water from the Pedro Miguel and Cocoli rivers was discussed, but the idea was abandoned in favor of Gatun Lake.

The plan of pumping water from the lake at a point on the west side of the Canal, just north of the entrance to Pedro Miguel Locks, would involve the installation and operation of electrically-driven pumps, but it would provide an absolutely certain supply during all months of the year, and would take care of a consumption far beyond the present estimate.

In studying the consumption charts for the past few years, based upon the total amount of water fed through the mains from Rio Grande and Cocoli, the committee found that the total consumption from Pedro Miguel south, exclusive of the Central Division engines hosted at Pedro Miguel, has increased rapidly from year to year, and now approximates 8,000,000 gallons a day. The consumption in Panama City has risen from 700,000 gallons to 2,000,000 gallons a day in six and one-half years. It was the opinion of the committee that the completion of the work at Pedro Miguel and Miraflores, resulting in the elimination of all steamshovels and locomotives, will not reduce the above amount by more than 800,000 or 900,000 gallons a day, or approximately 1,000,000 gallons a day, allowing for the amount of water used in lock construction. On the other hand, the concentration of the main shops, terminals, administration force, coast artillery force, Marine camp, etc., will, it is believed, more than offset the reduction in consumption due to closing down the Canal work, and that, therefore, the consump-

tion will probably not be less than 8,000,000 gallons a day when the Canal opens. If a force of 7,000 troops is stationed at Miraflores, it will use at least 700,000 gallons of water daily. If these troops should be stationed at East Culebra, it would still in all probability be more economical to supply water to them from the mains at Pedro Miguel, by pumping into a reservoir placed at or near Gold Hill, than to construct a reservoir on Pedro Miguel River, or some other stream. It is believed that a large increase may be expected in the amount required by Panama city. Provision is being made to furnish water along Las Sabanas road, and the indications are that the city may extend in that direction. The existence of docking and repair facilities at Balboa will no doubt lead to ships requiring fresh water before going to sea, but the scope of this demand cannot be foretold. At Gatun, including New Gatun, where a large number of houses are metered, the average daily consumption per capita is approximately 100 gallons. This does not include manufacturing plants. Based upon this, and on an estimated total of 68,929 people to be served, the amount of water required would aggregate nearly 7,000,000 gallons a day, exclusive of shops, railroad terminals, shipping, Naos Island, and the infantry camp. In view of the above, the committee recommended that the maximum normal supply should not be less than 12,000,000 gallons a day, and that the purification plant, pump station, and accessories be designed not only for that amount, but that provision be made for their future extension and enlargement without interference with the continuity of the supply.

The experience gained during the past six years, and particularly during the last year of the Agua Clara plant at Gatun, conclusively indicated in the minds of the members of the committee that the stream waters of the Isthmus yield readily to aeration, and aluminum sulphate treatment, followed by sedimentation and sand filtration. Heretofore, little attention has been given to the bacterial efficiency of the treatment, because practically all the water used for drinking purposes has been taken from uninhabited watersheds, with very little risk from contamination. In the proposed new water supply, the use of Gatun Lake water makes the matter of bacterial efficiency an important one. It is believed that a properly designed purification plant, with aeration and sedimentation, using aluminum sulphate, followed by rapid sand filtration, will take care of such water, but to provide against the possible contingency of pathogenic bacteria getting into the filtered water mains, it is proposed to use a bleaching agent—hypochlorite of lime—in addition to the aluminum sulphate, this agent to be used only when the daily analysis of the water indicates the presence of *B. coli*. The cost of this treatment would be small.

The committee considered the relative merits of pressure filters, as compared with the rapid mechanical gravity filters. It was shown that the first cost would be less, and that there would be an approximate saving in head of from nine to 15 feet by the adoption of the mechanical gravity type. It was further shown that filters of this type are rapidly supplanting those of the pressure type. The committee recommended their adoption.

It was believed that in using both the present 20-inch and 16-inch mains from the Rio

Grande reservoir into Panama, the best plan would be to install pumps on these lines just south of the proposed purification plant to act as "boosters" to the gravity head available, these pumps to be designed to deliver the maximum supply south of Corozal, with a terminal pressure practically zero at some point near the present low level reservoir at Ancon. At the latter point, it is proposed to install a second "booster" station with pumps directly on the main to lift water to the low and high level reservoirs. This line would be by-passed, so that the pumps could pump directly into the mains fed from the above reservoirs. All pumps and stations would also be by-passed, so that in case of trouble to the pumps, the head due to gravity would deliver some water through the mains. The "booster" pumps will obviate the necessity of laying an additional feeder line, at least until the estimate of 12,000,000 gallons of water a day is exceeded. "Booster" station No. 1 would probably be located on the west bank of the Canal, north of Pedro Miguel Locks, and would contain the supplementary pumps furnishing Gatun Lake water to the purification plant. "Booster" station No. 2 would likely be situated at some point near the present pump station at Ancon.

At the present time there are at Ancon two high pressure reservoirs, each of 1,000,000 gallons capacity, one situated on the east side of Ancon Hill at an elevation of 295 feet above sealevel, and the other on a knoll back of Hotel Tivoli, at an elevation of 138 feet. The committee was of the opinion that additional high pressure storage is necessary, and recommended the construction of a new 1,500,000-gallon reservoir immediately adjacent and connected to the present high level reservoir on Ancon Hill.

There is installed in the masonry of the emergency dam at the north end of Pedro Miguel Locks, a 24-inch diameter cast iron main carrying the water from the Rio Grande across the locks. It was the opinion of the committee that, as a measure of safety, and to provide for a possible future increase, an additional cast iron main, 30 inches in diameter, should be carried across the locks to a junction with the present 16-inch and 20-inch water mains.

The committee investigated a number of sites with reference to the location of the proposed purification plant, but refrained from making a recommendation, except that the plant be situated at the best point available on the west side of the Canal, north of Pedro Miguel Locks.

The committee recommended that such work be done as will make the old 16-inch main continuous from the Rio Grande reservoir to Panama, and that it be cross-connected to the new 20-inch main throughout its length. This will necessitate the laying of 3,940 lineal feet of new 16-inch main from the Rio Grande reservoir south along the present 20-inch main, the taking up and relaying of 2,700 feet of the old main from Pedro Miguel Locks north to join that part of the old main now in position, the taking up of approximately 11,600 feet of the 16-inch main now in use, lying within the Miraflores Lake area, and relaying it parallel to the 20-inch main along the Panama railroad and across the Miraflores tunnel hill, finally joining the present 16-inch main south of the Miraflores power house; and the laying of 3,100 feet of 16-inch pipe

from the block signal plant to the old low level reservoir at Ancon.

In view of the fact that the elevation of the purification plant, the size of the "booster" pumps, and finally the quantity of water that the mains may be expected to deliver in Panama depends on the correct value of the coefficient of friction for these lines, the committee recommended that friction tests be made, and that the results obtained be adopted in connection with the computations involved in the design of the different plants.

PERSONAL.

Gen. C. A. Devol returned from leave of absence on the *Colon*, which arrived at Cristobal on Monday, March 24.

The "Zonian."

The Canal Zone High School has issued the first number of its paper, *The Zonian*, for 1913, this making the seventh number issued since its establishment in 1910. *The Zonian* contains the usual features, including several local photographs. The list of exchanges printed in the exchange column includes papers from 21 high schools in the United States.

Missing Men.

Any one having information regarding the whereabouts of James B. Osborne of Upland, California, who is supposed to be on the Isthmus of Panama, is requested to communicate with the American Legation.

Any one having information regarding the whereabouts of Henry Willard French, who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of T. A. Brooks, who is supposed to be on the Isthmus, is requested to communicate with the Director of Posts, Ancon.

OFFICIAL CIRCULARS.

Assistant Division Engineer of the Atlantic Division.

CULEBRA, C. Z., March 19, 1913.

CIRCULAR No. 480:

Lieutenant Colonel William V. Judson is assigned to duty as Assistant Division Engineer of the Atlantic Division.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Filling Out of Twenty-four Trip Tickets.

CULEBRA, C. Z., March 20, 1913.

ALL CONCERNED:

Attention is invited to the instructions appearing on the cover of I. C. C. employees' twenty-four trip ticket, reading, as follows:

"Employee will fill in on coupon stations between which it is desired to travel and sign same before entering train."

It is reported that employees are not complying with these instructions, which results in considerable delay in the collection of transportation. In the future, failure to comply with these instructions will be reported to this office and proper discipline administered.

GEO. W. GOETHALS, Chairman.

Requests for Half-Rate Mileage Books.

CULEBRA, C. Z., March 24, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

A revised edition of Form C. E.-319, "Request for half-rate mileage books," is now in stock, the new form number being C. E.-319-1.

You are requested to requisition Mount Hope for a supply of the revised form, and upon receipt of same you will destroy any copies of Form C. E.-319 in your possession.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the clubs in the Isthmian duckpin bowling league on March 24 was, as follows:

Team.	Won.	Lost.	P. C.
Gorgona.....	7	2	.777
Culebra.....	7	2	.777
Cristobal.....	5	4	.555
Empire.....	5	4	.555
Gatun.....	2	7	.222
Corozal.....	1	8	.111

The moving picture schedule for the week March 31 to April 5 is, as follows:

Monday, Gatun; Tuesday, Cristobal; Wednesday, Gorgona; Thursday, Empire; Friday, Corozal; Saturday, Culebra; Friday, Porto Bello.

COROZAL.

Culebra took three games from the local team in the Isthmian Bowling League on Saturday, March 22, with the following scores:

Culebra.	Corozal.
Case..... 89 80 83	King..... 80 80 88
Steele..... 81 88	Beall..... 88 87 80
Brown..... 102	Roberts..... 77 79 86
Silver..... 82 93 90	Webb..... 86 84 94
Palmer..... 94 76 85	Dalton..... 80 96 87
Kiernan..... 79 89 99	

Totals.... 425 426 459 411 426 435

During the stay of the Tenth Infantry at Corozal, the moving pictures will be shown twice on the regular entertainment night, once for the soldiers, and again for the civilians.

CULEBRA.

High scores for the week in duckpins are, as follows: Case, 101; Steele, 103, 100; Warner, 102; Palmer, 107, 101.

The Gatun team will bowl at Culebra on Saturday night, March 29.

EMPIRE.

Thirteen men have been eliminated from the March handicap pool tournament having lost three games. The following is the standing of the first five men now in the tournament.

	Played.	Won.	Lost.
Donnelly.....	9	9	0
Swab.....	8	6	2
Eason.....	5	4	1
Cecil.....	5	4	1
Earle.....	4	2	2

The following games were bowled on the Empire alleys on Saturday, March 22: Empire and Cristobal in the Isthmian League, and Empire and Corozal in the "American" League. The Empire teams won two out of three in each league, as follows:

Isthmian.	American.
Empire..... 445 432 456	Empire..... 446 392 465
Cristobal .. 402 441 436	Corozal..... 440 412 388

A local tenpin bowling tournament has been started, 30 men having entered. They are divided into six teams of five men each. Tournament games will be bowled Monday, Wednesday and Friday evenings.

GORGONA.

The gymnasium classes will meet on Tuesday and Thursday as usual. The men interested in health recreation, and power are urged to join the class.

Gorgona took three straight games from Gatun on Saturday evening on the local alleys. Scores:

Gatun.	Gorgona.
Wurster..... 93 91 74	Sims..... 87 99 92
Green..... 81 82 77	Denst..... 106 74 78
Wells..... 101 73	Dunlap..... 88 83 102
DeMoll..... 77	King..... 100 114 114
Claherty..... 85 78 85	Davis..... 86 89 117
DePoorter..... 82 100	

Totals.... 437 406 336 467 459 503

The following are the scores over 100 during the week: Denst, 107, 102, 107, 115, 115; Arnold, 105; Regan, 103; Seebt, 123, 104; King, 103, 107; Davis, 109, 103; Moyer, 116; Dunlap, 106; Nelson, 109.

A handicap bowling tournament was held at the clubhouse on Good Friday, when ten men bowled for medals. A medal was given for high three games, as follows: King, first, three games, 294; Davis, second, three games, 279; high score, King, 107.

CRISTOBAL.

The Cristobal "Cardinals" defeated the Gatun "Outlaws" two games out of three in duckpins on Saturday evening, March 22. The number of spectators was unusually large.

A local wrestling tournament was held in the Gatun clubhouse on Tuesday night, March 25, with the following entries from which the contestants for an Isthmian tournament to be held in Gatun on April 16 were selected: Chas. E. Duer, Fred Huber, P. L. Martinoff, L. C. Wright, Henry Heine, Geo. Duer, Harry Koch, Harry Meyers, E. Childers, Lee Mitchell, Chas. Ragan,

J. A. Morrissey, J. W. Wilson, F. Jendres. Earl Parsons acted as referee.

At a committee meeting held in Gorgona last Saturday, it was decided to have the Isthmian wrestling tournament at Gatun instead of at Gorgona as originally planned, and the date was set for April 16. There will be two classes of contestants—"novice" and "open," the former for those who have not won matches, and the latter for all comers. Each match will be limited to nine minutes. An entrance fee will be charged and medals awarded winners. The referee has not yet been selected.

Saturday night the Gorgona chorus gave an entertainment assisted by the Tenth Regiment Orchestra. The solos, duets, and choruses were well received. The attendance was 170.

The moving picture date for Cristobal will be Thursday, March 27. The "smoker" will be given on Friday night. All members are requested to bring their friends.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending March 22:

Ancon, March 16, from New York, with 160,775 bags cement, for Atlantic and Fifth Divisions; 9 reels electric cable, First Division; 150 pieces castings, 386 packages brake beams, Mechanical Division; 8 pieces castings, Sixth Division; 24 bundles steel bars, 270 kegs white zinc, 11,000 pieces steel bars, 20 cases tool steel, 31 cases picks, 40 bundles claw bars, 35 pieces steel plates, for stock.

Sixola, March 16, from New York, with 25 reels electrical cable, 8 cases electrical material, 23 cases gate machinery, for First Division; 441 pieces structural steel, 1,429 pieces lumber, for Second Division; 342 bundles steel bars, Fifth Division; 58 packages steel doors, Panama Railroad Company; 20 kegs wire nails, 315 coils wire, 84 cases candles, 770 sacks oats, six barrels lime, 1C cases hardware, for stock.

Leelanaw, March 16, from San Francisco, with six cases hardware, for stock.

Pleiades, March 17, from San Francisco, with two crates rubber hose, for stock.

Carlago, March 17, from New Orleans, with 3,489 pieces yellow pine lumber, for Mechanical Division; 150 sacks tie plugs, 3,695 pieces cross-ties, 1,289 pieces yellow pine lumber, for stock.

Allianca, March 19, from New York, with 145 barrels sand, Mechanical Division; 34 bundles boiler tubes, 9 crates roofing material, for Atlantic Division; 56 cases gate machinery, First Division; 26 reels wire, 300 drums paint, 25 crates handles, 14 cases meters. 50 cases lanterns, 16 barrels glass jugs, 9 cases milk cans, 46 cases valves, 12 coils rope, 191 pieces wrought iron pipe, 50 bundles brooms, 12 cases rubber hose, 1,200 pieces steel bars, 992 bundles tie plates, for stock; and a miscellaneous cargo, the whole consisting of 3,398 packages, weighing 310 tons.

Almirante, March 20 from New York, with 94 packages pipe and fittings, for emergency dams; six pieces castings, Mechanical Division; 27 cases castings, First Division.

Abangares, March 20, from New Orleans, with 350 pieces white oak lumber, 218 pieces yellow pine lumber, for Mechanical Division; 2,764 pieces cross-ties, 16 pieces piling, 5,126 pieces yellow pine lumber, 10 crates handles, 10 pieces castings, 300 cases scouring bar, for stock.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending April 5, 1913. (75 meridian time.):

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
March 30.....	3.36	9.52	4.10	10.14	
March 31.....	4.30	11.18	5.31	11.46	
		P.M.			
April 1.....	6.03	12.40	6.48

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

Lost—On March 16, between the I. C. C. hotel at East Balboa, and Balboa docks, one bill fold, initialed "E. C. M." on inside, containing five ten dollar bills, one ticket on the National Theatre, Panama, Box "J," and one photograph of an elderly gentleman. Finder please communicate with Ancon police station.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning March 26, 1913:

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York via Kingston and Santiago de Cuba, sail thus: The *Karl Schurz* and the *Emil L. Boas* on alternate Wednesdays at 10 a. m., and the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m., ships for New York via Kingston, on Tuesdays, at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending March 22:

Arrivals—March 16, *City of Para*, from San Francisco; March 16, *Leelanaw*, from San Francisco; March 17, *Pleiades*, from San Francisco; March 17, *Manavi*, from Guayaquil; March 17, *Chile*, from Valparaiso; March 18, *Huallaga*, from Mollendo; March 18, *Trinculo*, from Port Harford; March 18, *Peru* (P. S. N.), from Guayaquil; March 22, *Peru* (P. M.), from San Francisco.

Departures—March 17, *Ucayali*, to Valparaiso; March 18, *Huasco*, to Valparaiso; March 20, *Ecuador*, to Guayaquil; March 20, *Astec*, to San Francisco; March 20, *Trinculo*, to Port Harford.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, APRIL 2, 1913.

No. 32.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Extension of Colon Reclamation.

The fill made in the swamp east of Colon, for the extension of the city from E to G streets, between the lines of Second and Ninth streets, has settled below the grade of the streets. Additional dumping to the extent of about 17,500 cubic yards will be made by the Panama railroad to bring the area to grade. G. street, the present western boundary of the swamp, is to be macadamized between Second and Ninth streets.

The area of reclamation between E and G streets is being extended to the south as far as Twelfth street by hydraulic filling from the pipe-line suction dredge excavating in the slips at the new Cristobal terminals. This area contains about 30 acres, and will probably be used as sites for factories. The present improvements on E street stop at 14th street. It is proposed to extend the macadam to 16th street, near the junction with the Mount Hope road, a distance of about 600 feet. The lots which this extension will make accessible are natural ground, a part of the original Manzanillo Island, and several feet above sealevel.

Work in Culebra Cut.

The work in Culebra Cut has advanced to the point where there is only about 8,000 lineal feet of distance left, exclusive of the drainage channel, in which the excavation has not reached grade in some part. This section is confined to that part of the Cut between Cucaracha slide, and the northern limit of the slide on the east bank, opposite Culebra village. Between Gold Hill and Contractor's Hill, a part of the drainage cut is down to grade, and visitors are now able to get a fairly clear conception of the final depth of the summit cutting.

On Saturday, March 29, there were 32 steamshovels working in the Canal prism in the Culebra Cut section; 13 of these were working on slide material, and the remainder in removing material at the bottom. This number is exclusive of the steamshovels

engaged in terracing the banks, and in miscellaneous operations. At the present rate of progress, it is estimated that about 5,500,000 cubic yards of material may be removed by October 1, the date at which operations by steamshovels will probably be suspended. This leaves between 2,000,000 and 3,000,000 cubic yards, based upon the recently revised estimate, that will have to be taken out by dredges if the water is let into the Canal on October 1. The amount to be removed in this manner will probably be increased by slides at different points along the banks between now and the end of the year.

Work on the Cucaracha slide is progressing favorably, and the output from it has been increasing day by day for the past month, or more, the record output being made on March 29, when five steamshovels removed 11,343 cubic yards of material. This is the largest amount of excavation from a single slide in one day since the beginning of operations by the United States on the Canal. The rock shoulder that formerly stood out prominently from this slide for two or three years before it renewed its activity, and which appeared to offer a stay to the mass of material behind it, joined the new movement, and has now moved into the Canal for a distance of about 80 feet.

Bombs Dug from Cristobal Harbor.

A number of 8-inch spherical bombs, and grape shot have been dug up by the 18-inch pipe-line suction dredge No. 4 excavating near the inner end of the slip, west of the new Pier 17 at Cristobal. About a dozen of the larger projectiles, and a peck of the smaller balls, were found in the stone box of the dredge on the night of March 20 and the morning of March 22, and it is estimated that a greater quantity went through the discharge pipe into the reclamation fill east of E street, Colon. A hand axe of a type used 50 years ago was also caught in the stone box. The dredge was excavating at about 18 feet below the surface of the sea.

The projectiles were encrusted with a kind of natural concrete, made up of coral deposits, sand, and shells, to a thickness of two inches. Below this was a coating of rust, beneath which the steel was clean and well preserved. The mark "ORD. D. 1862" was found in the interior of some of the larger projectiles. One which was opened contained black powder in a state of fair preservation.

Removal of Gamboa Engine House.

The Gamboa engine house and repair shop will be dismantled and reerected on the Gold Hill dump, east of the Canal, adjacent to the Panama railroad, where it will be more convenient of access to Central Division locomotives engaged in hauling material excavated in terracing back from the edge of the Cut. All arrangements will be of a temporary

character, as it is expected that the engine house will not be required more than ten months longer. At the old site, water used in hostling engines was pumped directly from the Chagres River; at the new site, it may be piped from Camacho reservoir. Power and lighting will be supplied by means of a cable line strung across the Cut. The ash pit at Gamboa would only accommodate one engine at a time, which limited the capacity of Gamboa to about one-half of the capacity of the yard and engine house. The new pit will have a capacity of five locomotives. Air will be obtained from the main on the east side of the Canal. Provision will also be made for repairing cars at the new site, including a car shed and necessary tracks.

Sunday Trips of Sightseeing Train for Employees.

The operation of the sightseeing train on Sundays, when 50, or more, employees have indicated their desire to make use of it, has been authorized. A flat rate of \$1.50 will be charged each employee. This train will start from Colon at 8 a. m., run over the three divisions and end the trip at Panama, making it necessary for passengers to return to their homes on the regular trains. Arrangements may be made direct with Mr. J. A. Smith, Superintendent, Panama Railroad Company, and must be completed in time, so that the Atlantic, Central, and Pacific Divisions can be notified not later than Friday afternoon preceding the Sunday on which the trip is made.

Apparatus for Testing Strength of Materials.

The results of nearly six months' use of the Riehle testing machine installed at Gorgona shops, for determining the strength of materials by tensile, compressive, transverse, and shearing tests, have been satisfactory with respect to the uses of such a machine, and to the quality of the castings made at the shops.

The apparatus is a 100,000-pound, United States standard, vertical, screw-power testing machine, furnished with a complete autographic attachment to record the strain diagrams automatically. Seven speeds are obtainable for the moving part of the testing frame proper, varying from 1/20 of an inch to eight inches per minute, for quick adjustment. Power is supplied by a 220-volt direct current motor, so connected and geared that the machine can be started, stopped, changed in speed, or reversed, conveniently and without danger to any of the mechanism.

The testing machine is used in investigating the strength of such materials as wire rope, leather, hose, boiler plate, steel castings, copper alloys, babbitt metals, coke, brick, wood, porcelain, and so forth. Such tests were formerly made with improvised apparatus, and specimens of cast steel and brass were occasionally sent to the testing bureau of the Watertown Arsenal, or to the Bureau of Standards at

NOTES OF PROGRESS.

(Continued.)

Washington. The machine is of especial value in connection with the steel and brass foundries. Specimens from each blow are turned to a standard section and length, screwed into blocks attached to the arms of the machine, and tested for tensile strength and elongation. This obviates the chemical analyses formerly made for each blow. They are now made only as a monthly check, or to determine the composition of such metals as do not meet the physical requirements. The machine is used

occasionally to test materials which have been shipped from the United States without the requisite tests, on account of urgent need.

Progress on Panama Station.

The walls of the new station of the Panama railroad in Panama have been erected to full height, and the roof over the main part of the building is almost completed. The tile columns along the front of the station have been stuccoed, and the balustrade surmounting them is being finished. The *porte cochere* at each end is erected, and, at the first-class, or south end, the connecting vestibule is almost finished. Passing through each coach

entrance will be a road, leading to the cabstand at the alighting platform, but the completion of this road will be delayed by construction work in the rear of the station. The entrance gates for first and second-class passengers have been moved from the immediate rear of the present station to the iron fence along the alighting platform.

The interiors of the waiting rooms are being plastered over the terra cotta tile of which the walls are built, and the ornamental ceiling of the first-class waiting room is almost completed. On the outside, only the columns and the roofs of the coach entrances have been plastered. The entire exterior is to be finished in stucco. It is expected that the building will be ready for use by July 1, 1913.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending March 29:

DATE.	Hours worked.	Cubic yards.
March 24.....	9.50	3,384
March 25.....	9.00	2,329
March 26.....	8.55	3,294
March 27.....	10.05	2,674
March 28.....	7.05	2,307
March 29.....	10.00	2,765
Total.....	54.55	16,753

New Pole Line Between Colon and Gatun.

A new telegraph and telephone pole line will be built between Colon and Gatun to carry a lead-covered cable, with a capacity of 30 pairs of wires, which will not only take care of the present open wires between the points mentioned, but will provide for 14 additional circuits. The change was made necessary partly on account of the automatic signal wires, and partly, because the clearance, between Mount Hope and Mindi, for the proposed transmission line would not be sufficient with the present pole route.

Radio Service.

The Naval radio station at Colon has been connected by wire direct to the Panama Railroad Company's telegraph offices, and radio messages to be dispatched to sea may be filed at any of the railroad offices open to commercial business. Tariffs may be obtained on application at local offices. Additional information concerning the radio service may be obtained from any officer in charge of the radio station at Camp Elliott, Bas Obispo.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 99 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on March 29, the amount in place being 4,404,268 cubic yards.

GATUN LOCKS AND SPILLWAY.

About 98 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on March 29, being 2,001,219 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 222,792 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending March 29, and of the total, follows:

DATE.	CONSTRUCTION PLANT 2-cubic yard mixers.				Large stone.	Total.	SPILLWAY.			
	Concrete placed.	Hours worked.	No. of mixer.	Concrete laid			Hours worked	No mixers used.		
	Cu. Yds.									
March 24.....	1,464	24.40	4	Cu. Yds.	Cu. Yds.	Cu. Yds.	136	7.50	1

MIRAFLORES LOCKS AND SPILLWAY.

Over 99 per cent of the concrete for the system of two twin locks at Miraflores was in place on March 29, the total amount on that date being 1,484,929 cubic yards, bucket measurement, out of a total of approximately 1,499,800. The record for each working day last week, follows:

DATE.	CONSTRUCTION PLANT 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixers.			Mixed by hand.	Large stone.	Total.	SPILLWAY. AUXILIARY PLANT.						Total.

*Includes 2,420 cubic yards laid by the Miraflores Locks construction plant—2 cubic-yard mixers; time included under locks.

SOCIAL LIFE OF THE ZONE.

Women's Clubs—Miscellaneous Notes.

The meeting of the Executive Board of the Canal Zone Federation of Women's Clubs will be held at the Hotel Washington, Colon, on Saturday, April 19. This will be the final meeting of the board and all business incidental to the closing of the federation will be transacted at this time.

Recent visitors to the Isthmus among club women of the United States have been Mrs. Emma Fox, official parliamentarian of the Daughters of the American Revolution, whose book on parliamentary usage is the authority used in the meetings of the General Federation, and Mrs. William Holden of the Twentieth Century Club, Detroit, former president of the Detroit Federation of Women's Clubs.

At the general meeting of the Cristobal Woman's Club on Wednesday, April 2, a paper on Jamaica was read by Mrs. Tracy Robinson. This is the last month of the club year and meetings scheduled are, as follows: April 9, home department, subject, gardening; April 16, art and literature department, subject, Stevenson's verse and song; April 23, annual meeting in the Commission clubhouse, at 3 p. m.

The home department of the Gatun Woman's Club met at the home of Mrs. J. H. Stevenson on Thursday afternoon, March 27. The program included discussion of current events. Refreshments were served. Meetings for this month will be held on the 11th and 18th.

The Empire Woman's Club held a social meeting at the home of Mrs. M. E. Smith on Thursday afternoon, March 27, in honor of Miss Jessie Smith, who is leaving on April 12 for a visit to her home in England. Miss Smith has been treasurer of the club for two years. She was presented with a gift of table linens as a memento of her work here.

Changes in the personnel, and removals of members from the Isthmus, were the causes which led to the decision to dissolve the Grand International Auxiliary to the Brotherhood of Locomotive Engineers at the meeting held at Las Cascadas on Friday afternoon, March 28. There were 18 present. The charter has been sent to the headquarters in the United States. The treasury contained about \$100, and this sum was divided between the Highland Park Home for Disabled Railroad Men at Chicago, and an orphanage in the same city. The auxiliary was organized on March 18, 1909.

The Washington Cotillion Club, organized to hold dances at the Hotel Washington on

the first and third Saturdays of every month, will hold its first dance on Saturday night, April 5, 1913.

Church Notes.

During the recent visit to the churches of the Episcopal mission in the Canal Zone, the Bishop of Cuba made ten visitations confirming 419 persons. The largest class for confirmation was at St. Stephen's, New Gatun, when over 100 candidates were presented.

An informal reception was held in honor of Bishop Knight at the Empire clubhouse, on Friday evening, March 28, at the close of the special service at St. Mary's Church, which was conducted by the bishop. The reception was under the auspices of the St. Mary's Woman's Altar Guild.

Easter gifts in the Canal Zone churches this year were unusually large, especially those of the women's societies and guilds. The Altar Guild of Christ Church, Colon Beach, gave an altar of artificial stone, and a credence table, which were used for the first time on Easter Day. The gifts were consecrated by Bishop Knight on the Sunday following. The gifts to St. Luke's Hospital Chapel were, as follows: From the Altar Guild, a new carpet, cushions for the altar rail; and from private contributors to the clergy, a set of candle shields, and a litany book. The Altar Society of St. Ferdinand's Church, Empire, gave a benediction cope and veil, altar linens, and surplices for the servers.

Orphan Asylum at Colon.

The Sisters of Charity in Colon are erecting a building in the new district of the city for the purpose of establishing an orphan asylum. The building, which is a frame structure, will contain dormitories for the accommodation of about 50 children, a schoolroom, rooms for the sisters, kitchen and laundry, and a chapel. In addition to the building lot and garden surrounding it, the Panama Railroad Company has given an extension of land which will be used as a playground. The work of establishing the asylum has been undertaken by the nine Sisters of Charity who conduct the Roman Catholic school in rented quarters at Cash and Seventh streets. The Sisters of this order came to the Isthmus as nurses in Colon Hospital in the time of the French canal. Upon the establishment of the new hospital system under the United States Government, they were retired from the service and opened their school which they have conducted since then. The orphan asylum will be open to children of any creed and nationality. For the poor it will be free, and those who can pay will be charged a small sum for board, the proceeds to be devoted to the maintenance of the institution. It is

expected that the building will be ready for occupancy about April 14. This is the first orphan asylum to be established in the city of Colon. The school, which has an enrollment of 200, will be removed to the new building.

PERSONAL.

Major General Alexander Mackenzie, U. S. A., retired, accompanied by Mr. and Mrs. W. A. Thompson of La Crosse, Wis., their niece, Miss Blanche Thompson; and Judge and Mrs. Charles C. Van Kirk of Greenwich, N. Y., arrived on the *Colon* on Monday, March 24, on a visit of inspection to the Canal. The party returned to the United States on the *Colon*, on Sunday, March 30.

Obituary.

Mrs. Walter S. Browning of Baltimore, Md., died while on the way to Ancon Hospital, on March 24. She was married, and had been on the Isthmus six years. She is survived by her husband, living at Las Cascadas.

John S. Wilcox, an employe of the Atlantic Division, residing at Cristobal, died at the Ancon insane asylum on Monday, March 24, aged 60 years. He had been on the Isthmus 20 years. He is survived by his wife, living at Plainfield, N. J., and a son, Claude I. Wilcox, living at Rodeo, Cal.

Immigration at Port of Colon During March.

According to the figures of the quarantine service, the number of persons who landed at the port of Colon from foreign ports during the month of March was 4,974, consisting of 1,713 cabin, and 3,261 steerage passengers. The number of persons who embarked for foreign ports during the same period was 3,324, consisting of 2,005 cabin, and 1,319 steerage passengers. The number of persons who landed over those who embarked was 1,650. Two thousand seven hundred and twenty-four of the persons arriving in steerage were from Jamaica and the West Indies; 177 were from Costa Rica, 183 from Colombia, 83 from Europe, and 33 from the United States.

The passengers arriving "in transit," consisting principally of tourists, numbered 5,827, as compared with 6,238 in February, and 4,044 in January. Of the 108 vessels arriving at Colon and Cristobal in March, seven were exclusively for tourists, but a much larger number of tourists arrived on the regular steamers. Three private yachts also arrived during the month, the *Clementina*, the *Noma*, and the *Vergemere*.

During the past six years the number of ships arriving at the port of Colon shows an increase of about 100 per cent.

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to January 31, 1913, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering.	General Items.	Fortifications.	Total.
Total to June 30, 1909.....	3,427,090.29		9,673,539.28	69,622,561.42	78,022,606.10		160,745,797.09

BRIDGE OVER FRENCH CANAL.

Plans Approved for Connecting Cristobal Yards with new Coaling Plant.

The plan for a permanent railroad connection from the Cristobal yards to a point in the vicinity of the proposed coaling plant on the island on the west side of the French canal, opposite dock No. 11, has been approved. This connection will be established by means of a bridge, with a span of the vertical lift, or bascule type, to permit the passage of vessels using the canal. Estimates were prepared by the chief engineer of the Panama railroad for two possible connections, one known as the upper, and the other, as the lower crossing. The adoption of the upper crossing was recommended, because it will provide for future development along the present drydock and shops, and can, if necessary, be connected with the main line at a point south of the Mount Hope station. This crossing will also make available a considerable area of water front on both sides of the French canal. The estimate of cost for the upper crossing was lower, as the adoption of the other would require the sinking of steel cylinders in some cases to the depth of 100 feet.

In establishing connection with the island, approximately 6,856 lineal feet of track will be laid, involving the use of 97,200 cubic yards of material to bring it to grade, and the building of about 1,900 feet of temporary trestle. The bridge over the French canal will be about 320 feet in length between the east and west abutment piers, and will be constructed of girders taken from the Barbaecos bridge, with the exception of the vertical lift span 110 feet long. A total of about 364,000 pounds of structural steel and parts will be used in the construction of this span, exclusive of the weight of the operating machinery. The machinery for the lift will be electrically operated.

The bridge superstructure will be supported by six piers; the east abutment pier will be of concrete built on creosoted piles; the center pier for the east approach span will consist of three 4-foot cylinders driven to rock; the east and west channel piers, on which the ends of the vertical span will rest, will be built of six 6-foot, and eight 6-foot steel cylinders, respectively; the center pier for the west approach span will be of three 4-foot steel cylinders, and the west abutment pier will be of concrete resting on solid rock, for which, some excavation, both wet and dry, will have to be done. All steel cylinders will be filled with reinforced concrete. The work on the project will be begun at once.

Railway Mail Clerk Examination.

Examination will be held probably the first Sunday in May for appointment to the position of railway mail clerk in the United States. Applicants should request from this office a copy of Form 1407, which contains all the information published in regard to this examination. Applications should be secured from and filed with this office. Applications will not be received after April 11; this date may be changed if necessary.

In this examination rigid requirements obtain in regard to age, height, and weight; and applicants should have medical certificates in applications executed by the district physician at Culebra, or at Ancon or Colon hospitals.

This examination is given in two grades or

degrees of difficulty of the subjects thereof, dependent upon the residence of the applicants as shown in answer to question 4 of the application. Such residence must therefore be shown in a State or Territory of the United States, and county thereof, up to the time of filing application.

The examination will probably be held in the Commission clubhouse at Empire, but the place and date of examination should be omitted in applications

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., March 29, 1913.

Work on West Bank at Culebra.

In order to continue the work of terracing the west bank of the Cut at Culebra village, the wagon road paralleling the Canal at this point, which establishes connection between the village and the labor camps at Enterprise and Rio Grande, and with the settlement at Rio Grande, will be moved further back. Nine buildings, which face the road, will also have to be taken down. Steamshovel No. 207, which has been working on the upper level, will be set at work on a berm lower down until such time as the buildings have been removed and the road relocated, when it will resume its former position.

The "Advance" in a Storm.

The Panama railroad steamship *Advance*, which was due to arrive at Cristobal on Tuesday, April 1, will not dock until Thursday, April 3. The vessel encountered a storm between the southern point of Florida and Cape Maysi, Cuba, which compelled it to proceed under reduced speed. A wireless report received states that the storm did some damage, principally to the ship's forecastle deck. The steamer *Cristobal*, which was proceeding in the same direction and at no great distance away, was ordered to stand by and render assistance if needed. The *Cristobal* is also due on Thursday.

Joint Land Commission.

The Joint Land Commission held its first public hearing on Monday, March 31, in its rooms in the National Palace, Panama. Sessions for the hearing of claims will be held from 8.30 a. m., to 12.30 p. m., on Mondays, Tuesdays, and Wednesdays of each week, the remainder of the week being devoted to executive sessions and visits of inspection.

Operations of French Scrap Contractor.

The first large shipment of the French scrap collected by the Chicago House Wrecking Company on the Isthmus, under contract with the Isthmian Canal Commission, is to be made to the United States in the steamship *Fairmead*, now taking on a cargo at Dock 14, Mount Hope. The vessel will be loaded with about 3,000 tons. About 40,000 tons remain in the yard in the rear of the wharf, and a quantity which cannot be estimated accurately is yet to be collected by the contractor; included in it are twelve abandoned ladder and suction dredges.

A fire was discovered about 7.12 p. m., on Wednesday, March 26, in the cattle pen in the native village at Empire. It is believed to have originated by sparks from a passing locomotive. The damage is about \$200.

David M. Sasso has been appointed consul for The Netherlands in the Republic of Panama.

BOAT LANDING AT GATUN.

Three Hundred Foot Wharf for Tugs, Launches and Smaller Craft Plying Gatun Lake.

The concrete wharf under construction by forces of the Panama railroad about two hundred yards east of the east wing wall for the approach to Gatun Locks from Gatun Lake, will be a landing place for tugs and other small craft. The entire wharf will be 298 feet long, and 30 feet wide. For a distance of 170 feet four inches from the east end, it will have its floor at elevation 92 feet above the normal level of the lake. Tugs and steam launches will receive and discharge cargo and supplies here. The remainder of the wharf, next to the locks, will be only a foot above the maximum level of the lake, with the floor at elevation plus 88 feet. This part will be used by cayucos, rowboats, and small motor boats.

Concrete stairs will connect the upper and lower portions. At each end of the wharf will be a floating landing, made of steel barge planked over and connected with the stationary structure by a wooden ramp, 16 feet long and the width of the wharf. This will insure easy landing, whether the lake be above or below the normal level. The water will be about 16 feet deep alongside.

No cargo-handling apparatus is to be installed. A railroad track with the top of the rails at elevation plus 88.31 feet, will run alongside the rear of the wharf, the center line of the track six feet from the inner face of the retaining wall.

The upper part of the two-level wharf is designed to support a live load of 500 pounds, to the square foot, the lower part a load of 250 pounds. The supporting piers are concrete columns of square sections, two feet on the side, reinforced with four vertical 70-pound steel rails. They will be spaced on 13-foot centers, transversely; longitudinally, they will be an average of 21 feet apart beneath the tug landing, and 31 feet apart beneath the part for smaller boats.

The floor of the lower and upper portions of the dock will be 10 and 12 inches thick, respectively, and will rest on stringers of 36-inch plate bridge girders, reclaimed from bridges on the abandoned old main line of the railroad. Crosswise support will be on reinforced concrete struts linking the pillars, and each having a reinforcement of eight 1½-inch twisted steel rods.

The columns rest on rock, but the 2-foot retaining wall along the rear of the wharf is built on a base, four feet wide and two feet high, resting on piles. The piles are spanned by 70-pound rails, resting on their tops; and vertical reinforcement consists of upright rails, bound with horizontal twisted steel rods.

Examinations by Board of Local Inspectors.

Examinations for pilots, masters, mates, engineers, chauffeurs, and navigators of motor boats, will be held by the Board of Local Inspectors at the Administration Building, Ancon, on Wednesday, April 9, 1913, beginning promptly at 8 a. m. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to operate same.

LOWER APPROACH AT GATUN.

Special Form of Center Guide Wall Necessitated by Salt Water and Deep Foundation.

The lower approach wall of Gatun Locks, at the Atlantic end, differs from the five other approach walls in the Canal lock construction. The cellular form of reinforced concrete used for the upper approach walls

construction, with consequent economy, as well as to afford better bracing for the forms in the erection of the piers, the stepped arch was adopted. The lower part of each riser is on the circumference of a regular segment, with 42-foot radius, so the strength of the arch is not diminished. Reinforcement in the base consists of twenty continuous longitudinal rows of 70-pound rail, resting on the

A transverse section of the wall is shown in Sketch B. Each pier, as shown, consists essentially of two piers, connected by a semicircular arch. The horizontal normal section of each component is 18 by 10 feet; the inner sides are vertical for a height of 22 feet five and 11-32 inches, this point above the base being the springing line of the arch, which has a radius of 11 feet. On the outer faces the piers

SKETCH A—SIDE ELEVATION OF LOWER APPROACH WALL AT GATUN LOCKS.

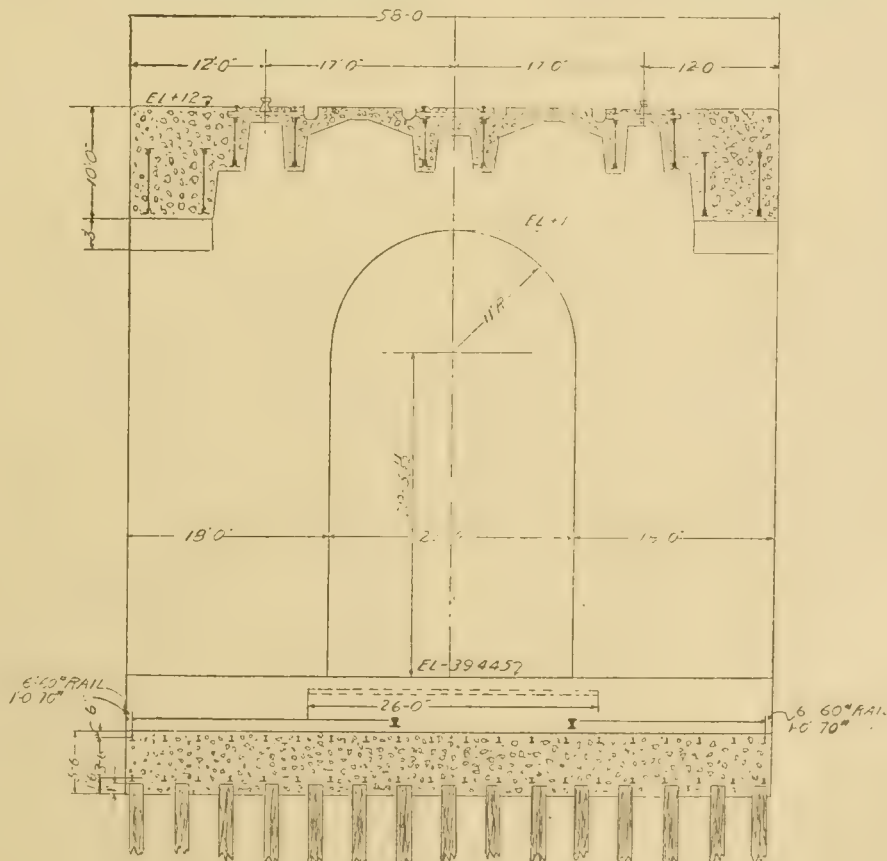

at Gatun, Pedro Miguel, and Miraflores Locks could not be used in sea water, because of its possible effect on the steel reinforcement. The heavy U-section, double gravity-wall, used for the lower center guide walls at Pedro Miguel and Miraflores, and founded directly on rock, would be too heavy for the relatively insecure base in the lower approach to Gatun Locks, where, after excavation has been carried to a maximum of 50 feet below sealevel, the use of long piles is necessary to reach rock, which in places is over 100 feet below sealevel.

The structure planned to meet these conditions comprises a series of piers, connected by flat spans above, to form a causeway of successive flat-span bridges. The original plans contemplated that the piers should rest on broad bases surmounting the piles, but would not be connected at bottom. Excavation revealed, however, softness in the earth overlying the rock which was not shown by the borings made at the time of determining the lock site. It became necessary to bind the piers together and protect them against transverse sliding. Accordingly, the piles, which are driven on four-foot centers, longitudinally and transversely, and on 3-foot centers for the outermost two hundred feet, are surmounted by a continuous base of concrete, which extends a foot below the top of the piles.

This base is 58 feet wide. The bottom is level, but the top is a series of inverted stepped arches, described on a radius of 42 feet. The haunches between the successive inverted arches form the bases of the piers of the flat-span bridge. At the lowest step of the inverted arches, the thickness of the base is five feet seven inches; at the springing line it is 10 feet seven inches. Several of the arches were constructed with the soffit on a curve, but for the sake of speed in

tops of piles; and duplicate rows of similar rail four feet six inches higher up. The side elevation of the base, and of a portion of the

are vertical from base at elevation—39.37 feet, to the top, which is 12 feet above sealevel. The shaded sections shown in Sketch

SKETCH B—SECTIONAL VIEW OF DUAL PIER.
(Twenty of these piers, 50 feet apart, support the causeway.)

completed wall, is shown in the accompanying sketch marked A.

B are not parts of the pier proper, but of the spans connecting the piers in the causeway.

The piers, 20 in number, are set 50 feet apart, center to center. The spans connecting them are carried by four 6-foot, and six 4-foot 6-inch plate girders, encased in concrete. The tops of the spans will be left uneven, in preparation for the grouting necessary to the laying of track for the towing locomotives.

The six spans of wall nearest the locks are closed by 2-foot curtain walls. This is to prevent water from surging from one approach channel to the other, between the piers, when a lock is discharging. Beyond the sixth pier the spans will be open, and the bottom of the spans will be two feet above the water. The wall will extend 1,016 feet from the line of the fender chains, and will contain approximately 45,000 cubic yards of concrete.

JOINT LAND COMMISSION.

Amendments to Rules.

At the session of Tuesday, April 1, the Joint Land Commission announced the following amendments to the rules of procedure:

Rule XIV. The following clause to be added to Rule XIV:

"A copy of such answer shall be served upon the claimant or upon his attorney in fact or agent."

Rule XV. The following clause to be added to Rule XV:

"In all cases, however, twenty minutes will be allotted to counsel for the claimant for final summing up. This limit of time may be extended by the Commission."

Additional Rule, to be marked No. XXI.

"XXI. Subpoenas, at the request of counsel for the United States, or of any claimant or his representative, shall be issued by the secretary of the Joint Land Commission, which said subpoenas may be served by the police of either government."

It is the intention of the Commission to give notice to claimants or their attorneys of the time set for inspection of properties. It does not seem necessary to the Commission, however, to burden the rules with minute details of procedure.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending March 29:

Carrillo, March 23, from New York, with seven cases electrical material, 24 cases electric fans, eight reels electric cable, for Mechanical Division; 26 reels insulated wire, 113 cases electrical material, 24 reels electric cable for First Division; 57 pieces steel angles, 12 pieces steel channels, 100 cases toilet paper, 250 cases linseed oil, 10 cases hardware, for stock.

Colon, March 24, from New York, with 12 barrels pipe-fittings, seven cases mining machinery, 81 pieces steel plates, 17 crates cant hooks, 10 cases iron netting, 12 bales rubber hose, 14 bundles tank gauges, 66 kegs rivets, 10 cases paint, 250 kegs bolts, 3,002 bundles steel bars, nine cases writing paper, for stock; 60 cases brake shoes, 98 coils copper wire, 25 cases tools, 54 cases incandescent lamps, 20 kegs dioxide, for Mechanical Division; 168 cases drugs and sundries, for Sanitary Department; and a miscellaneous cargo, the whole consisting of 4,330 packages, weighing 410 tons.

Heredia, March 24, from New Orleans, with 265 packages castings, 856 pieces lumber, for Mechanical Division; 531 pieces cross-ties, seven crates oars, 5,846 pieces lumber, for stock.

Prinz Eitel Friedrich, March 25, from New York, 16 barrels silica wash, 40 casks ingot copper, for Mechanical Division; 51 packages channel buoys, for Light House Division.

Fairmead, March 25, from Mobile, with 525 tons pig iron for Mechanical Division; 29,000 pieces cross-ties, for stock.

Santa Maria, March 27, from New York, with 183 cases soap, 31 barrels rosin, 67 cases galvanized pails, 10 cases paper, 12 cases sundries, for stock; 159 bundles steel bars, for fortifications; 11 reels cable, 11 cases electrical material, 14 cases castings, for First Division; 412 packages structural steel, for Second Division.

Atenas, March 28, from New Orleans, with 529 pieces lumber, for Mechanical Division; 1,310 pieces cross-ties, 480 sacks dairy feed, six pieces piling, for stock.

OFFICIAL CIRCULARS.

Transfers to Mechanical Division.

CULEBRA, C. Z., March 29, 1913.

CIRCULAR No. 349-B:

1. Effective May 1, 1913, the car department of the Panama Railroad Company, including the car shop, paint shop, planing mill, dry house, and blacksmith shop, and the inspection of cars in the Cristobal and Colon yards will be transferred to the Mechanical Division of the Commission.

2. On and after May 1, 1913, the Mechanical Division will inspect and repair and will perform all other work in connection with the maintenance of all cars belonging to the Panama Railroad Company as the General Superintendent may require.

3. Effective April 28, 1913, the car shop at Empire will be transferred from the Quartermaster's Department to the Mechanical Division.

4. After May 1, 1913, repairs to all classes of cars, except Lidgerwood and steel dump cars, will be made in the Cristobal shops, and repairs to Lidgerwood and steel dump cars will be made in the Empire shops. Repairs to steel flat cars and ballast cars, and emergency repairs to any class of cars, will be made at either place as may be most convenient.

5. On May 1, 1913, the foreman, two leading men, four car repairers, three inspectors, and one clerk (all gold employees) and such of the silver force as may be required will be transferred from the Panama Railroad Company to the Mechanical Division of the Commission.

6. Such of the tools, machines, and equipment now in the Cristobal shops as will be required in the performance of the work to be done therein will be lent by the Panama Railroad Company to the Commission, and the Superintendent of the Mechanical Division will give memorandum receipt therefor, as prescribed in paragraph 5 of Circular No. 370-D, dated September 27, 1912.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Shop Expense Percentage.

CULEBRA, C. Z., March 29, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

In accordance with the provisions of Circular No. 169-E the following shop expense percentage for each shop is hereby fixed, effective April 1, 1913, and will be applied, until further orders, to the distributed labor used in all shop work, in accordance with the provisions of Circular No. 264-A, viz:

Division or shop.	Shop expense percentum.
Mechanical Division.....	50
Dry Dock shop.....	65
Balboa shop.....	25
Porto Bello shop.....	60
Toro Point shop.....	30
Panama railroad shop.....	30

Circular letter from this office dated December 6, 1912, is revoked.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Reduced Rate Transportation via Royal Mail Steam Packet Company.

CULEBRA, C. Z., March 26, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

I am in receipt of the following communication from the local General Agent of The Royal Mail Steam Packet Company:

"Our head office have written us on the subject of abatements to Isthmian Canal Commission employees, pointing out that they have never authorized us to grant reduction other than between Colon and New York, their understanding being that the reduction was to favor employees when going to and from their homes in the States. They point out that we have been giving the reduction not only to New York, but to Southampton and all other ports served by this Company's steamers, and they instruct us that this should be discontinued. The advice sent you by this office under date of October 13, 1911, must, therefore, meantime be modified to this extent pending reply to letter which we have addressed to our head office. We have, however, told the company that we are taking the liberty to continue to grant the 25 per cent reduction on first-class and second-class passages not only to New York, but to the two intermediate points called at by our steamers, namely, Kingston, Jamaica, and Antilla, Cuba, for the reason that some of the employees may wish to use our steamers only to these ports and then make their way to New York by a different route.

We much regret to be under the necessity of communicating this news to you, but trust later to receive more favorable advices from our head office.

The special repatriation rate for the laborers being returned to Barbados will still hold good."

Hereafter, requests for reduced rate transportation on the above line will be issued only for first and second-class passage between Colon and Kingston, Jamaica; Colon and Antilla, Cuba; and Colon and New York.
GEO. W. GOETHALS, Chairman.

Rainfall from March 1 to 29, 1913, Inclusive.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The standing of the teams in the Isthmian Duckpin Bowling League on March 31 was, as follows:

Team.	Won.	Lost.	P. C.
Gorgona.....	9	3	750
Culebra.....	8	4	667
Empire.....	7	5	583
Cristobal.....	6	6	500
Gatun.....	4	8	333
Corozal.....	2	10	167

The standing of the teams in the American Duckpin Bowling League on March 31 was, as follows:

Team.	Won.	Lost.	P. C.
Empire.....	4	2	667
Gatun.....	3	3	500
Cristobal.....	3	3	500
Corozal.....	2	4	333

The moving picture schedule for the week April 7 to 12 is, as follows: Monday, Gorgona; Tuesday, Culebra; Wednesday, Cristobal; Thursday, Corozal; Friday, Gatun and Porto Bello; Saturday, Empire.

The next United States entertainment company will arrive on the Isthmus April 7. This company is known as "Walter Eccles and the Four College Girls." The following schedule has been arranged: April 8, Gatun; April 9, Gorgona; April 10, Empire; April 11, Cristobal; April 12, Porto Bello; April 14, Culebra; April 15, Corozal.

COROZAL.

The Corozal duckpin bowling team lost two out of three games to Empire on the Corozal alleys on Saturday night, March 29.

The Corozal basketball team lost one game to the Tenth Infantry team on Friday night by a score of 21 to 6.

Mr. W. K. Cooper gave a short, but interesting talk on Thursday night.

The Tenth Infantry band concerts which have been given in front of the clubhouse nightly for the last two weeks will be missed by the residents of Corozal. The soldiers struck their tents and returned to Camp Otis on Saturday and Sunday, March 29 and 30.

CULEBRA.

The local team lost two out of three games of duckpins to Gatun in the Isthmian League on Saturday night, March 29, with the following scores:

Gatun.....	508	409	465	Culebra.....	460	479	427
------------	-----	-----	-----	--------------	-----	-----	-----

High scores for the week are, as follows: Kiernan, 102, 100; Palmer, 108, 115; Brown, 104, 102, 100, 106, 100; Steele, 105, 109, 106; Case, 108, 117; Durand, 101, 108; Warner, Jr., 102.

The Cristobal team will bowl at Culebra on Saturday, April 5.

Moving picture dates have been exchanged with Corozal. Pictures will be shown at Culebra Friday night, April 4. Mr. Weston of Cristobal will sing songs illustrated by stereopticon.

EMPIRE.

The standing of the local tenpin tournament, which started during the past week, are, as follows:

Teams and Captains.	Won.	Lost.	P. C.
Giants, C. J. Huson.....	3	0	1.000
Athletics, J. Whaler.....	3	0	1.000
Senators, C. Davis.....	2	1	.666
White Sox, S. Bardelson.....	1	2	.333
Cubs, G. Gustavson.....	0	3	.000
Tigers, L. Giavelli.....	0	3	.000

The high score to date is held by J. Whaler—203—who also holds the high score for three games—497.

On Saturday night, March 29, Empire took three games from Cristobal in the American League series. Scores:

Empire.	Cristobal.
Hill..... 82 79	Buser..... 75 94 92
Grund..... 87 83 94	Farr..... 71 74 78
Mengel..... 78 86	Tuttle..... 76 86 75
Lowande..... 80 96 82	Cotton..... 85 84 87
Huson..... 82 90 85	Vandeburgh 86 88 88
King..... 101 87	

Total..... 409 449 434 393 426 420

The Gorgona boys played the Empire boys at indoor baseball on Saturday afternoon, March 29, and won by a score of 27 to 15.

A game of indoor baseball was played Saturday night between Camp Elliott and Empire, which resulted in a defeat for Empire. Score by innings:

Empire.....	1	0	2	2	1	4	5	4	0—19
Camp Elliott.....	4	2	1	3	0	2	3	4	3—22

The indoor baseball league opens April 19. Candidates for the teams are requested to begin practice now. Two nights each week will be reserved for this purpose.

The glee club held its first meeting on Wednesday night with an attendance of 14. New music has been procured from the United States, and, under the direction of H. W. Dohrman, it is hoped that the club will soon be able to give a concert.

All men who are interested in chess or checkers are

invited to meet on Monday night at 7.30 to aid in forming a chess and checker club.

A new list of books is being made up. Any suggestions will be welcomed.

GORGONA.

Increased interest is being shown in the gymnasium. Every week new men have joined the classes, which are held on Tuesdays, and Thursdays. Twenty-two boys have joined the boys' classes, and all are trying out for the team contest in class work, games, and special sports for boys.

A Spanish class has been organized, with eight members. If there are any more who desire to learn Spanish they are requested to hand their names to the secretary.

The Culebra chess team will meet at Gorgona on Saturday night for a special contest. All lovers of chess are invited to attend.

The discussion club will meet on Thursday evening, and a special debate will be held. Messrs Morrison and Borrows will meet Messrs Wight and Ewing; subject, "Resolved, that restriction of the laws of immigration will be a detriment to the United States."

High scores for the week: King, 112; Seebt, 121, 104; Misal, 107; Norwick, 102; Dunlap, 100, 102, 110; Moyer, 106; Roper, 102.

GATUN.

Gatun defeated Corozal two games out of three in duckpins in the American League series played at Gatun on Saturday evening, March 29. Scores:

Gatun.....	423	426	413	Corozal....	430	403	376
------------	-----	-----	-----	-------------	-----	-----	-----

The first concert of the Walter Eccles and the Four College Girls Company will be held at Gatun on April 8. The seats will be reserved. Ticket are now on sale.

The following pictures are now on sale at the clubhouse: The "smoker," Y. M. C. A. building, anniversary reception, executive council, large group on the front steps, a "States" entertainment, moving picture crowd, pool room, Spanish class, pool team, reading room, barber shop, gymnasium class, and "Singbad" Company.

The Gatun indoor baseball team will play the Marines at Bas Obispo on April 4.

Arthur Pazaggli of New York sang at the motion picture entertainment held on March 28. His songs were "Pagliacci," "The Rosary," "Aida," "For all eternity." Mr. Weston sang four illustrated songs on March 31.

Louis DePoorter, pool room attendant at Gatun made a run of 51 balls at the clubhouse on the evening of March 26, and another run of 54 balls at the Hotel Washington on March 29.

A new class in Spanish for beginners starts on Wednesday evening, April 2.

Those interested are urged to take advantage of this opportunity, inasmuch as it will be several months before another class is formed.

In the local wrestling tournament on Tuesday evening, March 25, the following matches were held:

115-125-pound class—(a) Wright vs. Claybourne, won by Wright; (b) Wright vs. Kerrush, won by Wright.

125-135-pound class—(a) Martinoff vs. J. Wilson, draw; (b) Martinoff vs. J. Wilson, won by Martinoff.

135-145-pound class—(a) J. Duer vs. Huber, won by Duer; (b) J. Duer vs. Huber, won by Huber.

145-158-pound class—Ragan vs. P. G. Flynn, won by Ragan; Ragan vs. L. Mitchell, won by Mitchell; Mitchell vs. Dillon, won by Mitchell.

158-170-pound class—Kock vs. Carlson, won by Kock.

Heavy weight class—Myers vs. Jendros, won by Myers.

Burlesque—Huber vs. Jendros, resulting in a draw.

The general classifications for the library books as made in the new catalogue are, as follows: Nos. 1 to 24, biography; 25 to 49, education; 50 to 74, games; 75 to 99, physiology and hygiene; 135 to 184, travel and adventure; 185 to 234, religion; 235 to 264, poetry; 265 to 443, standard and classic authors; 435 to 449, plays and philosophy; 450 to 549, history and politics; 550 to 1499, fiction; 1500 to 2000, juvenile. The number of books in the library exceeds 1,000. New rules governing loan of books have been drawn up. Library cards can be used only by the member in whose name, and the names of his immediate family, the cards are drawn.

CRISTOBAL.

The results of the duckpin bowling match for the Isthmian League between Gorgona and Cristobal, follows:

Gorgona....	430	452	452	Cristobal...	469	441	449
-------------	-----	-----	-----	--------------	-----	-----	-----

A "smoker" was given on Friday night, the program being, as follows: Three selections by the Marine orchestra; solo by Mr. Mosher; solo by Mr. Paul Case; buck and wing dancing by Mr. O'Toole of the Tenth Infantry; address, "The inauguration and personnel of the new Administration," by Mr. Cooper, secretary of the Washington Y. M. C. A.; selection by the orchestra; solos; Messrs. E. L. Mosher and Paul Case; orchestra selection, and serving of coffee; solos by Messrs. Mosher and Case; wrestling, Mr. Fred Huber vs. Messrs. A. Farrell and William Frasher combined, resulting in a draw; wrestling, Mr. A. Quinn of Gorgona vs. Mr. R. Hughes of Cristobal; time, 10 minutes, draw; selection by orchestra.

The regular gymnasium classes will meet on Monday and Thursday nights. Indoor baseball will begin this month, and candidates are urged to report.

PORTO BELLO.

*Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—*Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m., returning leave Porto Bello 11 p. m., arrive Dock 13 at 3 a. m.

*Saturdays—*Leave Dock 13 at 9 a. m., arrive Porto Bello 11 a. m., returning, leave Porto Bello 2 a. m., arrive pier No. 4, Colon, 4 p. m.

*Every Saturday, except the first Saturday after the 20th of each month. Sailing No. 1—*Leave Dock 13 at 2 p. m., arrive Porto Bello 4 p. m., returning, leave Porto Bello at 4.30 p. m., arrive at pier No. 4, Colon, 6.30 p. m. *Sailing No. 2—*Leave Dock 13 at 6 p. m., arrive Porto Bello 11 p. m., returning, leave Porto Bello 12 midnight, arrive Dock 13 at 4 a. m.

*Every Sunday—*Leave Dock 13, 7 p. m., arrive Porto Bello 9 p. m., leave Porto Bello 9 p. m., arrive Dock 13, 11 p. m.

*Sundays, immediately following the 20th of each month ONLY—*Leave Porto Bello 6 a. m., arrive Dock 13 at 8 a. m.

TORO POINT.

*Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. Sailing No. 1—*Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2—*Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.

*Special, Wednesdays, ONLY—*Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m., returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

*Saturdays. Sailing No. 1—*Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. *Sailing No. 2—*Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5.30 a. m., arrive Dock 13 at 6 p. m.

*Sundays. Sailing No. 1—*Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. *Sailing No. 2—*Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5 p. m., arrive Dock 13 at 5.30 p. m.

Married.

ROHDEN-McKENZIE—At the Union Church, Cristobal, on March 24, Jessie McKenzie of Chattanooga, Tenn., to Mr. N. Rohden of Chicago, Ill., the Rev. Carl H. Elliott officiating.

Lost—A flat gold bracelet in Colon or Cristobal. Finder will be rewarded if same is returned to House 30, Cristobal, C. Z.

Lost—March 27, in Gatun, or on way to Colon Hospital, wallet containing money, I. C. C. hotel book No. 311,353, commissary book No. 63859C, and personal papers, valuable only to owner. Finder will please return books and papers to the owner's care, the McClintic-Marshall Construction Company, Gatun, and keep the money.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York via Kingston and Santiago de Cuba, sail thus: The *Carl Schurz* and the *Emil L. Boas* on alternate Wednesdays at 10 a. m., and the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m. ships for New York via Kingston, on Tuesdays, at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending March 29:

Arrivals—March 24, *Pachitea* from Valparaiso; March 26, *Limari*, from Valparaiso.

Departures—March 23, *Hualaga*, to Mollendo; March 24, *Peru* (P. S. N.) to Valparaiso; March 25, *Manavi* to Guayaquil; March 26, *Seward* to San Francisco; March 26, *City of Para* to San Francisco.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, APRIL 9, 1913.

No. 33.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications.

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Organization for Balboa Townsite Work.

The subdivision of municipal work of the Fifth Division, which will be used on the construction work in connection with the new townsite at Balboa, will be increased by the addition of 19 men on the gold roll, and 406 men on the silver roll, a total of 423. The approved organization includes one junior engineer, two transitmen, one general foreman, eight foremen, four carpenters, and three road roller engineers as the gold force; and three clerks, six foremen, three messengers, two storemen, three watchmen, five blacksmiths, 10 waterboys, 44 carpenters, 20 caulkers, six chainmen, one hostler, 50 ten-cent, 50 thirteen-cent, 100 sixteen-cent, and 100 twenty-cent laborers as the silver force.

Awards for Transmission Line Equipment.

Awards have been made for the greater part of the material required in the construction of the Cristobal-Balboa electric transmission line, 48 miles long, which will be the principal feeder of the proposed Isthmian transmission system, connecting a terminal substation at Cristobal with a similar one at Balboa.

The contract for the fabrication and assembly of 627 steel track-span bridges for single track, and for 150 track-span bridges for double track, together with 3,108 anchors, seven feet long, all under circular No. 752, has been made to the United States Steel Products Company, who agree to begin delivery in 150 days and complete it in 305 days. The only other bidder on the above material was the Riter-Conley Company of Pittsburgh. The plan of manufacturing this material at the company's shops and then assembling it on the Isthmus, the Canal Commission furnishing the erecting shed, necessary trackage and transportation facilities, quarters for the company's employees, etc., has been adopted. The successful bidder already has a force on the Isthmus working on other contracts.

Award was also made to the United States

Steel Products Company for supplying 1,500,000 feet of No. 00 copper wire, and 500,000 feet 5/16-inch copper clad wire, in competition with the National Brass and Copper Tube Company, the only other bidder. The contract for furnishing 4,000 insulators, 3-unit, suspension type, with Monel-metal fittings, and 2,500 insulators, 3-unit, strain type, with Monel-metal fittings, was awarded to the Locke Insulator Manufacturing Company of Victor, N. Y., in competition with the General Electric Company, and the National Electric Supply Company.

No award has yet been made for substation equipment. The ground plates required for the work will be manufactured from old copper and cable, now on the Isthmus.

Canal Zone Wind Velocities.

The wind movements on the Canal Zone do not show a very wide range from year to year. The maximum velocity of record since the Americans took charge of the meteorological observations occurred in July, 1909, when, during a storm on the Pacific slope from the southeast, a velocity of 59 miles an hour was attained for a brief interval. There is no record of a storm of cyclone dimensions ever having visited this part of the Isthmus. The nearest approach to a heavy wind storm in the past nine years was that above mentioned, which broke down a number of trees and tore off the galvanized roofs of some dwellings in an area extending from Panama City to Miraflores. At Culebra 10 miles away, the wind did not exceed 36 miles an hour.

The wind movement at Cristobal is greater than at either Culebra or Ancon, and at Culebra, greater than it is at Ancon. The average maximum velocities at all three points each year for three years, from computations made from March 1 to March 1, follows:

CRISTOBAL.		
YEAR.		Max. vel. Miles.
1910-11.....	28½	
1911-12.....	28½	
1912-13.....	31	
CULEBRA.		
1910-11.....	29½	
1911-12.....	29½	
1912-13.....	28½	
ANCON.		
1910-11.....	24½	
1911-12.....	24½	
1912-13.....	25½	

Cristobal and Colon are some times visited by heavy "northers" late in the year and during the trade wind season, but in no time during the past five years has the maximum velocity of the wind at that point been greater than 39 miles an hour, which occurred in November, 1909. In June, 1910, the maximum there did not exceed 19 miles an hour. At Culebra, the maximum wind velocity since April, 1909, was 39 miles an hour, in July, 1910, and the lowest monthly maximum 21 miles an hour, in October, 1912. At Ancon,

the lowest monthly maximum in five years was 18 miles an hour in September, 1908, and again in the same month in 1910.

Order for 1,000-Cubic Yard Barges.

Requisition has been forwarded to Washington for six dump barges with a capacity of 1,000 cubic yards each, to be used in connection with the 15-cubic yard dipper dredges, recently contracted for with the Bucyrus Company of South Milwaukee, Wis. These barges are to be delivered at some Atlantic or Pacific port of the United States for towing to the Isthmus by January 1, 1914. They are to form part of the dredging equipment for use in emergency work in the Culebra Cut section, and will be towed up the Canal to the point required. A description of the dipper dredges appeared in THE CANAL RECORD of February 5, 1913.

The specifications call for barges of 1,000 cubic yards capacity when level full with top of hopper coaming. The largest barges in the Canal service at the present time have a capacity of 500 cubic yards each. The new barges are to be of heavy construction, suitable for rough service, and will be rectangular in design, with a rake at each end. Each barge is to be 160 feet long, with depth, molded, of not more than 13 feet six inches, and is to have a 30-inch freeboard when fully loaded. The top of the hatch coaming is to be not more than two feet above the deck.

The hoppers are not to be more than four in number to each barge, with a minimum width of 12 feet at the bottom and are to be provided with doors opening to their full size at bottom. The sides are to be framed with not less than 6 by 3½ by ¾-inch angles, spaced 24 inches from center to center, made of steel plates weighing 22.95 pounds to the square foot, and lined throughout with 6 by 8-inch yellow pine timbers set on end to prevent injury to the hoppers when loading rock. The hopper doors are to be of wood 10 inches thick, lined with steel plate. They are to be dropped by manual power, and lifted by steam, or other approved method, the mechanism to be located on one side of the hopper.

The hoppers are to be provided with watertight bulkheads extending between them to the deck. The bulkheads forming the ends of the hoppers are to extend entirely across the barge frames to floor deck and side beams, and are to be made of steel plate weighing 12.7 pounds to the square foot. There is also to be a watertight bulkhead at each end of each rake, and in the space forward and aft of the hoppers, there is to be a central longitudinal bulkhead of steel plate weighing 10.2 pounds to the square foot, which will extend from the hoppers to each end of the barge. In addition, there are to be two long lattice trusses, one on each side, midway from the center bulkhead to the side of the hull.

The deck beams are to be of 5 by 3½-inch Z-bars, spaced one on each frame. The hull

NOTES OF PROGRESS.

(Continued.)

plating is to be of the weight of 22.95 pounds to the square foot; bilge to be of the same weight of material and to be carried to the height of 12 inches to the flat surface beyond the round of the bilge. The side plates are to be of a weight of not less than 18 pounds to the square foot. The deck is to be of checkered steel about 7/16 of an inch thick. The hatches are to be 18 inches in diameter, one opening into each compartment of the hull, each hatch

to be fitted with a cast-iron cover. An 18-inch iron ladder is to be provided for each hatch.

Proposed Agricultural Show.

James N. Harris has made application of the Canal Commission for a site in the city of Colon for the holding of an agricultural show, in which the West Indians on the Isthmus are expected to participate. The show is to be held in celebration of the opening of the Canal, and the applicant states that the Governor of Colon has already approved the idea. He has been advised that in all probability a suitable site can be provided.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 99 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on April 5, the amount in place being 4,414,839 cubic yards.

GATUN LOCKS AND SPILLWAY.

About 98 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 5, being 2,007,641 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 223,521 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending April 5, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone.	Total.	SPILLWAY.

EXECUTIVE ORDERS.

Modification in Application of Safety Appliance Acts.

Under authority vested in me by law, it is ordered:

Paragraph 5 of Executive Order No. 1002, dated January 6, 1909, is hereby amended by adding the following paragraph thereto:

The application of the requirements of the Safety Appliance Acts to equipment of rolling stock at navy yards is hereby so far modified that the cars and engines at yards and stations, will be fitted with safety appliances only to such extent as may, in the judgment of the commandant, subject to the approval of the Chief of the Bureau of Yards and Docks, Navy Department, be deemed necessary or advisable.

WOODROW WILSON.

THE WHITE HOUSE,

March 19, 1913.

[No. 1750.]

Suspension of Operation of Order of February 26, 1913, Providing a Method of Compensation for Personal Injuries to, or for the Death of, Employees of the Isthmian Canal Commission and Panama Railroad.

Whereas, an Executive Order was promulgated on February 26, 1913, providing a method of compensation for personal injuries to, or for the death of, employees of the Isthmian Canal Commission and of the Panama Railroad Company, and no appropriation has been made available for the payment of compensation under the terms of such Order:

And Whereas, the provisions for the payment of claims for injuries to, or for the death of, employees of the Isthmian Canal Commission and of the Panama Railroad Company, in force prior to the time of the promulgation of said Order of February 26, 1913, should continue until the Order just mentioned can be made effective;

By virtue of the authority vested in me,

It is ordered, That the operation of the said Order of February 26, 1913, is hereby suspended until further executive order or direction in the premises;

And it is further ordered, That, until such further order or direction, payment of compensation for injuries to, or for the death of, employees of the Isthmian Canal Commission and of the Panama Railroad Company, occurring after February 28, 1913, shall, as before that date, continue to be made in accordance with the Act of Congress, approved May 30, 1908, (35 Stat. 556), being "An

Act granting to certain employes of the United States the right to receive from it compensation for injuries sustained in the course of their employment," the Act of Congress, approved February 24, 1909, (35 Stat. 645), being "An Act relating to injured employes on the Isthmian Canal," Section 5 of the Act of Congress, approved March 4, 1911, being "An Act making appropriations for sundry civil expenses of the government for the fiscal year ending June thirtieth, nineteen hundred and twelve, and for other purposes," the laws of the Canal Zone, and the rules and regulations heretofore made in regard thereto.

WOODROW WILSON.

THE WHITE HOUSE,

March 24, 1913.

[No. 1755.]

Hunting of Birds in Canal Zone.

By virtue of the authority vested in me, I hereby establish the following Executive Order for the Canal Zone:

Section 1. It shall be unlawful for any person to hunt, trap, capture, wilfully disturb or kill any bird of any kind whatever, or to take the eggs of any bird, except in the form and manner permitted by the regulations provided for by this Order.

Section 2. The Isthmian Canal Commission, or the Governor of the Panama Canal after the reorganization is established, is hereby empowered and directed to enact suitable regulations, from time to time, for the protection of birds and their nests, and prescribing the form and manner in which birds may be hunted, and the kinds of birds that may be hunted, and those that shall not be molested.

Section 3. A violation of any of the regulations established under this Order shall be punished by a fine of not more than one hundred (\$100) dollars or by imprisonment for not more than thirty days for each offense.

Section 4. This Order shall take effect thirty days after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,

March 19, 1913.

[No. 1749.]

To amend an Executive Order approved February 5, 1912, providing an inexpensive method for the administration of the estates of deceased and insane persons in certain cases, etc.

By virtue of the authority vested in me, I hereby establish the following Executive Order for the Canal Zone:

Section 1. That Section 1 of an Executive Order entitled: "Executive Order to provide an inexpensive method for the administration of estates of deceased and insane persons in certain cases, and to repeal Act 24 of the Canal Zone laws and the Executive Orders amendatory thereto," and the first paragraph of Section 8 of said Order, are hereby amended so as to read, as follows:

Section 1. Whenever an employe in the service of the Isthmian Canal Commission, or the Government of the Canal Zone, or of the Panama Railroad Company, shall die, leaving an estate in the said Zone, or whenever such decedent, being a citizen of the United States, leaves an estate in the Canal Zone or in the Republic of Panama; and the said estate consists of personal property only and a regular administration shall not have been instituted in the Courts of the Canal Zone thereon, the Collector of Revenues

for the Canal Zone is hereby authorized and directed to take possession of the estate of the said deceased person and to make a complete inventory thereof and present the same to the Judge of the Circuit Court of the First Judicial Circuit of the Canal Zone, to be filed by the said Judge in the records of his court when approved by him.

Section 8. If an employe of the Isthmian Canal Commission, the Government of the Canal Zone, or the Panama Railroad Company should be adjudged insane by the Canal Zone Courts and the estate consists entirely of personal property and no regular guardianship of such estate shall have been instituted by the Canal Zone Courts, it shall be the duty of the Collector of Revenues to take possession of the estate of such insane person, including any salary or other acknowledged claim due to such employe by the Isthmian Canal Commission, the Canal Zone Government or the Panama Railroad Company, and make a complete inventory thereof and file the same with the Judge of the Circuit Court of the First Judicial Circuit of the Canal Zone, and under the direction and with the approval of the Judge of said court, the Collector of Revenues may pay the lawful indebtedness due by the insane person, as well as the expenses incurred in administering the said estate and he shall hold the residue of the estate subject to the orders of the Circuit Judge.

Section 2. This amendment shall apply to the estates of employes who died or became insane prior to this date as well as to those who die or are adjudged insane hereafter.

Section 3. This Order shall take effect from and after this date.

WOODROW WILSON.

THE WHITE HOUSE,

March 20, 1913.

[No. 1751.]

Relating to Foreign Corporations.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

SECTION I.

No corporation or joint stock company (other than insurance companies) organized under the laws of any State or Territory of the United States or of any foreign government shall do business in the Canal Zone until after it has filed in the office of the Collector of Revenues a duly authenticated copy of its charter or articles of incorporation, as well as a statement, verified by the oath of the president or secretary of said corporation and attested by a majority of its board of directors, showing:

1. The name of such corporation and the location of its principal office or place of business outside of the Canal Zone; and if it is to have any place of business or principal office within the Canal Zone, the location thereof.

2. The amount of its capital stock.

3. The amount of its capital stock actually paid in, in money, and the amount of its capital stock paid in, in any other way, and in what way the payment was made.

4. The amount of assets of the corporation and in what the assets consist, and the actual cash value thereof.

5. The liabilities of such corporation, and if any of its indebtedness is secured, how secured, and upon what property.

6. Such other evidence as the Collector

of Revenues may deem necessary to satisfy him of the financial standing or solvency of the corporation or company.

SECTION II.

Such corporation or joint stock company shall file a certificate with the Collector of Revenues, certifying that said corporation or joint stock company has consented to be sued in the Canal Zone upon all causes of action arising against it therein, and designating the Collector of Revenues, and his successors in office, to be its true and lawful attorney, upon whom all process in any such action may be served; and it shall agree that any lawful process against it served on such attorney shall constitute a valid service upon it, and that his authority shall continue in force so long as any liability against it remains outstanding in the Canal Zone.

Such power of attorney, and the vote authorizing its execution, duly certified and authenticated, shall be filed in the office of the Collector of Revenues, and a copy thereof, certified by him, shall be sufficient evidence thereof.

No corporation or joint stock company shall do business in the Canal Zone until such certificate is duly filed and the other provisions of this Order are complied with.

SECTION III.

Upon compliance with the conditions set out in the foregoing section of this Order and the payment of an annual fee, in advance, of \$50, to the Collector of Revenues, he shall issue to such corporation or company a certificate authorizing it to do business within the Canal Zone. Such certificate, however, shall be terminable by the direction of the Chief Executive of the Canal Zone, but if terminated without fault upon the part of the corporation or joint stock company, a proportionate rebate of the license fee will be made to such corporation or company.

SECTION IV.

Any agent or person representing a corporation or joint stock company who does business in the Canal Zone before such corporation or company has complied with the provisions of this Order shall be subject to a fine not exceeding \$25, or imprisonment in jail not exceeding thirty days, and each day's business so done by such agent or person shall be considered a separate offense for the purpose of this Order.

SECTION V.

This Order shall not be held to modify the provisions of an Executive Order relating to insurance companies, dated March 12, 1907, effective July 1, 1907.

SECTION VI.

This Order shall take effect 60 days from the date of its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,

March 20, 1913.

[No. 1752.]

Dedication of Hebrew Synagogue.

The Hebrew congregation (Kaal Kadosh Yangacob), at Colon, will dedicate its new synagogue on Third and F streets, on Sunday, April 13, at 2.30 p. m. All Israelites residing in the Canal Zone are invited to attend the ceremony.

ACTIVITIES OF ZONE WOMEN.

Number of Organizations for Women has Grown from 15 to 25 Since 1907.

The present status of the organizations of women in the Canal Zone, from the number and nature of such organizations, forms a significant study of the development and aim of the woman movement, which was begun in 1907. A short history of this movement was published in *THE CANAL RECORD* of August 2, 1911; the paragraphs that follow show the present strength of each organization.

In 1907, there were not more than 15 organizations of women in the Canal Zone; there were nine general clubs, with one federation, about two fraternal societies, and one or two small church organizations. The present list of such organizations contains 25 names. There are three general clubs, one federation of clubs, one sunshine society, one study club, 12 church societies, four fraternal societies, one camp fire girls organization, one bowling club, and two gymnasium clubs. The total membership of these organizations is 695.

Under the head of general clubs is the Canal Zone Federation of Women's Clubs, with a membership of 58. This number also includes four members at large. The subdivisions of the federation, with their respective memberships are, as follows: The Cristobal Woman's Club, 35; the Gatun Woman's Club, 10; the Empire Woman's Club, 10; the Gatun Sunshine Society has 32 members, the Ancon Study Club has 12 members. The total membership of the women's auxiliaries to the fraternal societies is 286. The largest of these societies is the Isthmian Canal Rebekah Lodge, No. 1, Gorgona, which has a membership of 90; Orchid Chapter, No. 1, Order of the Eastern Star has 87 members; the Pythian Sisters have 70 members, and the Panama Auxiliary, United Spanish War Veterans, No. 1, has 39 members.

The 12 church organizations have a total membership of 239, divided, as follows: In Empire, there is an auxiliary to the Christian League with 34 members, a girls' sunshine society with 18 members, the Fidelity Bible Class with 32 members, St. Mary's Altar Guild with 12 members, and St. Ferdinand's Altar Society with 15 members. In Gatun, there is a missionary study class with eight members, an auxiliary to the Christian League with 11 members, and an Altar Guild, composed of women of the Episcopal Church, with 14 members; In Cristobal, there is the Ladies Aid to the Cristobal Union Church with 27 members, and, on Colon Beach, the Altar Guild of Christ Church with 30 members. In Ancon, the Woman's Foreign Missionary Society to the Methodist Episcopal Church has 20 members and the Altar Guild of St. Luke's Hospital Chapel has 25 members. There are gymnasium classes of girls in Gorgona and Gatun with memberships of 18 and nine, respectively. The camp fire girls' organization in Gatun has six members, and a bowling club of girls in the same village has nine members.

The earliest existing club is the Cristobal Woman's Club, which was organized on September 7, 1909, and the last to be organ-

ized is the Panama Auxiliary, United Spanish War Veterans, which was formed under a charter from Denver on March 12, 1912.

At its meeting on Thursday, April 3, the Ancon Study Club authorized the president, Mrs. H. C. Shick, to make application for admission of the club to the General Federation of Women's Clubs. This application will be placed in the hands of the membership committee at once. The study club has been organized 15 months, and the course of meetings has been broken only by a three weeks' vacation at Christmas time. In addition to maintaining the library, and the purchase of reference books, the club has pledged \$15 to the Canal Zone Federation of Women's Clubs toward the blind boy fund. The library is an important branch of the club work. It contains 173 volumes, and there is a constant circulation of more than one-third of the number. The meetings of the club are held weekly at the home of the librarian, Mrs. Mark White. Application for club membership may be made at any time through a member.

The health department of the Cristobal Woman's Club will hold the second free lecture in the 1913 series in the conversorium, Cash and D streets, Colon, on Thursday evening, April 10. The subject is oral hygiene. Dr. M. E. Connor will be the speaker.

Church Work.

The quarterly meeting of the Isthmian Sunday School Association will be held in the Commission chapel, Gorgona, on Sunday, April 13, at 2.30 p. m. The program includes a paper on teaching in the Sunday school by Mrs. E. M. Keyser of the Methodist Episcopal Church, Panama; an address on the work by Mr. Weaver of the Cristobal Union Church, and a discussion on these two papers led by Mr. Kromer, superintendent of the Cristobal school. Mr. Warner of Culebra will conduct a round table discussion. The musical program is under the charge of Mr. Kramer of Gorgona, with Mrs. Charles O. Purdy of Gatun as soloist.

The meetings of St. Luke's Altar Guild are being held semimonthly in the morning at 9.30 o'clock. The guild has in hand sewing for charity. The second of the morning meetings will be held at the residence of Mrs. Charles F. Mason on Tuesday morning, April 15.

Immigration at Ports of Panama and Ancon.

According to the figures of the quarantine service, the number of persons who landed at the ports of Panama and Ancon during the month of March from foreign ports was 618, consisting of 458 cabin, and 160 steerage passengers. The number of persons who embarked for foreign ports was 682, consisting of 554 cabin, and 128 steerage passengers. The number of persons who embarked over those who landed was 64. The net immigration to the Isthmus during March through the ports of Colon, Cristobal, Panama, and Ancon was 1,586.

Accidents at Miraflores Locks.

Ross S. Wallace, American, in the employ of the McClintic-Marshall Construction Company, Charles F. H. Clarke, Barbadian, and Lionel Downes, Demerarian, in the employ of the same company, were killed at Miraflores Locks on Thursday, April 3, by the fall of a scaffold. The men were engaged

in riveting the lock gates, when one end of the scaffold gave way under the weight of a 7-ton rivet reamer, precipitating them to the floor of the lock, 60 feet below. A Grenadian named Sanford Huggins also fell with the others but was not killed. Another workman saved himself by thrusting a wrench through a hole in the gate leaf and hanging on to it until rescued. Mr. Wallace was a native of Ohio, was 44 years of age, married, and is survived by his wife living at Moline, Ill. He had been on the Isthmus about 11 years.

Harvey Edwards, American, age 31, home address, Charleston, Ill., and Hugh Dever, American, age 24, home address, Philadelphia, both employees of the McClintic-Marshall Construction Company on the lock gates at Miraflores, fell and were killed on Monday, April 7. The men were working on a scaffold, when Edwards stepped on a projecting plate in the gate leaf to further his reach, holding on with one hand to a wrench which he had thrust through a hole in the side of the leaf. The wrench pulled out, and, in falling, he carried Dever to the bottom of the lock with him. Both men were single.

PERSONAL.

Mr. C. F. Wicker, the new secretary of the American Legation in Panama, succeeding Mr. W. W. Andrews, assumed the duties of the post on March 24. He was at one time private secretary to the American Ambassador at Berlin, and, later, was for two years with Mr. Dodge, the present American minister to Panama, in Morocco. He is a graduate of Yale, and studied international law at Oxford University.

Cristobal Dancing Club.

CRISTOBAL, C. Z., April 7, 1913.

The regular dance of the Cristobal Dancing Club will be held on April 12, 1913, at the clubhouse. Invitations or membership cards must be presented at the door.

W. H. MARSH, *Secretary.*

Sailing of the "Cristobal."

The sailing date of the steamship *Cristobal* has been set for Sunday, April 13, at 3 p. m., from pier No. 11, Cristobal.

Sailing of the "Advance."

The steamship *Advance* will sail from pier No. 11, Cristobal, at 3 p. m., Thursday, April 10, instead of April 7, as was listed in the regular sailing list.

A party of 48 engineers from Cuba have been spending a few days on the Isthmus inspecting the Canal work.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, April, 1913. All heights are in feet above mean sealevel.

ANCON CRUSHER.

Rock Furnished from Ancon Quarry is in Excess of Anticipated Demands.

The extent of operations at Ancon quarry and crusher has considerably exceeded that anticipated when the first rock was crushed there on February 8, 1910. At that time the crusher was meant to supply crushed rock for Pedro Miguel and Miraflores Locks, requiring about two million cubic yards. Of this quantity about 55,000 cubic yards has been supplied by the Rio Grande crusher, which closed down at the time the Ancon crusher began operations. Up to April 1, 1913, the output from Ancon crusher was 2,412,951 cubic yards. The two-million mark was passed in August, 1912.

The Porto Bello crusher supplied all the crushed rock for Gatun Locks and Spillway, turning out approximately two million cubic yards of rock between the latter part of 1907 and April 30, 1912, when it closed down. It left enough rock in the stock piles at Gatun for the completion of the Atlantic lock and spillway work, but all other crushed rock used in the Canal and railroad work since has been supplied from Ancon quarry. Future operations there will be determined by the demand for rock in the construction of permanent terminals and buildings, and the requisites for fortifications, roads, track ballast, and commercial sales. The demand from the Pacific locks, which are now taking about 1,400 cubic yards daily, will cease practically within a few months.

When Ancon quarry was begun at 150 feet above sealevel on the west side of Ancon Hill, it was planned to carry the work as high as elevation 375 feet. One of the drills is now within a hundred feet of the top of the hill, which rises 650 feet above sealevel. The face of the excavated bank extends 375 feet above the dumping track at the crusher, or over 400 feet above the track on which the cars receive the crushed rock. The face is cut by three distinct terraces, averaging two hundred feet in width, and discernible in profile far down the bay. The length of the working face of the quarry at the lowest terrace is about 1,400 feet.

The area of operations is extended during each dry season by stripping the side of the hill, above or beyond the working face, of vegetation and surface earth. About 150 extra men are employed through four months for this work. The regular force at quarry and crusher numbers about 175 men, and the average continuous service of these men has been more than two years.

The output of the crusher has frequently exceeded the manufacturer's rated maximum capacity of 3,000 cubic yards a day. The greatest weekly record—25,693 cubic yards—was made during the six days ending March 23, 1912, during which time, however, the crushers were on double shift and these figures are, therefore, not the best records. For those days, the lowest record was 4,145 cubic yards. The highest record for any day has been 3,679 cubic yards, on August 9, 1912, on which day the crushers were operated nine hours. The lowest weekly record has been 6,895 cubic yards, for the week ending October 1, 1910. The main shaft of the crusher broke

on September 26, and the machinery was shut down for several days.

The output during the week ending April 5, 1913, is shown in the following statement:

DATE.	Hours worked.	Cubic yards.
March 31.....	10.05	2,843
April 1.....	6.45	2,761
April 2.....	7.25	2,624
April 3.....	7.50	2,438
April 4.....	7.15	2,062
April 5.....	6.40	2,155
Total.....	46.00	14,883

Sand Barges Converted to Dump Barges.

Two of the three steel sand barges which were towed from Colon to Balboa, through the Strait of Magellan by the tug *Reliance* for use in the Chame sand service, have been converted into hopper barges for handling spoil from the ladder dredges at work in the Pacific entrance. The lessened placements of concrete, with the approach to completion of the locks, has diminished the demand for sand to as little as 1,000 cubic yards a day, and has released some of the sand barges for other use.

The second of the converted barges was launched from the Balboa shipways on April 5. The changes consisted in cutting holes in the bottoms of the four 12-foot compartments, into which the hold of the barge is divided by steel bulkheads, and installing timber drop-doors to control the apertures. The drops are raised and lowered manually, by chains and ratchets, and the compartments may be dumped singly or simultaneously. The alterations have reduced the capacity of each barge from 600 to 525 cubic yards.

Work of Lidgerwood Unloaders in March.

During the month of March, the following Lidgerwood trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.....	5*	1,114	23,394
Miraflores.....	2	270	5,670
Gamboa.....	4†	1,149	24,110
Total.....	11	2,533	53,174

*One unloader worked from the 1st to the 25th.

†One unloader worked 23½ days.

Balboa Sand Service.

A report of sand shipped from Balboa during March, follows:

DESTINATION.	Number cars.	Cubic yards.
Fifth Division (C. E.).....	1,124	21,238
Atlantic Division.....	19	463
Central Division.....	43	645

Panama railroad.....	13	325
Sanitary Department.....	1	25
Private.....	7	175
Total.....	1,600	31,928

*Also three barges.

A cable message has been received from Madrid, Spain, by the Minister of Foreign Relations of Panama advising that the embargo, which has been in effect for some time past, prohibiting the emigration of the laborers of that country to other parts, has been lifted, in so far as it applies to Panama.

LOST—In or near Cristobal commissary on April 3, a small mesh purse containing keys and money. Reward if returned to Auditor's office, Panama railroad Colon.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of March.

During the month of March, the total amount of material excavated in the Central Division was 1,183,900 cubic yards, of which 259,571 cubic yards were classified as earth and 924,329 cubic yards as rock. The total—1,183,900 cubic yards—was primary excavation in the Canal prism, and all of it was removed by steamshovels.

The high record for the month was made by shovel No. 208, working 25 days in the Culebra district, which excavated 51,128 cubic yards of rock.

The second best record for the month was made by shovel No. 207, working 25 days in the Culebra district, which excavated 50,152 cubic yards; 10,802 cubic yards of rock, and 39,350 cubic yards of earth.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 25 days in the Culebra district, which excavated 42,300 cubic yards of earth.

Shovel No. 208, working in the Culebra district, made a high record for one day by excavating 2,940 cubic yards of rock on March 24.

Shovel No. 224, working on a 12-hour shift in the Culebra district, made a high record of 3,743 cubic yards of earth on March 29.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best record for the month and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.

*The excess number of days over and above the actual number of working days in the month of March (25) is due to double shift and night work.

Monuments to Balboa.

Gen. Rafael Reyes, a former president of the republic of Colombia, is interested in the project of obtaining the cession of some suitable location in the Canal Zone for the purpose of raising a monument to Vasco Nunez de Balboa, discoverer of the Pacific Ocean. The four hundredth anniversary of this discovery occurs on October 5 (new style) of this year. His idea is that the monument shall be paid for by the governments of the Latin-American republics who may be favorably disposed. A site will probably be granted if the matter is fully determined upon. The municipality of Panama has already made provision for the erection of a monument in honor of Balboa at some point in that city to be determined later.

OFFICIAL CIRCULARS.

Remission of Customs on Parcels Post Packages.

CULEBRA, C. Z., March 29, 1913.

CIRCULAR No. 481:

Employees receiving packages by parcels post in the future will be required to submit request for the remission of customs duties on Form C. E. 403. No parcels post packages will be released by postmasters until the presentation of an approved copy of Form C. E. 403 describing briefly the character of merchandise being imported, or the presentation of a receipt from the Panamanian customs officials showing the payment of the required duties.

A supply of Form C. E. 403 can be secured on requisition from Mount Hope.

GEO. W. GOETHALS, *Chairman.*

Captain of the Port of Ancon.

CULEBRA, C. Z., April 5, 1913.

CIRCULAR No. 410-A:

Effective this date, Mr. Charles H. Mann, receiving and forwarding agent, Balboa agency, is appointed captain of the port of Ancon.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Survey of Equipment.

CULEBRA, C. Z., March 25, 1913.

To ALL ACCOUNTABLE OFFICERS:

In future, in submitting surveys, the following information will be shown:

Boilers—1. Number. 2. Type. 3. Dimensions. 4. Old French or American manufacture. 5. Horsepower. 6. Date entered service. 7. Date discontinued in service. 8. Safe working pressure. 9. Date last inspected. 10. General condition at time of survey.

Engines—1. Type. 2. Dimensions. 3. Horsepower. 4. General condition at time of survey.

Mixers, Concrete—1. Name of maker. 2. Size. 3. Capacity in cubic yards per hour. 4. Horsepower required. 5. Date entered service. 6. Date discontinued in service. 7. General condition at time of survey.

Crushers, Rock—1. Name of maker. 2. Size. 3. Capacity per hour. 4. Date entered service. 5. Date discontinued in service. 6. General condition at time of survey.

Drills, Rock—1. Name of maker. 2. Type. 3. Diameter of cylinder. 4. Length of stroke. 5. Equipped for steam or air. 6. Diameter of hole drilled. 7. Diameter of steel used. 8. Date entered service. 9. Date discontinued in service. 10. General condition at time of survey.

Channellers—1. Name of maker. 2. Size. 3. Type of head. 4. Date entered service. 5. Date discontinued in service. 6. General condition at time of survey.

Locomotives—1. Name of maker. 2. Date built. 3. Type. 4. Gauge. 5. Size of cylinders. 6. Horsepower. 7. Weight. 8. Train length. 9. Maximum width. 10. Maximum height. 11. Wheel base. 12. Diameter of drivers. 13. Number of tubes and dimensions. 14. Date entered service. 15. Date discontinued in service. 16. General condition at time of survey.

Pumps—1. Name of maker. 2. Type. 3. Size. 4. Date entered service. 5. Date discontinued in service. 6. General condition at time of survey.

On shop tools, miscellaneous machinery, etc., it is

desired that in so far as possible a complete description of each article be given, showing type, capacity, general condition, etc.

This information can be shown in a memorandum pasted to the survey, and is necessary for the proper compilation of catalogues for sale.

Please acknowledge receipt of this letter direct to the surveying officer.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Electrical Work—Fifth Division.

COROZAL, C. Z., March 27, 1913.

ORDER:

Mr. H. K. Smith, electrical superintendent of the Fifth Division having resigned, the position is abolished. Effective March 27, Mr. C. W. Lawton, station engineer, is assigned charge of the Miraflores power plant. Mr. H. E. Wilkins, general foreman, is assigned charge of the outside electrical work. Both Mr. Lawton and Mr. Wilkins will report to the resident engineer direct.

H. O. COLE,
Resident Engineer, Fifth Division.

Sunday Trips of Sightseeing Train for Employees.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., APRIL 4, 1913.

CIRCULAR No. 63:

All concerned—Effective at once, when fifty or more employees desire to use the sightseeing train on Sunday, arrangements will be made to operate it over the Atlantic, Pacific, and Central Divisions at a flat rate of \$1.50 per passenger, train to leave Colon passenger station at 8 a. m., going over all three divisions, tying up at Panama. Passengers will have to return to their respective stations on regular trains.

Arrangements may be made with this office and should be completed not later than Friday afternoon preceding Sunday on which trip is to be made, in order that the Atlantic, Central, and Pacific Divisions can be notified of the movement not later than that date.

J. A. SMITH, *General Superintendent.*

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon during the week ending April 5:

Pastores, March 30, from New York, with 175 cases electrical material, 18 reels electrical cable, 18 cases pumping machinery, for First Division; 111 bundles steel bars, for Fifth Division; 33 cases scoops, 13 cases fuse, eight cases tools, 20 cases hardware, for stock.

Carl Schurz, March 30, from New York, with 70 cases bolts, 11 cases paper, five cases blow torches, for stock; 50 packages buoy parts, for Lighthouse Division.

Parissima, March 31, from New Orleans, with 300 pieces white oak lumber, 237 pieces yellow pine lumber, two reels steel cable, for Mechanical Division; 939 bales hay, 2,628 pieces cross-ties, 3,110 pieces yellow pine lumber, for stock.

Metapan, April 3, from New York, with 187 cases electrical material, nine pieces pipe and fittings, for First Division; 99 bundles metal lath, for Fifth Division; eight cases paint, 18 cases brushes, for stock.

J. L. Luckenbach, April 3, from New York, with 104,

914 bags cement, for Atlantic and Fifth Divisions; 120 cases blasting caps, for stock.

Turrialba, April 3, from New Orleans, with 505 pieces lumber, for Mechanical Division; 91 pieces piling, 1,051 pieces cross-ties, 1,451 pieces lumber, 648 drums oil, 1,060 cases oils and greases, 328 bales hay, 557 bales straw, for stock.

Cristobal, April 3, from New York, with 35 cases shellac, 41 crates ranges, 438 pieces angles and beams, 848 bundles steel bars, 16 cases wire, 68 cases caustic soda, 47 cases hardware, 247 pieces iron pipe, 12 cases rubber hose, 20 barrels creosote oil, nine cases paper, eight cases solder, for stock; 138,402 bags cement, for Atlantic and Fifth Divisions; 200 tons pig iron, 30 pieces locomotive tires, 10 cases aluminum, 12 cases electrical material, for Mechanical Division; 15 cases structural steel for Atlantic Division; 25 cases castings, 20 cases electrical material, for First Division.

Advance, April 3, from New York, with 75 cases conduits, 25 reels copper wire, 15 cases castings, for First Division; 5,500 pieces hollow tile, for Second Division; 33 cases boiler fittings, for Fifth Division; 20 cases drugs and sundries, for Sanitary Department; 10 barrels compound, 16 cases wrenches, 17 cases mops, 298 slabs zinc, 500 crates garbage cans, 183 cases water coolers, 24 cases rubber hose, 150 barrels alum, 28 cases cardboard, 300 bags tie plugs, for stock; and a miscellaneous cargo, the whole consisting of 7,440 packages, weighing 535 tons.

Haakon VII, April 4, from St. Mary's Ga., with 2,513 pieces piling, and 3,903 pieces cross-ties, for stock.

Misdirected Letters.

ANCON, C. Z., April 9, 1913.

The following insufficiently addressed letters originating in the United States or its possessions, have been received in the office of the Director of Posts, and may be procured upon request of the addressees:

Alder, T. P.	McCallum, Walter L.
Bryce, Michael	McClain, Miss Edna
Buser, Fred H.	McDonald, Mrs. E.

CULEBRA.

At the entertainment to be given by the Walter Eccles and The Four College Girls Company on Monday night, April 14, the following prices will obtain: Members, free; nonmembers, adults, 50 cents; children, 25 cents. The program will begin at 8 o'clock.

The local team lost two out of three games to Cristobal in the Isthmian Duckpin League on Saturday, April 5, with the following scores:

	Cristobal.	Culebra.
Barrett.....	82 79 99	Palmer..... 77 85 84
Herrington.....	101 95 96	Silver..... 77 87 82
Weston.....	95 87 106	Brown..... 93 95 77
Smith.....	101 84 86	Case..... 85 102 90
Bullard.....	85 85 91	Kiernan..... 80 80 84
	464 430 478	412 449 417

High scores for the week are, as follows: Steele, 107; Case, 100, 102; DeCora, 107, 105, 102; Herrington, 100; Patterson, 110; Brown, 107.

EMPIRE.

The standing of the local tenpin tournament is, as follows:

	Won	Lost	P.C.
Giants.....	8	1	889
Athletics.....	4	2	667
Senators.....	2	4	333
Cubs.....	2	4	333
White Sox.....	1	2	333
Tigers.....	1	5	167

The high score made so far by any of the league players is 243, which was made during the past week by C. J. Huson. He also holds the high average of 201.1.

The list is ready for the April pool tournament. All contestants are requested to sign without delay.

The March handicap pool tournament was won by Mr. Donnelly. This was a three-game elimination tournament. Mr. Donnelly won twelve games and lost but one. The second place was won by Mr. Clyde Cecil, who won nine games and lost two, while third place was won by Mr. F. G. Miller. Considerable interest was shown in this tournament.

The following program was given at the clubhouse on April 6, by the Gorgona chorus:

Part One—Orchestra, selected, by the Tenth Infantry; "Nancy, my yellow rose," Geibel; song of the pedler, Williams, by Gorgona Chorus; vocal solo, selected, by Mr. Onkon; vocal duet, "Fly away birdling," Abt, by Mr. and Mrs. Kramer; solo, selected, by Mrs. Boyd; "The song of the Triton Taylor; Sleep, little one, sleep, Woole, by Gorgona Chorus.

Part Second—Orchestra, selected, by Tenth Infantry; "Anchored," Watson; "Shoogy Shoo," Abrose, by Gorgona Chorus; "Then you'll remember me," solo, by Mr. Bradsky; "Sweet and low," "Last rose of Summer," "Water lilies," "We're going to leave Gorgona," by Gorgona Chorus. "March Onward," Geibel, by chorus and orchestra; "Anvil Chorus," Verdi, "Soldier's Chorus," Gounod, by chorus and orchestra.

The Isthmian Duckpin tournament games rolled at Empire on Saturday, April 5 resulted, as follows: Empire..... 449.... 480.... 446
Gorgona..... 422.... 399.... 462

The opening of the indoor baseball league will be on April 26, instead of April 19. This leaves an extra week for practice. Candidates for the Empire team are requested to appear for practice twice a week.

GORGONA.

A debating club was organized on Thursday evening, when over 100 men attended the debate given by Messrs. Ewing and Werner vs. Messrs. Borrow and Wight, on the subject of "Resolved, That foreign immigration is not a detriment to the United States. The debate was won by the affirmative. The next debate will be

held on Thursday evening, April 10. A week from Thursday, the club will put on a mock trial.

A "smoker" is being planned for Friday, April 25. The boys' event in the all-around gymnastic contest resulted, as follows: "Tigers" 1, "Athletics" 3. The boys are divided into two classes, or groups. Each group has the same activity and is judged according to its efficiency.

The mens' classes meet on Tuesday and Thursday evenings and the exercises include wrestling, gymnastics, and indoor baseball.

The Culebra chess club played at Gorgona on Saturday evening. Scores:

	Culebra.	Won.	Lost.	Gorgona.	Won.	Lost.
Duhois.....	2	Dr. Levy.....	2

		Wurster..... 88 95

Totals.... 441 410 425 440 454 454

The Gatun "Stars" of the Isthmian league won two out of three games of duckpins from the Gatun "Outlaws" of the American League on Thursday evening, April 3. The "Outlaws" will play the "Stars" on Thursday, April 10.

The married mens' gymnasium class now numbers 16. In a game of volleyball played on Friday, April 4, the married men defeated the single men by a score of 3 to 2.

CRISTOBAL.

On Friday night, April 11, the Walter Eccles and Four College Girls Company, will give an entertainment. All seats have been reserved. Admission to nonmembers, 50 cents; members free.

The gymnasium classes and indoor baseball practice nights will be on Tuesdays and Thursdays.

PORTO BELLO.

On Thursday night, March 27, Mr. F. E. Jackson of Empire, delivered a lecture, illustrated with slides and films, on the palaces and ruling princes of India. Divine service was conducted by Rev. Carl H. Elliott of Cristobal, on Wednesday night. While Mr. Elliott was holding service in the clubhouse, Rev. Mr. Duncan, representing the Bible Society, was conducting a service among the negroes.

A "Tacky" party was given on Thursday night, April 3. The makeups were unusually good. Among the men, Mr. Hill was voted the most "tacky." On Saturday night, April 5, Messrs. Dwelle, Cullens, McCann, and King of Corozal visited Porto Bello to participate in a "smoker."

MARRIED.

CRANDALL-WATSON—In the Union Church, Cristobal, on April 6, Miss Esther Mildred Watson, of

Northwood Narrows, N. H., to Dr. Walter Midkiff Crandall of Lynn, Mass., the Rev. Carl H. Elliott officiating. Isthmian residence, Taboga sanitarium.

Sale of Furniture.

OFFICE OF THE CHIEF QUARTERMASTER.

(CULEBRA, C. Z., April 7, 1913.

Sealed proposals will be received at this office until 3 p. m., Tuesday, April 22, 1913, for the purchase of any or all of a miscellaneous lot of second hand furniture now stored at the Lirio mill. Full information regarding the items for sale can be secured upon application to the district quartermaster at Culebra. Proposals should be accompanied by certified check, money order, or cash, for five per centum (5%) of amount bid. Envelopes containing proposals should be marked "Proposals for furniture," and addressed to Gen. C. A. Devol, Chief Quartermaster, Culebra, C. Z.

Values in inches.

WEATHER CONDITIONS. CANAL ZONE. MARCH, 1913

Typical dry season weather prevailed on the Isthmus during the month of March. The rainfall was everywhere deficient. Porto Bello reported the highest monthly total, 1.17 inches, while at several stations on the Pacific slope no rain was recorded during the month. The average air temperature and wind movement were well above normal, while there was a general deficiency in atmospheric pressure, relative humidity, and cloudiness. Of the fogs observed, 71 per cent were dissipated by 6.30 a. m.; 83 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York via Kingston and Santiago de Cuba, sail thus: The *Carl Schurz* and the *Emil L. Boas* on alternate Wednesdays at 10 a. m., and the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m. ships for New York via Kingston, on Tuesdays, at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending April 5:

Arrivals—March 29, *Arica* from Buenaventura; March 31, *Guatemala*, from Callao; April 1, *Quito*, from Guayaquil; April 2, *Ucayali* from Valparaiso; April 3, *Ecuador* from Guayaquil; April 3, *City of Sydney*, from San Francisco; April 5, *Pennsylvania*, from San Francisco; April 6, *Santa Rita*, from San Francisco.

Departures—April 1, *Leelanaw*, to San Francisco; April 1, *Pleides*, to San Francisco; April 1, *Chile*, to Guayaquil; April 1, *Peru* (P. M.), to San Francisco, March 31, *Pachita*, to Mollendo; March 31, *Limari*, to Valparaiso.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, APRIL 16, 1913.

No. 34.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Foundation for Lower Approach Wall at Gatun.

The foundation for the center guide wall at the Atlantic approach to Gatun Locks has been completed over its length of 1,016 feet from the fender chains. For a distance of 200 feet, at the outer end, the concrete base rests on piles driven on 3-foot centers, longitudinally and transversely. The remainder of the supporting piles are spaced on 4-foot centers. The foundation appears to be firm, and the erection of the superstructure is being pushed.

The completion of this foundation, assuring steady progress on the approach wall, has important bearing on the date of completion of the Canal. Excavation for its site had been carried to 51 feet below sealevel when, on January 25, a large slide from the east bank carried away tracks, overthrew machinery and covered the site with a layer of mud averaging 10 feet thick. In further developments the sliding threatened the work with delay. Any slide which may occur hereafter at this point will cause no interference. The placing of concrete will go on, and the sliding material will be removed by dredges after water is let in from the Atlantic entrance channel.

Canal Excavation in March.

The grand total of Canal excavation to April 1 was 195,589,407 cubic yards, leaving to be excavated 22,548,892 cubic yards.

The total excavation for the month of March was 2,625,838 cubic yards, as compared with 2,803,015 cubic yards in the corresponding month last year, and 3,327,443 cubic yards for March, 1911.

The dry excavation last month amounted to 1,676,141 cubic yards, and was entirely by steamshovels. The dredges and monitors removed 949,697 cubic yards. The progress in the locks at Gatun, Pedro Miguel, and Miraflores is referred to elsewhere in this issue.

In the Atlantic Division, the total excavation was 438,757 cubic yards. Of this total, 35,705 cubic yards consisted of dry excavation

at Gatun Locks, and the remainder—403,052 cubic yards—was wet excavation from the Atlantic entrance.

The total excavation in the Central Division was 1,183,900 as compared with 996,800 cubic yards in the preceding month. All of the Central Division excavation during March was from Culebra Cut.

In the Pacific Division, the total excavation was 1,003,532 cubic yards, 456,536 cubic yards of which consisted of dry excavation. Of the 546,645 cubic yards of wet excavation 379,845 cubic yards were taken from the Pacific entrance, and 166,800 cubic yards from the site of the Balboa terminals.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follows:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total excavation.
Dry excavation—	Cu. Yds.	Cu. Yds.	Cu. Yds.
Locks, dam and spillway	35,705		35,705

	Cu. Yds.	Cu. Yds.	Cu. Yds.
Concrete placed in locks	418,806	134,442	553,248
Concrete placed in dams and spillways	2,653	12,862	15,515
Fill placed in dams	96,110	45,000	141,110

Mean rainfall along Canal (ten stations), 0.33 inches.
By "Work" Excavation is meant excavation actually

made for one of the constituent parts of the Canal such as prism, diversions, or locks, etc.; that is it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

*Includes 13,252 cubic yards laid at Gatun Locks to April 1 by First Division.

†Includes 10,387 cubic yards laid at Pedro Miguel and Miraflores Locks to April 1 by First Division.

Underground Cables in Colon.

All of the electric light and telephone wires of the Panama Railroad Company in Colon, beginning at a point about midway between the passenger station, and extending to Colon beach, have been placed underground. Vitrified conduit, containing six ducts, with 3½-inch openings, encased in two inches of concrete, has been installed from the point south of the freight station to the new Hotel Washington, thence to the rear of the old Washington House, with a three-line branch leading to the private road back of the Panama railroad employees' quarters. One duct has been extended to the sewer pump manhole on Colon beach for the purpose of carrying a 25-cycle line for an electrically-operated sewer pump. Four of the six ducts are designed to take care of the electric wires, one is for the telephone cables, and the sixth is for possible future growth. Manholes of sufficient size to facilitate the drawing in of cables were built of terra cotta tile, concrete, and cement. It was not found possible to keep these manholes free from seepage water from the sea, so openings were made in the sides of each manhole at the level of low tide, low enough to prevent the water from reaching the cables. Although the cables are waterproof, it was thought that their contact with salt water and cement might create a local chemical action that would tend to injure them. The work of removing all of the poles and overhead wires is now in progress.

Panama Tramway System.

The first shipment of four cars for the Panama Tramways Company will be made on the United Fruit Company's steamer *Metapan*, which is scheduled to leave New York on April 23. The remainder of the 11 cars ordered will be shipped in lots of four, or less, on each steamer of the company sailing after that date. It was originally planned to have cars with steel bodies, but owing to the crowded condition of the steel mills, it was decided rather than to incur any further delay to order cars with wooden bodies. The cars will be of the single truck type, each 25 feet long, and each car will seat about 35 passengers. The new car shed, a fireproof structure, consisting of a steel framework, with concrete-lined sides, fitted with iron doors, and the substation, which will house the transformers, are com-

NOTES OF PROGRESS.

(Continued)

pleted. The Canal Commission is building a transmission line to connect the Miraflores power plant with the substation, and has the work nearly finished. A part of the system will be placed in operation as soon as possible after the arrival of the first shipment of cars.

Under a contract between Messrs. R. W. Hebard & Company, Inc., the tramway builders and the Panama Government, dated March 25, 1913, a modern electric light and power plant will be erected on the site of the old Panama railroad building on North Ave-

nue, now used as an office by Messrs. Hebard & Company. It will have a capacity of about 1,200 kilowatts, equivalent to about 1,600 horsepower, and will probably be equipped with Diesel oil engines. The plant is designed to furnish power later for the operation of the tramway system, but will also furnish electric light and power to local consumers. Under its contract, the company agrees to furnish commercial lighting and power at a reduction of about 35 per cent from the prevailing rates, and further agrees to give the Panama Government two per cent of its gross earnings. The Panama Government, on its part agrees to admit material required for the plant, free of duty, for a period of 25 years,

and to give no other electric lighting franchise, containing additional advantages, other than those contained in the contract, in question, for a period of 25 years.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct an examination at the Administration Building, Ancon, on Wednesday, April 23, 1913, beginning promptly at 8 a. m., for persons desiring to secure the following classes of licenses: pilots, masters, mates, engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to operate same.

Canal Zone Postal Savings Bank Transactions.

A statement of postal savings bank transactions at Canal Zone postoffices for the month of March, follows:

NAME OF OFFICE.	Postal savings certificates issued.	Postal savings certificates paid.

Fire at Empire.

A fire occurred in the Pennsylvania House at Empire at 8.29 p.m., on April 8, caused by the overturning of a lamp. The damage to the premises was unimportant. Mrs. Samuel Simpson, wife of one of the occupants, was severely burned about the body by her clothing's becoming ignited while she was trying to extinguish the fire. She is now at Ancon Hospital and will probably recover.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

Over 99 per cent of the total of 4,446,530 cubic yards of concrete to be placed in the locks had been laid at the close of work on April 12, the amount in place being 4,425,410 cubic yards.

GATUN LOCKS AND SPILLWAY.

About 98 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 12, being 2,013,511 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 224,253 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending April 12, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone.	Total.	SPILLWAY.		
	Concrete placed.	Hours worked.	No. of mixers.			Concrete laid	Hours worked.	No. mixers used

LABOR FORCE AND QUARTERS IN MARCH.

Largest Force Ever Engaged in the Canal Construction

The force report for March 26 shows the actual working force of the Canal Commission to be 32,567: of the Panama railroad 6,522, and of the contractors 5,644, a total effective working force of 44,733 men. This is the largest force the Canal Commission or the Panama Railroad have ever employed, and is the largest total ever shown in the history of the Canal. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,487, a gain of three over the previous month. The total Canal force, by divisions, was as follows:

DEPARTMENT OR DIVISION	SILVER EMPLOYEES*										Total silver	Total gold	Grand total		
	Artisans.					European laborers.		West Indian laborers.							
	Monthly	44 cents.	32 cents.	25 cents.	20 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.				10 cents.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco and Naos Island. (2) Includes Europeans and Asiatics. (3) Includes 71 Panamanians. (4) Includes 23 East Indians. (5) Includes 73 Panamanians. (6) Includes Matichin. (7) Includes Colon Hospital. (8) Includes 54 Asiatics, 84 Panamanians and 12 U. S. citizens. The gold force included in the above list consists of 45 families, and 671 bachelors.

Naturalization Case of Miss Kurath.

A news item published recently in the American press stated in substance that Judge Thompson of Philadelphia had rendered a decision in the naturalization case of Miss Louise Kurath, formerly in the employ of the Isthmian Canal Commission as a nurse, declaring that residence in the Canal Zone,

for the purpose of naturalization as American citizens, is residence within the territory of the United States. The Department of Civil Administration has made inquiry with reference to the facts in this case of the Division of Naturalization at Washington. A reply has been received in which it is stated that Judge Thompson did not hand down an

opinion in the case, and that his verbal expression in admitting Miss Kurath to citizenship had no such broad application as the dispatches indicated. Judge Thompson did not hold that residence in the Canal Zone was residence in the United States. He did, however, hold that, because of certain peculiar facts in connection with the case of Miss Kurath, her residence was in Philadelphia, and that her absence was merely incident to her employment as a nurse.

Colon Hospital Changes.

Dr. C. E. Phillips has been transferred to Colon Hospital to be chief of the surgical clinic, vice Dr. Noland resigned. Dr. Phillips will hold a clinic for out patients every day during the week except Sunday, from 2 to 3 p. m., instead of the clinics formerly held on Wednesday afternoon and Sunday morning.

Hotel Washington Service.

The room rates at the new Hotel Washington on Colon Beach are as follows:

JANUARY 1 TO JUNE 1.

Room with bath, \$3 a day; \$1 for each additional person in a room.

Room with shower bath, \$4 a day; \$1 for each additional person in a room.

Room with tub bath, toilet, and shower, \$5 a day; \$1 for each additional person in a room.

JUNE 1 TO DECEMBER 1.

Room without bath \$2 a day; \$1 for each additional person in a room.

Room with shower bath \$3 a day; \$1 for each additional person in a room.

Room with tub bath, toilet, etc., \$4 a day; \$1 for each additional person in a room.

A reduction of 50 cents a room is made from the regular rates to all gold employes of the Canal Commission and Panama railroad, but no reduction is made in the price of meals. The *table d'hôte* meals are \$1 each, and an *a la carte* service is in effect from 6.30 a. m. to 11 p. m.

One of the features of the hotel is a small printing plant, equipped with several fonts of artistic letter job type, and an improved Chandler and Price 10 by 15-inch job press, operated by an electric motor. All of the hotel stationery is printed and embossed at this plant.

PERSONAL.

Lieut.-Col. Ezra B. Fuller, U. S. A., retired, librarian of the Army Staff College and Special Service Schools at Fort Leavenworth, Kan., is spending a few days on the Isthmus viewing the Canal work.

Capt. R. E. Wood, accompanied by his family, sailed for the United States on the *Cristobal*, on Sunday, April 13, on his annual leave of absence.

Dr. Lloyd Noland, chief of the surgical clinic at Colon Hospital, has resigned, effective April 9, and sailed for New Orleans on the steamship *Turrialba* on the following day, having accepted a position with the Tennessee Coal and Iron Company, with headquarters at Birmingham, Ala. He entered the Canal service on July 6, 1904, was appointed superintendent of the old Miraflores hospital for the insane on April 18, 1905, pathologist at Colon Hospital on October 1, 1905, and chief of the surgical clinic at Colon Hospital on August 1, 1907.

Dr. J. C. Perry returned from his annual leave of absence on Friday, April 11, on the *Allanah*.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION.

HYDRAULIC WORK ON SLIDES.

Monitors to be Used for Sluicing Tops and Relieving Pressure.

Cucaracha slide and the slide immediately north of Gold Hill have broken back so far from the line of the Canal that the slope of the earth at their outer edges is away from the channel. Separating these slides, Gold Hill rises to elevation 652 feet above sealevel and presents a sheer face of dark, hard rock 482 feet above the Canal bottom; it is a mass of breccia which intrusions of basaltic lava pushed upward through several hundred feet of soft overlying formations. This mass stands as firm as Gibraltar, while the soft material flanking it at the crest of the continental divide is involved in slides which, of all those along Culebra Cut, are exceeded in volume only by the slide diagonally opposite, on the west bank at Culebra. No other breaks reach as high above the Canal bottom.

The height of the tops and the outward slope of the adjacent ground will enable the use of hydraulic monitors in the adopted practice of excavating at the tops of slides to relieve the pressure. Equipment used in the hydraulic excavation south of Miraflores Locks is being installed for the purpose of sluicing material back into the valley toward which the earth slopes on the two sides and at the rear of Gold Hill. The surface over which it is proposed to waste the spoil is about 240 feet above sealevel. The construction of flumes on grades of 4.6 and 5 per cent will allow the sluicing of earth 330 feet above sealevel.

Sluicing will begin at the top of the slide to the north of Gold Hill. Under the original survey, it was estimated that 1,400,000 cubic yards were to be removed from this area, but a later break of the earth, farther back, has rendered estimates of the extent of operations only approximate. It is estimated that between 1,000,000 and 1,500,000 cubic yards can be removed economically in the Cucaracha territory, in addition to that which will be sluiced down the slide into the Canal, to be removed by suction dredge. The material to be excavated is mostly soft earth, and includes a dump made from the French excavation.

Water will be supplied by damming the upper Obispo and several of its tributaries, draining a watershed with a total area of 4.1 square miles. This will be accomplished without difficulty, because the course of the stream is crossed by an American dump below which 20-inch pipes were laid for drainage. The water can be dammed by raising the pipe intakes with vertical elbows. Foundations and retaining walls for the pumping station have been built of concrete at a point near the relocated line of the Panama railroad, about four miles above Pedro Miguel, and 3,000 feet east of the Canal, opposite Culebra. The station is to be equipped with half of the Agua Dulce pumping plant. The two 24-inch triple expansion horizontal pumping engines are stored on the ground, and the 500-horsepower boilers to supply them are being installed. Each unit was originally rated to deliver 7,500 gallons of water a minute at 150 pounds pressure. In their worn condition, however, and in forcing water against a 100-foot rise to the level of excavation, they will be counted on to furnish water at the monitors under pressure of from 80 to 85 pounds to the square inch.

The pipe line from the station to the top of the slide on the north side of Gold Hill is approximately a mile in length. It reduces in

diameter from 40 to 32 and 24 inches, and is laid with only one elbow. When the excavation is extended toward Cucaracha slide an electrically driven "booster" pump is to be installed on the northeast side of Gold Hill at elevation plus 425 feet, 200 feet above the pumping station. The approach to Cucaracha slide will be made through a saddle between the main part of Gold Hill and an adjacent knob.

A force of about 200 men is engaged in the preparatory work of erecting the station, laying and riveting the pipeline, constructing flumes, clearing and drilling. The pumping plant and machine shop are close to a spur extending from the relocated Panama railroad to the Obispo Diversion track, and additional tracks render the area accessible to trains and locomotive cranes for the handling of heavy parts. Water and compressed air for construction purposes are delivered from connections with the Culebra Cut service. The foundation for a fuel oil tank to hold 1,000 barrels is laid near the station. It is proposed to have a section of the Government's permanent transisthmian oil line laid along the relocated railroad, from the pumping station to Paraiso in time for the sluicing operations and to make connections at Paraiso with the line of the Union Oil Company. It is expected that sluicing will begin about the middle of June, by the time the rainy season flow of the streams has accumulated a sufficient reserve supply of water at the pumping plant.

New Camp for West Indian Laborers at Balboa.

A camp for West Indian laborers on the Pacific terminal work, and later, for the shop and drydock forces, etc., will be laid out on the Balboa dump, south of and along the new Sosa road, in the vicinity of the new Commission oil tanks. The plan is to erect the barracks for the silver bachelor employees on one side of Central avenue, which will lead off from Sosa road, and the quarters for the silver married employees on the other side. The material for the buildings will be provided by the dismantling of laborers' barracks at various points along the Canal. The resident engineer of the Fifth Division has been charged with the work of preparing the layout of the new camp, including water and sewer systems, and the erection of the buildings will proceed with the least possible delay, in order that the existing congestion in silver quarters at the Pacific end may be relieved. The proposed layout will provide at present for five barracks for silver employees which will be removed from Gorgona.

Operations of Insurance Companies in Canal Zone.

The following is a statement of the operations of fire, life, and miscellaneous insurance companies doing business in the Canal Zone, during the year 1912:

FIRE INSURANCE COMPANIES.	
Net premiums received.....	\$2,993.70
Net losses incurred.....	None
Risks written and renewed.....	68
LIFE INSURANCE COMPANIES.	
Insurance in force December 31, 1911...	\$98,000.00
Insurance written in 1912.....	227,016.00
Premiums received in 1912.....	11,753.53
Losses incurred in 1912.....	None
Insurance in force December 31, 1912...	280,016.00
MISCELLANEOUS COMPANIES.	
Premiums received in 1912.....	\$37,088.95
Losses paid in 1912.....	18,172.96
LOSSES SUBDIVIDED ACCORDING TO CLASSES OF BUSINESS.	
Fidelity.....	\$1,812.10
Accident.....	13,490.68
Health.....	2,870.18
Total	\$18,172.96

SOCIAL LIFE OF THE ZONE.

First Jewish Temple on Isthmus.

The opening of the first Jewish temple on the Isthmus of Panama took place in Colon, on Sunday afternoon, April 13, in the presence of a large gathering which included the President of the Republic and his aide, Senor Estrepaut, the Secretary of State, Senor Filos, the governor of Colon, Senor Arcia, the mayors of the cities of Colon and Panama and many prominent business men of both cities. The ceremonies of dedication were begun with the opening of the ark, following which the "perpetual light" was kindled while the choir sang the Hebrew hymn, "To Light." Following this the doors of the synagogue were thrown open in response to loud knocking and the rabbi and dignitaries of the congregation bearing the scrolls of the law entered. After the processional the scrolls were placed in the ark and its doors were closed. A historical address was made by Mr. Albergá, the first president of the Hebrew congregation in Colon. Congratulatory address were made by the members of the Panama society. The sermon was delivered by Rabbi Dobrin and was followed by evening prayer and the Hallelujah sung by the choir.

The synagogue is built on land granted by the Panama Railroad Company in the new fill on Broadway. It is a large frame building with a red roof and high arching dome. The structure is raised on concrete supports six feet high, and beneath it there is a solid concrete floor. The windows are of colored glass. The ark is built of solid mahogany. The cost of the temple was \$5,000. The cornerstone was laid on September 17, 1912. The services in the temple will be on Friday evenings at 6 o'clock and on Saturday mornings at 9 o'clock.

There are two Hebrew congregations on the Isthmus. The Colon congregation, "Kaal Kadosk Yangakob" (Holy House of Jacob) was organized in 1896, at which time there were nearly 200 members. The present membership is 90. In Panama the congregation "Kol Sherith Israel," (Holy House of Israel), was organized over thirty years ago, and has now 200 members.

Annual Dinner of the "Incas."

Notice of the sixth annual dinner of the Inca Society, to be held at the Tivoli Hotel on Saturday evening, May 3, has been issued. In view of the number of removals, resignations, transfers, etc., which have taken place among the members since the last annual dinner, the secretary does not know all of their present addresses. If any member is overlooked in the matter of an invitation, he is requested to communicate either with the secretary, Mr. M. C. Pratt, or Col. Tom M. Cooke, Ancon.

Orphanage Asylum Charity Ball.

The patronesses for the charity ball to be given at the Hotel Washington, Colon, on Saturday evening, April 26, in aid of the Sisters' Orphan Asylum are Mrs. Goethals, Mrs. Porras, Mrs. Rousseau, Mrs. Devol, Mrs. Burke, Mrs. Smith. The tickets, which admit a lady and gentleman are \$5, United States currency. The holder is entitled to transportation from any point on the Panama railroad and return. A special train will leave Colon for the convenience of the guests at midnight. The ball is in charge of two committees; the

first, an executive committee, composed of Mrs. C. C. Pierce, Mrs. Elder, Mrs. Murphy, and Dr. Weigle; the second, a committee, in charge of the printing, Mrs. Butters, Mrs. McCormick, Mrs. Kerr, and Mrs. Doyle.

A history of the orphanage, which will be opened this month, was published in THE CANAL RECORD of April 2.

United Spanish War Veterans.

The regular meeting of Chagres Camp No. 1 will be held at 8 p. m., on April 26, at the K. of P. hall, building No. 1, Cristobal.

Women's Clubs.

The last meeting of the executive board of the Canal Zone Federation of Women's Clubs will be held at the Hotel Washington on Saturday afternoon, April 19. It is urgently requested that every member of the board be present. There will be a lunch at the Hotel Washington at one o'clock, and the business meeting will follow immediately.

The Ancon Study Club has in view an amendment to its by-laws, which will admit to membership those women who desire to affiliate with the club as associate members. During the absence from Ancon of the chairman, Mrs. H. C. Shick, the presiding officer is Mrs. George E. Wanson.

Annual Outing of Canal Zone High School.

The annual outing of the Canal Zone High School was held on Saturday April 12, the day being spent on Taboguilla Island. The excursion left Panama in one of the Pinel launches after the arrival of the morning train from Colon. Pupils of the three branches of the high school at Gatun, Empire and Ancon, attended. They were chaperoned by three high school teachers, Miss Hine, Miss Reid, and Mr. Flory.

Accounting of Receipts from Benefit Baseball Game.

A committee, composed of Messrs. J. D. Eason, B. M. Litt, and H. H. Hudson met at Empire on the evening of April 2 for the purpose of auditing the receipts of the baseball game played at Empire Park on Sunday, March 16, for the benefit of Mrs. J. F. Catto, whose husband met his death on the night of February 21. Messrs. Bolen, Kozier, Kirk and Graham, who had charge of the sale of tickets for the game, rendered a final accounting to the committee, and it will be a source of satisfaction to everyone on the Isthmus who generously contributed to this worthy cause to know that the amount turned over to the committee was \$1,445. A draft for this amount has been turned over to Mrs. Catto.

Memorial Day Observance.

There will be a joint meeting of the American Veterans of Foreign Service, Army and Navy Union, and United Spanish War Veterans at building No. 1, Cristobal, on Sunday, April 20, immediately after the arrival on train No. 22, to make arrangements for the observance of Memorial Day, May 30, at Mount Hope. Members of all fraternal organizations are invited to attend.

Until further notice the hours for music at the Strangers Club will be from 6 to 11 on Thursdays and from 6.30 to 9 on Sundays. Informal dance every Thursday evening.

The regular dance of the Washington Cottillion Club will be held on April 19, 1913, at the Hotel Washington.

OFFICIAL CIRCULARS.

Removing Old Cards from P. R. R. Cars.

CULEBRA, C. Z., April 8, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Attention is invited to circular issued by this office under date of January 21, 1913, as follows:

"Some confusion has arisen through failure to remove old cards from P. R. R. cars that have been emptied. Please see that these cards are removed in the future as soon as the cars are empty."

The Panama Railroad Company reports that the instructions contained in the above circular are not being carried out. Please again bring the matter to the attention of all concerned.

GEO. W. GOETHALS, Chairman.

Transfer of I. C. C. Artisans to Classified Service.

CULEBRA, C. Z., March 19, 1913.

CIRCULAR No. 482:

1. The following Executive Order is published for the information and guidance of all concerned:

EXECUTIVE ORDER.

All artisans, citizens of the United States, who are or may hereafter be in the service of the Isthmian Canal Commission and who have rendered one year's satisfactory service on the Isthmus of Panama, and who may be recommended, upon discharge, for transfer, may be transferred within three years to corresponding positions in the classified service under the several Executive Departments and independent government establishments without examination, subject to the other provisions of the civil-service rules.

THE WHITE HOUSE,

WM. H. TAFT.

February 1, 1913.

[No. 1705.]

2. To be entitled to the benefits conferred by this Executive Order, an employee must fulfill all of the following requirements, viz:

a. The employee must have worked for the Commission under one of its designations of trades that are covered by the generic term of "artisan." An artisan is defined to be a person who has been trained to manual dexterity in one of the recognized mechanical trades.

b. The employee must be a citizen of the United States.

c. The employee must have been in the service of the Isthmian Canal Commission on or subsequent to February 18, 1913.

d. The employee must have rendered one year's satisfactory service in the employment of the Commission on the Isthmus of Panama. Part of the one year's service may have been rendered prior to February 18, 1913.

e. The employee must have been discharged on account of "reduction of force" or "at his own request" (that is, by resignation) and not "for cause."

f. The employee must be specifically recommended for transfer to a corresponding position in the classified service under the several Executive Departments and independent government establishments in the United States.

3. When an employee is discharged who fulfills all of the above requirements, the head of the department or division in which he is employed will recommend, on his termination of service blank, form C. E. 171-1, whether or not the employee should be transferred to the classified service.

4. There should be ascertained from each such employee and entered on his termination of service blank, C. E. 171-1, the Executive Departments and government establishments to which he prefers to be transferred, in case the employee desires to express such preference.

5. An employee who is given the rating of "Indifferent" or "Poor" in general workmanship or of "Poor" in general conduct, or to whose reemployment objection is made, will not be recommended for transfer to the classified civil-service lists.

6. There will be entered, on the termination of service blank, form C. E. 171-1, for each employee recommended for transfer to the classified civil-service lists, the particular classes of work on which he has been engaged and on which he has shown special aptitude and competency, together with such other explanatory remarks as will give the Civil Service Commission full information in regard to the employee's qualifications.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Sale of Furniture.

OFFICE OF THE CHIEF QUARTERMASTER,

CULEBRA, C. Z., April 7, 1913.

Sealed proposals will be received at this office until 3 p. m., Tuesday, April 22, 1913, for the purchase of any or all of a miscellaneous lot of second hand furniture now stored at the Lirio mill. Full information regarding the items for sale can be secured upon application to the district quartermaster at Culebra. Proposals should be accompanied by certified check,

money order, or cash, for five percentum (5%) of amount bid. Envelopes containing proposals should be marked "Proposals for furniture," and addressed to Gen. C. A. Devor, Chief Quartermaster, Culebra, C. Z.

Administrator's Notice.

In the Matter of the Estate of Leslie C. Cunningham—To any and all persons who may have a claim or claims, against the estate of Leslie C. Cunningham, deceased, who died at Pedro Miguel, Canal Zone, on January 31, 1913:

You will present the same on or before, the 15th day of October, 1913, to the undersigned Administrator of said estate, properly verified, or the same will be forever barred according to law.

TOM M. COOKE, Administrator.

Tug Service to Porto Bello and Toro Point.

Following is a schedule of Atlantic Division tugs in the service between Dock 13 and Porto Bello, and Dock 13 and Toro Point.

PORTO BELLO.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m., returning leave Porto Bello 11 p. m., arrive Dock 13 at 3 a. m.

Saturdays—Leave Dock 13 at 9 a. m., arrive Porto Bello 11 a. m., returning, leave Porto Bello 3.45 p. m., arrive pier No. 4, Colon, 5.45 p. m.

Every Saturday—Leave Dock 13 at 6 p. m., arrive Porto Bello 11 p. m., returning, leave Porto Bello 12 midnight, arrive Dock 13 at 4 a. m.

Every Sunday—Leave Dock 13, 7 p. m. arrive Porto Bello 9 p. m., leave Porto Bello 9 p. m., arrive Dock 13, 11 p. m.

TORO POINT.

Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. Sailing No. 2—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.

Special, Wednesdays, ONLY—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m., returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.

Saturdays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m., returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. Sailing No. 2—Leave Dock 13 at 5.00 p. m., arrive Toro Point 5.30 p. m. Leave Toro Point 5.30 p. m., arrive Dock 13 at 6 p. m.

Sundays. Sailing No. 1—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. Sailing No. 2—Leave Dock 13 at 4.30 p. m., arrive Toro Point 5 p. m., returning, leave Toro Point 5 p. m., arrive Dock 13 at 5.30 p. m.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York via Kingston and Santiago de Cuba, sail thus: The *Carl Schurz* and the *Emil L. Boas* on alternate Wednesdays at 10 a. m., and the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m. ships for New York via Kingston, on Tuesdays, at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The following ships arrived at, or departed from the port of Balboa during the week ending April 12, 1913:

Arrivals—April 7, *Manitro*, from Valparaiso; April 9, *Palena*, from Valparaiso; April 10, *San Jose*, from San Francisco.

Departures—April 7, *Guatemala*, to Guayaquil; April 7, *Quito*, to Guayaquil; April 6, *Ucayali*, to Valparaiso; April 10, *Ecuador*, to Guayaquil; April 10, *City of Sydney*, to San Francisco; April 7, *Santa Rita*, to San Francisco; April 12, *Arica*, to San Francisco and intermediate points.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, APRIL 23, 1913.

No. 35.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission to the Secretary of War for the month of March is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Consolidation of Timekeeping Force.

Effective April 1, the timekeeping office of the Atlantic Division was consolidated with the central timekeeping office of the Department of Examination of Accounts at Culebra. The transfer of the office force, including all of the 10 employees, with one exception, and of the timekeeping records, took place on April 10. The central timekeeping office now has a force of 42 gold employees, and the time and pay rolls for the Chief Engineer's office, the Second, Fifth, and Sixth Divisions of the Chief Engineer's office, the Atlantic Division, the Department of Sanitation, and the Department of Civil Administration are prepared there. In addition, there are district timekeepers, one each at Gatun, Porto Bello, Cristobal drydock, and Balboa, who are charged with the issuing of commissary and hotel books, and other duties, and who report to the Culebra office. The Central and Mechanical Divisions and the Subsistence Department continue to maintain their own timekeeping forces.

Transfer of Gorgona Employees Begun.

The transfer of gold bachelor employees from Gorgona to Empire and Cristobal is in progress, and it has been decided that the Gorgona transfers are to take precedence over those from other districts. The removal of the car repair work from Gorgona shops to Empire on May 1 will necessitate quartering approximately 30 additional gold bachelors in the Empire district. As there are only nine Type 5 houses in that district, it will be necessary, until the demand for quarters has lessened, to assign three men to a room, as has been the

practice in Type 5 houses in other districts. There has been a decrease on the gold roll at Gatun of 69 employees, which has afforded relief to the situation at that point. At the Pacific end, however, quarters are congested, particularly the silver quarters.

New Developments of Slide of February 5.

The large mass of broken rock on the east side of the Canal, opposite Culebra, included in the original break of February 5, 1913, took its third movement downward and laterally on the night of April 16, heaving up the bottom of the Canal in much the same way as on the two previous occasions, and destroying four tracks, all of which had been destroyed on each of the two previous occasions. A single track only, on the extreme west side of the Cut, was left in commission. A second one has since been relaid, and on the afternoon of April 17, two tracks on the west side of the Cut were in commission.

The slide involved no new material, but was simply a repetition of what took place at the time of the original break, which action will probably be repeated several times in the future before the height of the broken bank and the volume of the material involved in it are so reduced as to prevent further heaving of the bottom.

Steamshovels on 12-Hour Shift.

Nine steamshovels are now working on a 12-hour shift in the Culebra Cut section, four having been added, on Monday, April 14, to the five previously at work. Five steamshovels on this schedule are excavating in the Cucaracha slide, two have been set at work in the new movement of the break on the east bank, north of Gold Hill, which developed on February 5, and the remaining two are engaged in terracing the bank back from the edge of this break. The longer day of the steamshovels necessitates a corresponding lengthening of the schedule for the work trains which serve the nine shovels, and these do not stop work now until 6.30 at night. The object of the extra shift was to make additional headway in the removal of the slide material.

Dumping of Culebra Cut Spoil.

The dumping of material removed by the Culebra Cut steamshovels now includes the Naos Island breakwater, the Balboa dump, the Ancon-Sosa fill, inclusive of the area near the baseball park; the Balboa Wye fill, the sanitary fill south of the Miraflores power house, the fill on the Panama railroad relocation embankment between Miraflores and Pedro Miguel, the backfill at Pedro Miguel Lock, the Culebra swamp dump, the Gold Hill, or Cotton Tree dump, on the east bank of the Canal and Nos. 1, 4, 5, and 7 dumps off the Panama railroad relocation north of Gamboa. Dumping for the Ancon-Corozal wagon road embankment fill was completed

last week. Operations have entirely ceased on the Miraflores dump, and the tracks over the area have been torn up. At the present time no material is carried north farther than the dumps on the relocation north of Gamboa. More material is being wasted on these dumps at present than at any other one locality, the number of trainloads on April 19 being 43, which was an average day. On the same date, 12 trainloads were dumped on the Naos Island breakwater; 43 on the fills at Balboa and around Sosa and Ancon Hills; one south of the Miraflores power house; nine, between Miraflores and Pedro Miguel; one on the Pedro Miguel Lock backfill; 17 on the dump at West Culebra, and 17 at Cotton Tree dump. The number of trainloads dumped on April 19 was 148, with a total of 50,098 cubic yards of material. This number of trainloads is sometimes more, and again it is less.

Manufacture of Roofing at Paraiso.

The American Cement Tile Manufacturing Company has a force of seven white Americans and 38 negroes engaged at Paraiso in the manufacture of roofing tile for the terminal buildings at Balboa. About one-eighth of the quantity has been completed and is in storage. A test was recently made for the purpose of determining the breaking load and strength per square foot, and the results show that the tile is well above the stipulations of the contract with the company.

New Drainage Ditch Between Empire and Culebra.

A steamshovel was set at work this week excavating a drainage ditch on the west bank of the Canal, beginning at a point near the old Lirio planing mill, thence parallel to the Cut to El Cerro, where it will turn and continue back of the Empire incinerator until it connects with the open drain that serves the village of Empire. Before the fill at West Culebra was begun, the surface water from the area to be served by the ditch drained into the nearby swamp and ran out from it gradually. With the filling of almost the entire area covered by the swamp, the water is now pent up in a comparatively small space, and will rush through its only outlet during heavy rains in such volume as to endanger the solidity of the bank between the present drainage ditch and the Canal. The new ditch will involve a cut about 18 feet in depth.

To Remove Shoal in Limon Bay.

A shoal in Limon Bay, west of the Atlantic entrance, and on a line west and a little north of Cristobal Point, will be removed by Atlantic Division dredges within the next few months. The shoal covers an area of approximately one-half of a square mile, and will be dredged to a depth of not less than 30 feet below mean sealevel, involving the excavation of about 346,000 cubic yards. In addition to the shoal, two hummocks that exist in the bottom of

NOTES OF PROGRESS.

(Continued.)

the harbor near the entrance to the Canal prism will be removed.

Arrangements have also been made to take soundings in that part of the bay, lying between the Toro Point breakwater and the 30-foot contour, west of the Canal entrance, in order that the 30- and 35-foot contours referred to mean sealevel may be accurately located and plotted, and to make certain that in the area between the 30- and 35-foot contours there are no depths less than 30 feet, and no hummocks projecting above the level of the surrounding bottom. In the same way

soundings will be taken of the bottom of the bay between the 35-foot contour and the breakwater, in order to ascertain if there is a uniform depth of 35 feet. The soundings will probably be accomplished by the drag method.

Lieut.-Col. William V. Judson has been appointed chairman of the Board of Local Inspectors, effective April 25, vice Mr. W. G. Comber, resigned.

Mr. Daniel J. Waters has been appointed vice and deputy consul general of the United States at Panama, vice Mr. Caspar L. Drcier, transferred to Bangkok, Siam.

PERSONAL.

Brig.-Gen. C. A. Devol, accompanied by Mrs. Devol, sailed on the *Allianca*, on Friday, April 18, on his annual leave of absence.

Col. W. C. Gorgas sails on the *Parismina* for New Orleans, on Saturday, April 26, on his annual leave of absence. Mrs. Gorgas will leave for New York on the next sailing of the *Ancon* from Colon.

Col. John L. Phillips, accompanied by his family, returned on Monday, April 21, on the *Ancon*, from his annual leave of absence.

Lieut.-Col. Charles F. Mason returned from vacation leave on the *Ancon*, which docked at Cristobal on April 21.

Maj. Henry A. Brown, chaplain at St. Luke's, Ancon, sails on the *Colon*, on Thursday, April 24, on his annual leave of absence.

Dr. A. J. Orenstein, who resigned his position as Assistant Chief Sanitary Inspector, sailed for New York on the *Allianca* on Friday, April 18. From New York he goes to Hamburg, Germany, to enter the Colonial Institute in that city, with the view of later entering the German Colonial Service in Africa. He entered the Canal service on November 6, 1905, was stationed for a time at Colon and Ancon Hospitals, later was appointed district physician at Ancon, and Assistant Chief Sanitary Inspector in May, 1911.

The building at Culebra, occupied by the dispensary, will be dismantled on account of steamshovel operations on the west bank of the Cut. The old motor house will be fitted up for use as a dispensary.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending April 19:

DATE.	Hours worked.	Cubic yards.
April 7.....	7.25	1,908
April 8.....	4.50	1,844
April 9.....	5.50	2,214

April 16.....	6.40	1,954
April 17.....	4.45	1,949
April 18.....	5.00	1,776
April 19.....	5.55	1,775
Total.....	33.05	11,112

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

About 99 per cent of the entire quantity of concrete to be placed in the locks and spillways had been laid at the close of work on April 19, the amount in place being 4,433,803 cubic yards.

GATUN LOCKS AND SPILLWAY.

About 98 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 19, being 2,017,167 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 224,687 cubic yards out of a total of 225,000 cubic yards. A statement of the amount placed each working day of the week ending April 19, and of the total, follows:

DATE.	CONSTRUCTION PLANT 2-cubic yard mixers.				Large stone.	Total.	SPILLWAY.

CANAL MEDAL LIST.

On the following list are the names of American employees of the Isthmian Canal Commission, who have completed two years of continuous service on the Isthmus during the twelve months ending December 31, 1912, and are in consequence entitled to receive a Canal medal. The date shown opposite each name is that from which medal service is computed.

The list is published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman for correction.

A continuation of the medal list, together with a list covering employees of the Panama railroad, as well as the bar lists for both I. C. C. and P. R. R. employees, will appear in later issues.

Heads of divisions are requested to carefully check their lists of American employees on the silver roll, and to report any omissions on the medal or bar lists to this office.

(To be continued.)

DOORS FOR LOCK TUNNELS.

Award Made for 99-Details of their Construction.

Award has been made to the Mesker Iron Company of St. Louis for the manufacture of 99 steel doors, complete, to close all entrances to the operating tunnels of the locks. The contract price is \$4,398 and delivery is promised in 60 days.

The doors are to be rectangular in form,

the numbers placed on the keys. The hinges, pins, and gudgeons are to be of steel; the hinge part will be fastened to the gudgeon and riveted in, and not of the loose-pin type.

The doors are to be fitted with brass locks, consisting of a large locking bolt in the horizontal plane, made of steel, which will be opened or closed by a T handle, also of steel. Each lock will have two flat keys of Yale

all members of a powder gang engaged in blasting in that part of the Canal prism, south of Miraflores Locks, enclosed between two earth dikes, the south one of which serves as a barrier against the open water channel to the sea. The gang numbered 30 men in all, 27 of whom were powdermen. The explosion occurred about 15 or 20 minutes after the men had finished loading the drill holes, and the most of them were in a body to one side of the danger zone waiting for the order to make the final connections. The switch box from which the blasts are shot off is situated on an elevation on the east bank of the Canal, about 300 yards from the scene of the explosion, and it had not been opened. There was only one key to the box, and it was in the pocket of the subforeman who was killed. Mr. Richard Roberts, the foreman in charge, had left his field office for the site of operations to give final directions preparatory to setting off the blast, when he stopped to speak to one of his men. It was at this moment that the explosion occurred. The material in which the dynamite was planted was mostly mud and hard clay; had it been rock, which constitutes a large part of the excavation in this section, the mortality would probably have been much greater. The drill holes were 92 in number, and were bored to a depth of 30 feet, and, owing to the fact that the locality is below sealevel, there was about 25 feet of water in each hole over each charge. All the charges were set off. The cause of the explosion has not been established.

Obituary.

Charles M. Swinehart, a general foreman in the employ of the Central Division, was killed on Friday, April 18, while working at the bottom of the Cut, near Station 1670, Empire. He was assisting in connecting a section of pipe when a large rock rolled down the side of the Cut from the 95-foot level and struck him on the head, fracturing his skull. He entered the Canal service in April, 1905, was 32 years of age, and unmarried. His home before coming to the Isthmus was at Berlin, Wis. His mother, Mrs. Deceta Swinehart, lives at Las Cascadas.

Olaf W. Johnson, naturalized American, died at Colon Hospital on Friday, April 18. He was a carpenter in the employ of the Atlantic Division, residing at Gatun, and first entered the Canal service on September 23, 1905, reentering it in 1909. He was a native of Sweden, 34 years of age, and unmarried. A sister, Mrs. Aaron Lawson, lives at No. 295 Pearl street, Providence, R. I.

W. E. Hall, American, nonemployee, residing at Cristobal, died at Colon Hospital on April 2. He was 34 years of age, and unmarried. He was in the Canal service at one time, and had been on the Isthmus about two years and a half. His mother, Mrs. S. J. Hall, lives at Grenada, Miss.

Harry Modin, naturalized American, employed on dredge No. 85 at Balboa, died at Colon Hospital on Monday, April 21. He was a native of Sweden, was 40 years of age, and had been on the Isthmus 11 years, entering the Canal service in August, 1908. He is survived by his wife, Mrs. Hilda Modin, and daughter, four and one-half years old, residing at Gatun.

Mr. D. S. Webster has been appointed consul for the kingdom of Norway in the city of Colon.

FRONT ELEVATION OF DOOR TO OPERATING TUNNEL.

constructed of open hearth structural steel, galvanized, and equipped with the necessary keys, stops, gudgeons, and hinges. All holes are to be drilled and locks and hinges

type, and the locks are to have 14 master keys, six for Gatun Locks, which will open all of the 44 doors; four for the 24 doors at Pedro Miguel Lock, and four for the 31 doors at Miraflores Locks. All of the 99 locks are to be different as to individual keys, and each key will have an initial stamped on it, as "G" for Gatun, "P. M." for Pedro Miguel, etc. Two of the doors at Gatun Locks will be 41 inches wide and 71 inches long; all the others will be 47 inches wide and 71 inches long. They will be installed by the Commission forces.

Premature Explosion of Dynamite.

Three men were killed and 19 more or less seriously injured in a premature explosion of 21,050 pounds of 60 per cent dynamite in the Canal prism, opposite Corozal, at about 1.55 p. m., on Saturday, April 19. No Americans were among the victims. The dead are: Frederick Dunning, subforeman, Antigua; Edward Blake, Jamaican; Gaston Victor, Martiniquan. Of the injured, seven were from Barbados, three from Antigua, one from Jamaica, four from St. Vincent, two from Montserrat, one from St. Kitts, and one from Cuba. Two men are still missing, and although a crew of laborers has been at work digging over the ground on and near the site of the explosion, no trace of them had been found up to Tuesday night. The men were

LOCK FOR DOOR

properly attached. Each door will be marked with a brass name plate; for example, "Gatun No. 1, etc.," "Pedro Miguel No. 1, etc." The numbers used will correspond with

CANAL WORK IN MARCH.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., April 16, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of March, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d Div.	5th Div.	6th Div.	Total.
Work excavation, dry..	Cubic yds...	35,705	1,183,900	51,387	395,500		1,666,492
Work excavation, wet..	Cubic yds...	380,243		*166,800		379,845	926,888
Total work excavation	Cubic yds...	415,948	1,183,900	218,187	395,500	379,845	2,593,380
Plant excavation, dry..	Cubic yds...			3,949	5,700		9,649
Plant excavation, wet..	Cubic yds...	22,809					22,809
Total plant excavation	Cubic yds...	22,809		3,949	5,700		32,458
Total Canal excavation	Cubic yds...	438,757	1,183,900	222,136	401,200	379,845	2,625,838
Material placed in dams	Cubic yds...	96,101			45,800		141,901
Concrete placed, locks, dams and spillways..	Cubic yds...	51,465			47,304		98,769
Explosives used.....	Tons (Gross)	48.48	145.64	11.96	57.12	19.00	282.20
Rock drilled.....	Feet.....	22,012	339,566	12,698	99,972	12,460	486,708
Tracks removed.....	Miles.....		9.00	2.67			11.67
New tracks laid.....	Miles.....	3.10	20.53	3.75	2.50		29.88
Rock crushed.....	Cubic yds.				65,743		65,743
Cement used.....	Barrels.....	42,531	77	3,956	38,592	14	85,170
New roads built.....	Miles.....				.58		.58
Water mains laid.....	Feet.....	9,009	600		3,110		12,719
Sewers laid.....	Feet.....	400	558		269		1,227
Open drains and ditches dug.....	Feet.....	38,051	382	900			39,333
Average daily force.....		5,069	6,752	1,183	6,434		19,438
Average rainfall.....	Inches.....	.90	.25				0.33

*Accomplished by 5th division for the 2d division

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineer of the Atlantic Division, the resident engineer of the Fifth Division and the erection subdivision of this office. The inspection of this work is being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

Work was continued on the erection of the eight spillway gates at Miraflores, and was about 90 per cent completed at the close of the month.

Work on the preparation of rising stem gate valve machinery chambers was continued at Gatun, Pedro Miguel, and Miraflores; at the end of the month it was about 95 per cent completed at Gatun, 85 per cent completed at Pedro Miguel and 35 per cent completed at Miraflores.

Inspection of the assembly and riveting of draft tubes for the Gatun hydroelectric station was continued.

LOCK GATES AND PROTECTIVE DEVICES.

All material for the 92 leaves has been completed and shipped, except the nickel steel bearing plates for 10 leaves. Practically

all structural material for the spare parts has been riveted and shipped; the bearing plates, bolts, and a large part of the castings for the spare parts remain unfinished. Shipments of spare parts during the month totaled 611 tons. Erection, reaming, and riveting were prosecuted at a high rate of speed and the finishing of the leaves progressed satisfactorily. The riveting at Gatun and Pedro Miguel is so far advanced that it will not delay the completion of the gates. The status of the work in the several locks may be summarized as follows:

Gatun—Work was in progress on all the leaves, 40 in number; erection, 86 per cent completed; reaming, 93 per cent completed;

riveting, 82 per cent completed; finishing, 20 per cent completed.

Pedro Miguel—Work was in progress on the entire 24 leaves; erection, 82 per cent completed; reaming, 94 per cent completed; riveting, 84 per cent completed.

Miraflores—Work was in progress on all of the 28 leaves; erection, 64 per cent completed; reaming, 54 per cent completed; riveting, 35 per cent completed.

LOCK GATE RECESS COVERS.

Except the movable parts at the quoin end of the recesses, the status of the work remained the same as at the close of the previous month. The contractors now engaged in coating the interior of the lock gates have entered into an agreement to thoroughly clean and coat with bitumastic enamel all parts below the coping not imbedded in concrete, and the work on this painting has just begun.

CHAIN FENDERS.

The field work consisted of a practical test of the first chain fender—812-813. All parts of the apparatus functioned satisfactorily. It was found, however, that there is some liability to the collection of air in the piping, which made it desirable to raise the tanks in these two pits and also to arrange the piping in the remaining chain fenders, so that the lower level of the water in the tanks will always be higher than any part of the piping. Tests were also made to determine whether the resistance valves will function properly in service and also to decide between the Ross and the Mueller valves; but these tests are still incomplete.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Reduction of the inspection force continued. The contractors are still behindhand, but progress is being made in the rates of delivery. The following tabulations summarize the work:

RISING STEM GATE VALVES.

To date.....	20	2	

ELECTRICAL WORK—ATLANTIC LOCKS.

Conductor rails, insulators, brackets, and cover plates were installed on 2,462 feet of straight track, making a total of 25,468 feet. Of this, 11,346 feet have been equipped with steel conductor bar and 14,122 feet with copper conductor bar. Two thousand eight hundred and sixty-eight feet of cable were pulled to the end of the month. In connection with the installation of the different classes of machines, the following electrical work was performed:

Cylindrical valve machines—Motor connected on 59; limit switch installed on 55, and connections made on 14; indicator switch installed on 58, and connection made on 14; all contact panels installed.

Auxiliary culvert valve machines—Motor connected on two; limit switch installed on four, and connection made on two; contact panel installed on four.

Rising stem valve machines—Motor connected on four; limit switch installed on 43, and connection made on 15; contact panels installed on 43, and connection made on 15; contact panels installed on 30.

Miter gate moving machines—Limit and commutating switches installed on 19; contact panel installed on 21.

Handrail operating machines—Controller and contact panel installed on 21.

Electrical work was started in one transformer room.

The service tests started in February on sample towing locomotive No. 640 were continued during the month and 16,610 trips were made. The load was increased from 11,000 pounds to 14,000 pounds, 3,320 trips being made with the latter load.

Spillway gate machine No. 13 was tested, raising and lowering the spillway gate, and operated satisfactorily.

Test was made of handrail machine No. 35, with temporary control, and the operation of same was, in general, satisfactory.

On March 31, the erection of the penstocks for the hydroelectric station was about 90 per cent completed; water turbines Nos. 2 and 3 had been erected, and No. 1 partially erected; all turbogenerator subfoundations were in place; the erection of all turbogenerators was approximately 24 per cent completed.

ELECTRICAL WORK—PACIFIC LOCKS.

Conductor rails, insulators, brackets, and copper plates were installed on 1,426 feet of track, making a total of 12,903 feet. Of this amount, 6,002 feet have been equipped with

steel and 6,901 feet with copper conductor rail. There were 2,880 feet of fibre conduit installed during the month, making a total of 19,042 feet. This entire amount, together with 97,461 feet of vitrified tile conduit, has been rodded, cleaned, and made ready for the reception of cable. At the close of the month, 48,987 feet of cable had been pulled into the conduit system. The following electrical work was performed during the month in connection with the installation of the different classes of machines:

Cylindrical valve machines—Limit switch and contact panel installed on 20. The entire 20 operated satisfactorily.

Auxiliary culvert machines—Limit switch and contact panel installed on four.

Rising stem valve machines—Limit switch installed on 22; contact panel installed on 18. Six of these machines were tested.

Miter gate moving machines—Motor connected to two; contact panel installed on eight.

Miraflres—Steel conductor bar, insulator brackets, and plates were installed on 2,000 feet of track. There were 28,811 feet of duct rodded, cleaned and wired. Satisfactory tests were made on 20 cylindrical valve machines. Experiments on the waterproofing of tunnels continued during the month.

EMERGENCY DAMS.

Inspection was in progress at five localities in the United States, and 1,125 tons of material were accepted. At the end of the month, 13,572 tons had been fabricated and accepted. There were only about 10 tons of material delivered on the Isthmus during the month; approximately 1,114 tons were erected. On March 31, a total of 8,642 tons had been delivered and 5,202 tons erected. There was no receipt of material during the month; about 40 per cent of that on the ground had been erected at the close of the month. Work was in progress on the east and west dams at Gatun and the east and west dams at Pedro Miguel.

AIDS TO NAVIGATION.

There was one steel lantern door hung and one circular stairway completed on range towers of the Atlantic and Pacific type. The rust scale was scraped from and cement wash applied to the reinforcing bars of the caisson for the west breakwater light. Two concrete steel reference targets 20 feet high were completely erected. In the vicinity of San Pablo and Tabernilla about 28 acres of Canal prism were cleared of trees. Work was also in progress finishing range No. 2, Gatun Lake section, erecting and painting metal lantern stairways in range towers No. 1, Gatun Lake section, and Nos. 5 and 6, Atlantic Division; assembling six gas buoys, chains and sinkers, and placing gas buoys on station at the Pacific entrance to the Canal.

Second Division—Office of the Chief Engineer.

BALBOA TERMINALS.

The following work was accomplished during the month:

EXCAVATION.	Cu. Yds.
Preparing site.....	18,264
Drydock No. 1.....	28,421
Shops.....	4,815
Pier No. 1.....	2,595
Quay Wall.....	1,241
Total.....	55,336

FILLING AND EMBANKMENT.

Preparing site.....	33,384
Backfill (shop foundations).....	712
Dikes.....	4,556
Sand line.....	120
P. R. R. temporary coal pockets.....	300
Sixth Division drainage ditch.....	4,140
Fifth Division.....	840
Atlantic Division.....	12,320
Total.....	56,462

CONCRETE PLACED.

Caissons.....	1,531
Shop foundations.....	1,173
Total.....	2,704

There were 200,745 pounds of steel reinforcing placed, 12,698 lineal feet of rock drilled, 26,805 pounds of dynamite used. Work was continued on the quay wall.

The American Cement Tile Manufacturing Company, which has been awarded the contract for the tile to be used on the roofs of the permanent shops at Balboa, made, at Paraiso, 6,600 standard tile, 500 glass tile, 600 standard half tile and 500 ridge rolls. Samples of these tiles were tested to destruction and, although thinner than those tested by the Bureau of Standards, each sustained a load far in excess of the specified requirements.

METEOROLOGY AND HYDROGRAPHY.

The usual observations and measurements were made and taken.

Fifth Division—Office of the Chief Engineer

DISTRICT NO. 1, LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation amounted to 401,200 cubic yards, of which 264,100 cubic yards were classified as rock, and 137,100 cubic yards as earth.

Filling and Embankment—Two thousand cubic yards of dry filling were added to the prism of the west dam at Pedro Miguel, increasing the total amount in place to 692,878 cubic yards. The backfill at Pedro Miguel was increased by 51,400 cubic yards, the total quantity in place at the close of the month being 905,636 cubic yards. At Miraflores, the dry filling in the toes of the west dam was increased by 43,800 cubic yards, making the total quantities of dry and hydraulic filling in place at the end of the month 1,619,414 and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 99,000 cubic yards, the total quantity in place at the close of the month being 1,355,547 cubic yards.

Pedro Miguel Locks—Concrete work consisted of the construction of the south guide wall extension, miscellaneous finishing and trimming. Installation of the buffer springs in the guide walls was commenced. The total amount of concrete laid was 4,793 cubic yards, placed as follows: Two hundred and ninety-nine cubic yards in the walls, 49 cubic yards in the floors, and 4,445 cubic yards in the south approach wall.

OPERATION OF THE AUXILIARY CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete, actual time worked.....	8.23
Average number of mixers per day.....	2.08
Average hourly output per mixer, actual time, (cubic yards).....	11.33
Concrete laid (cubic yards).....	4,850.00

The above total includes 24 cubic yards placed for the American Bridge Company, 25 cubic yards for the United States Steel Products Company, and eight cubic yards for the Central Division drainage. The plant consisted of three $\frac{1}{2}$ -cubic yard mixers, the output of which was either discharged by mixers directly into forms, or handled to forms by Decauville equipment.

Miraflores Locks—The concrete work for the locks consisted of the completing of the south guide wall, the laying of concrete in

the southwest wall and floor of the lower west chamber, northwest wing wall, operating tunnels, and in the manufacturing of concrete lamp posts. The total amount of concrete laid was 20,208 cubic yards, placed as follows: Ten thousand eight hundred and seventy-eight cubic yards in the walls, 2,962 cubic yards in the floors, 5,422 cubic yards in the south approach wall, 430 cubic yards in the northeast core wall and 516 cubic yards placed for the First Division. Fixed irons, aggregating 215,263 pounds, were placed in the masonry.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant	Auxiliary Plant
Length of working day (hours).....	8.00	8.00
Average number of hours per day worked laying concrete, actual time.....	3.12	7.03
Average number of mixers per day.....	7.00	3.44
Average hourly output per mixer actual working time (cubic yards).....	34.92	14.31
Average amount of concrete laid per hour per berm of chamber crane, actual working time (cubic yards).....	44.73	

Concrete laid (cubic yards)..... 13,534.00 19,452.00

The above totals include 12,432 cubic yards laid in the Miraflores spillway, 136 cubic yards in the sump pump discharge, and 210 cubic yards for the McClintic-Marshall Construction Company. The auxiliary plant consists of a daily average of 7.03 $\frac{1}{2}$ -cubic yard mixers, the output of which was discharged directly into forms, or placed by derricks and locomotive cranes. The permanent plant consisted of four berm and four chamber cranes.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers, and oil pipelines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER.

Length of working days (hours).....	12.00
Average number of hours per day, actual working time.....	9.40
Average number of cubic yards crushed per hour per working day.....	219.14
Average number of cubic yards crushed per working hour.....	279.75
Total output for the month (cubic yards).....	65,743.00

Sixth Division—Office of the Chief Engineer.

The following is a statement of the output of the seven dredges which were in operation during the month:

DREDGE.	Type.	WORK.			PLANT.		Total.	Remarks.
		Earth.	Clay.	Rock.	Earth.	Rock.		
		Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	Cu. Yds.	
Badger.....	Ladder.....	4,722	18,495	16,133			39,350	Place measurement
Cardenas.....	Dipper.....		450	8,700			9,150	Snow measurement
Corozal.....	Ladder.....	21,194	53,610	49,870			124,674	Place measurement

No. 85.....	Suction.....				160,865		160,865	Place measurement
Total.....		203,520	93,838	82,487	166,800		546,645	

CHAMÉ SAND EXCAVATION.

Approximately 33,660 cubic yards of sand were excavated at Punta Chamé and delivered to the Balboa sand bins.

BALBOA SHOPS.

The manufacturing and repair work in the shops and shipways was satisfactorily performed during the month.

Atlantic Division.

GATUN LOCKS.

Excavation—There were 39,975 cubic yards excavated during the month. Of this amount, 2,569 cubic yards were removed from the lock site in the preparation of foundations for the north approach walls; the remainder was

taken from the borrow pit and Canal prism for the backfill and construction tracks.

Backfill—There were 40,972 cubic yards of backfilling placed during the month. The total amount placed to April 1, was 2,050,468 cubic yards. On that date the work was 98.91 per cent completed.

Receiving and issuing material—The issues of rock for the month amounted to 29,327 cubic yards. There were 10,883 cubic yards of sand dredged from the pool north of the spillway and added to the storage pile; 15,148 cubic yards of sand were issued. Cement receipts totaled 42,040 $\frac{1}{2}$ barrels and the issues amounted to 38,261 $\frac{1}{2}$ barrels.

Mixing and placing plants—Mixer No. 1 and the portable mixers were kept in satisfactory operation throughout the month.

Concrete work—A total of 34,928 cubic yards of concrete was laid, distributed as follows: Upper lock, 47 cubic yards; middle lock, 28 $\frac{1}{2}$ cubic yards; lower lock 34,852 $\frac{1}{2}$ cubic yards.

On March 31, the locks concrete work was 98.01 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	9.00
Average number of actual working hours per day per strand of cableway, laying concrete.....	5.84
Average number of mixers per day.....	4.00
Average hourly output per mixer, actual working time (cubic yards).....	59.95
Average amount of concrete laid per actual working hour, per strand of cable (cubic yards).....	29.75
Concrete laid (cu. yds.) cableways.....	34,736
Concrete laid (cu. yds.) portable mixers.....	127
Concrete laid (cu. yds.) hand mixed.....	309

Total amount of concrete laid (cu. yds.)..... 35,172.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement, 113,377 cubic yards, making the total amount in place 21,439,754 cubic yards. On April 1, the dam was 97.4 per cent completed.

Hydraulic fill—There was no increase made in the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry fill—There were added to the dry fill 96,101 cubic yards of material removed by steamshovels; this was placed on the north

and south toes of the dam, east and west of the spillway, making the total dry fill in place 11,278,500 cubic yards.

GATUN SPILLWAY

Concrete—A total of 2,659 cubic yards of concrete was laid during the month. A revised estimate of the amount of concrete required to finish the spillway dam shows that on April 1st 7,506 cubic yards remained to be placed, exclusive of 1,200 cubic yards in the penstock head wall estimated for under the hydroelectric plant, and exclusive of 1,000 cubic yards for paving the terrepain along the side walls of the spillway, covered by a special estimate. Concrete work for the spillway is 96.7 per cent completed.

HYDROELECTRIC PLANT.

During the month 89 cubic yards of rock were removed by hand in the preparation of foundations, making a total excavation of 98,080 cubic yards. There were 626 cubic yards of concrete placed, making a total of 1,789 cubic yards.

HARBOR AND CHANNEL SECTION.

*Dredging—From the ocean to Gatun Locks—*Seven dredges removed 329,077 cubic yards of earth and 51,166 cubic yards of rock from the Canal prism. In addition, the dredge *Caribbean* removed 93,646 cubic yards of earth from the Cristobal approach channel; dredge No. 4 removed 104,940 cubic yards of earth from the slip at Panama Railroad Company's pier No. 17, and 7,671 cubic yards of earth from between piers 16 and 17, as well as 22,809 cubic yards of earth from the French canal. On March 31, forty feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 4 plus 3,000 feet, 30 feet to mile post 4 plus 3,600 feet, 20 feet to mile post 6 plus 2,350 feet, and 10 feet to mile post 6 plus 2,800 feet. The *Terrier* drilled 3,008 feet, used 30,460 pounds of dynamite and shot 29,129 cubic yards of rock to minus 45 feet mean sealevel.

*West breakwater, Colon—*There were 19,321 cubic yards of Porto Bello rock unloaded, of which 12,108 cubic yards were handled by cranes and 7,213 cubic yards by the derrick barges, making the total amount unloaded to April 1st 189,927 cubic yards.

MUNICIPAL ENGINEERING.

*New Colon waterworks—*In the sedimentation basin there were 2,100 cubic yards of material excavated, 1,600 lineal feet of 20-inch pipe underdrain laid, and fifty-five 30-foot concrete piles driven. The backfill around the walls of the clear water basin was completed to elevation 11; the columns supporting the filter beds were constructed; the floor of the pipe gallery and the walls of the main building to elevation 16 were completed. The forms for the walls of the pump station, up to and including the eaves, were made ready for concrete.

The reservoirs, water mains, sewers, roads and oil pipe lines were maintained and extended as required to facilitate construction work.

Central Division.

The total amount of material excavated during the month was 1,183,900 cubic yards, of which 259,571 cubic yards were classified as earth, and 924,329 cubic yards as rock. The entire amount was removed by steamshovels and all of it was primary excavation in the Canal prism.

The daily average number of steamshovels at work was 38.52 and the total number of shovel days was 963, as compared with 38.8 shovels at work and 892.5 shovel days in February. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels.	Classification of material		Av. No. of shovels at work	W'kg days	Av. yards per shovel day.
		Rock.	Earth.			
1912	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. P.
Mar ..	1,702,125	1,335,061	347,064	46.27	26	1,414.90
1913:						
Mar ..	1,183,900	924,329	259,571	38.52	25	1,229.00

Rainfall at Empire: 1912, .01 ins.; 1913, .22 ins.

The above table shows the average output

to be 13.14 per cent less in March, 1913, than in the corresponding month of 1912.

The total amount of material excavated from Culebra Cut in March, 1913—1,183,900 cubic yards—is the lowest record in that section for the month of March since 1907; in March of that year 815,270 cubic yards were removed.

The estimated amount of dry material removed and to be removed, according to the revision of February 1, 1913, is 111,751,472 cubic yards. Up to April 1, 1913, 104,232,172 cubic yards had been removed, leaving 7,519,300 cubic yards to be removed in order to complete all dry excavation in this division. At the close of the month 93.27 per cent of all dry excavation was completed. On March 31, the status of the work in the sections which compose this division was as follows:

	CULEBRA CUT.	Cu. Yds.
Completed	91,847,517	
To be completed	7,519,300	

CHAGRES SECTION.

Dry excavation completed	12,384,655
Wet excavation still to be accomplished	300,000

There were furnished during the month to the Panama Railroad Company, for the Cristobal mole, 13,566 cubic yards of stone, the total amount furnished to March 31 for this purpose being 225,665 cubic yards.

There were 60,455 cubic yards of material dumped from the Naos Island trestle, making a total of 1,283,535 cubic yards.

The daily average number of laborers employed was 6,173, while the average number of gold men working was 579.

Quartermaster's Department.

*Labor—*The force report of March 26 showed 39,089 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 5,644 men. Throughout the whole period of the Canal's construction, this is the largest number of men actually working at one time. The supply of unskilled labor is now equal to the demand.

*Buildings—*The radio station at Balboa was completed. Gamboa engine shed was removed to a point on the east side of the Canal, nearly opposite Empire, and its reerection partly completed. The erection of two type 5 quarters at Corozal was completed. At the close of the month there were in course of reerection at the latter point, one Quartermaster's storehouse removed from Bas Obispo, as well as three type 5, one type 14, and two type 1 quarters, all removed from Gorgona.

*Quarters—*Arrangements were made to transfer all married employes at Gorgona to other districts as rapidly as quarters can be provided for them and, until all these families are taken care of, there will be no new assignments made to married quarters in the Culebra, Empire, Las Cascadas Bas Obispo and Cristobal districts. It is proposed to move the Gorgona bachelors to Cristobal and Empire in the very near future. A decrease of 69 gold bachelors at Gatun has some what relieved the situation in that district. Increase in the work at Balboa has resulted in a large movement of laborers to that district and, as a result, silver quarters there are congested.

*Material and supplies—*The value of material received was \$940,277.57. This material came forward in 38 steamers, the total weight of cargo, exclusive of lumber, piling and ties, being 26,434 tons.

Subsistence Department.

The Tivoli Hotel showed a net profit of

\$18,826.74. The operation of the line hotels, European laborers' messes, colored laborers' kitchens, restaurants, tugs and dredges returned a net profit of \$2,000.64. The total net profit on subsistence operations during the month was \$20,827.38.

Department of Civil Administration.

COURTS.

*Courts—*During the month two civil and two criminal cases were disposed of in the Supreme Court, 21 civil and 40 criminal cases in the Circuit Courts, and 65 civil and 538 criminal cases in the District Courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$406,233.51, and the fees to \$1,955.63. Receipts from stamps and card sales and newspaper postage aggregated \$9,693.52. The total collection of revenues made by the division was \$25,790.41, and the collections on account of court fines, costs and fees \$3,103.85. A total of \$141,335.00 was deposited in postals saving accounts and a total of \$97,101.00 was withdrawn. At the port of Ancon, 22 vessels entered and 23 cleared; at the port of Cristobal, 32 entered and 31 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 551, of whom 505 were men and 46 women. Twenty-four nations, or forty-two separate states and dependencies, were represented. There were 16 convicts committed to the penitentiary and 18 were discharged, leaving 117 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,218.09, and the value of the work performed by them on the roads of the Canal Zone was \$2,032.80.

FIRE PROTECTION.

There were 55 fires reported in the Canal Zone. The total damage occasioned by these fires was \$646.80.

PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 1,973,800 gallons, and in Colon 1,258,506 gallons. The usual inspection and maintenance work was performed.

SCHOOLS.

The net enrollment in the white schools was 1,334, the average number of pupils belonging was 1,104.3, and the average daily attendance 1,034.4. In the colored schools the net enrollment was 1,470, the average number belonging was 1,004.9, and the average daily attendance 819.3. At the close of the month there were employed in the white schools 46 teachers, and in the colored schools 31 teachers, the total being one less than at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 32, divided as follows: From disease 19, and from violence 13, giving an annual average per thousand of 4.05 and 2.77, respectively. The annual death rate per thousand among employes for the month of March, 1912, was 8.45.

The annual average death rate per thousand in the Canal Zone and in the cities of Colon and Panama, including both employes and nonemployes, was 19.32. This rate is based upon a population in the Canal Zone of 62,810 according to the census of February, 1912, and populations in Colon and Panama, respectively of 20,232 and 47,172 as estimated

by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of March, 1912, was 14.67.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites 2.79, blacks 4.43, giving a general average for disease of 4.05. For the same month during 1911 the annual average death rate per thousand from disease among whites was 3.88, blacks 7.76, giving a general average of 6.76; and for the same month during 1912, whites 2.75, blacks 7.9, giving a general average of 6.57.

Among employes, deaths from the principal diseases were as follows: Duodenal ulcer, two; lobar pneumonia, three; tuberculosis, seven; ulcer of the stomach, one, leaving six deaths from all other diseases and 13 deaths from external violence.

No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS,

Chairman and Chief Engineer.

SOCIAL LIFE OF THE ZONE.

Orphan Asylum Dedication.

On Wednesday afternoon, April 16, the building of the new orphan asylum at Colon, was dedicated, the office being performed by the parish priest, the Rev. Father Volk, in the presence of about 100 people, friends of the Sisters of Charity, and members of kindred orders from Panama. The procession of priests, Christian Brothers, children of the school, and inmates of the asylum, and the sisters, made a tour of the balconies, the brothers chanting the service. A short history of the undertaking was given, and benediction was pronounced. Refreshments were served in the refectory. The sisters have removed from their old quarters into the new building, and the school will begin its new year on or about May 1.

The preparations for the ball to be given in aid of the asylum at the Hotel Washington, Colon, on Saturday, April 26, are completed, and the tickets are selling well. The special train returning to Panama will leave Colon at midnight. The price of the ticket includes transportation on the Panama railroad to Colon and return from any point on the line. Following is the full list of patronesses: Mrs. Porras, Mrs. Goethals, Mrs. Rousseau, Mrs. Devol, Mrs. J. A. Smith, Mrs. Burke, Mrs. Ernesto Lefevre, Mrs. J. A. Arango, and Mrs. E. A. Morales. The two committees as given in last week's issue of THE CANAL RECORD have been made into one executive committee which is composed of the following ladies: Mrs. Pierce, Mrs. Elder, Mrs. Murphy, Mrs. McCormick, Mrs. Kerr, and Mrs. Doyle. The committee is assisted by Dr. Weigle. The members of the floor committee are: Messrs. Dawson, Lee, Bermudez, Espinosa, and Drs. Connor and Beverley. Dr. M. E. Connor is the treasurer.

Church Notes.

A change in the administration of the Wesleyan Methodist Church, at Panama and Colon, has been made by the resignation and removal to Jamaica of the superintendent, the Rev. M. Britton King, and the arrival

of his successor, the Rev. C. G. Hardwick, to take charge of the work. Mr. Hardwick's associate is the Rev. F. T. Palmer, who resides in the parsonage in Colon. Negotiations are pending for a new church building, which will include a parsonage and school-room in place of the old building now in use in Colon. The Panamanian government desires to construct an extension to the old prison building, which adjoins the Wesleyan church buildings, and has made the church an offer which will release this lot to the government. In exchange, the government has offered the church a site on the corner of Seventh street and Broadway. The Wesleyan Methodist church has been established in Panama 31 years, the West Indian work having been extended to include the Isthmus in 1882. There are several mission stations along the line of the Panama railroad. The mission at Colon was originally known as the Taylor mission in honor of Bishop Taylor, the missionary. The foundations for the church in Panama were laid in 1899, but, owing to adverse circumstances, building operations were suspended nearly 10 years, when the cornerstone of a concrete structure was laid on New Year's day, 1908. The new mission house which is situated immediately behind the church was opened in the early part of the present year.

The monthly meeting of the Isthmian Ministers' Association was held at Culebra on Monday, April 7. The principal paper of the afternoon was read by the Rev. J. L. Wise, of Empire.

The officers of the Fidelity Bible Class, at Empire, elected at the meeting in March, entered upon their duties at the meeting on Tuesday afternoon, April 8. They are: President, Mrs. E. C. Soule; first vice-president, Mrs. J. A. Van Hardeveld; second vice-president, Mrs. G. E. Wright; secretary, Miss Mattie Berry; treasurer, Mrs. H. Holmwood. The chairmen of the committees are: Social, Mrs. J. D. Russell; lookout, Miss Florence Satterfield; visiting, Mrs. Frank Peek. Mrs. R. Stanton is the teacher, with Mrs. H. A. A. Smith as assistant. The class will observe Mothers' Day at the meeting on Tuesday, May 13.

Anniversary Celebration, I. O. O. F.

The anniversary celebration of the Independent Order of Odd Fellows will take place at the I. C. C. chapel at Empire on Saturday, April 26, at 8 p. m. All sojourning brothers and their friends and families are invited to attend. The I. O. O. F. lodges on the Isthmus have been asked to participate in the program, and District Deputy Grand Sire B. F. Sisson will give an address upon the early history of the order in the United States. There will be music and refreshments.

Elks' Outing.

Local Elks, with their families and friends, made a sightseeing trip over the Canal on Sunday, April 20. The train started from Colon at 9.15 a. m., and went over all three divisions of the Canal work. Refreshments were served en route. It was expected that a delegation of Chicago Elks would be their guests on this occasion, but a cable was received that owing to the floods, it had been decided to postpone the trip. A meeting of all the Elks on the Isthmus will be held at Kangaroo Hall, Empire, on Sunday, April 27, at 2.30 p. m.

FEDERATION DISBANDS.

Women's Clubs of the Canal Zone Bring Their Work to a Close.

The final meeting of the executive board of the Canal Zone Federation of Women's Clubs was held at the Hotel Washington on Saturday, April 19, every member of the board being present.

The library was presented to the Isthmian Sunday School Association for extension work among the federated Sunday schools in the Canal Zone. The committee on the disposition of the art collection recommended that the collection be presented to the Ancon Study Club. In view of the fact that the books and pictures were a gift of club women to the federation, the logical disposition was to present them in turn to club women in the Canal Zone. The committee recommended that the collection be made available for use among the clubs, such as may remain or be organized hereafter by American women in the Canal Zone, and among the public schools upon request.

The history of the federation will be published at once. Any woman wishing to procure a copy of this work may become a subscriber by applying to Mrs. J. E. Westberg, Empire. If a sufficient number of subscribers is obtained, the price of the history will not be more than 50 cents.

The question of the maintenance of the blind boy now in Perkins Institute, Boston, could not be decided upon and it was found advisable to form a committee for the purpose of carrying on this work.

Following the disbanding of the federation, a committee was formed of the late executive board under the title of the post-federation committee on Elysium James, with Mrs. Thomas Edwin Brown, Jr., Cristobal, as chairman; and Mrs. J. E. Westberg, Empire, as treasurer. The committee is composed of the members of the late executive board of the federation, Mrs. Carl H. Elliott, Cristobal; Mrs. E. J. Neville, Gatun; Mrs. A. H. Herman and Mrs. S. E. Calvit, Gorgona; Mrs. M. E. Smith, Empire; Mrs. Henry Ropes Trask, Culebra; and Miss J. Macklin Beattie, Ancon.

At the close of the meeting, the officers were authorized to destroy all books and documents in their possession and the federation was declared disbanded. A brief history of its organization will appear in an early issue of THE CANAL RECORD.

Police Pistol Match.

A pistol competition of the Division of Police and Prisons will be held at Cristobal, on April 26, at 1 p. m. The following members of the division, having scores of 70 per cent, or better, in their record firing of the past pistol practice season, have been designated as eligible: Capt. C. W. Barber, A. G. Belknap, J. B. Cooper, Leo A. McIntire, Walter F. Doby, Elbert F. Ball, Joseph M. Feeley, William O. Myers, Ambrose Durham, Paul F. Lewis, Y. L. Harvill, John Acors, William Cooney, Sydney King. The competitive firing course will be identical with the course of record firing, namely, five shots each at 15, 25, and 50 yards, bulls-eye target, and 10 shots on the silhouette moving target. Firearms and ammunition are to be service regulation, as issued by the division, trigger pull to be not less than four pounds. To the officers making the three highest scores, suitable medals will be awarded.

JOINT LAND COMMISSION.

An Opinion.

JOINT LAND COMMISSION,
National Palace, Panama.

In the matter of the claim of Augusta Dunlop, Docket No. 7. Opinion on demurrer of United States to jurisdiction of Commission. Attorney for claimant, Valentine E. Bruno, Esq. Attorneys for United States, Hon. Frank Feuille and Wm. K. Jackson, Esq.

On March 24, 1913, Augusta Dunlop, through her attorney, V. E. Bruno, Esq., filed a claim for \$300 for the value of a building located in the town of Pedro Miguel, which building had been torn down by order of the Isthmian Canal Commission. This building was constructed on land held under lease No. 869, granted by the Isthmian Canal Commission on January 1, 1905.

The attorneys for the United States, Hon. Frank Feuille and Wm. K. Jackson, Esq., on March 28, 1913, filed a demurrer to the jurisdiction of the Commission.

Lease No. 869, filed by the claimant contains the following provisions:

"And the party of the second part hereby covenants to pay to the United States the yearly rent above reserved, on the date above mentioned; that this lease shall be revocable at will by the Secretary of War; and to pay to the United States on demand any sum which may have to be expended after the expiration or revocation of this lease in putting the said premises or property in as good condition for use by the United States as it is at this date.

"And it is further agreed that after the expiration or revocation of this lease the party of the second part shall remove the buildings and other property which he may have on the said premises, within such time as the Secretary of War may indicate, and upon his refusal, neglect, or inability to remove the same the Secretary of War may cause them to be removed at the expense of the party of the second part, and no claim for damages against the United States, or any agent thereof, shall be created by or made on account of such removal. Provided, that if at the expiration or revocation of this lease, there shall be any part of the rent herein agreed to be paid, due by the party of the second part to the party of the first part, the party of the second part shall forfeit, without formality or legal proceeding of any sort, any improvements that may have been erected on the land described above, by said party of the second part."

In determining the limits of jurisdiction of the Joint Commission established by Articles VI and XV of the Treaty between the United States of America and the Republic of Panama, concluded November 18, 1903, it is essential to bear in mind that this Commission was created for the purpose of discharging an international obligation, and not with the intent of placing under its jurisdiction questions of a purely municipal character. It is clear that when a person has accepted a revocable lease or license from the United States Government, such lease or license is accepted subject to the powers specifically reserved by the United States Government or its agent, the Isthmian Canal Commission, to revoke the lease or license, and to require the removal of any building erected thereon. The relationship is a purely municipal one, and involves nothing in the nature of an international obligation to be discharged under the Treaty.

We have therefore reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligation which the United States has agreed to discharge under the Treaty; and for the adjudication of all such claims, the claimants must seek a remedy through the procedure afforded by municipal laws.

The demurrer of counsel for the United

*Leaves Panama Sunday night, arrives Colon Monday morning.

States is therefore sustained, and the claim of Augusta Dunlop dismissed because of lack of jurisdiction.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER. S. LEWIS. L. S. ROWE.

New Timetable.

A new timetable will take effect on the Panama railroad at 12.01 a. m., Sunday, April 27. The principal changes consist in the addition of a Sunday train out of Colon (No. 31,) which will leave there at 10.30 p. m., and arrive at Panama at 12.45 Monday morning. Train No. 3, now leaving Colon daily, except Sunday, at 5.30 a. m., will leave under the new schedule at 5.10, arriving in Panama at 7.20. Train No. 2 out of Panama will leave at 6.50 instead of 6.40 a. m., arriving at Colon at 9.05 a. m.

Train No. 72 on Saturday nights, now leaving at 6 o'clock, will leave at 7.20 after next Sunday. Train No. 18, leaving Panama at 12.40 a. m., Sunday morning, has been substituted for No. 74, leaving Panama at 12.20, arriving at Colon at 2.35 a. m. The traveling time of some of the other trains between Colon and Panama has been lengthened a few minutes.

At the request of the United Fruit Company, the services of Dr. S. T. Darling of the Ancon Hospital laboratory staff have been lent to it for two weeks for the purpose of investigating the cause of a number of recent deaths at Santa Marta, Colombia, near where the company has banana interests. Dr. Darling left for there on one of the company's vessels on Thursday, April 17.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week April 28 to May 3 is as follows: Monday, Culebra; Tuesday, Gatun; Wednesday, Gorgona; Thursday, Empire; Friday, Cristobal; Saturday, Corozal; Friday, Porto Bello.

The standing in the Isthmian Bowling League, April 21, was as follows:

Team.	Won.	Lost	P. C.
Gorgona.....	14	7	667
Empire.....	14	7	667
Culebra.....	11	10	524
Cristobal.....	11	10	524
Gatun.....	9	12	424
Corozal.....	4	17	190

The standing in the American Bowling League, April 21, was as follows:

Team.	Won.	Lost.	P. C.
Empire.....	10	5	667
Cristobal.....	9	6	600
Corozal.....	6	9	400
Gatun.....	5	10	333

CULEBRA.

The Gorgona team took two out of three games with the local team in the Isthmian Duckpin League, Saturday night, April 19, with the following scores:

Gorgona.	Culebra.
Sims..... 99 83 96	Case..... 88 87 93
Dent..... 72	Brown..... 77 89 83
Moyer..... 87 120 89	Silver..... 78 96 92
Dunlap..... 87 82 104	Kierhan..... 94 93 93
King..... 110 74 107	Palmer..... 79 88 82
Davis..... 100 72 109	

Total... 468 431 505 416 453 449
The following high scores were made during the week:
Brown, 100; Case, 110, 124, 103, 122, 105, 102; Seyse, 111, 105; Anderson, 103; Kleene, 100.

EMPIRE.

The standing of the local tenpin tournament is as follows:

Team.	Won.	Lost.	P. C.
Giants.....	10	2	833
White Sox.....	6	3	667
Senators.....	7	5	583
Athletics.....	6	6	500
Tigers.....	4	8	333
Cubs.....	3	12	200

High score so far has been made by C. J. Huson—243; he also holds the high score of 604 for three games. The five highest averages to date are Huson 180-7, Hobbs 166, Bardelson 163-2, J. Whaler 162-4, F. Whaler 158-7. Sixteen men have entered the local monthly handicap pool tournament.

The following scores were made in the Isthmian duckpin tournament:

Empire.....	474	431	483
Gatun.....	452	429	425

The lecture by Mr. F. A. Gause, superintendent of schools, which was to have been given at the clubhouse on Sunday evening, April 20, was postponed until April 27, when the Mosher brothers will probably sing.

The second appearance of the Walter Eccles concert company on Monday evening, April 21, drew one of the largest audiences that has ever attended a concert in the Empire clubhouse.

The dates for the curio exhibits is May 1 and 2. Every one is invited to contribute articles of interest for the exhibit.

GORGONA.

A "smoker" is being planned for Friday evening, April 25.

The Spanish class is open to any one desiring to take the course. The classes meet on Tuesday of each week.

The indoor baseball game scheduled by Gorgona for Saturday evening will be played at Cristobal instead.

The Gorgona chorus gave a return engagement on Sunday evening, April 20.

The Gorgona bowling team bowled at Culebra Saturday evening.

Following are the high scores for the last two weeks: Dent 100, 100 102; Davis 102, 108, 103, 108, 106, 103 101, 108; Varenkamp 101, 111; Nelson 100, 100; Vickers 100; Heinz 104, 102; King 105, 127; Dunlap 105, 112, 106, 108; Regan 105; Sims 113, 106; 104; Norwick 102.

GATUN.

The return engagement of Walter Eccles and the Four College Girls Company at Gatun drew an audience of 502 people, of whom 298 were members. This is probably a local record-breaker for a States entertainment.

Empire took two games of duckpins from Gatun in the American League series rolled on Saturday evening, April 19.

The people of Gatun were given a double treat on Saturday evening, April 19, when the all-Isthmian wrestling tournament was held immediately after the motion pictures. Hughes of Cristobal acted as referee and Wil-

son of Gatun was timekeeper. The results were as follows:

Light weight, 135 pounds or under—L. C. Wright Gatun, vs. H. M. Doherty, Corozal. Wright won.
Welterweight, 145 pounds or under—Theo Edwald, Gorgona, won by default of opponent who failed to appear.

Middle weight, 158 pounds or under—H. Koch, Gatun, vs. P. G. Robinson, Gorgona. Won by Koch.

Light weight, 135 pounds or under—T. L. Martin of Gatun, vs. A. Quinn of Gorgona. Quinn received the decision on aggressiveness.

Heavy weight, over 158 pounds—Robert C. Butler of Corozal, vs. F. W. Nprvak of Gorgona. Won by Butler.

CRISTOBAL.

There was an attendance of 370 at the return engagement of the Walter Eccles and the Four College Girls Company on Friday night, April 18.

The results of the American League Duckpin League games were, as follows:

Cristobal.	Corozal.
Buser..... 79 80 97	Sanders..... 87 88 103
Landers..... 96 81 76	Conner..... 81 77 83
Tuttle..... 88 79 89	Kyte..... 83 79
Cotton..... 92 83 98	Evans..... 78 84 77
Vanderberg. 74 96 89	Bartlett..... 84 91 96
	Ryan..... 86
Total.... 423 419 449	413 417 443

Sale of Surveying Instruments, Etc.

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., April 19, 1913.

Bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 o'clock p. m., May 3, 1913, when they will be opened in the presence of attending bidders, for any or all transits, levels, compasses, planimeters, etc., now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application to this office. The right is reserved to reject any or all bids, or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase surveying instruments," addressed to the Depot Quartermaster, Mount Hope, C. Z.

C. NIXON, Depot Quartermaster.

Administrator's Notice.

In the Matter of the Estate of Leslie C. Cunningham—To any and all persons who may have a claim or claims, against the estate of Leslie C. Cunningham, deceased, who died at Pedro Miguel, Canal Zone, on January 31, 1913:

You will present the same on or before, the 15th day of October, 1913, to the undersigned Administrator of said estate, properly verified, or the same will be forever barred according to law.

TOM M. COOKE, Administrator.

Married.

CLEARY-MILTIMORE—On April 12, at St. Luke's Hospital Chapel, Ancon, Miss Mabel Miltimore to John E. Cleary, Maj. Henry A. Brown officiating. Canal Zone residence, Empire.

LOST—On April 13, between Empire and Toro Point, a black ribbon watch fob with lion head locket containing picture of lady and child. Reward of \$5 will be paid for its return to A. E. Alexander, house No. 11-A, Empire, P. O. Box 45.

LOST—In Panama, on April 13, sterling silver Elks' card and receipt case, engraved "Alexandria, La., No. 546" and monogram "M. A. K." Reward, if returned to M. A. Kelly, Corozal.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

OFFICIAL CIRCULARS.

Charge for Scrap Rail.

CULEBRA, C. Z., April 18, 1913

CIRCULAR No. 483:

My circular of January 7, 1910, directing that no charge be made between divisions of the Isthmian Canal Commission or Panama Railroad Company for scrap rail is hereby cancelled. In future, a charge of \$7.53 per ton for American scrap rail transferred between divisions of the Commission or between the Commission and Panama Railroad Company will be made in addition to the expense incurred in procuring, straightening, or bending the rail. The \$7.53 per ton is a flat rate to which no surcharge will be added.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Restrictions on Sightseers.

CULEBRA, C. Z., April 17, 1913.

TO ALL CONCERNED:

Difficulty has been experienced in preventing tourists who ride on the Panama railroad sightseeing train from going into dangerous places about the locks. This is due partly to the fact that employees have been taking friends who happen to be among the passengers out on the uncompleted lock gates and to other points equally dangerous, thereby setting an example which some of the other passengers follow despite the instructions of the guides.

In future no employee will be permitted to take passengers on this train to any point not visited by the regular guides, nor shall he in any way delay passengers under his guidance from getting back promptly to the train after the signal for returning has been given.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Assembly of Second-hand Rail.

CULEBRA, C. Z., April 19, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Reports received from the Depot Quartermaster indicate that there is a shortage of second-hand rail on the Isthmus.

You are requested to take steps immediately to see that all abandoned track is torn up at the earliest practicable date, and serviceable and unserviceable rail turned over to the Depot Quartermaster. Crooked rail will be shipped to the Empire shops to be straightened.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Examination of Railroad Employees.

CULEBRA, C. Z., April 21, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to instructions issued under date of February 11, 1913, and February 27, 1913, relative to examinations of railway employees:

Employees who are partially color blind, but who do not confuse the colors used in transportation service, namely, red, green, yellow, and white, may be considered eligible for employment as unqualified engineers or conductors, but will not be eligible for qualification. This refers to those cases where the employees do not confuse one of the colors named with any of the other three.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

New Account in Classified Expenditures.

EMPIRE, C. Z., April 10, 1913.

CIRCULAR No. 43:

The following new account in the classified expenditures of the Isthmian Canal Commission is hereby authorized under the Department of Sanitation to care for the operations of the Corozal farm:

Department of Sanitation.

ACCOUNT No. 208—COROZAL FARM.

To this account will be charged all expenses incurred on account of the operation of Corozal farm, including salaries and wages, material and supplies, and the value of all tools, implements and equipment purchased for use thereon. The account will also be charged for the value of such farm products as are used in its operation, and credited for all revenues derived from the sale of its products to other departments and divisions or individuals and companies.

H. A. A. SMITH, Examiner of Accounts.

Approved:

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Treasurer of the Canal Zone.

ANCON, C. Z., April 16, 1913.

Heads of divisions of the Department of Civil Administration, and all others concerned: Effective April 17, 1913, Mr. Eugene H. Ash has been appointed treasurer of the Canal Zone, vice Mr. Edgar P. Beck.

M. H. THATCHER,
Head of Department of Civil Administration.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning April 23, 1913:

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York via Kingston and Santiago de Cuba, sail thus: The *Carl Schurz* and the *Emil L. Boas* on alternate Wednesdays at 10 a. m., and the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m.

The arrival and departure of vessels at the port of Balboa for the week ending April 19, follows:

Arrivals—April 14, *Chile*, from Guayaquil; April 14, *Mexico*, from Valparaiso; April 14, *Manavi*, from intermediate points; April 17, *Huallaga*, from Callao; April 19, *Quito*, from Guayaquil.

Departures—April 12, *San José*, to San Francisco; April 12, *Pennsylvania*, to San Francisco; April 14, *Mantaro*, to Valparaiso; April 14, *Palena*, to Valparaiso.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands and address of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

More Work for Pacific Dredges.

The zone of dredging operations at the Pacific end of the Canal will be extended to include the section between the two earth dikes, south of Miraflores Locks. It was originally planned to excavate the material remaining in this section by steamshovels, but as the dredges have nearly finished their work in the Pacific entrance, they will be available for use at this point. About 151,000 cubic yards of material between the two dikes were removed by the hydraulic plant, and 16,000 cubic yards by steamshovels, leaving about 1,400,000 cubic yards to be excavated by the dredges. A dynamite gang is now engaged in blasting over this territory, and will conclude its operations early in May. The south dike acts as a barrier to the open water channel extending from the Pacific entrance. When the space between the dikes is ready to be filled with water, the operation will be accomplished by pumping, instead of allowing the water to flow in by demolishing the south dike. This precaution is taken, in order that the north dike will not be subjected to a too sudden pressure.

Permanent Oil Pipe Line.

The first section of the permanent oil pipe line across the Isthmus will be laid along the Panama railroad relocated line, beginning at a point near Paraiso Cabin, and continuing for the present as far as pipe of proper size, now on the Isthmus, is available. It is estimated that there is about 16,000 feet of this pipe in the various storehouses. The pipe will be eight inches in diameter, strong enough to withstand a regular working pressure of about 420 pounds to the square inch. The work will be performed by the Central Division forces upon request of the Fifth Division, and will include the laying of a connection between the main pipe line, near Paraiso Cabin, and the two oil tanks designed for a storage supply for the hydraulic sluicing operations near Gold Hill. The cost of laying the main line will be charged to a new account to be opened for "Permanent

oil pipe line," while the cost of the connection will be borne by the sluicing plant.

The contract with the Petroleum Iron Works Company for the manufacture and erection of the four new permanent oil tanks described in THE CANAL RECORD of October 9, 1912, has been amplified to include the erection of the two tanks at the sluicing plant. One of these tanks is already on the ground; the other will be moved from Las Cascadas.

Work of the Seagoing Suction Dredges.

The seagoing suction dredge *Caribbean*, which went into the Cristobal drydock on March 25, vacated its berth there on Wednesday, April 16, after a general overhauling, including renewal of the woodwork on its deck houses, repainting inside and out, and the substitution of new forward distributing chutes for old ones. The *Caribbean* is in drydock on an average of about two times a year, once for general overhauling, and once for such urgent repairs as cannot be made by its crew. It and its companion vessel, the *Culebra*, at work in the Pacific entrance, have been in continual service since first placed in commission in 1907. During the calendar year 1912, the *Caribbean* removed 2,603,072 cubic yards from the Atlantic entrance at an average cost of \$0.0387 a cubic yard. The average unit cost of repairs made to the dredge during that year was \$0.0298 to the cubic yard. On the Pacific side, the *Culebra* excavated 2,400,214 cubic yards in 1912 at an average unit cost of \$0.05092 a cubic yard, and the average unit cost of repairs during the same period was \$0.01940 a cubic yard. While the upkeep in the case of the *Caribbean* ran as high as \$71,494.78 during the fiscal year ending June 30, 1912, this dredge, like the *Culebra*, has been kept in a high state of working efficiency.

Change of Color of Passenger Service Cars.

All cars in the passenger service of the Panama railroad are to be painted the Pullman standard color, a dark olive green, instead of the chrome yellow which has been in use for the past three years. Yellow was made the standard in 1909, after a year's comparative test on three coaches painted with it, the Pullman color, and Tuscan red. The test was inconclusive, but the yellow was adopted in the belief that it would deteriorate and change color less in the Isthmian climate than the others. The foreman of the car painters has come to the conclusion that this is not the case; that on the other hand, Pullman standard, which was applied to two private cars and the pay cars, grows dark less rapidly, shows less contrast when spots are retouched, and costs less than the yellow. He estimates that about \$2,000 a year may be saved in maintenance by the use of the Pullman color. The change is to be made now, because a large number of cars is to be overhauled between May 1 and January 1.

Included in the passenger service are all first and second-class coaches, baggage cars, express cars, specie cars, private, parlor, sight-seeing, and refrigerating cars.

Change in Time, Panama-Balboa Labor Train.

The time of the Panama-Balboa labor train, formerly leaving Panama at 5.25 p. m., has been changed so that it will connect with the Pedro Miguel labor train due to arrive in Panama at about 5.39 p. m. The change is made for the convenience of the gold employees who work on the line and take their evening meal at the East Balboa hotel. The transfer from one train to the other is made at the Panama wye.

Over the Canal by Hydrobiplane.

Mr. Robert G. Fowler, the aviator, accompanied by Mr. R. A. Duhem of the Duhem and Harter Motion Picture Company, San Francisco, Cal., made the air voyage from the Pacific to the Atlantic entrance of the Canal on Sunday, April 27. This is said to be the first ocean to ocean flight ever made in a single trip, and is the first time that a flying machine has crossed the Canal Zone from ocean to ocean. Mr. Fowler has been on the Isthmus about three weeks awaiting a favorable opportunity for the crossing, using the bathing beach at Bella Vista as his base of operations. His hydrobiplane is in part constructed from his own design. It was built by the Gage-McClay Company of Los Angeles, Cal., and the 80-horsepower motor was supplied by the Hall-Scott Company of San Francisco. The propellers on the machine are placed in front after the manner of most European biplanes of today. Mr. Fowler began his career as an airman three years ago, and until last year drove a Wright machine. He held the endurance test up to a year ago, and holds the record of a coast to coast trip in the United States. Since coming to the Isthmus he has made six flights, as follows:

April 12—Over Panama and vicinity, without passenger; time in air 15 minutes.

April 12—Over Panama and vicinity, with passenger; time in air 20 minutes.

April 13—Over Panama and vicinity, with passenger and camera; time in air five minutes. Compelled to descend on account of poor gasoline.

April 25—Over Panama and Ancon, without passenger; time in air 15 minutes.

April 25—Over Panama, islands in the bay, Naos Island breakwater, Pacific entrance, and up the Canal as far as Pedro Miguel with passenger and camera. Picture film became exhausted.

April 27—Over Panama to the Pacific entrance and over the entire route of the Canal to Cristobal Point, with passenger and camera; time in air one hour and 35 minutes.

The trip over the Canal was uneventful, with the exception of the descent at Cristobal. The supply of gasoline became exhausted on

NOTES OF PROGRESS.

(Continued.)

nearing the journey's end, and the glide failed to carry the machine to deep water. It landed among the rocks off pier No. 11, wrecking the pontoon. Mr. Fowler and the camera operator left the Pacific entrance at Balboa, according to his own timing, at exactly 10 a. m. The landing was made at Cristobal at 10.57. At Culebra, the aviator made a circle of his machine in order to obtain pictures of both sides of Culebra Cut. At Gamboa, a drenching rain squall was encountered. Pictures were taken only where the Canal work

was in evidence. The greater part of the Canal north of Gamboa, where there is a sameness in physical features, and much of the lake section, were omitted. The highest altitude attained on this flight was 1,800 feet; the lowest, 400 feet. Messrs. Fowler and Duhem sail for New York on the *Ancon* on Friday, May 2.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon on Wednesday, May 7, 1913, beginning promptly at 8 a. m., for persons desiring to secure the following classes of licenses:

Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate same.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending April 26:

DATE.	Hours worked.	Cubic yards.
April 21.....	5.30	1,696
April 22.....	3.20	1,801
April 23.....	7.30	2,180
April 24.....	6.25	2,720
April 25.....	6.05	1,566
April 26.....	7.30	2,071
Total.....	36.20	12,034

Sailing of the "Ancon."

The sailing date of the steamer *Ancon* has been set for Friday, May 2, at 3 p. m., from pier No. 11, Cristobal.

A revocable license has been granted to Thomas R. Lombard and Company to operate a quarry on land situated in the Canal Zone, on a hill west of the new Chorrillo addition to the city of Panama, now leased by the company from Messrs. A. B. de Obarrio and Domingo Diaz A. The license becomes effective after the United States has acquired title to the property.

One lower tumbler wheel, Lobnitz sand excluding, with sleeve and shaft complete, and one portable grease pump with all attachments, have been ordered purchased in the open market from Lobnitz and Company, Renfrew, Scotland, for the dredge *Corozal*.

A committee has been appointed to consider and recommend a standard specification covering all matters connected with reinforced concrete designs, which, when approved, will be a standard I. C. C. specification governing all departments and divisions of the Canal Commission and the Panama railroad.

It has been decided that in future, when any new repairs are made to the docks and wharves at Colon and Cristobal, precautions will be taken to make the structures ratproof.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

About 99 per cent of the entire quantity of concrete to be placed in the locks and spillways had been laid at the close of work on April 26, the amount in place being 4,685 476 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 98 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on April 26, being 2,021,063 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 225,127 cubic yards, about 99 per cent of the total amount. A statement of the amount placed each working day of the week ending April 26, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone	Total	SPILLWAY.		
	Concrete placed.	Hours worked.	No. of mixers			Concrete laid	Hours worked	No. mixers used.

CANAL MEDAL LIST.

(Continued.)

On the following list are the names of American employees of the Isthmian Canal Commission, who have completed two years of continuous service on the Isthmus during the twelve months ending December 31, 1912, and are in consequence entitled to receive a Canal medal. The date shown opposite each name is that from which medal service is computed.

The list is published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman for correction.

A continuation of the medal list, together with a list covering employees of the Panama railroad, as well as the bar lists for both I. C. C. and P. R. R. employees, will appear in later issues.

Heads of divisions are requested to check carefully their lists of American employees on the silver roll, and to report any omissions on the medal or bar lists to this office.

(To be Continued)

NO SALOONS IN ZONE.

Canal Commission Will Not Grant Licenses for Sale of Liquor.

At a meeting of the Canal Commissioners held on Thursday, April 24, the following resolution was adopted:

"RESOLVED, that no license for the sale of intoxicating liquors in the Canal Zone be granted by the Commission for any period beginning on or after July 1, 1913."

During the present fiscal year, there were five Canal Zone settlements in which saloons were permitted, namely, New Gatun, Gorgona, Matachin, Empire, and Culebra, and for this period, beginning July 1, 1912, thirty-eight licenses were granted by the Commission in those towns. The early abandonment of Gorgona and Matachin eliminated those villages as future license points; the proximity of Empire to Camp Otis made it advisable to stop granting licenses there, and the same reason applied to Culebra. This left only one town, New Gatun, open for the granting of licenses, and in view of this fact it was decided to extend the prohibition to include the whole of the Zone.

A statement of the number of saloon licenses granted in the Canal Zone each semiannual period from July 1, 1907, to June 30, 1913, and the license fees collected for each semiannual period, and for each fiscal year, follows:

FISCAL YEAR	Semiannual period.	No. licenses	Amount fees.
1907-08	July 1 to December 31, 1907	34	\$20,400
	January 1 to June 30, 1908...	34	20,400
	Total for fiscal year.....		\$40,800
1908-09	July 1 to December 31, 1908	63	\$37,800
	January 1 to June 30, 1909...	58	34,800
	Total for fiscal year.....		\$72,600
1909-10	July 1 to December 31, 1909	57	\$34,200
	January 1 to June 30, 1910...	52	31,200
	Total for fiscal year.....		\$65,400
1910-11	July 1 to December 31, 1910	57	\$34,200
	January 1 to June 30, 1911...	57	34,200
	Total for fiscal year.....		\$68,400
1911-12	July 1 to December 31, 1911	48	\$28,800
	January 1 to June 30, 1912...	44	26,400
	Total for fiscal year.....		\$55,200
1912-13	July 1 to December 31, 1912	38	\$22,800
	January 1 to June 30, 1913...	35	21,000
	Total for fiscal year.....		\$43,800
Grand total for entire period—six years....			\$326,200

In 1907, the plan of assigning certain areas, in the Zone for the sale of intoxicating liquors was adopted. At that time these areas included the towns of Rio Grande, Culebra, Empire, Las Cascadas, Bas Obispo, Matachin, Gorgona, Tabernilla, Bohio, and Gatun. Saloons were established in all of those places up to 1911, when Bas Obispo, Tabernilla, and Bohio were eliminated from the saloon area, Bas Obispo on account of its proximity to the camp of United States Marines, and Tabernilla and Bohio, because of their prospective abandonment by reason of the filling of Gatun Lake. In 1912, the area was further restricted by the elimination of Rio Grande and Las Cascadas, leaving only five towns in which licenses were in force on July 1, 1912. The greatest number of licenses issued for any one semiannual period was that from July 1 to December 31, 1908, when there were 63. The moneys derived from the granting of licenses for the retail sale of intoxicating liquors, which were fixed at \$1,200

per annum each, have formed part of the Canal Zone general fund, from which money has been appropriated as needed for carrying out public improvements, maintenance of the Canal Zone school system, and for other purposes.

Pumping of Sewage at Golden Green.

A change is to be made in the method of handling the sewage in the village of Golden Green, near Empire. There are now six community closets into which the sewage of the town is dumped, and from which it is removed by carts. In order to reduce the expense of handling, it has been decided to install a portable pump which can be moved from one closet to another. This pump will force the sewage through a 6-inch pipe discharging into the open sanitary ditch that serves Culebra at a point near the Panama railroad culvert at Lirio. The length of the pipeline will be about 2,000 feet.

Tennis Association Tournament.

The Maduro-Lupi cup became the property of the Ancon club, as the result of the tournament, in doubles, held by the Isthmian Tennis Association at Ancon, on Sunday, April 27. The preliminaries, semi-finals, and finals, were as follows:

Preliminaries—Tivoli (Ohlson and Edwards) defeated Culebra (Goethals and Tupper) 6-0, 6-4.

Empire (Bartholomew and Newbold) defeated Colon (Hart and Farquharson) 6-3, 5-7, 6-4.

Ancon Hospital (Ross and Runyan) defeated Gatun (Wells and Neeley) 7-5, 1-6, 6-3.

Semifinals—Ancon Hospital defeated Tivoli 2-6, 6-1, 6-2.

Pacific Club (Snyder and Pearman) defeated Empire 11-9, 6-2.

Finals—Ancon Hospital defeated Pacific Club 4-6, 6-4, 8-6.

The Maduro-Lupi cup was won by the Empire club in 1910, and by the Ancon Hospital club in 1911, 1912, and 1913. According to the rules governing the gift of the cup to the association, any club winning it three consecutive times becomes its permanent possessor.

At a meeting of the officers of the association held on Sunday, April 27, it was decided to have a free-for-all tennis tournament, in singles, on Sunday, May 11, at Ancon, in place of the regular association tournament, in singles, scheduled for that date. Any member of a club affiliated with the association may enter. The entrance fee for this tournament will be \$1 for each player, and must be in the hands of the acting secretary, C. E. Nevius, Ancon, C. Z., not later than May 8.

Joint Land Commission.

Notice is hereby given that hearings will be held by the Joint Land Commission on the following estates, at the dates named: Monday, April 28: Barro Colorado Abajo, Peñas Blancas Arriba; Monday, May 5: Juan Grande; Tuesday, May 6: DeBosque Estate (lands at Matachin), Tabernilla; Monday, May 12: Cuatro Calles; Tuesday, May 13: San Antonio y Charco Baruco; Wednesday, May 14: Juan Mina; Monday, May 19: Bohio y Buena Vista; Tuesday, May 20: Peñas Blancas en Medio; Wednesday, May 21: Buena Vista y Agua Salud.

Notice is hereby given to all persons having title to the lands above named, as the owners

thereof, or having any right, claim or interest therein, as occupants or otherwise, to present claims without delay. All persons delaying the filing of such claims will do so at their own risk, as there will be no postponement, on this account, of the consideration of the cases on the dates announced.

By order of the Joint Land Commission.

J. C. LUITWIELER,
Panama, April 21, 1913. *Secretary.*

Notice to Mariners.

Owing to location of maneuvering chains of the dredges *Corozal* and *Badger*, commercial ships will not be permitted to drop anchor and turn in the basin north of the Panama railroad wharf. The channel in front of the dock is gridironed with chains from these dredges, and shipmasters must not drop anchors in front of the wharf.

C. H. MANN, *Port Captain.*

Balboa, C. Z., April 26, 1913.

Accidental Drowning.

First Lieutenant Charles F. Conry of the Tenth Infantry, Camp Otis, and Private Edward P. Callaghan of Company K of the same regiment, were drowned in the West Division, near Gatun, on Friday, April 25. The two men were in temporary camp with others of the regiment at New Gatun, and were last seen at about 3 o'clock Friday afternoon. They stated that they were going for a trip by boat on the lake or river. Search parties were organized when the men failed to appear, but it was not until about 11 o'clock Sunday forenoon that the bodies were found.

Lieutenant Conry was born in Ohio on January 29, 1882; graduated from the United States Military Academy with the class of 1904; was assigned to the Tenth Infantry as second lieutenant on June 15, 1904, and was promoted to first lieutenant on March 11, 1911.

Private Callaghan's military record is, as follows: In Company D, Second Infantry, from June 9, 1904, to January 9, 1906; January 10, 1906, to January 9, 1909, and from January 10, 1909 to January 12, 1912; enlisted at Fort Slocum, N. Y., for three years on October 13, 1912; arrived on the Isthmus and was assigned to Company K, Tenth Infantry, on November 15, 1912. He had a campaign badge for service in the Philippines, and was a sharpshooter in his first enlistment. He was born at Rochester, N. Y., and is survived by his mother, Mrs. Julia Callaghan, and by two brothers and a sister, all residing in that city.

Obituary.

John J. Sofaly, a private in the United States Marine Corps at Camp Elliott, died at 12.05 Saturday morning from an injury received while at target practice on Thursday April 24. He was standing in the target butts when a piece of a deflected bullet struck him in the throat. He enlisted at McKeesport, Pa., on November 15, 1911, and was 25 years of age. His father, Frank Sofaly, lives at Irwin, Pa.

Memorial Service.

A memorial service to Mr. Olof Johnson will be held at the Commission chapel, Gatun, on Sunday, May, 4, at 10.45 a. m., under the auspices of the Independent Order of Odd Fellows, and the Masonic club of Gatun. These orders have invited members and friends to be present.

MAKING DREDGE SPUDS.

Native Timber Braced by Steel Plates for Atlantic Dipper Dredges.

In the manufacture of new forward spuds for the Atlantic Division dipper dredges *Mindi* and *Chagres*, it has been found necessary to resort temporarily to the use of native wood, owing to lack of other timber of suitable size in the Canal Commission stock piles. The native timber is obtained from large trees found here and there in the vicinity of Gatun Dam. They are cut down, hauled by rail to the Cristobal marine shops, where they are shaped to the required size. The wood is fairly close grained, slightly resembles oak, but is full of sap and does not have the resisting power of Douglas fir or yellow pine, the wood commonly used for this purpose. Spuds made of native wood have been tried, but it has been found that they do not last long, and only serve as a temporary substitute. In order to strengthen and keep them in service as long as possible, the plan has been adopted of encasing the timbers, American, as well as native stock, in iron plates made into a continuous piece by welding the short lengths together in the smith shop at the drydock plant. Each of these plates, when finished, is three-fourths of an inch thick, 36 inches wide, and 48 feet long, and is fastened to the spud timbers by one and one-eighth inch rivets. When the heads of the bolts are sunk in the timber, the holes are capped with pieces of wood to prevent the exposed surfaces from corroding. The plan of using plates has also been tried on some of the spuds on the dredges in the Pacific entrance to the Canal, but the welding in this case was done in the United States, and shipment made in the proper lengths.

The plates, four to each timber, will give an added weight to each of the new spuds of about nine tons, making the total weight of the longer pieces over 20 tons each. The spuds used on the dredge *Mindi* are 40 by 40 inches square, and 57 feet long; those on the *Chagres* are 36 by 36 inches square, and 68 feet long. New spuds for these two dredges are being formed out of four timbers, cut from native stock, and securely bolted together. In addition, a spud is being made for the *Chagres* out of a single piece shipped from the United States.

The life of a spud timber varies, and depends in a great measure on the strain to which it may be subjected. During the past two years, the *Mindi* has broken nine, and the *Chagres* 19 spuds. The greater breakage in the case of the *Chagres* is mainly due to the fact that its spuds are considerably longer than those of the *Mindi*, and, in consequence, are subjected to a greater strain; also, that the sectional area of its spuds is smaller. When unfitted for further use, the old spuds are stripped of their ironwork and piled up in one part of the marine shops yard. An effort is being made by Mount Hope Depot to work them up into smaller pieces.

Bids for the Tug "Bolivar" Rejected.

Bids were opened at the office of the Panama Railroad Company in Colon on April 10, for the sale of the tug *Bolivar*, which was retired from the railroad service at Balboa a short time ago. Four proposals were received, all from Panama firms or individuals, as follows; Heurtematte and Company, \$10,000; J. A. Jimenez, \$12,000; Pinel

Brothers, \$12,200; Cia. Panameña de Vapores, \$12,500. The bids were rejected as being too low, and new proposals will be advertised for both here and abroad. The *Bolivar* is of 234 gross tons capacity and cost when new \$52,000. The fire tug *Phoenix*, of 161 gross tons capacity, formerly in the Panama railroad service, sold in New York for \$25,000. It cost when new \$57,942.53.

Competitive Pistol Shoot.

The results in the competitive pistol firing test among the marksmen of the Division of Police and Prisons, held at the Cristobal range on Saturday, April 26 were, as follows:

NAME.	Bull's eye target.	SCORE.*	
		Moving target.	Aggregate.
Lee A. McIntire	135	41	176
J. B. Cooper	124	41	165
Joseph M. Feeley	126	39	165
Charles W. Barber	119	39	158
William Cooney	116	41	157
Ambrose Durham	115	41	156
William O. Myers	123	33	156
John Acors	130	26	156
Andrew G. Belknap	109	33	142
Paul F. Lewis	112	27	139
Sydney King	110	27	137
Y. L. Harvill	110	24	134
Elbert F. Ball	100	31	131
Walter F. Doby	90	24	114

*Possible score 200.

The tie score between Inspector J. B. Cooper and First-class Policeman Joseph M. Feeley was decided on high score made on moving target. The men holding the three highest scores will be awarded medals.

Results of Indoor Pistol Matches at Culebra.

The indoor championship matches recently held at Culebra, under the direction of the Culebra Pistol Club, have been completed with the following results (shot at 20 yards at night under artificial light):

Match A, revolver, possible 500, M. W. Fox 404; C. B. Larzelere 391; M. E. Woodward 384; L. D. Cornish 377; Jacob Bernson 359.

Match B, pistol, possible 500, M. W. Fox 424; Jacob Bernson 417; L. D. Cornish 399; C. B. Larzelere 395.

Match F, pocket revolver, possible 250, Jacob Bernson 161; L. D. Cornish 156; M. W. Fox 151; C. B. Larzelere 133; M. E. Woodward 117.

Match G, novice, reentry, possible 250, W. L. G. Perry 152, 191; Miss Shellie M. Dunn 190; M. E. Woodward 190, 182, 187; B. Balduf 182, 174; T. E. L. Lipsey 166, 181, 172.

Central Section Water Supply.

A high-duty plunger pump, 14-inch suction and 10-inch discharge, capacity 1,500 gallons a minute, has been added to the auxiliary water supply from the Chagres River near Gamboa to furnish water for mechanical and domestic purposes in addition to the present centrifugal pumps installed. This pump was used during the dry season of last year by the Central Division but was transferred to the Atlantic Division for sluicing work in the locks and afterward for stripping a quarry at Quebrancha on the Panama railroad relocation, it being returned after the abandonment of this quarry.

Both the Camacho and the Caribali reservoirs are holding out better than last dry season. The present daily delivery from Camacho reservoir is from 750,000 to 1,000,000 gallons, and from Caribali, from 450,000

to 500,000 gallons. The Chagres River pumping station is able to supply 3,000,000 gallons daily, and at present is pumping into the feeder mains about 2,500,000 gallons every 24 hours. On April 19, there was a total supply remaining in Camacho reservoir of 73,924,000 gallons, as compared with 52,353,000 gallons for the same time a year ago; and in Caribali reservoir there was a total supply of 23,040,000 gallons, as compared with 12,960,000 gallons on the same date last year. The water from the Chagres is not filtered, the residents of the Central Division villages being supplied with condensed water for drinking purposes.

Wool and Cotton Shipments from Infected Ports.

The local quarantine regulations against wool and cotton coming from infected ports on the west coast of South America and shipped across the Isthmus are only such as to prevent the introduction of plague as a result of these articles harboring rats and fleas. Cargoes of wool and cotton in transit are often stored on the Isthmus for several days awaiting transshipment and reloading, and on this account, are almost as dangerous from the standpoint of possible infection as cargoes that remain here.

Practically all of the cotton from Peruvian ports is shipped from Callao and Payta. The regulations require that cotton from Callao be certified by the officer of the United States Public Health Service stationed there, as not having been stored in rat-infested warehouses, and that it, in his opinion, is free from danger of conveying infection. Cotton from Payta, where there is no United States public health officer, is received under certificate of the American Consul in accordance with the practice in vogue for the past three years. The shipment of wool from Mollendo is subjected to regulations that require the cargo to remain in the cars until ready for transfer to vessel; furthermore, that cotton and wool be stored in the holds of vessels and be thoroughly fumigated before arrival at Balboa.

The only prohibition that has been placed in effect is that on shipments of cotton from Eten, on account of the severe epidemic of plague prevalent there, and at Chiclayo, the town for which Eten is the port. The shipments from Eten, however, are not large. Plague has been more prevalent in the ports of Peru, and towns adjacent thereto, during the present season than for the past two or three years, and the regulations enforced against shipments of wool and cotton are only aimed to prevent the introduction of plague through these agents as vermin carriers.

Bids for Radio Station at Caimito.

Bids for a high power radio station at Caimito, C. Z., will be opened at the Bureau of Yards and Docks, Navy Department, Washington, D. C., at 11 a. m., May 10.

Missing Man.

Any one having information regarding the whereabouts of Richard T. Dodge who left Buffalo, N. Y., last February, and who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

The tide gage, formerly stationed in the Pacific entrance to the Canal, has been removed on account of dredging operations in that vicinity. It will be installed at the lower end of Miraflores Locks.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The sixth annual meeting of the Cristobal Woman's Club was held in the Commission clubhouse, Cristobal, on Wednesday afternoon, April 23. Two members who were present at the organization of the club on September 27, 1907, were among those at the meeting. The officers for 1912-1913 were held over until October 1, when an adjourned session of the annual meeting will be held. The corresponding secretary, Mrs. Charles Butters, will conduct any correspondence for the club during the recess and the philanthropy committee will have power to act upon all matters that properly come under its consideration. The members of this committee are: Mrs. Lewis Webster, Mrs. M. C. Rerdell, and Mrs. L. E. Willson. The health committee will also continue to act, under Mrs. Thomas E. Brown, Jr. The club closed the year with a membership of 25. Mrs. Carl H. Elliott is the president, having succeeded Mrs. J. L. Storla, who resigned in February.

The sixth year of the Cristobal Woman's Club was opened with a general reception on September 28. There have been seven general meetings. The programs covered a wide range of subjects, and included one health lecture and one lecture on woman suffrage. The home department has held several meetings, with appropriate programs, and the eight meetings of the art and literature department have been of special interest. Under the health committee, two free lectures have been held in Colon. The committee has funds for continuing this work, and at least one more lecture will be given this year.

On Friday, April 25, the Cristobal club gave a reception in honor of Mrs. J. A. Smith, who sailed for the United States on the day following. Mrs. Smith has been a member of the Cecelian Chorus since its organization in 1908.

Church Work.

Bishop Homer C. Stuntz, bishop of the Methodist Episcopal Church, with residence in Buenos Aires, arrived in Panama on April 28 for his first visit to the Methodist mission here. He will remain on the Isthmus until May 6.

Services are being held in the seawall church, Panama, every evening this week, with preaching by Bishop Stuntz. Accompanying the bishop is the Rev. Thomas B. Wood, one of the first hospital chaplains appointed by the Canal Commission. Dr. Wood was appointed on the Isthmus by Governor Magoon as chaplain in the Health Department with duties at Ancon Hospital, on October 16, 1905, and continued in the service until September 15, 1906.

On Saturday afternoon and evening the members of the Panama church will hold a reception in the parsonage over the church in honor of Bishop and Mrs. Stuntz, and Dr. and Mrs. Wood.

Isthmian Sunday Schools.

The quarterly meeting of the Isthmian Sunday School Association was held in the Commission chapel at Gorgona on Sunday, April 20, with 73 members of the various Sunday schools in attendance. Under the head of new business, a committee was appointed to place before the Canal Commission a petition for a building for Sunday school purposes, with a playground attached, in

the largest permanent village in the Canal Zone, probably Balboa. The president, the Rev. A. A. Nellis, reported that the gift of books from the Canal Zone Federation of Women's Clubs had been received; that the library had been enlarged in six groups and boxed, and that these groups were ready to be forwarded to any Sunday school upon request. The secretary, W. N. Windes, having resigned, Mr. J. F. Warner of Culebra was appointed to fill the unexpired term. The following program was given: Song service, beginning at 2.30 p. m.; Scripture reading and invocation, the Rev. C. O. Purdy, Gatun; song, the congregation; roll call and reports from the schools; minutes of the previous meeting, the secretary; solo, Miss Marie Louise Ensminger; duet, Mr. and Mrs. George R. D. Kramer; "The Sunday school teacher," address, by Miss Elsie Keyser, Ancon; vocal solo, Mrs. Purdy, Gatun; "The aim of the Sunday school" address, by J. M. Weaver, Cristobal.

Owing to the prospective abandonment of the village of Gorgona, the next meeting will be held in the Commission chapel at Empire, on July 6, or 13.

Anniversary Celebration of Odd Fellows.

The Canal Zone lodges of the Independent Order of Odd Fellows, with the auxiliary, the Daughters of Rebekah, celebrated the ninety-fourth anniversary of the founding of the order in the Commission chapel, Empire, on Saturday evening, April 26. In the absence of the District Deputy Grand Sire, B. F. Sisson, the presiding officer, Past Grand H. W. Dohrman, presided. Speeches were made by Past Grand Charles Beetham, representing the Gorgona lodge; Vice-Grand William McLaughlin, representing Canal Zone Lodge, No. 3, Empire; Past Noble Grand Janet Martin, representing the Rebekah Lodge, No. 1, Gorgona, and Mr. Dohrman, who read a brief historical sketch of the order. These speeches were interspersed with musical numbers, as follows: Soprano solo, Miss Myrtle Byram, piano duet, the Misses Mabel and Gladys Byram, baritone solo, Mr. Charles Beetham, and vocal duet, Mr. Beetham and Mr. Dohrman, accompanied by Mrs. Beetham. Annual celebrations of the order have been held in the Canal Zone since 1906. There are six lodges including the auxiliary. The Independent Order of Odd Fellows was instituted at Baltimore, Md., under the title of Washington Lodge, on April 26, 1819. There are at present 17,985 lodges and 9,543 auxiliaries, with a total membership of more than 2,000,000, making the order the strongest, numerically, in the world. Since its institution the expenditures for benefits have been \$150,000,000.

The employees of the Panama railroad and commissary department have chartered a special sightseeing train for Sunday, May 11. This train will leave Colon station at 8 a. m., and will cover all points of interest between Colon and Balboa. The return trip from Panama will be made on the 7 o'clock p. m. train out of Panama.

All Vanderbilt University men are requested to send their names, addresses, and year of graduation to J. V. Delgado, Ph. C., '12, Colon, R. de P., or to M. E. Henry, M. D., '12, care of Colon Hospital, Colon.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week May 5 to 10, is, as follows: Monday, Empire; Tuesday, Gorgona; Wednesday, Corozal; Thursday, Cristobal; Friday, Gatun; Saturday, Culebra; Friday, Porto Bello.

The standing of the Isthmian Bowling League, on April 28 was, as follows:

	Won	Lost	P.C.
Gorgona.....	17	7	708
Empire.....	15	9	625
Culebra.....	14	10	583
Cristobal.....	13	11	542
Gatun.....	9	15	375
Corozal.....	4	20	167

The standing of the American Duckpin League remains as on April 21, no games having been bowled on April 26.

The standing of the Indoor Baseball League, April 28 is, as follows:

	Won	Lost	P.C.
Camp Elliott.....	1	0	1000
Gatun.....	1	0	1000
Cristobal.....	1	0	1000
Gorgona.....	0	1
Empire.....	0	1
Corozal.....	0	1

The schedule of the first series of engagements for the Apollo Concert Company is, as follows: Friday, May 2, Gorgona; Saturday, Culebra; Monday, Gatun; Tuesday, Cristobal; Wednesday, Empire; Friday, Corozal; Saturday, Porto Bello.

COROZAL.

The American League duckpin games scheduled for Saturday, April 26, were not bowled as three of the members were not able to be present.

The first league baseball game of the season was played on Saturday, April 26, with the team from Camp Elliott. The score by innings follows:

	1	2	3	4	5	6	7	8	9
Camp Elliott.....	5	1	1	0	1	1	0	8	—18
Corozal.....	3	8	0	0	0	0	0	1	0—12

The players for Camp Elliott were: Messrs. O'Brien, Waldbridge, Johnson, Harper, Dejrre, McDonald, and J. G. Anderson; for Corozal: Messrs. Roberts, Kenny, Emerson, Souder, Potter, Sims, Mitchell, and Erickson.

The hall was again filled on Wednesday night, April 23, when the Walter Eccles and Four College Girls Company gave its second entertainment.

Empire will play indoor baseball at the clubhouse on Saturday, May 3.

CULEBRA.

Culebra took three straight games from the Corozal team in the Isthmian Duckpin Bowling League on Saturday, April 26, with the following scores:

	Corozal.	Culebra.
King.....	89 101 79	Case..... 104 94 99
Ziller.....	85 79 90	Silver..... 88 96 105
Rvans.....	80 85 89	Brown..... 92 103 106
Humphrey.....	86 73 76	Palmer..... 84 84 86
Dalton.....	91 107 91	Kiernan..... 81 88 101

431 445 425 449 465 497
The following high scores were bowled during the week: Ferguson 112, 101, 106; Case 106, 101, 104, 106; Kiernan 105, 111, 101, 114; Chadbourne 106; Brown 103, 106; Silver 105; Johnson 100.

Arrangement are being made for an open air concert by the Tenth Infantry Band next week. Announcement of the date will be made by bulletins.

The Apollo Concert Company will appear at Culebra on Saturday night, May 3, at 8 p. m. Admission will be, as follows: Members, free; adult nonmembers, 50 cents; children, 25 cents. Reserved seats may be procured on and after Thursday morning, May 1, at the office of the secretary.

EMPIRE.

On Saturday night, April 26, the Gatun indoor baseball team won the first league game of the season from the Empire team, the score being 40 to 39. Considerable interest is being manifested in this pastime, and it is requested that all who desire to play come out and practice.

Mr. Frank A. Gause gave an interesting lecture on Sunday night, April 27, on the Life of Abraham Lincoln. The Mosher brothers of Cristobal sang.

GORGONA.

A "smoker" will be given on Thursday evening to which all the men of Gorgona are invited.

The Gorgona baseball team will play at Gatun next Saturday evening.

The Cristobal bowling team will bowl at Gorgona on Saturday, May 3.

The Spanish class has not met this week, due to the absence of the instructor. The classes will resume the second week of May.

A large crowd attended the entertainment on Friday evening entitled "The country school." This enter-

tainment was made up of local talent. The program was, as follows: Roll call by the teacher; opening song; assignment of lessons; 30-minute study period; visit of the school board; solos, recitations, duets, and school songs.

GATUN.

A handicap elimination pool tournament and a three-cushion billiard tournament will be started on Monday, May 5. Any member of the association may enter. One pool table was recently recovered and three first-class ivory billiard balls were received last week from the United States. Mr. DePoorter will arrange details and will be in charge of both tournaments.

An effort is being made to infuse new interest into both the senior and married men's gymnasium classes. Both classes will meet on Wednesday and Friday this week, the married men's class at 5.30 p. m., and the senior class at 8 p. m. On Wednesday evening at 6.15 the married men will play the single men a game of volleyball.

Gorgona will play indoor baseball at Gatun on Saturday evening, May 3. Members and their friends are invited to see the game.

An interesting chess match is scheduled to be played on Thursday evening, May 1, when Mr. Walter J. Shutes will meet any number of other players simultaneously.

Gorgona took three games from the local team in the Isthmian bowling league on Saturday, April 26, with the following scores:

Gorgona.....	478....	481....	488
Gatun.....	422....	434....	441

CRISTOBAL.

Cristobal won the opening game of the Isthmian Indoor Baseball League, which was played with Gorgona, by a score of 18 to 12. The lineup was, as follows:

Gorgona—G. Morrison c., Christensen p., Burweiser 1b., Martin 2b., Morton 3b., Quinn ss.

Cristobal—MacSparran c., Russell p., Wehmeier 1b., Levy 2b., Frazer 3b., D. Raymond ss., D. Simons l.f. Umpires, Duer and Shradley.

The results of the bowling between Empire and Cristobal were, as follows:

Empire				Cristobal			
Pinney.....	74.....			Barrett.....	84	92	104
Giavelli.....	79	102	82	Herrington.....	99	92	86
Potter.....	97	97	85	Collins.....	87	89	87
Rodeghiero.....	96	88	90	Smith.....	91	85	102
Gustavson.....	81	93	99	Bullard.....	100	112	96
DeCora.....	99	76					
	427	479	432		461	470	475

Empire rolls Cristobal in the American Bowling League tournament on Wednesday night.

On Saturday night, Camp Elliott will play Cristobal indoor baseball on the home floor.

Tickets for the Apollo Concert Company's entertainment, Tuesday night, May 6, will be on sale beginning Friday, May 2.

PORTO BELLO.

On Sunday night, April 20, Mr. S. P. Verner of the Sanitary Department gave an interesting address on Africa.

On Wednesday night, April 23, Rev. A. A. Nellis preached on the "Temptations of Jesus" to an audience of about 80.

The visiting men of the Tenth Infantry were guests of the Y. M. C. A. at the moving picture show on Friday evening, April 25.

Saturday night, April 26, a farewell reception was given Mr. and Mrs. Schreiber, Mr. and Mrs. Werner, and Miss Margaret Werner, Mr. and Mrs. Quinn and family, and Dr. and Mrs. W. C. Gibson. Music was furnished by the Tenth Infantry orchestra.

Arrangements are being made for observing Mother's Day, Sunday, May 11, and Children's Day, Sunday, June 8, by the members of the Sunday school.

Mr. Chas. M. Chase, formerly president of the Christian Endeavor Society of the Union Church, Cristobal, will speak at the song service, Sunday night, May 4.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa during the two weeks ending April 26:

Almerian, April 12, from Liverpool, with 202 barrels carbolic acid, for stock; 15 cases machinery, for Fifth Division.

Sixsofa, April 13, from New York, with 239 pieces structural steel, Atlantic Division; 69 packages plumbing material, 10 reels electric cable, 194 cases electrical material, First Division; 73 cases transil oil, Atlantic Division; 6 cases bells, Mechanical Division; 1,035 sacks oats, 10 cases sheet copper, stock.

Emil L. Boas, April 13, from New York, with 186 kegs bolts and rivets, stock.

Heredia, April 14, from New Orleans, with 622 pieces yellow pine lumber, 3 reels steel cable, Mechanical

Division; 1,906 pieces cross ties, 46 pieces piling, 3,793 pieces yellow pine lumber, 1,094 pieces pipe, 112 pieces white oak lumber, stock.

Almirante, April 16, from New York, with 131 pieces structural steel, Atlantic Division; 27 reels insulated wire, 240 cases electrical material, First Division; 240 cases electrical material, First Division; 21 bales packing, stock.

Alenas, April 17, from New Orleans, with 168 pieces yellow pine lumber, Mechanical Division; 8,238 pieces yellow pine lumber, 1,344 pieces cross ties, 89 pieces piling, stock.

Colon, April 18, from New York, with 32 crates handles, 78 pieces lumber, 50 cases graphite, 11 pieces steel angles, 15 pigs type metal, 17 cases mullage, 111 bundles galvanized sheets, 60 cases sal soda, 18 cases torpedoes, 10 barrels soap flake, 20 cases paper, stock, 90 kegs chlorate of potash, 500 pieces car couplers, 100 barrels sand, 414 pieces steel castings, 13 barrels coupler parts, Mechanical Division; 92 barrels solid asphalt, 10 crates roofing felt, Fortifications; 60 barrels leadite, Fifth Division; and a miscellaneous cargo, the whole consisting of 2,032 packages, weighing 230 tons.

C. NIXON, Depot Quartermaster.

Sale of Surveying Instruments, Etc.

MOUNT HOPE, C. Z., April 19, 1913.

Bids will be received at the office of the Depot Quartermaster, Mount Hope, C. Z., until 2 o'clock p. m., May 3, 1913, when they will be opened in the presence of attending bidders, for any or all transits, levels, compasses, planometers, etc., now on hand in the storehouse for obsolete material. These instruments may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m., on application to this office. The right is reserved to reject any or all bids, or any combination of bids. Bids must be sealed and plainly marked: "Proposal to purchase surveying instruments," addressed to the Depot Quartermaster, Mount Hope, C. Z.

C. NIXON, Depot Quartermaster.

OFFICIAL CIRCULARS.

Consolidation of Dredging Work.

CULEBRA, C. Z., April 26, 1913.

CIRCULAR No. 183-U:

Effective May 1, 1913, the following changes are made in the organization of the Department of Construction and Engineering:

The dredging work, now in the Atlantic Division, together with the dredges, barges and forces in that service will be transferred to the Sixth Division of the Chief Engineer's Office, thus consolidating all dredging under the supervision and direction of the resident engineer, Mr. W. G. Comber.

The drydock and its shops will be transferred to the Mechanical Division.

Arrangements will be made between the division engineer of the Atlantic Division and the resident engineer of the Sixth Division for the joint use of tugs, as well as other facilities, forces, etc., that can be utilized to advantage by both interests.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Procedure in Transfer of Employees.

CULEBRA, C. Z., April 21, 1913.

CIRCULAR No. 357 E:

Before an employee is transferred from one division or department of the Commission or Panama railroad to any other division or department, the number of the house and room in which he is to be quartered at his new station will be obtained in advance by the division or department in which the employee is working, from the head of the division or department to which the employee is to be transferred, and four copies of Form C. E. 333 will be made out for each employee thus transferred. One copy will be mailed to the head of the division or department to which the employee is transferred; one copy will be mailed to the Examiner of Accounts, and one copy with necessary transportation, will be given to the employee, who will deliver the copy in person to the official to whom he has been instructed to report. The fourth copy will be retained in the files of the division or department from which the employee is transferred.

The same procedure will be followed in all cases where an employee of one division or department is temporarily loaned to another division or department. When an employee is sent to a temporary assignment the division or department in which he is employed will make out Form C. E. 333, and when the employee is returned the division or department that borrowed his services will make out Form C. E. 333.

Circulars Nos. 357, dated October 26, 1910, and 357-C, dated February 21, 1912 are hereby modified in so far as any of their provisions conflict with the above.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission.
President, Panama Railroad Company.

Acting Chief Sanitary Officer.

CULEBRA, C. Z., April 26, 1913.

CIRCULAR No. 484:

Effective this date, and during the absence of Colonel W. C. Gorgas, Colonel John L. Phillips is designated as Acting Chief Sanitary Officer.

GEO. W. GOETHALS, Chairman.

Employees' 120-Trip Tickets.

CULEBRA, C. Z., April 24, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The holders of I. C. C. employees' 120-trip tickets will hereafter be required to fill in on coupons stations between which it is desired to travel and sign their names before entering train.

GEO. W. GOETHALS, Chairman.

Administrator's Notice.

In the Matter of the Estate of Leslie C. Cunningham—To any and all persons who may have a claim or claims, against the estate of Leslie C. Cunningham, deceased, who died at Pedro Miguel, Canal Zone, on January 31, 1913:

You will present the same on or before the 15th day of October, 1913, to the undersigned Administrator of said estate, properly verified, or the same will be forever barred according to law.

TOM M. COOKE, Administrator.

Married.

WRIGHTSON-GORGAS—On Wednesday evening, April 23, at St. Luke's Chapel, Ancon, Aileen Lyster Gorgas, daughter of Colonel and Mrs. William Crawford Gorgas, to Mr. William Dougherty Wrightson, Major Henry A. Brown, chaplain, Engineer Corps, U. S. A., officiating. Residence, Houston, Texas.

MOHRMAN-McGILL—At the Union Church, Cristobal, on April 17, Miss Mary McGill to Mr. Harry Mohrman, the Rev. Carl H. Elliott officiating. Isthmian residence, Colon.

Lost—Between Las Cascadas and Colon on April 19, an Elgin watch with fob attached. Fob has the monogram "T. B. R." A liberal reward is offered for its return to Thomas Rees, Las Cascadas.

COMMISSARY DEPARTMENT.

Panama Railroad Steamship Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

Hamburg-American steamers for New York via Kingston and Santiago de Cuba, sail thus: The *Carl Schurz* and the *Emil L. Boas* on alternate Wednesdays at 10 a. m., and the *Prinz Joachim* and the *Prinz August Wilhelm* on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays, at 3 p. m.; ships for New York via Kingston, on Tuesdays, at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

The Panamanian Steamship Company's steamer *Panama* will sail from Panama for Aguadulce and Pedregal on May 8, 17, and 27.

The following ships arrived at, or departed from, the port of Balboa during the week ending April 26:

Arrivals—April 21, *Ucayali*, from Callao; April 23, *Acapulco*, from San Francisco; April 24, *Luckenbach*, from San Francisco; April 25, *Huasco*, from Valparaiso; April 24, *Cuzco*, from Puget Sound; April 25, *Barracouta*, from Central America.

Departures—April 21, *Chile*, to Guayaquil; April 21, *Mexico*, to Valparaiso; April 21, *Manana*, to intermediate ports; April 21, *Huallaga*, to Ilo, Peru.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is issued free of charge, one copy each, to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Increased Activity of Cucaracha Slide.

That portion of the Cucaracha slide immediately north of Purple Hill, in spite of the dry weather, has shown greatly increased activity during the past few days, and on the night of May 2-3, had moved to such an extent as to cover the east track on the 70-foot berm, west bank of the Canal, leaving but a single passing track on this bench for all loads and empties to and from the south end of the Canal, and causing great congestion at this point.

When heavy rains come, the trouble from this slide will doubtless be increased considerably, but two 20-inch pipes have been laid, with their bottoms at elevation plus 37 feet, in a ditch cut into the solid rock bottom, passing in front of the entire slide. They will afford drainage to the south, even though covered to a depth of many feet by the slide itself.

Progress on New Colon Waterworks.

The construction of the purification plant, pump station, and accessory works in connection with the new water supply for Colon, Cristobal, and Mount Hope has been under way since October, 1912.

The tunnel between Brazos Brook and Gatun Lake has been completed; the gatehouse on the Gatun Lake side, together with the face and wing walls and the concrete plug closing up the tunnel, has been completed. The 20-inch pipeline from the gatehouse to the Gatun Lake control house has been laid. The control house at the end of this pipeline has been completed with the exception of the installation of the controller.

The pile foundations for the pump station and the pump sump beneath the floor of the station, and the walls of the station up to the level of the plates for the roof trestles have been completed.

The clear water basin under the filter building, the floor of the pipe gallery, and the walls of the filter building have been completed up to elevation 16.08, and the forms for the filter

beds on one side of the building have been erected ready for concrete.

The excavation for the sedimentation basin and the driving of the concrete piles beneath the west side of the basin have been completed. About 40 per cent of the floor of this basin has also been completed.

Work is in progress on the erection of the steel trestles for the pump station roof. The building of forms for the filter beds in the filter building, and the setting of the steel reinforcement for the walls and floor of the sedimentation basin are in progress.

A gravel washing and separating plant has been installed in Gatun and work is in progress washing and segregating into the three sizes required the gravel that will be necessary for the lower portions of the filter beds.

The 20-inch cast iron pipe for the new 20-inch main between Brazos Brook and the purification plant has been received and is being delivered along its location.

It is expected that unless delayed by non-receipt of material ordered in the United States, and the shortage of rock for concrete, that the entire plant will be ready for operation in October of this year.

Committee on Maintenance of the Canal.

In accordance with the resolution adopted by the Isthmian Canal Commission at its 163rd meeting, held April 24, 1913, the following members of the Commission were appointed by the Chairman and Chief Engineer a committee to investigate and recommend to the Commission plans for the maintenance of the Panama Canal: Lieut.-Col. D. D. Gaillard, Corps of Engineers, U. S. A., chairman; Lieut.-Col. Wm. L. Sibert, Corps of Engineers, U. S. A.; Colonel W. C. Gorgas, Medical Corps, U. S. A., and Mr. M. H. Thatcher, Head of the Department of Civil Administration.

Concrete Block Machines.

It is probable that hollow concrete blocks will be used extensively in the construction of the permanent buildings at the new Balboa town site. The blocks will be made on the Isthmus, and for that purpose, twelve special machines have been ordered from the United States. These include two machines for foundation blocks 12 by 12 by 24 inches; six for main wall blocks 8 by 12 by 12 inches; two for corner blocks 8 by 8 by 16 inches; one for partition blocks 4 by 12 by 12 inches, and one for interior columns 3 by 12 by 12 inches. In addition, two agitators for agitating the concrete before going into the block machines, are to be purchased.

Clearing Miraflores Lake Area.

In anticipation of the filling of the Miraflores Lake to the 55-foot level, a force of men is engaged in the removal of all brush between the 45 and 55-foot contours, and of all trees in the lake basin, the trunks or branch-

es of which pierce the surface of the water at the 55-foot level.

The clearing of this lake is for the purpose of the control of mosquito breeding that may be expected after the lake has reached its full height. Work similar to this was done some time ago in the Miraflores Lake area west of the Pedro Miguel Lock. The clearing of the Miraflores Lake area will extend from a point near the Cocoli spillway to some distance northeast of Pedro Miguel.

Effect of Wind Movement on Gatun Lake.

The effect of the wind movement on the water level of Gatun Lake has been observed during dry season months. In general, with the wind from the north or northeast at a velocity not exceeding 20 miles an hour, there has been a daily rise in the lake level at Gamboa of from one to two-tenths of a foot, reaching its maximum at from 2 to 4 p. m. There has been a similar rise, reaching a maximum earlier and less in amplitude, at the other lake stations, with the exception of Gatun, where the level decreases, the movement beginning in the middle of the forenoon. The lowering of the lake level at Gatun is barely half of the increase at Gamboa.

Railing for Spillway Dams.

Award has been made to the Vulcan Rail and Construction Company of Brooklyn, N. Y., for the railing for the approach and wing walls of the spillway dams at Gatun and Miraflores. The contract price is \$3,312, and delivery is to be made in 65 days. The approach wall on the upstream side of the Gatun spillway dam will require 970 lineal feet of railing; the wing walls on the downstream side will require 600 lineal feet, and the lower wings on the east and west walls at Miraflores spillway dam will require 500 lineal feet, a total of 2,070 lineal feet. The posts and railing are to be wrought iron pipe, manufactured from open hearth steel, galvanized inside and out, with fittings of malleable cast iron. The railing is to be two inches in diameter. Bolts and nuts are to be zinc coated according to the United States Sherardizing process, or similar. The posts will be spaced about 10 feet apart.

Immigration to the Isthmus During April.

According to the figures of the quarantine service, the number of persons who landed at the port of Colon from foreign ports during the month of April was 4,381, consisting of 1,343 cabin, and 3,038 steerage passengers. The number of persons who embarked for foreign ports during the same period was 3,477 consisting of 1,867 cabin, and 1,601 steerage passengers. The number of persons who landed over those who embarked was 904. Two thousand five hundred and forty-six of the persons arriving in steerage were from

Jamaica and the West Indies; 196 were from Costa Rica, and 133 from Colombia.

The passengers arriving "in transit," consisting principally of tourists, numbered 3,331, as compared with 5,827 in March. Of the 103 vessels arriving at Colon during April, five were exclusively for tourists, and carried a total of 921. The month of May will probably show a marked decrease in tourist travel, as but one special steamer is scheduled to arrive. On April 26, there arrived from Bridgetown, Barbados, the schooner *Meteor*, having 136 passengers on board. The trip was made in 13½ days, with a stop at Curaçao.

The number of persons who landed at the ports of Panama and Ancon during the month of April from foreign ports was 723, consisting of 554 cabin, and 169 steerage passengers. The number of persons who embarked for foreign ports was 486, consisting of 365 cabin, and 121 steerage passengers. The number of persons who landed over those who embarked was 237. The net immigration to the Isthmus during April was 1,141.

Laborers Killed by Slide.

Four West Indian laborers were buried under a slide which occurred in the bank while they were excavating for a culvert near

mile post 37 on the Gold Hill cut-off of the Panama railroad line at about 10.35 a. m., Tuesday, May 6. Life was extinct when the bodies were reached. The names of the men were: William Smith, Jamaican, check No. 79018, living at Matachin; Robert Robinson, Jamaican, check No. 79004, living at Matachin; David Picton, Jamaican, check No. 79003 living at Panama, and William Noel, Martiniquan, check No. 79013, living at Panama.

Sunday Engagements with the Chairman.

Employees having business with the Chairman may call at his office between 7.30 and 10.30 o'clock each Sunday morning. Employees should, therefore, reach Culebra on the north or south-bound train, due to arrive at 7.33 and 8.37 a. m., respectively.

Boston Business Men Visit Canal.

A party of Boston business men, members of the Chamber of Commerce, and others, with Mayor John E. Fitzgerald, arrived on the Isthmus on the *Melapan* on Friday, May 2. Mayor Fitzgerald and his own party spent one day here and then continued on the *Melapan* on a trip to Santa Marta. The remainder of the visitors were taken over the Canal and on Sunday, were given a trip in the bay on the steamer *Panama* of the Panama Steamship Company, by the merchants of the city. Most of the party sailed on the *Guatemala* of the Pacific Steam Navigation Company's service on Monday, May 5, on a trip to points along the west coast of South America.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending May 3:

DATE.	Hours worked.	Cubic yards.
April 28.....	7.10	2,371
April 29.....	7.20	2,502
April 30.....	7.00	2,497
May 1.....	6.35	2,226
May 2.....	7.15	1,882
May 3.....	7.20	2,303
Total.....	42.40	13,781

Missing Man.

Any one having information regarding the whereabouts of William Alexander Simpson of Amboy, Ill., formerly a corporal of the 93d U. S. Coast Artillery Corps, Fort Stevens, Oreg., who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

CONCRETE WORK IN THE LOCKS AND SPILLWAYS.

About 99 per cent of the entire quantity of concrete to be placed in the locks and spillways had been laid at the close of work on May 3, the amount in place being 4,696.463 cubic yards.

GATUN LOCKS AND SPILLWAY.

Over 99 per cent of the concrete for the system of three twin locks at Gatun has been laid, the amount in place at the close of work on May 3, being 2,025,623 cubic yards, out of a total of 2,043,730. In the spillway of Gatun Dam there had been placed 225,432 cubic yards, about 99 per cent of the total amount. A statement of the amount placed each working day of the week ending May 3, and of the total, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			Large stone.	Total.	SPILLWAY.		
	Concrete placed.	Hours worked.	No. of mixers.			Concrete laid.	Hours worked.	No. mixers used.

PEDRO MIGUEL LOCK.

Concrete work in the lock at Pedro Miguel is almost completed, 920,159 cubic yards having been placed at the close of work on May 3, out of a total of 920,556. The record for each working day of last week, follows:

DATE.	AUXILIARY PLANT.						Mixed by hand	Large stone.	Total.
	2-cubic yard mixers.			½-cubic yard mixers.					
	Concrete placed.	Hours worked.	No. of mixers	Concrete placed.	Hours worked.	No. of mixers

MIRAFLORES LOCKS AND SPILLWAY.

Over 99 per cent of the concrete for the system of three twin locks at Miraflores was in place on May 3, the total amount on that date being 1,498,286 cubic yards, bucket measurement, out of a total of 1,501,993. At the spillway, 26,963 cubic yards were in place. The record for each day worked last week, follows:

DATE.	CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. ½-cubic yard mixers.			Mixed by hand.	Large stone.	Total.	SPILLWAY.						Total.
										CONSTRUCTION PLANT. 2-cubic yard mixers.			AUXILIARY PLANT. 1-cubic yard mixers.

SOCIAL LIFE OF THE ZONE.

Church Notes.

On Saturday afternoon, May 3, the congregation of the Methodist Episcopal Church, Panama, held a reception in the parsonage in honor of Bishop Homer C. Stuntz, and Mrs. Stuntz. During the afternoon, Miss Elsie Wood, directress of the mission school of the Woman's Foreign Missionary Society of the Methodist church in Lima, Peru, gave an informal address on her work.

The Methodist church is to erect a new chapel in Guachapali for the negro congregation. It will be a frame structure, with a seating capacity of about 150, and is designed to meet the needs of the growing congregation in that part of Panama.

Bishop Stuntz is developing a plan for the erection of a schoolbuilding for the mission school in connection with the church in Panama. It is proposed to erect a two-story concrete structure. A staff of teachers will be sent from the United States, and the instruction will be in accordance with the best system for secondary schools.

The mission school in the seawall Methodist Church was opened on Monday, May 5, with an enrollment of 63 pupils. During the past year, which closed in February, the Ladies' Aid Society of the church supported eight scholarships, and others were maintained by the Las Cascadas Sunday school, the Ladies' Auxiliary of the Empire Christian League, Empire, and one individual subscriber from Gorgona. A scholarship costs \$25, United States currency.

The ladies' auxiliary to the Empire Christian League will hold an election of officers at its meeting on Friday, June 6. At this meeting the text book on Mormonism will be completed.

On Monday, May 5, Bishop Stuntz was the guest of the Isthmian Ministers' Association at the monthly meeting held in the Commission chapel at Empire, and delivered the principal address of the afternoon. The bishop sailed for New York on the steamer *Panama* on Wednesday, May 7. During

his visit to the church in Panama he preached every evening at the seawall church, beginning on Tuesday, April 29, and at the morning and evening services on Sunday, finishing his work with a lecture on the Philippines, on Monday evening, May 5.

The Empire Sunday school is preparing to celebrate Children's Day, which occurs in June.

At the invitation of the Woman's Guild of St. Luke's Hospital Chapel, Miss Wood spoke before the members and their friends in the church on Wednesday morning, May 7, her subject being her work in Lima.

Miscellaneous Notes.

The regular dance of the Cristobal Dancing Club will be held Saturday, May 10, 1913, at the Commission clubhouse. Invitation or membership card must be presented at door.

A dance was held at the Strangers Club on Thursday evening, May 1. A special dinner, with music, is announced for Sunday evening, May 11.

The Catholic Club at Gorgona held a farewell dance in the Commission clubhouse on Saturday evening, April 26.

Annual Dinner of 1904 Men.

The sixth annual dinner of the members of the Society of the Incas, composed exclusively of Canal employees, and others, whose term of service with the Canal Commission began during the year 1904, was held at the Hotel Tivoli on Saturday evening, May 3. The dinner, as usual, was in honor of the anniversary of the taking over of the French canal property by the United States Government, which occurred on May 4, 1904. It was attended by 44 of the 1904 men now on the Isthmus, of which there are approximately 60. Col. Tom M. Cooke presided. The general design for a society button, or pin, as individual members may wish, was adopted. It will be in white, green and gold, and will show a map of the North and South American continents drawn to scale, with the year "1904" across the face. On the reverse side there will be the words "Society of the Incas," and "Panama Canal,"

with space left for the owner's name. They will be made at Tiffany's. Col. Cooke was authorized to appoint a committee of five to confer with Colonel Goethals with the view of procuring his consent to allow the 1904 men then remaining on the Isthmus the privilege of passing through the Canal on the first ship. The committee consists of Judge H. A. Gudger, chairman; A. B. Nichols, J. J. Meehan, M. B. Connolly, and Dr. A. B. Herrick. The members present at the dinner were: Col. Tom M. Cooke, Judge H. A. Gudger, Judge M. C. Rerdell, Dr. A. B. Herrick, Dr. J. C. Perry, Dr. Claude C. Pierce, A. B. Nichols, R. H. Wardlaw, J. M. Sinclair, M. C. Pratt, E. C. McFarland, George W. Wosnon, J. J. Reidy, C. L. Stockelberg, Numa Nunn, C. C. J. Wirz, D. W. Dennis, Henry Anderson, R. K. Vibert, Charles D. Hummer, M. B. Connolly, Charles L. Parker, George Buchan, D. F. Donahue, William Bodette, J. S. Kirk, Frank Loulan, Mark W. Tenny, A. S. Jussen, R. W. Unckles, O. S. Boyd, A. A. Lundishef, J. J. Meehan, A. C. Griggs, Frank E. Moore, Max Herz, Phil M. Bates, W. C. Haskins, Monroe L. Padgett, Hartley Rowe, George M. Wells, R. P. Dixon, Dan E. Wright, H. P. Warren.

Obituary.

The death of Lieut.-Col. Wendell Lee Simpson, U. S. A., retired, general purchasing agent of the Panama Railroad Company, with headquarters at New York, occurred on April 23, at his home at Garden City, L. I. He was born in New York on August 10, 1859, graduated from West Point with the class of 1884; served in the Cuban campaign in the Spanish-American War, and also in the Philippines, and was retired from active service on September 7, 1912. He is survived by his wife, a son, and a daughter.

Owing to the prospective abandonment of the Gorgona shops, and on account of the small stock of spare repair parts now on the Isthmus requisitions have been forwarded to the United States for purchase of a quantity of these parts for early shipment.

CANAL MEDAL LIST.

(Concluded.)

On the following list are the names of American employees of the Isthmian Canal Commission, who have completed two years of continuous service on the Isthmus during the twelve months ending December 31, 1912, and are in consequence entitled to receive a Canal medal. The date shown opposite each name is that from which medal service is computed.

The list is published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Office of the Chairman for correction.

A list covering employees of the Panama railroad, and the bar lists for both I. C. C. and P. R. R. employees, will appear in later issues.

Heads of divisions are requested to check carefully their lists of American employees on the silver roll, and to report any omissions on the medal or bar lists to this office.

NINE YEARS OF CANAL WORK.

Review of Operations from May 1 to May 1—
Present Status.

The transfer of the French canal property to the United States Government took place on May 4, 1904. Although this date formally signalizes the beginning of Canal operations under American supervision, the first three years were chiefly devoted to the sanitation of the Isthmus, to assembling a working force and providing them with quarters and places of subsistence; and in various other ways preparing for the actual period of construction. The beginning of the tenth year of operations finds the constructive features of the Canal work in the final stages of completion. Concrete work in the locks has advanced to the point where its termination can be clearly prefigured; work is in progress on all of the 46 lock gates and their erection is over 90 per cent completed; installation of the lock machinery is well under way; the removal of all original excavation from the Canal prism, both wet and dry, is a matter of months; and plans for most of the auxiliary features connected with the operation of the finished Canal have been decided upon, and the work on some of them, as well as on terminal facilities, has been begun. Several reorganizations and consolidations have been effected during the year, notably in the Department of Construction and Engineering by which the Pacific Division was abolished and the work of that division assigned to the Second Division, and to the Fifth and Sixth Divisions, newly created. Consolidations have been effected in the timekeeping forces, and in the dredging work of the Atlantic and Sixth Divisions.

According to present plans, Gatun Lake, now practically stationary at about 49 feet, will be allowed to fill after July 1, until it has reached its normal level of 85 feet, which event, in case there is a season of average rainfall, is expected to take place about December 1. The rise in the lake level will probably flood Culebra Cut shortly after October 1, causing a suspension of steamshovel operations near that date. The work of removing the two remaining villages that will be cut off by the filling of Gatun Lake—Gorgona and Matadin—will probably be completed early in September. The work of dismantling the married quarters at Gorgona is already under way, and the removal of the bachelor quarters and miscellaneous buildings will be begun about August 1. Fifty-seven of these buildings will be erected at Corozal, which will be the home of many of the workers on the Pacific side until the permanent quarters at the new Balboa townsite are ready for occupancy.

LOCK CONCRETE WORK.

According to the table printed on Page 306 the amount of concrete remaining to be laid in the locks of the Canal is less than 26,000 cubic yards divided, as follows: Gatun Locks, about 20,103 cubic yards; Pedro Miguel Lock, 723 cubic yards, and Miraflores Locks, 4,431 cubic yards. All of the concrete at Gatun Locks is in place, with the exception of the north approach wall. The concrete work at Miraflores Locks will be finished by May 15, while the work at Pedro Miguel Lock is practically completed, with the exception of a gap in the northeast wing wall to allow Central Division construction trains to pass through, and a section at the north end where the caisson sill and the chain fender slot cross the drainage ditch. Concrete construc-

tion at Gatun Locks was begun on August 24, 1909, and up to May 1, 2,023,627 cubic yards had been laid out of a total of 2,043,730 cubic yards. The work at Pedro Miguel was begun on September 1, 1909, and up to May 1, a total of 920,032 cubic yards had been laid, out of a total of 920,556. Laying of concrete in Miraflores Locks was begun in February, 1910, and up to May 1, 1,497,562 cubic yards had been placed out of a total of 1,501,993 cubic yards.

LOCK GATES.

Considerable progress was made during the year in the erection of the lock gates. All of the material for the 92 leaves has been completed and shipped, except the nickel steel bearing plates for four leaves. The work of erection was begun in June, 1911, at Gatun Locks, and on May 1, the status of erection at all of the locks was, as follows: Gatun, 95.4 per cent completed; Pedro Miguel, 95 per cent completed; Miraflores, 78.6 per cent completed.

WATER CONTROL VALVES.

Eighty-six of the 116 rising stem gate valves that will control the flow of water into the lock chambers had been placed on May 1, and 63 of the machines for operating these valves had been installed on the same date. Of the 120 cylindrical valve machines for controlling the flow of water from the center wall culverts into the lock chambers, 109 were in place on May 1. Of the 12 auxiliary culvert valve machines, four each at Gatun, Pedro Miguel, and Miraflores, installation has been completed at Gatun and Pedro Miguel, and one machine placed at Miraflores, at the close of April.

GATE OPERATING MACHINERY.

Of the 92 miter gate moving machines, eight had been installed (mechanical work only) on May 1, six at Gatun Locks, and two at Pedro Miguel Lock. Of the 46 miter forcing machines, one only had been installed on May 1, namely, on gates Nos. 37 and 38, in the east chamber at Gatun Locks. The installation of the motors and other electrical apparatus in connection with the gate operating machinery is in progress. Concrete work on the control house at Gatun has been begun. The equipment has been installed in two transformer rooms.

EMERGENCY DAMS.

The erection of the structural steel in connection with four of the emergency dams, placed in the forebay above the upper locks of each flight, is under way, one each on the east and west walls at Gatun Locks, and one each on the east and west walls at Pedro Miguel Lock. The east emergency dam at Gatun was closed across the lock chamber on Saturday, May 3. No work has yet been done on the two dams of this type at Miraflores Locks.

CHAIN FENDERS.

A practical test was made of the first of the 24 chain fenders in March, with satisfactory results. The tests were continued during April. These fenders are designed to be stretched across the locks, when required, to prevent damage to the gates by possible ramming of vessels.

TOWING LOCOMOTIVES.

Tests have been conducted, beginning in February, with sample towing locomotive, No. 640, at Gatun Locks. The contract for the

40 locomotives, dependent on the success of the one on trial, has not yet been awarded. During the tests conducted in April, the machine traveled 574.12 miles, 45.2 miles on the return track and 528.92 miles on the towing track. The maximum load carried was 22,550 pounds.

AIDS TO NAVIGATION.

From May 1, 1912 to May 1, 1913, the following work was done by the Lighthouse subdivision:

Range towers Nos. 1, 2, 3, 5, 7, 9, 11, 15, 16, 17, and 18, Gatun Lake section, were practically completed; beacons Nos. 5, 7, and 8, Pacific Division, were completed; fourteen reference targets in Gatun Lake were completed; the reinforced caisson foundation for the West Breakwater light was built up to a height of 25 feet; the reinforced concrete spiral stairways for range towers were cast at the Balboa plant of the Lighthouse subdivision, as were also 16 concrete beacons, and 35 roofs for beacons. There were also cast at the same plant 224 concrete sinkers for gas and spar buoys.

Two and one-half miles of electric light line from Aguadulce pumping station to range No. 1-2, Pacific Division, were constructed; and electric lights installed in range No. 1-2, and Beacons Nos. 5, 7, and 8. Electric lights were also installed in range No. 5-6, Atlantic Division.

Award was made in the United States for the construction of 57 gas buoys, 30 of which have been delivered on the Isthmus. Six of these buoys have been placed on their stations at the Pacific entrance to the Canal.

Surveys and reconnaissances have been made in the Gatun Lake region in connection with the construction of range towers, beacons, and reference targets.

DAMS AND SPILLWAYS.

The hydraulic fill of Gatun Dam, the artificial barrier that, stretching across the old valley of the Chagres River, impounds the water of Gatun Lake, eventually 164 square miles in extent, was begun in March, 1909, and completed in September, 1912. The fill was made by suction dredges pumping from nearby borrow pits, and amounts to 10,124,082 cubic yards. The dry fill of the dam was begun in 1907, and has continued to the present time, 11,385,362 cubic yards being in place on May 1. On that date the dry fill, exclusive of paving, was approximately 98 per cent completed. The work of paving the lake side of the dam for a distance of 10 feet above and below the normal level of the water, 85 feet above sealevel, is in progress. About 175,000 cubic yards will be required for this purpose. Dumping of dry fill for the west dams at Pedro Miguel and Miraflores is practically completed, the totals in place on May 1, being 692,878, and 1,635,629 cubic yards, respectively. The hydraulic fill of the west dam at Miraflores was accomplished by the hydraulic excavation equipment of the Pacific Division, and amounts to 661,048 cubic yards. It was completed about December 1, 1912.

Concrete work in the spillway of Gatun Dam is nearly completed, 225,235 cubic yards, being in place on May 1. At Miraflores spillway, excavation for the foundations is about finished, and approximately 25 per cent of the concrete has been placed. Of the 22 spillway gate machines, 14 at Gatun,

and eight at Miraflores, only one had been installed up to May 1, namely, at Gatun.

HYDROELECTRIC PLANT.

Excavation for the foundations of the hydroelectric station at Gatun spillway, which will generate electricity for all of the operating machinery and lights of the Canal, is practically completed. The erection of the three penstocks was about 95 per cent completed on May 1. All of the turbogenerator sub-foundations are in place, three water turbines have been installed, and the erection of the turbogenerators is about 45 per cent completed. All of the structural steel for the station building has been received. A full description of the plant is given in THE CANAL RECORD of July 3, 1912.

TRANSMISSION LINE.

All line construction material for the Cristobal-Balboa electric transmission line is now under contract, with deliveries promised in about four months. It is expected to award contract for the substation equipment shortly. Construction work on foundations has been started at New Culebra Siding.

EXCAVATION.

The greater part of the material remaining to be excavated from the Canal in the dry is confined to a section of Culebra Cut extending from Cucaracha slide to a point south of the Empire suspension bridge, a total distance of about 9,000 feet. Of the 6,633,400 cubic yards remaining to be removed in the entire Culebra Cut section on May 1, only about 1,500,000 cubic yards come under the head of original excavation. The remainder was brought in by slides, which were again active during the year. Cucaracha slide, which first developed in 1907, and afterward became inactive, was the scene of a new movement in December, 1912, which has continued to a greater or less extent up to the present time, although the steamshovels now concentrated at that point are making headway against it. A new movement also developed on February 5 in the slide on the east bank, opposite Culebra village, and additional movements have been recurring there. Blasting operations in the Cut will probably be concluded within about three months' time, and this may diminish the danger from slides to some extent. The work of terracing the east and west banks of the Canal, north of Gold Hill and Contractor's Hill, to lessen their weight, has continued uninterruptedly. The increased activity on the part of slides made necessary a revised estimate of excavation, and in February, 1913, 5,634,161 cubic yards were added to the total, making the estimate for Culebra Cut 99,516,817 cubic yards, and for the the entire Canal 218,138,299 cubic yards. The excavation in the Culebra Cut section, by years, follows:

May 1 to May 1	Cubic Yards.
1904-05.....	648,911
1905-06.....	1,250,570
1906-07.....	4,861,895
1907-08.....	11,285,217
1908-09.....	13,955,753
1909-10.....	14,886,427
1910-11.....	15,925,976
1911-12.....	16,448,513
1912-13.....	13,762,255
Total.....	93,025,517

In the Chagres section there remain to be removed about 300,000 cubic yards, consisting principally of silt brought down by the Chagres River. This work will be done by dredges after the water has been turned into the Cut.

Dry excavation in the Canal prism, outside of the Culebra Cut section, is confined to 875,553 cubic yards in the Fifth Division, principally between Pedro Miguel and Miraflores Locks, and south of Miraflores Locks to the limit of dredging operations marked by the north dike. It is expected that all steamshovel excavation in the Fifth Division will be completed by August 15.

The work by dredges in the entrances to the Canal is approaching completion. In the Pacific entrance, there is an open water channel extending from Station 2145 to Station 2260. This channel carries a depth of plus 40 feet at mean tide, at the present time, with a few rock shoals to be removed to bring it to grade. From Station 2145 to deep sea Station 2500, a distance of 36,500 feet, the Canal is excavated down to and below grade, thus permitting the navigation of vessels drawing 40 feet of water to the dam at Station 2145, from deep sea. Dredges will be set at work shortly in the section between the dikes, immediately below Miraflores Locks, where approximately 1,400,000 cubic yards of rock are to be taken out.

On the Atlantic side, the dredges are nearing the lower approach to Gatun Locks, and on May 1, there were 35 feet of water in the channel to mile post 5 plus 2,200 feet, except one shoal at west point of bank at mile post 4 plus 2,500 feet. There are 26 feet of water over this shoal. The navigable channel now extends to within 2,100 feet of Gatun Locks. A consolidation of all the dredging operations on the Canal was made on May 1, and Mr. W. G. Comber, resident engineer, Sixth Division, was placed in charge. A plan of operation under the new arrangement is being worked out.

Two new 15-cubic yard dipper dredges, capable of digging to a depth of 50 feet below the surface of the water, were contracted for on January 13, 1913. A description of these dredges was given in THE CANAL RECORD of February 5, 1913.

BREAKWATERS.

The trestle, 3.29 miles long, connecting Naos Island with the mainland at East Balboa, was finished on November 6, when rail communication with the island was established. Dumping on the embankment fill is proceeding at the rate of about 12 trainloads a day. Under the order of preference recently adopted in the matter of making fills with material available to October 1, the breakwater fill is placed second in importance, that of the new Pedro Miguel townsite being first. The breakwater, according to present plans, will be built as far as practicable above high tide, with sufficient width at the top for a railway track and single roadway. The dike will be armored for most of its length to resist wave action.

The trestle on the west breakwater extending out from Toro Point, in Limon Bay, was completed on January 1, 1913, and has a total length of 11,526 feet. The work of armoring both sides of the breakwater with hard rock obtained from Porto Bello, large pieces on the outside, and smaller ones on the inside, is in progress. It is estimated that about 800,000 cubic yards of hard rock will be required for the purpose, and up to May 1, 209,442 cubic yards had been placed.

PERMANENT WATER SUPPLY.

Plans for a permanent water supply on the Pacific side were approved in March, 1913. They contemplate the continued use of the

Rio Grande reservoir, with an increase in its capacity procured by raising the dam 27 feet above its present crest; also, the continued use of the Camacho reservoir at Empire by laying a pipeline from it to the Rio Grande reservoir, and by pumping water into the supply mains from Gatun Lake, just north of the entrance to Pedro Miguel Lock, with the installation of a new pumping station, purification plant, and accessories nearby. An additional 1,500,000-gallon high pressure reservoir will be built on Ancon Hill. All plans for the permanent water supply are based on an ultimate consumption of at least 12,000,000 gallons daily in the villages and industrial plants on the Pacific slope.

The water supply plans on the Atlantic side contemplate the continued use of Agua Clara reservoir at Gatun to serve the permanent village near the locks, and of Brazos Brook reservoir to supply Colon and Cristobal, with provision for an auxiliary supply by piping water into the reservoir from Gatun Lake. A new waterworks plant is under construction at Mount Hope, and progress thereon is set forth in an article in another part of this issue.

TERMINAL FACILITIES.

The construction of the permanent terminals at the Pacific end of the Canal was begun with the removal of the Commission village of Balboa, and the remnants of the native village of La Boca, in June and July of 1912. Excavation was begun near the northeastern limit of the village sites in July, and has proceeded southward, cutting into Sosa Hills to make a wide, level site for shops, etc. Following the completion of excavation along Sosa High, the macadam highway was rebuilt at the base of the bluff, and the Balboa line of the Panama railroad was shifted into the area of excavation, east of its former location, in order to clear the site of the large drydock, No. 1. The dispensary was relocated at the foot of the hill, the postoffice was moved to the east side of the hill, toward the Balboa commissary store, and only the necessary shops, storehouses and office buildings were left on the the former village site.

Excavation for drydock No. 1 and its entrance slip began on January 1. Up to May 1, 107,495 cubic yards, or about eight per cent of the total, had been removed. The drydock entrance slip will extend beyond the present shore line, and the construction of a large cofferdam to permit of excavation in the dry, was begun in April, 1913. The building of the cofferdam necessitated the transfer of the dredge landing and the construction of a new coal pocket for supplying vessels. They have been located just north of the steel pier, on the site occupied by the wharf which collapsed on August 17, 1912.

Work on the quay walls and the one new pier authorized to date has included the sinking of over 28 per cent of the six-foot concrete caissons. The overwater parts of these structures will be supported on steel caissons, none of which has been sunk to date. A completed section of the 55-foot quay wall, 656 feet long, was placed in commercial service on July 13.

Construction work accomplished to date on the permanent shops includes the driving of foundation piles for all the footings under buildings Nos. 5, 6, 8, and 10, and of those footings for buildings Nos. 1, 2, 3, 4, 9, 11, and 12 which will be on piles. The remaining

footings will be in nearly all cases concrete piers sunk to rock. Erection of steel framework for the planing mill, building No. 8, has been begun by the United States Steel Products Company, which has the contract for the fabrication and erection of all superstructure steel for the Balboa terminal buildings. Roofing for these buildings is being manufactured at Paraiso by the American Cement Tile Manufacturing Company.

Spoil from the excavation at the foot of the hills and in the drydock has been used to raise the level of the townsite, and to provide new yards for the Panama railroad. A part of the quay wall and the foot of the new pier will lie adjacent to the east toe of the abandoned Sosa dam. Dumps have been made east of this toe for permanent yards, and some of the

construction and storage tracks required in the terminal work have been so laid out that they may be left for commercial use.

Dry filling of the swamp between Sosa and Ancon Hills was completed during the year, and supplemented by spoil from pipeline suction dredge, deposited in January and February. The residential section of the permanent town will occupy this site in part, and plans are being prepared for its construction. Work on the permanent administration building was begun in February, 1913, when a steamshovel began cutting away the top of the hill which the building will occupy, north of the Ancon cemetery, and overlooking the townsite. The excavation is almost completed. Contract for the steel work for the building has been awarded,

and the architectural details are being worked out.

Award of contract has been authorized for the building of two 250-ton revolving floating cranes, for use in handling cargo and general wrecking service in the Canal and at the terminals. Award has been made for materials for four 40,000-barrel steel tanks for fuel oil, two of which will be erected on the south side of Sosa Hills, on the fill in rear of the steel pier. Proposals for furnishing the machinery for the coaling plants at the ends of the Canal, will be opened June 14.

An outline has been made of the policy to be pursued by the Government with regard to private coal and fuel oil depots on the Isthmus for the purpose of supplying ships passing through the Canal, and since its publication, a number of inquiries have been received with reference to the establishment of such depots.

The work on the terminal facilities at Cristobal has followed the plans outlined in 1911, which were pursued with only slight variations during the year 1912. The mole from which the piers will jut has been extended 3,085 feet from the shore line. The wharf on the southwest side of Cristobal point, known as Dock 16, was placed in commercial use in January, 1913. Paving the floor with Purinton brick is in process, 9,106 square yards having been laid to May 1. Columns for the shed are being erected; 229,280 pounds of steel superstructure are in place.

For the one authorized pier, No. 17, jutting from the mole, 18,182 lineal feet of 6-foot concrete caissons have been driven, and filled with 20,531 cubic yards of concrete. The steel beams, girders, and reinforcements for the floor, amounting to 8,383,222 pounds, are in place, and the floor will be completed in June.

Caissons, four feet in diameter, have been driven during the past year for Dock 15, which will extend from the outer end of Dock 16 back along the outer side of Cristobal Point. Concrete placed in the caissons to date amounts to 843 cubic yards, and the erection of the superstructure is under way.

At the head of the slip between Pier 17 and Dock 16 it has been necessary to sink caissons to support a floor beyond the earth fill for the mole, in order to have the slip in the clear of the earth slope. In the past year, 3,890 lineal feet of caissons have been driven, and 1,545 cubic yards of concrete have been placed in them. Concrete in the floor has amounted to 1,866 cubic yards.

A coaling station was determined upon during the past year, to be located on the swampy island across the French canal from Cristobal. Borings were made to determine the most advantageous site and line of approach from the land. A spur track has been constructed to the canal bank between Cristobal machine shops and the printing plant, and bids are invited for a suitable lift or turning bridge to span the canal to the coaling plant site. Plans for the station are in preparation in the office of the Chief Engineer of the Canal Commission.

A memorial service to E. H. Modin, who died on April 21, will be held at the Commission chapel, Gatun, on Sunday, May 11, at 10.45 a. m., under the auspices of the Independent Order of Odd Fellows and the Knights of Pythias. These orders invite members and friends to be present.

PANAMA RAILROAD COMPANY.

Colon-Gatun Shuttle Train Service.

Effective May 7, 1913, daily, except Sundays, shuttle trains will be operated between Colon and Gatun on following schedule, making stops as shown:

J. A. SMITH,

General Superintendent.

OFFICIAL CIRCULARS.

Personal Injury Compensation.

CULEBRA, C. Z., April 29, 1913.

CIRCULAR No. 235-1:

By Executive Order, dated March 24, 1913, the President has ordered suspended the operation of the Executive Order of February 26, 1913, which was amended March 1, 1913, providing a method of compensation for personal injuries to, or for the death of, employees of the Isthmian Canal Commission and of the Panama Railroad Company, until such time as a further order or direction in the premises shall be made. That Order provides further:

That, until such further order or direction, payment of compensation for injuries to, or for the death of, employees of the Isthmian Canal Commission and of the Panama Railroad Company, occurring after February 28, 1913, shall, as before that date, continue to be made in accordance with the Act of Congress, approved May 30, 1908, (35 Stat. 556), being "An Act granting to certain employees of the United States the right to receive from it compensation for injuries sustained in the course of their employment," the Act of Congress, approved February 24, 1909, (35 Stat. 645), being "An Act relating to injured employees on the Isthmian Canal," Section 5 of the Act of Congress, approved March 4, 1911, being "An Act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, nineteen hundred and twelve, and for other purposes," the laws of the Canal Zone, and the rules and regulations heretofore made in regard thereto.

Claims for compensation on account of injuries resulting in disability continuing for more than fifteen days, or in death, and recommendations for the allowance of meritorious sick leave arising out of injuries received by employees in the course of employment subsequent to February 28, 1913, will continue to be prepared, allowed and paid under the regulations in force prior to March 1, 1913.

GEO. W. GOETHALS, Chairman.

Special Orders, No. 97—Brigadier-General Devol.

WAR DEPARTMENT,
WASHINGTON, April 26, 1913,
(Extract.)

3. Brig.-Gen. Carroll A. Devol, Quartermaster Corps, is relieved from duty with the Isthmian Canal Commission and will repair to this city, take station, and report to the Chief of the Quartermaster Corps for duty. The travel directed is necessary in the military service.

[2032171, A. G. O.]

By order of the Secretary of War:

W. W. WOTHERSPOON,
Major General, Acting Chief of Staff.

Official:
GEO. ANDREWS,
The Adjutant General.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal and Colon, during the week ending May 3:

Pastores, April 27, from New York, with 15 cases rubber hose, 60 reels barbed wire, 350 coils steel wire, 66 reels wire cable, 32 coils manila rope, for stock, 28 reels insulated wire, eight barrels lamps, incandescent, 12 cases transil oil, 220 cases electrical equipment for First Division; 19 pieces dredge parts, four pieces dredge buckets, for Sixth Division; 20 cases electrical material, for Atlantic Division.

Karl Schurz, April 27, from New York, with 67 cases paper, six cases paint, for stock; 12 barrels batteries, for Mechanical Division; 50 packages buoy parts, for Lighthouse Division.

Cartago, April 28, from New Orleans, with 79 pieces white oak lumber, for Mechanical Division; 26 pieces white oak lumber, 5,562 pieces yellow pine lumber, 1,123 pieces cross ties, 178 barrels fire clay, 1,569 bales prairie hay, for stock.

Border Knight, April 29, from New York, with 113,288 bags cement, for Atlantic and Fifth Divisions; 12,000 cases dynamite, for stock.

Abangares, May 1, from New Orleans, with 604 pieces white oak lumber, for Mechanical Division; 30 rolls cotton duck, 101 cases scouring bar, 71 pieces piling, 89 pieces white oak lumber, 311 pieces cross ties, 3,772 pieces yellow pine lumber, 480 sacks dairy feed, 668 drums oils, 810 cases oils and greases, for stock.

Panama, May 1, from New York, with 251 cases electrical material, 94 cases conduit material, nine reels copper wire, for First Division; 150 pieces pipe fittings, for Atlantic Division; 213 pieces car couplers, 400

pieces car wheels, for Mechanical Division; 33 pieces iron pipe, for Fifth Division; 11 barrels metal, 40 cases books, 62 crates sledge handles, 200 pieces pipe, 48 barrels paint, 65 cases lanterns, 68 cases caustic soda, 16 crates butchers' blocks, 12 crates refrigerators, for stock; and a miscellaneous cargo, the whole consisting of 2,030 packages, weighing 500 tons.

Metapan, May 2, from New York, with 16 cases babbitt metal, 503 pieces galvanized pipe, 10 cases hardware, for stock; 10 cases electrical material, for First Division; 235 pieces structural steel, for Mechanical Division.

Married.

DIETRICH-MERWIN—On April 28, at the Union Church, Cristobal, Miss Frances Bodine Merwin to Mr. Walter Louis Dietrich, both of Brooklyn, N. Y., the Rev. Carl H. Elliott officiating. Canal Zone residence, Empire.

HALL-APGAR—On Thursday, May 1, at the Union Church, Cristobal, by the Rev. Carl H. Elliott, Miss Edith Mae Apgar of Wellsboro, Pa., to Mr. Arthur Hall of New York. Canal Zone residence, Corozal.

Misdirected Letters.

ANCON, C. Z., May 7, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of addressees:

Allen, Miss Faye	Overman, C. I.
Chamberlain, John S	Rogers, Wm.

Auction Sale of Dairy Cows.

ANCON HOSPITAL, May 3, 1913.

On Saturday, May 31, 1913, at 9 a. m., there will be sold at public sale to the Ancon Hospital dairy, eight dairy cows between three and nine years of age.

WEATHER CONDITIONS, CANAL ZONE, APRIL, 1913.

Continued dry season weather prevailed in the Canal Zone during the greater part of the month. The rainfall was below normal at all stations except Gorgona, Frijoles, Gatun, and Brazos Brook. Heavy showers occurred in the Atlantic Section from April 24 to 30. The monthly totals ranged from 0.03 inch at Ancon to 5.38 inches at Gatun. The maximum precipitation recorded on one day was 3.81 inches, at Brazos Brook on the 26th.

Approximately normal conditions of air temperature and wind movement prevailed, while the relative humidity, atmospheric pressure, and cloudiness were generally below normal.

No fogs were observed during the month at either coast station, and but few at the interior stations. Of the fogs observed, 62 per cent were dissipated by 6.30 a. m., 94 per cent by 7.30 a. m., and 100 per cent by 8 a. m. The following table summarizes the weather conditions for the month:

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week May 12 to 17 is, as follows: Monday, Gorgona; Tuesday, Corozal; Wednesday, Empire; Thursday, Culebra; Friday, Cristobal; Saturday, Gatun; Friday, Porto Bello.

The standing of the Isthmian Duckpin Bowling League, as of May 5 is, as follows:

Team.	Won.	Lost.	P.C.
Gorgona.....	18	9	.667
Empire.....	18	9	.667
Culebra.....	15	12	.556
Cristobal.....	15	12	.556
Gatun.....	11	16	.556
Corozal.....	4	23	.148

The standing of the Indoor Baseball League, as of May 5 is, as follows:

Team.	Won.	Lost.	P.C.
Camp Elliott.....	2	0	1.000
Gatun.....	2	0	1.000
Cristobal.....	1	1	.500
Corozal.....	1	1	.500
Empire.....	0	2	.000
Gorgona.....	0	2	.000

The standing in the American Duckpin League, as of May 5 is, as follows:

Team.	Won.	Lost.	P.C.
Empire.....	14	7	.667
Cristobal.....	14	7	.667
Corozal.....	6	12	.333
Gatun.....	5	13	.278

Mr. C. C. Pearsall of the Eccles Company, who was detained on the zone by sickness, played the piano at the moving picture entertainments during the week, May 3 to 10.

COROZAL.

The Corozal and Empire indoor baseball teams played on the Corozal floor Saturday night, May 3, immediately after the moving picture show. The score was 36 to 13 in favor of Corozal. The lineup was, as follows:

Corozal—Roberts, 1b; Potter, 2b; Taylor, 3b; Kenny, ss; Souder, f; Emerson, c; Sims, p.

Empire—Giavelli, 1b; Watson, 2b; Brown, 3b; Sawyer, ss; Newbold, f; Rose, c; Gardner and Hall, p; umpire, Stevens. Corozal will play Gatun at Gatun on Saturday, May 10.

The Apollo Concert Company will appear at the clubhouse Friday night, May 9.

The membership in April was 462. Corozal now has the largest membership of any local clubhouse, except Gatun.

Twenty-seven new books were added to the library last Friday.

GORGONA.

At the "smoker" held on Thursday evening, the following program was given: Selection by orchestra from Camp Otis; buck and wing dancing by O'Toole; piano selection by Wright; Cogan, Emery, and Robitoy in a new play; bass solo by Case; illuminated Indian club swinging by Kramer; Kane from Camp Elliott, Burmaster, and Patterson in a special feature; Fitchet and Norman, States entertainers; wrestling by Willoughby and Quinn. Refreshments, consisting of coffee and sandwiches, with plenty of cigars, were served.

The debating club held its regular meeting on Friday evening; subject, "Resolved, that all men over 30 years of age, and all women over 25 years of age and not married shall be subject to a special tax." The question was affirmed by Mr. Verner, and denied by Mr. Swanson. After the regular discussion the debate was opened for discussion, Messrs. Ewing, and Patterson spoke. A vote was taken as to which side won. The popular vote was in favor of the negative. The next meeting will be on Friday, May 9, 1913; subject, "Resolved, that tolls on American vessels shall be remitted." The public is invited to attend.

The Cristobal bowling team took two games from Gorgona on Saturday evening, by the following scores:

Gorgona.			Cristobal.				
Roper.....	77	86	87	Barrett.....	87	78	87
Denst.....	106	82	87	Weston.....	83	87	85
Dunlap.....	80	80	82	Collins.....	103	90	101
King.....	86	89	95	Smith.....	91	91	92
Davis.....	103	81	80	Bullard.....	85	91	94

Totals. 452 418 431 449 437 459

The high scores for the week were, as follows: Davis, 108, 103, 106, 103 103; Denst, 102, 106, Phillips, 100, Swain, 116; King, 123, 105, 102; Regan, 100.

GATUN.

Thursday evening, May 1, was known as "chess night" at the Gatun clubhouse. Walter J. Shutes, the star chess player of Gatun, played 10 other men simultaneously, and won every game. Others who participated were: Messrs. Logan, Morgan, Farley, Shropshire, Sullivan, Allyea, McQueen, Regan, Dale. Wil-

liams. After the tournament, the Gatun Chess Club was formed. Mr. Shutes is president, and Mr. Shropshire, secretary-manager. The club is open for challenges. The result of the match with Empire on Saturday evening, May 3 was: Gatun 8; Empire 5.

A "Current Topics Club" will be formed on Thursday, May 8. The object of the club is for the discussion of present day topics. Occasionally, a formal debate will be held. Any Y. M. C. A. member may join.

Mr. C. C. Pearsall, accompanist of the Four College Girls Company, will play the piano for the moving picture entertainment on Friday evening, May 9. Mr. Pearsall will play several of the popular selections which were given by his company at their recent entertainments on the Isthmus.

Sixty new library books were ordered recently from the States; also 100 new pennants.

Gatun took two out of three games of duckpins in the Isthmian league series on Saturday evening, May 3, as follows:

Culebra.				Gatun.			
Case.....	105	99	84	Claherty.....	95	94	90
Silver.....	102	82	87	Wells.....	105	85	82
Brown.....	76	74	79	DePooter.....	97	81	
Durand.....	93	90	92	DeMoll.....	89		70
Kiernan.....	76	102	105	Wurster.....	102	92	109
				Green.....		78	88

Totals.... 452 447 447 488 430 448

On Thursday evening, May 1, the "Stars" won three straight games of duckpins from the "Outlaws."

The following periodicals have been added to the reading room list: National Geographic Magazine, American Photography, Good Housekeeping, Outing, Sporting News, Railroad Man's Magazine, Cassier's, Chicago Tribune, International Review, Christian Herald, North American Review, the Nation, Physical Culture, Country Gentleman, Lippincott's, Practical Electricity.

A handicap billiard and a handicap pool tournament were started on May 1. Entries for pool are: Coleman 60, Baxter 70, Reisner 50, Garrett 70, Kerruish 60, Pettit 60, Mitchell 50, Garrison 50, Bethea 50, Galloway 80, O'Hara 70, Brown 50. Entries for billiards: Townsley 100, Coleman 70, Bellringer 100, Galloway 75, Wurster 100, Hughes 100, Dickson 65.

On account of Gorgona's team failing to appear at Gatun on Saturday evening, May 3, the indoor baseball game of the interassociation series was forfeited to Gatun. In order to satisfy the fans, a game was played between the regular Gatun team and a scrub team. The lineup was, as follows:

Gatun—Thompson, c., G. Duer p., Stevens 1b., Mitchell 3b., Wathen 3b., J. Duer ss., Claybourne f.

Scrubs—Brown c., Wright p., Dickson 1b., Loudon 2b., Carpenter 3b., Woolworth ss., Flynn f.

Mr. McCormick acted as referee. The regular team has won two games and lost none so far in the Isthmian League.

CRISTOBAL.

On Monday night the class in Spanish under Prof. José Gomez closed its second series of lessons. The two classes will organize into another advanced class on Monday, May 5. Ten lessons for \$2.50.

The next moving picture entertainment in the series will be on Thursday, May 8. There will be two special reels, the Fitzjenammer Kids and Pathe's Weekly.

On Saturday night, May 10, the Culebra bowling team will roll the local team in the last series of the Isthmian Duckpin League.

The indoor baseball team lost its first game this season to the Camp Elliott team by the score of 12 to 7, on Saturday night, May 3. It was the fastest game that has ever been played on the Cristobal floor, the score being a tie up to the ninth inning when Cristobal began to fumble the ball and Camp Elliott took the lead. The lineup follows:

Cristobal—Mathues c., Frazer p., Wehmeier 1b., Russell 2b., MacSparren 3b., Raymond ss., Carpenter f. Camp Elliott—O'Brien c., Walbridge p., Johnson 1b., Harper 2b., Dejure 3b., MacDonald ss., Anderson f.

Score by innings:

	1	2	3	4	5	6	7	8	9
Camp Elliott.....	0	0	0	0	1	2	1	6	—12
Cristobal.....	0	0	0	0	3	0	0	3	1—7

Sale of Household Goods.

MOUNT HOPE, C. Z., April 30, 1913.

The following articles are on hand at Mount Hope Depot in the storehouse for obsolete material and are available for sale to employees at prices shown:

16 boards, meat cutting, No. 3, 16" x 18" each 10c; 21 boards, meat cutting, No. 3, 12" x 18" each 10c; 3 blocks, meat, hardwood, 12" x 16" each 16c; 10 blocks, pastry, birchwood, 20" x 30" each 22c; 2 blocks, pastry, birchwood, 20" x 24", each 22c; 3 blocks, pastry, birchwood, 18" x 24", each 19c; 32 breakers, ice, each 65c; 9 cutters, bread, Acme, each \$1.25; 14 cutters, slaw, w/boxes (3 blades), each 53c; 144 sticks, candle, agate, each 4c.

These articles will be disposed of for cash and may be seen on any working day between the hours of 7 to 11 a. m., and 1 to 5 p. m.

C. NIXON, Depot Quartermaster.

CANAL

RECORD

Volume No. VI.

ANCON, CANAL ZONE, WEDNESDAY, MAY 14, 1913.

No. 38.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

More Concrete Work for Atlantic Division.

The Atlantic Division will take over part of the concrete work of the First Division at Gatun Locks. It will furnish material and labor for the forms and install concrete for the towing and return tracks on the lower approach and wing walls, as well as on the inclines which have not been concreted by the First Division. The latter will indicate the level and alignment. This arrangement will permit of the transfer of more of the First Division force to Miraflores Locks, where the installation of track is not as far advanced as at Gatun.

Canal Excavation in April.

The grand total of Canal excavation to May 1 was 198,243,402 cubic yards; leaving to be excavated 19,894,897 cubic yards.

The total excavation for the month of April was 2,655,095 cubic yards, as compared with 2,754,383 cubic yards for the corresponding month last year and 2,691,753 cubic yards in April, 1911.

The dry excavation last month amounted to 1,676,000 cubic yards, entirely by steam-shovels. The dredges removed 979,095 cubic yards.

In the Atlantic Division, the total excavation was 469,677 cubic yards. Of this amount, 29,649 cubic yards were dry excavation in the vicinity of the locks, and the remainder—440,028 cubic yards—was principally wet excavation from the channel and harbor section.

The total excavation in the Central Division was 1,179,100 cubic yards, which includes 1,100 cubic yards charged to "Plant excavation."

In the Pacific Division, the total excavation was 1,006,318 cubic yards, 467,251 cubic yards of which consisted of dry excavation, 23,875 at Miraflores spillway, 68,296 at the Balboa terminal, and 375,080 from the prism between Pedro Miguel and Miraflores Locks, and

immediately south of the latter. Of the 539,067 cubic yards of wet excavation, 182,125 cubic yards were taken from the terminal site, and the remainder from the Pacific entrance.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (ten stations), 1.89 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes

only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Status of Work in Fifth Division on May 1.

A statement showing the work accomplished in the Fifth Division up to and including April 30, 1913, based upon the revised estimate of March 1, 1913, and the amounts remaining to be done, follows:

Inundating Pit in Pacific Sealevel Section.

The work of filling the section between the two dikes, south of Miraflores Locks, with water, preparatory to beginning dredging operations, is in progress. The material in this area was partly removed by the hydraulic excavation plant, which was closed down about December 1, 1912. Since then, one-half of the plant has been dismantled and transferred to a point back of Gold Hill, where it is being set up for hydraulic work on slides, while part of the remaining equipment has been used in furnishing compressed air to the drills, etc., in the vicinity of Miraflores Locks. One of the two remaining pumps is now engaged in pumping water into the above pit.

It was originally planned to excavate the remainder of the material in this pit in the dry, but as dredges were available a change in the method was decided on. In order not to endanger the north dike, which rests on rock foundation, without penetration, it was decided to let the water in gradually, and this is being accomplished in three ways, namely, by pumping from the sump at the Aguadulce pumping station; by siphon, and by damming the Rio Grande diversion, thus backing up the water so that it will flow into the pit by gravity through pipes under the Balboa sand track. Pumping was begun on Monday, April 28, the discharge being through a 12-inch pipe. By this method about 7,000,000 gallons of water are added to the

supply every 24 hours. The siphon was installed and began working on Tuesday, May 6, and consists of a 20-inch pipe laid over the south dike, drawing water from the sealevel channel. It can be operated only about one hour and three-quarters before and after high tide, but adds about 6,000,000 gallons a day to the supply. The two 20-inch pipes from the Rio Grande diversion furnish a cheap and continuous supply amounting to about 10,000,000 gallons a day. The amount could be increased but for the work at the Miraflores spillway which will not permit of a rise of water in the diversion higher than nine feet above sealevel, so a part of the flow of the stream escapes. The total daily supply amounts to about 23,000,000 gallons, about equally divided between salt and fresh water, and at the present rate, the pit will probably be filled some time this week. It is planned to allow the water to rise until it reaches an elevation about two feet above mean sealevel, when the dike will be blown up. The north dike, which separates the pit from steamshovel operations immediately south of Miraflores Locks, has been widened and strengthened by the dumping of additional material.

Concrete Work in Locks and Spillways.

Over 99 per cent of the entire quantity of concrete to be placed in the locks had been laid at the close of work on May 10, the amount in place being 4,449,373 cubic yards.

A statement of the concrete laid in the six locks of the Canal, and in Gatun and Miraflores spillways, as of May 10, follows.

SOCIAL LIFE OF THE ZONE.

Exhibition of Curios.

An exhibition of curios was held in the entertainment hall of the Commission clubhouse at Empire on May 6 and 7. The greater part of the articles shown were from Central and South America, but a number of articles from other countries were catalogued also. The exhibitor on the largest scale was Mrs. Dove L. Prather, whose Guatemalan bazaar occupied one end of the hall. Here were shown the dress of the native women and children, examples of native pottery, toys, and baskets, straw-packing mats and large rope bags; and for the transportation of farm products and other articles, saddle bags and panniers; also, several pieces of hand wrought silver jewelry.

Other women exhibitors were Mrs. W. H. Brown, who showed a Navajo blanket of rare weave, and a collection of original oil paintings; Mrs. Ernest Van Lira Finch, who showed a suit of reindeer skins of a Labrador Eskimo; Mrs. Fred Gorham, who exhibited the skin of a young seal, and Mrs. Gardener, who had a rolling pin made of the wood of an apple tree, a relic of the War of 1812. Mr. Russell, under whose direction the exhibit was conducted, showed a valuable collection of butterflies, moths, and beetles, a tom-tom (native musical instrument), and several kinds of hides. Messrs. Fred and Jack Whaler lent a collection of relics from the Indian graves in the province of Chiriqui, Republic of Panama, a large number of postal card views and photographs of scenes in the interior, and arrows and bags of the Cholo Indians. There was a notable collection of old coins lent by Mr. Killfoil; Mr. Otto Schroeter showed a collection of butterflies and moths; Mr. Ross, a number of snakes in pickle, and taxidermic specimens; Mr. Freeland, a tobacco set made of native woods; Mr. Rawson, nine hides of animals; Mr. Hall, hides of animals; Mr. Frank Skinner, a shark's tooth of large size; Mr. Wertz, a piece of petrified cottonwood taken from the Canal, near Mamei; the Rev. A. A. Nellis, photographs and postal card views; Master Kenyon Zinn, a saw fish; Mr. Darling, a collection of shells and conches from the Pacific Ocean. In addition, there was exhibited a collection of articles confiscated from criminals arrested in the Canal Zone, among them being machetes, clubs of various weights and sizes, ancient guns and pistols, etc.

This is the second exhibit that has been held in the clubhouse, the first, in November, 1912, consisting mainly of photographs and postal card views.

The Strangers Club will give a dinner concert and dance on the eve of Decoration Day, May 29.

Tennis Tournament.

An all-comers' tournament in doubles will be held at Ancon on Sunday, May 25, and Decoration Day, May 30, 1913. This tournament is for the Isthmian championship, and is open to all members and clubs affiliated with the association. Entrance fee is \$1 for each player; it must be in the hands of the acting secretary, C. E. Nevius, Ancon, not later than May 22, 1913.

I. B. of S. S. and D. M.

Local No. 19, International Brotherhood of Steamshovel and Dredgemen, will hold its

next meeting at the Empire lodge hall on Sunday, May 18, at 12.15 p. m. All members are requested to be present.

J. I. MAJOR,
Secretary and Treasurer.

Empire, C. Z., May 12, 1913.

Obituary.

Mr. Joseph McDonald Sinclair, chief clerk in the office of the superintendent of Ancon Hospital, died suddenly at his home in the hospital grounds at 6.40 p. m., on May 8, from organic disease of the heart. He was 32 years of age, had been in the service of the Canal Commission since July, 1904, coming to the Isthmus from Washington, D. C., and was a member of the Society of the Incas and of the Society of the Chagres. He is survived by his wife. The funeral service was held at St. Luke's Hospital chapel on Sunday afternoon, May 11.

Mrs. Mary A. Grout, living with her son, F. E. Grout, at Diablo, died during the night of May 6. She was 64 years of age, a widow, and had been on the Isthmus two years, coming here from Portsmouth, Ohio.

Convicted of Second Degree Murder.

J. Frank Houston, who shot and killed Harry Stern at Gatun on February 8, was convicted of murder in the second degree in the Circuit Court of the Third Judicial Circuit at Cristobal on May 1. The motion for a new trial was overruled, and the minimum sentence of 10 years in the Canal Zone penitentiary was imposed by Justice Brown on Thursday, May 8. Notice of an appeal to the Supreme Court has been given.

Dates for Public Land Hearings Cancelled.

The large number of claims filed by occupants of estates under consideration by the Joint Land Commission has resulted in a large amount of unfinished business. The commission has, therefore, found it necessary to cancel all dates hitherto announced for public hearings. An announcement will be made later of the dates on which hearings will be held.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the week ending May 10:

DATE.	Hours worked.	Cubic yards.
May 5.....	6.50	2,227
May 6.....	5.50	2,310
May 7.....	6.55	1,681
May 8.....	6.15	2,640
May 9.....	4.35	1,607
May 10.....	3.00	1,095
Total.....	33.25	11,560

United Spanish War Veterans.

The next meeting of Chagres Camp will be held in the I. C. C. lodge hall, Gorgona, on Sunday, May 18, at 2.30 p. m..

Sailing of the "Cristobal."

The sailing date of the steamship *Cristobal* has been set for Friday, May 16, at 3 p. m., from pier No. 11, Cristobal.

J. Gordon, a Barbadian employed by the McClintic-Marshall Construction Company was killed on Tuesday, May 13, by falling from a lock wall, a distance of 75 feet.

CANAL MEDAL BAR LIST.

The attached list contains the names of employes and exemployes of the Isthmian Canal Commission, who at some time during the past year completed their fourth year of continuous service on the Isthmus and are now entitled to their first service bar. The date shown opposite each name is that from which the bar service begins.

All changes or corrections should be reported to the Office of the Chairman, at Culebra, at an early date.

As soon as the list is revised, numbers will be assigned by alphabetical order of surnames, on both medal and bar lists, and the lists will be forwarded to the Washington Office of the Isthmian Canal Commission, where final arrangements will be made for the proper engraving. Distribution will be made about October 1 of the present year.

The heads of divisions are requested to carefully check their lists of American employes on the silver rolls, and to report any omissions on this list to the Office of the Chairman.

CRISTOBAL MOLE EXTENSION.

Breakwater at Terminal Docks To Be Nearly a Mile in Length.

By authorization made last July, the mole for the Atlantic terminal piers at Cristobal was to extend 3,250 feet from the initial station near the former shore line along Roosevelt avenue. The end is now 3,085 feet from the initial point. It has been decided to extend the mole, to serve as a breakwater, to a total length of 4,958 feet. The decision is based upon the probable need of such extension in future, for the erection of more piers, the protection to be afforded against heavy seas, and the possibility of doing it more cheaply now than later.

The principal element in the less cost at present will be the use of rock to be dredged from the channel and berth at the permanent coaling station on the island opposite Wharf 11. The site of the mole extension will furnish a convenient dumping place for the scows serving the dredges at the station, and it is believed that enough hard coral rock will be obtained to lay the entire base to a height of approximately 10 feet below the surface of the water. Inasmuch as this excavation and dumping must be done as a part of the coaling station construction, the fill will be made without cost for the piers. This method of placing a subaqueous base by dumping from dredge scows was successfully tried out in building the present mole, when the dipper dredge *Mindi* was working in the slip for dock No. 16. Less trouble was experienced with slides and settlements in building the upper levels over this area than occurred on the original breakwater, for which no subaqueous fill was made.

Between the present end of the mole and a point 3,680 feet from shore (Station 36 plus 80) the water is relatively shallow, over a ledge; beyond that point the soundings show a dropping off to depths as great as 40 feet. Estimates for the extension were accordingly made in two divisions.

The section used in estimating quantities is based upon information obtained from cross sections of the present breakwater, using a slope of 1:1½ above water and 1:2 below water on the south, or inside, face of the mole; and 1:1½ above water and 1:4 below water on the sea side. It is also assumed that the weight of new material would displace about 10 feet of mud under the center portion of the breakwater, gradually diminishing toward the slopes.

Following is the estimate for cost of dry filling, now, or in future, without the use of rock spoil dumped from the dredge scows:

Station 30 + 85 to Station 36 + 80:			
	Cu. Yds.		
Theoretical section.....	130,560		
Mud displaced.....	30,900		
End slope.....	10,400		
Total of.....	171,860 at \$.50....	\$85,930	
Hard rock armor on sea face.....	2,200 at \$1.00....	2,200	
		88,130	
Adding 10 per cent for slides and washouts due to severe northers during construction.....		8,813	
Total.....		96,913	
Station 36 + 80 to Station 49 + 58:			
	Cu. Yds.		
Theoretical section.....	382,000		
Mud displaced.....	94,600		
Total of.....	476,600 at \$.50....	\$238,300	
Hard rock armor on sea face.....	4,800 at \$1.00..	4,800	
		243,100	
Adding 10 per cent for slides, etc.....		24,310	
Total.....		\$267,410	
Grand total, both sections.....		\$364,353.00	

Saving will be made by the use of less dry fill, estimated to cost 50 cents per cubic yard. The cost of excavating from the Mount Hope borrow pit, and placing, has averaged about 46 cents per unit. The use of dredge spoil will diminish costs according to the following estimates:

Station 30 + 85 to Station 36 + 80:			
	Cu. Yds.		
Theoretical section.....	59,300		
End section.....	3,250		
Total of.....	62,550 at \$.50....	\$31,275	
Hard rock armor.....	2,200 at \$1.00....	2,200	
		33,475	
Adding 10 per cent for slides, etc.....		3,347	
Total.....		36,822	
Station 36 + 80 to Station 49 + 58:			
	Cu. Yds.		
Theoretical section.....	137,375 at \$.50....	\$68,687	
Hard rock on face.....	4,800 at \$1.00....	4,800	
		73,487	
Adding 10 per cent for slides, etc.....		7,348	
Total.....		\$80,835	
Grand total, both sections.....		\$117,657	

The saving to be effected by the use of dredge spoil will be about \$245,696. It is estimated that while one dipper dredge is operating at the coaling station site the subaqueous filling may be made from barges at the rate of 35,000 cubic yards a month, and that about 14 months will cover the placement of the requisite 500,000 cubic yards of subaqueous material. Such dry fill as will be needed can be supplied in place with the subaqueous fill without difficulty. The hard rock for armor will be specially selected, like that from Quebrancha quarry, or from the excavation in Sosa Hill for the Pacific terminals.

Balboa Sand Service.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, May 21, 1913, beginning promptly at 2 p. m., for persons desiring to secure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms for application and information respecting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeur's licenses must bring automobile with them.

Missing Men.

Any one having information regarding the whereabouts of Luther D. Martin, whose service with the Commission terminated October 20, 1909, is requested to communicate with the American Legation, Panama.

Information regarding A. H., or Hart Chapman, concrete worker, thought to have been employed on Canal construction work in the fall of 1908, is sought by his father.

Replies should be mailed to Mrs. Lola Kelly, 202 Cedar street, Ottawa, Canada.

Any one having information regarding the whereabouts of Thomas James Kneeland, supposed to be on the Isthmus of Panama, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of William Wallace McCallum, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD, Ancon.

PERSONAL.

Lieut.-Col. D. D. Gaillard sailed for the United States on the *Panama* on Wednesday, May 7, on his annual leave of absence.

Commissioner H. H. Rousseau, accompanied by his family, sailed on the *Parismina* on Tuesday, May 13, for Port Limon, Costa Rica, and from there will go to Cartago, where he will spend his annual leave.

Mr. Walter W. Warwick, formerly Examiner of Accounts with the Isthmian Canal Commission, was nominated by the President, on May 2, to be assistant controller of the treasury.

Mr. Henry Schoellhorn, mechanical engineer in the Mechanical Division, sailed for New York on the *Ancon*, on Friday, May 2, having been detailed to take charge of the inspection of the two new floating cranes which will be built for the Canal Commission at Duisburg, Germany. He will proceed to his post after a conference with Maj. F. C. Boggs, the general purchasing officer of the Commission at Washington. In his absence the advisory duties of mechanical engineer will be performed by Mr. W. R. McCann of the First Division.

Mr. A. A. Greenman, land agent for the Isthmian Canal Commission and Panama Railroad Company, has resigned, effective May 15, and, accompanied by his family, will sail for New York on the *Cristobal* on May 16. He entered the employ of the Panama railroad on the Isthmus as land clerk on November 11, 1908, and became the land agent of the railroad and Canal Commission on May 1, 1911.

Handicap Pistol Match.

During the monthly handicap match of the Culebra Pistol Club for the month of April, 1913, one of the members, Mr. Maurice W. Fox, made a target of 10 shots at 50 yards, with a Smith and Wesson pistol, 22 calibre, on standard American target, on which he scored 99 out of a possible 100.

Eight of the ten shots were all inside a 2½-inch diameter circle and all ten were within a 3½-inch diameter circle. This is the best record for a single target ever made by a member of the club and ties the world's record made by Thomas Anderton in 1903.

The power for operating the presses and other machinery at the Mount Hope printing plant was changed on Sunday, May 11, by the installation of a 35-horsepower electric motor in place of the gasoline engine which had hitherto given service. The motor was formerly in use in the Quartermaster Department's saw mill at Ancon. Electric current is obtained from the Gatun power plant, transformed at the Cristobal plant.

STEAMSHOVEL RECORDS.

Work of the Central Division Machines During the Month of April.

During the month of April, the total amount of material excavated in the Central Division was 1,179,100 cubic yards, of which 353,646 cubic yards were classified as earth, and 825,454 cubic yards as rock.

Of the total, 1,178,000 cubic yards were primary excavation in Canal prism, and 1,100 cubic yards were from ditch for draining the old Culebra dump. The total—1,179,100 cubic yards—was removed by steamshovels.

The high record for the month was made by shovel No. 221, working 32½ days in the Empire district, which excavated 52,639 cubic yards of earth.

The second best record for the month was made by shovel No. 206, working 40 days in the Culebra district, which excavated 50,864 cubic yards; 35,604 cubic yards of rock, and 15,260 cubic yards of earth.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 26 days in the Culebra district, which excavated 39,720 cubic yards, 15,888 of which were earth, and 23,832 rock.

Shovel No. 230, working in the Culebra district, made a high record for one day by excavating 2,736 cubic yards of rock on April 23.

Shovel No. 232, working on 12-hour shift in the Empire district, made a high record of 3,173 cubic yards of earth on April 28.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown below:

BEST RECORDS FOR THE MONTH.
CULEBRA DISTRICT.

SHOVEL No.	CUBIC YARDS.			No. of days at work.
	Earth.	Rock.	Total.	
206.....	15,260	35,604	50,864	40
219.....	23,495	23,495	46,990	40
204.....		45,723	45,723	27

EMPIRE DISTRICT.

221.....	52,639		52,639	32½
232.....	35,364	4,843	40,207	31
262.....		39,374	39,374	31½

BEST RECORDS FOR ONE DAY.

Shovel.	LOCATION.	Date.	Character of material excavated.	Cubic yards.
226	Empire.....	April 26	Rock.....	2,470
209	Empire.....	April 4	Rock.....	2,432
209	Empire.....	April 3	Rock.....	2,394
230	Culebra.....	April 23	Rock.....	2,736
204	Culebra.....	April 15	Rock.....	2,617
208	Culebra.....	April 2	Rock.....	2,600
208	Culebra.....	April 23	Rock.....	2,590

The excess number of days over and above the actual number of working days in the month of April (26), is due to double shift and night work.

Work of Lidgerwood Unloaders in April.

During the month of April, the following Lidgerwood trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.....	5*	1,188	24,948
Miraflores.....	1	227	4,767
Gamboa.....	4	1,162	24,380
Total.....	10	2,577	54,095

*One unloader worked from the 21st to the 30th.

Misdirected Letters.

ANCON, C. Z., May 14, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have

been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Barnett, Geo. G.	Kershaw, J. B.
Bates, W. W.	Le Blanc, Joe
Bryce, Herbert	Lorbeer, Dr. T. L. (2)
Burgos, Miss Ines	Manehim, Joseph
Byam, Joseph B.	McLoone, J. J.
Cloviss, Mrs. Ann (photo)	Owens, Thomas
Eddington, Lash	Palmer, T. B.
Fullinwider, E. R.	Robinson, James
Gillespie, Berkeley	Ross, Mrs. Chas. C.
Golby, James G.	Shambaugh, Dr. C.
Harding, Miss May	Sporer, Daniel G.

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

OFFICIAL CIRCULARS.

Decoration Day a Holiday.

CULEBRA, C. Z., May 13, 1913.

CIRCULAR No. 486:

Decoration Day, Friday, May 30, 1913, will be observed as a holiday in the Canal Zone, and as far as practicable, all public business will be suspended on that day.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Acting Division Engineer, Central Division.

CULEBRA, C. Z., May 6, 1913.

CIRCULAR No. 485:

During the absence of Lieut.-Col. D. D. Gaillard, on leave, effective May 7, 1913, Mr. A. S. Zinn is designated Acting Division Engineer of the Central Division.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Repair of Hand and Push Cars, Baggage and Station Trucks.

CULEBRA, C. Z., May 5, 1913.

*CIRCULAR No. 349-C:

Hand and push cars and baggage and station trucks will be repaired by the Mechanical Division in the Empire shops until further orders.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.

President, Panama Railroad Company.

Inspector of Shops to Pass on Artisans.

CULEBRA, C. Z., May 13, 1913.

CIRCULAR No. 262-G:

Whenever a reduction in the force of artisans employed in any division or department can be made, a list of the employees whose services can be dispensed with will be forwarded to the inspector of shops, and the latter will indicate the place and position to which they can be transferred, or recommend any other action to be taken. No artisans will hereafter be given five days' notice or discharged on account of reduction of force, until after the recommendation of the inspector of shops has been obtained.

The above will supersede Circular No. 262-E.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.

President, Panama Railroad Company.

Jumping On or Off Trains.

CULEBRA, C. Z., May 13, 1913.

CIRCULAR No. 379-A:

Section 2 of an ordinance adopted by the Isthmian Canal Commission July 18, 1912, approved by the Secretary of War, August 6, 1912, and which became effective thirty days after its approval by the Secretary of War is, as follows:

It shall be unlawful for any persons except members of a train crew, and construction and transportation officials and employees engaged in the performance of their duties, to jump off or on a railroad locomotive, car, or train while same is in motion, or to ride on the roof or platform of a car of such train. Any person thus offending shall be fined not to exceed ten dollars for each offense.

The permission given to construction and transportation officials and employees engaged in the performance of their duties, to jump on or off locomotives, cars, or trains in motion shall be construed to apply only to

such officials and employees as have received this permission in writing from the head of their department or division.

GEO. W. GOETHALS, Chairman.

Celebration of Independence Day.

CULEBRA, C. Z., May 7, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

You are requested to appoint one or more officers of your department or division to attend a meeting to be held at the Administration Building, Ancon, on Saturday, May 17, at 2.30 p. m., to consider the question of a Fourth of July celebration by Americans on the Isthmus of Panama on July 4, 1913.

Among the questions to be decided are:

1. Shall such a celebration be held?
2. If so, where; and what shall be the general program of the celebration or celebrations?
3. Organization for making necessary arrangements, raising subscriptions, etc.

Such celebrations are intended to be arranged by and for the benefit of Americans on the Isthmus, and it is intended that any celebration held shall be carried out in accordance with the wishes of the majority of the American employees of the Isthmian Canal Commission and Panama Railroad Company. Please advise me as soon as practicable whom you designate to attend this meeting (who will be expected to act on this committee until further notice). Your representatives should be instructed to canvass the sentiment among the employees in their respective departments or divisions prior to the meeting on May 17, so that they may be able to act with as full knowledge of the views of those whom they represent at the meeting on May 17 as practicable. The Disbursing Officer of the Commission will be a member *ex officio*, and any head of department or division may likewise act on this committee *ex officio* and be present at the meeting. The committee is authorized to appoint any additional members to act with it.

Commissioner M. H. Thatcher is appointed general chairman of the Fourth of July celebration committee.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Committee on Maintenance of the Canal.

CULEBRA, C. Z., May 9, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The committee appointed to investigate and recommend plans for the maintenance of the Panama Canal is authorized to call upon heads of departments and divisions of the Isthmian Canal Commission and officials of the Panama Railroad Company for such data as may be required in connection with the preparation of such plans.

Lieut.-Col. William L. Sibert will act as chairman of this committee, during the absence on leave of Lieut.-Col. D. D. Gaillard.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission.

President, Panama Railroad Company.

Constructing Quartermaster.

CULEBRA, C. Z., May 7, 1913.

All Concerned—Effective at once, Mr. C. B. Cook will be in charge of the repair and construction of buildings of the Quartermaster's Department, and will in the future perform all the duties heretofore performed by the Constructing Quartermaster.

GEO. W. GOETHALS, Chairman.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture entertainments for the week May 19 to 24 is, as follows: Monday, Culebra; Tuesday, Empire; Wednesday, Corozal; Thursday, Cristobal; Friday, Gatun and Porto Bello; Saturday, Gorgona.

The standing of the teams in the Isthmian Duckpin Bowling League, at the end of the tournament was, as follows:

Teams.	Won.	Lost.	P. C.
Empire.....	21	9	.700
Gorgona.....	18	12	.600
Cristobal.....	17	13	.567
Culebra.....	16	14	.533
Gatun.....	14	16	.467
Corozal.....	4	26	.133

The standing of the Indoor Baseball League, as of May 10 is, as follows:

Teams.	Won.	Lost.	P. C.
Camp Elliott.....	3	0	1.000
Gatun.....	3	0	1.000
Cristobal.....	1	2	.333
Corozal.....	1	2	.333
Empire.....	1	2	.333
Gorgona.....	0	3	.000

The standing of the teams in the American Duckpin League, as of May 12 is, as follows:

Teams.	Won.	Lost.	P. C.
Empire.....	16	8	.636
Cristobal.....	15	9	.625
Corozal.....	8	13	.381
Gatun.....	6	15	.286

The return dates of the Apollo Concert Company are, as follows: May 13, Empire; May 14, Ancon; May 15, Corozal; May 16, Gatun; May 19, Gorgona; May 20, Cristobal; May 21, Culebra.

The Mary E. Lyon Concert Company will arrive on the Isthmus on May 16, and will give a series of entertainments at the clubhouses.

COROZAL.

Corozal lost three games of duckpins and one game of indoor baseball to Gatun teams on Saturday night.

CULEBRA.

Reserved seats for the entertainment to be given by the Apollo Concert Company on Wednesday night, May 21, will be on sale Monday morning, May 19. Doors will be open at 7.30 o'clock, and the program will begin at 8 sharp.

Permission has been granted by the Panama Railroad Company for the use of the special sightseeing train through the Cut and over the locks on May 30. The fare on this train from Gatun to Panama will be \$1.50 each to Y. M. C. A. members and their friends. A committee, consisting of Messrs. Fleischman, Leydecker, Cain, Chadbourn, and Hansli, has been appointed to take signatures and the money, which must be in hand on or before May 20. Further details will be made known later by bulletin.

High scores for the week in duckpins were, as follows: Case 100, 109, 104, 111, 110, 113; Bechlem 109; Ferguson 100; Koperski 102.

EMPIRE.

Mr. Samuel Verner of Bas Obispo gave an interesting talk on his travels in South Africa on Sunday evening, May 11. On a later date Mr. Verner will give another talk, when pictures illustrating his travels will be shown.

The indoor baseball game between Empire and Cristobal played on Saturday, May 10, was won by Empire, the score being 12 to 11.

A Spanish class for beginners will be started as soon as five members are procured. The class will meet Wednesday and Friday mornings from 9.30 to 10.30.

GORGONA.

The subject of the debate on Friday evening, May 9 was: "Resolved, That all American coastwise vessels

should pass through the Canal free of tolls." The question was affirmed by Messrs. Kramer and Col. Ewing; and denied by Messrs. Wright and Patterson. The negative side won. The next meeting will be on Thursday of next week.

Gymnasium classes will be started on Tuesday evening. All who are interested in exercises, and physical development of the body are urged to join.

Empire took three straight games from Gorgona on Saturday night. This closes the duckpin tournament, and gives Empire the team medals. Mr. King of Gorgona will get high average, and Mr. Sims second place for high average. Scores follow:

Gorgona.	Empire.
Sims.....	97 98 85
Dens.....	93 84 86
Dunlap.....	85 90 100
Lowe.....	82 86 90
Davis.....	101 89 74

Total..... 458 447 435 475 474 455
100-games: Dens 104, 100; Dunlap 108; King 101, 103.

GATUN.

Empire took two out of the three games from Cristobal on the Gatun alleys in the American duckpin league on Saturday, May 10. Scores:

Cristobal.....	434.....	436.....	412
Empire.....	434.....	482.....	463

In the first game the roll-off was won by Cristobal, 54 to 45.

Gatun has won every game in the indoor baseball league so far, having taken games from Empire, Gorgona, and Corozal. The Corozal game was won by a score of 22 to 16. The next game will be with the Marines at Camp Elliott, on Saturday, May 9.

The current topics club held its first meeting on Wednesday, May 14, when the Japanese land bill was discussed.

Tuesday, May 9, was ladies' night on the bowling alley. Prizes were won by Miss Schmidt and Mr. Hodges.

CRISTOBAL.

Tickets for the Apollo Concert Company's return engagement on May 20 will be on sale Friday of this week.

In the last series in the Isthmian Bowling League, the local team took two out of three games from Culebra. Scores follow:

Culebra.	Cristobal.
Case.....	100 82 88
Silvers.....	92 83 79
Durand.....	89 86 83
Palmer.....	98 94 77
Kiernan.....	102 84 102
Herrington.....	97 88 89
Weston.....	78 79 83
Collins.....	80 87 99
Smith.....	99 109 106
Bullard.....	79 96 92
481 429 429	442 459 469

Mr. Childers of Gatun gave a lecture here on Wednesday night, with about 60 present. His topic was "The natural law in the world of labor."

The Cristobal baseball team went to Empire last Saturday night and was defeated in a close game by a score of 12 to 11. The score was tied until the last inning.

The moving pictures will be held on Friday night this week.

The Corozal indoor baseball team will play here Saturday night. All the Cristobal "fans" are urged to come out.

The Young People's Society of the Cristobal Union Church gave a stereopticon lecture on "The Other Wise Man," on Tuesday, May 9.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending May 10:

Tivies, May 4, from New York, with 26 cases game moving machinery, First Division; 200 pieces car wheels, Mechanical Division; 51 pieces iron pipe, Atlantic Division; 10 cases sheet copper, fortifications;

200 bundles bar iron, 20 cases pipe magnesia, 16 bundles rakes, 10 cases fittings, for stock.

Trent, May 4, from New York, with 3 cases hardware, for stock.

Heredia, May 5, from New Orleans, with 861 pieces lumber, Mechanical Division; 335 bales hay, 150 acks dairy feed, 1,611 pieces cross-ties, 32 pieces piling, 9,915 pieces lumber, for stock.

Lyra, May 5, from San Francisco, with 39 cases babbitt metal, 20 cases bar solder, 13 cases sheet lead, 32 bales rubber hose, 1,222 pieces redwood, 2,256 cases Trojan powder, for stock.

Prinz August Wilhelm, May 5, from New York, with 205 kegs bolts and rivets, for stock.

Jamaican, May 6, from Liverpool, with 12 pieces bucket links, 8 packages dredge parts, for Sixth Division.

Cristobal, May 6, from New York with 141,320 bags cement, Atlantic and Fifth Divisions; 21 cases wedges, 195 cases incandescent lamps, 296 pieces car couplers, 10 cases hardware, for Mechanical Division; 41 reels cable, Panama Railroad Company; 34 cases machinery, Atlantic Division; 58 cases conduit material, 20 packages electrical material, First Division; 20 reels wire, Fifth Division; 10 cases castings, First Division; 100 pieces pipe, 32 crates sledge handles, 14 packages chains, 55 bundles steel bars, 13 cases forges, 10 kegs nuts, 10 cases drill parts, 50 cases alcohol, for stock; 10 cases machinery, for Sixth Division

Zacapa, May 7, from New York, with 250 pieces car wheels, Mechanical Division; 9 cases castings, First Division; 30 pieces iron pipe, 6 cases pipe-fittings, Fifth Division; 20 cases putty, 150 kegs boat spikes, 1,060 sacks oats, 126 coils wire, 6 cases sheet brass, for stock.

Allianca, May 7, from New York, with 111 cases sales books, 53 barrels whitening, 63 coils lead pipe, 40 cases Japan dryer, 30 crates galvanized buckets, 1,300 kegs wire nails, 100 cases soap, 18 barrels paint, 50 pieces channels, 45 kegs nuts, 21 cases files, 20 cases lamp chimneys, 17 reels wire rope, for stock; 64 barrels alcohol, 20 cases gauze, 67 cases drugs and sundries, for Sanitary Department; 20 reels electrical cable, First Division; 40 barrels batteries, 23 pieces steel rails, 17 bundles splice bars, Panama Railroad Company; 18 crates valves, Atlantic Division; 214 pieces car couplers, 145 barrels sand, Mechanical Division; and a miscellaneous cargo, the whole consisting of 3,080 packages, weighing 450 tons.

Glencoe, May 7, from Baltimore, with 103 cases blasting caps, 330 bundles brooms, 315 tons coke, for stock; 960 pieces bars and plates, 73 kegs rivets, Second Division; 37 pieces cast iron pipe, Atlantic Division; 36 pieces car wheels, 376 tons pig iron, Mechanical Division; 829 pieces structural steel, Panama Railroad Company; 900 tons structural steel, emergency dams; 540 tons structural steel, Balboa shop buildings.

Atenas, May 8, from New Orleans, with 802 pieces cross-ties, 119 pieces lumber, for stock; 1,792 pieces lumber, Mechanical Division.

Californian, May 8, from New York, with 178,602 bags cement, Fifth Division; 20 cases benzine, for stock.

The total value of material received during the month of April was \$1,324,607.32, which came forward in 38 steamers, total weight of cargo, exclusive of lumber, piling, and cross-ties being 40,000 tons. The value of material received for stock was \$427,807.15.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa at 9 o'clock Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

LOST—On March 5, 1913, between Cristobal police station and Mount Hope storehouse, a Howard watch, hunting case, 25-year. Liberal reward if returned to C. M. Shute, Quartermaster's Department, Mount Hope.

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to February 28, 1913, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering.	General Items.	Fortifications.	Total.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission to the Secretary of War for the month of April is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work on all departments and divisions.

Record 48-Hour Rainfall at Porto Bello.

Precipitation was general over the Isthmus during the week ending May 17, and was unusually heavy along the Atlantic coast.

At Porto Bello on May 14-15, 10.65 inches of rain fell during a period of 24 consecutive hours.

This 24-hour record has been exceeded on the Isthmus once only during the period covered by the Commission records. This was at Porto Bello also—on December 28-29, 1909—when 10.86 inches of rain fell in 24 hours.

The 48-hour rainfall at Porto Bello on May 15 and 16, amounted to 16.76 inches, which exceeded any previous record on the Isthmus for a period of 48 consecutive hours.

Isthmian rainfall records in excess of 10 inches in 24 hours are, as follows:

STATION.	Amount	Date.
Gatun	10.48 inches.	Dec. 2-3, 1906
Porto Bello	10.86 inches.	Dec. 28-29, 1909
Porto Bello	10.65 inches.	May 14-15, 1913

Auxiliary Crusher at Ancon Quarry Plant.

Output from the Ancon crusher has been principally 2 and 3-inch and larger rock for mass concrete and road work. In the course of crushing it, a proportion of smaller rock was produced and screened out which was sufficient for the reinforced concrete. The impending work on the terminals and permanent buildings, however, will require a greater supply of small rock, and a gyratory crusher which will reduce No. 1 rock to No. 2 and screenings is being installed in the south end

of the storage bin of the present plant. The belt conveyor which distributes the larger rock over the bin will feed the crusher direct through a chute.

The smaller crusher is the Gates "K" type of the Allis Chalmers Company, with a normal capacity of about two hundred cubic yards in eight hours. It was part of the abandoned crusher plant at Rio Grande. At the Ancon plant, it is mounted on the reinforced concrete floor of the bin, and will discharge direct into dump cars.

Material for Fills.

It has been estimated that about 1,900,000 cubic yards of material will be available for dumping, south of Culebra Cut, from now until October 1, or a little over one-third the amount necessary to complete the dumps that are being filled at the present time, namely, 5,445,000 cubic yards. In view of this fact, the Chief Engineer has established the following order of preference in continuing these fills:

	Est. Quantity. Cubic yards.
1. Pedro Miguel townsite.....	460,000
2. Naos Island breakwater.....	1,050,000
3. Balboa wye.....	150,000
4. Ancon-Sosa fill.....	50,000
5. Fill south of Miraflores power house.....	600,000
Total.....	2,310,000

This will leave the following dumps to be filled with the remainder of the material available before October 1, and any material available from the Culebra Cut section after that date:

	Est. Quantity. Cubic yards.
1. Two dumps, north of Miraflores tunnel.....	625,000
2. Balboa dump.....	2,450,000
3. Curundú River dump.....	60,000
Total.....	3,135,000

The Curundú River dump will not be required for about a year, and work on this fill will probably be postponed until some time after October 1, and then only if material is available, for, if necessary, this fill can be made with material obtained from other than Canal excavation.

Movement of Squatters in Canal Zone.

In order to prevent further immigration of squatters into the Canal Zone, the movement of squatters from one part of the Zone to another, and the emigration of residents of the Canal Zone settlements to the jungle within Zone boundaries, the chief of police has been charged with the duty of maintaining a patrol, both by land and water, so far as the use of the force under him for this purpose will permit. It is proposed to establish regular patrols at suitable intervals on all trails, as well as on Gatun Lake, the streams tributary thereto, and other navigable waters. The work will probably be simplified by dividing the territory into districts, with one patrol to each district. This

patrol will prepare a list of the residents in his district, which will enable him to keep informed of the changes of residence of any of them. Notices will be printed and distributed, and posters will be placed along the public highways advising all concerned.

The Panama Government has provided a new townsite at Yegualita, a point on the coast about 22 miles west from Panama city, for the native people leaving the Zone, and has requested the use of a Commission tug to transport the people and their effects to the new location. The request will probably be granted, the tug landing its passengers at Punta Chamé village, which is only a short distance from the new town.

New General Superintendent, Panama Railroad.

Capt. John D. Patterson of Atlanta, Ga., assumed the duties of General Superintendent of the Panama railroad on May 19, vice Mr. J. A. Smith, resigned. Capt. Patterson was lately superintendent of joint terminals in Atlanta and in his career has had experience in practically every operating department of a railroad.

Fill for New Pedro Miguel Townsite.

The fill for the new Pedro Miguel townsite will be begun as soon as the dump track, which branches off from the Panama railroad relocation just south of the station, is laid. The dumping operations are to cover eventually three separate areas, one of which is east and two are west of the relocated line. The largest area lies east of the track, and will extend from the railroad as far east as the rising ground back of the last row of American quarters; north to nearly on the line with the police station, involving the removal of nine native houses, and a store; and south as far as the Pedro Miguel River. The dirt trains will probably come in on the main line at Paraiso Junction, and then follow it south to the dump track switch.

It is planned to make the fill east of the track, to the height of about 67 or 70 feet above sealevel at the north edge, giving it a gradual slope to about 63 or 65 feet at the south and east edges. As the fill is completed along the west side of the first row of American quarters, the houses will be raised and moved by the Quartermaster's Department to the newly made ground directly west. As soon as this part of the area has been completed, the location of the dump track will be changed, and operations extended to the easterly limit, the houses in the second row of quarters to be raised and moved west, occupying on the new fill the present sites of the houses in the first row. The hotel, and house No. 106, both two-story buildings, will probably be raised, and the fill under them made by hand, rather than to attempt to move them.

The two fills to be made on the west side of the main line track, one between the railroad and the Central Division tracks, north to the

old Panama railroad station, and south to the Pedro Miguel River; and the other, west of the Central Division tracks, extending north to, but not including the present American quarters, and south to and including the site of the engine shed, will close the gap between the relocated line and the lock backfill. These fills will not be made, however, until later, probably not until the Central Division tracks are abandoned, and it is possible that instead of making these fills in the dry, they will be made with suction dredge pumping from the Canal prism between Pedro Miguel and Miraflores Locks, where it is proposed to leave the excavation to the depth of five feet for the dredges to remove.

It is estimated that the fill east of the railroad will require about 300,000 cubic yards of material, and those west, about 160,000 cubic yards. All changes in sewer and water pipe lines and roads, as well as new installations, will be made by the forces of the Fifth Division.

Footwalk on Gamboa Bridge

Plans are in preparation for building a footwalk the length of Gamboa bridge over the Chagres River, for use after Gatun Lake has risen. The walk will be outside the trusses and girders, and will be of sufficient width and strength to accommodate the passage of native horses.

Concrete Work in Locks and Spillways.

Over 99 per cent of the entire quantity of concrete to be placed in the locks had been laid at the close of work on May 17, the amount in place being 4,454,199 cubic yards.

A statement of the concrete laid in the six locks of the Canal, and in Gatun and Miraflores spillways, as of May 17, follows.

Dynamiting of Dike.

The east end of the dike separating the ocean channel from the only section at the Pacific end of the Canal remaining to be dredged was destroyed by dynamite at 10.35 a. m., Sunday, May 18. At this time the water in the pit, north of the dike was a little lower than the tide level in the open water channel. The blast, which was one of the largest ever shot off in connection with the Canal work, consisted of 32,750 pounds of 60 per cent dynamite, planted in 120 holes, some of them drilled to a depth of 70 feet. The explosion caused the ground to vibrate for several miles around, but on account of the depth at which the holes were loaded, the noise was muffled. The blast leveled the end of the dike, and loosened the piles in the trestle foundation, but did not establish an opening between the channel and pit. The dredge *Corozal* was set at work on Monday morning, May 19, removing the remainder of the dike.

Ancon Crusher.

Work Resumed on Masonic Temple at Colon.

Work on the new Masonic Temple in Colon which was suspended last July owing to lack of funds, will be resumed at once, a loan, payable in five years, having been negotiated with the Panama Railroad Company. The new building, which is situated on the corner of Bolivar and Eleventh Streets, directly behind the commissary, is a two-story, fireproof concrete structure. Special features will be a modern café, equipped with electric cooking apparatus, and a roof garden. Electric lights and telephone service will be installed throughout the building.

Capacity of Flatboats Carrying Employees.

Following the drowning of four West Indian employes by the swamping of a flatboat which was being towed along the French canal, near the dry dock at Mount Hope, on April 23, the Board of Local Inspectors considered, at the instance of the Sanitary Department, rating the maximum capacity of all flats and skiffs in use by the Commission. The Board reported adversely upon the idea, stating that, "as a rule such plant is operated under the observation of intelligent employes, accustomed to water work, and its capacity varies with the conditions varying at any given time, and is hardly a fixed quantity.

No effort has ever been made in the United States, as far as known, to fix the capacity of such craft not used for hire."

Missing Men.

Any one having information regarding the whereabouts of James Guillian, or Quilliam, who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding the whereabouts of Richard Renton Perot, who left the service of the Commission in March, 1907, or of William Lange, who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD, Ancon.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter, American National Red Cross, for the month of March, follows:

RECEIPTS.		
March 1, On hand.....	\$2,633.93	
5, Misc. receipts account		
Jamaican relief fund.....	12.50

NONREVENUES.	
Cash received from estates.....	\$2,725.87
Value of estates closed.....	3,563.72

Mr. J. J. Henriquez has been appointed vice-consul of Belgium in the Republic of Panama, with residence at Colon.

Because of increased railway building, the Quartermaster's Department's recent requisition for 22,000 cross-ties, No. 1 grade, has been increased by cable order to 40,000.

SOCIAL LIFE OF THE ZONE.

Women's Clubs.

The Empire Woman's Club has taken a recess until October 9, when it will reconvene. There was no election of officers at the meeting on Tuesday, May 6, the present administration remaining over until the beginning of the club year in October.

To close the year 1912-1913, the Gatun Woman's Club held an open meeting at the Commission clubhouse on Thursday, May 8, which was attended by the members of the club and many invited guests. The meeting was held in the entertainment hall of the clubhouse which was decorated with red hibiscus, and a variety of cut flowers. From 3 to 4 o'clock there was a program during which the following numbers were given: Address of welcome by Mrs. J. H. Stevenson, chairman of the committee on arrangements for the meeting; piano solo, Mrs. Dennis; address, Miss J. Macklin Beattie; vocal solo, Mrs. Charles Purdy; and a piano solo by Miss Florence Neville. Following the program, an informal reception was held, refreshments being served by the officers of the club. The president has called a business meeting of the club for Friday, May 23, at which time it will be decided whether to disband or to hold over, reopening after a short recess. In accordance with the request of the club, a brief review of the organization follows:

The Gatun Woman's Club was organized on October 17, 1907, with 17 members. Mrs. Chester Harding was the president. The first work of the club was to procure quarters for the unmarried school teacher who was assigned to the school before quarters were constructed for the bachelor women. During the year 1907-1908 the club passed through several trying stages. It emerged, however, with a good record, and though the average membership has never been more than the original 17, the organization won for itself a prominent place in the social life of the village. In 1909, the club opened a kindergarten, providing the equipment and maintaining a teacher through one year. The following year, aided by the community, the club opened the first public playground for the American children. Although, eventually, the playground movement became a community affair, the money for its establishment—\$400—being raised by a two-days' carnival, in which the residents of the village participated, the idea was popularized through the woman's club, and the credit of the initiatory steps toward the establishment of this civic improvement properly belongs to these women. Other efforts of the club have been along philanthropic lines, such as Christmas celebrations and gifts for the children in New Gatun and the Spanish quarters, visiting the sick and sewing for children whose mothers were unable to work for them, home economics, exchanges of recipes and useful household suggestions, demonstration in cooking and instruction in needlework, literature, programs on current topics and papers of interest from readers invited to entertain, exhibits of pictures, and of needlework and pottery. Music has always formed an attractive feature of the home programs, and on one occasion, when the club was hostess to the State Federation, the program was given entirely by members of the club or residents of the village. Throughout the six years of

the existence of the club, it has been one of the foremost of the organizations to support the efforts of the State Federation, in many cases paying double its apportionment toward philanthropic movements begun by the State Federation. "Club teas" have been interesting features of club life. The presidents during the six years have been: Mrs. Chester Harding, 1907-1908; Mrs. C. D. Corp, 1908-1909; Mrs. Charles Stoddard, 1909-1911; Mrs. J. H. Stevenson, 1911-1912; Mrs. Edward Neville, 1912-1913.

Church Notes.

The Fidelity Bible Class of Empire celebrated Mother's Day with a social meeting on Tuesday, May 13, when the following program was given: Devotional exercise, led by members of the class; reading, "A day in the life of a Japanese mother," Mrs. Edward Stanton; recitation by Sarah Smith; violin solo, Miss Juanita Pierson, accompanied by Mrs. M. E. Smith; reading from Panama Patchwork, Miss Phyllis Kelly; piano solo, Miss Lucille Butler; vocal solo, Miss Myrtle Byram, accompanied by her sister, Miss May Byram; reading, "Mary of Bethany," by Mrs. H. A. A. Smith. The program was arranged by Mrs. Frank Peak. Refreshments were served.

At the meeting of the Woman's Altar Guild of St. Luke's Hospital chapel, Ancon, held at the home of Mrs. Charles F. Mason on Tuesday morning, May 20, it was decided to omit the meeting on the first Tuesday in June and to convene in a social session at the residence of Mrs. Frank Feuille on Tuesday, June 24, at 3.30 o'clock.

High School Commencement.

The commencement exercises of the class of 1913, at the Canal Zone High School will be held in the Commission clubhouse at Gatun on Friday evening, June 27. There are seven graduates, three boys, and four girls. Following the exercises, the underclass students will hold an informal reception for the seniors. The junior class will act as ushers for the graduates. The commencement will resemble class day exercises, each graduate taking part in the program, which will be, as follows:

Overture.....	Orchestra
Song, "Greetings," by Franz Abt.....	High School Chorus
Salutatory.....	Corrine Browning
Piano solo.....	Arthur Howard
Class poem.....	Helen Calkins
Song, "Ship of State," words by Longfellow.....	High School Chorus
Debate.....	Frederick Barber and Emmanuel Perry
Selection.....	Orchestra
Contralto solo.....	Adeline Babbitt
Valedictory.....	Emma Stubner
Selection from "Il Trovatore" by Verdi.....	High School Chorus
Presentation of diplomas.....	Frank A. Gause
Selection.....	Orchestra

The high school is preparing for its annual entertainment to be given in June. Goldsmith's comedy, "She stoops to conquer" will be played. The first performance will be given at the National Theatre in Panama, on Saturday, June 7, and the play will be repeated at several of the Commission clubhouses. The proceeds from these entertainments will be used to pay the deficit on the midyear issue of *The Zonian*, the high school magazine, and for general expenses incidental to the entertainment. Entertainments given by the high school in former years were, as follows: "Pauline," an

operetta, in 1910; "Mr. Bob," a comedy, in 1911; "The Merry Milkmaids," an operetta, in 1912.

Receipts from Charity Ball.

One thousand and fifty-three dollars are the total receipts of the ball held at the Hotel Washington, Colon, in April, for the benefit of the new St. Vincent's orphanage, recently opened by the Sisters of Charity in that city. The Sisters have taken up residence in the new building and the school has been removed from its former site on Bottle Alley to the rooms on the ground floor of the orphanage.

Memorial Day Observance.

On Sunday, May 25, there will be a special service at St. Luke's Hospital chapel, Ancon, to be followed by decoration of the graves at Ancon cemetery, where a memorial service will be read, three volleys fired, and taps blown.

Services will be held at Mount Hope cemetery on Decoration Day, May 30. As soon as possible after the arrival of the morning train from Panama, the organizations will form a parade on Roosevelt avenue, Cristobal, and proceed to the cemetery. The bands of the Tenth Infantry and United States Marine Corps will lead; the veteran service organizations will come next, followed by the various societies.

The committee on arrangements extends an invitation to all fraternal societies to participate. Mr. C. L. Bleakley, Cristobal, is secretary of the committee, and may be communicated with in connection with arrangements concerning the parade.

PERSONAL.

A farewell banquet was given to Mr. J. A. Smith, the retiring general superintendent of the Panama railroad, by the steamship agents in Colon, at the Hotel Washington, on Saturday evening, May 17. Mr. John D. Patterson, the new general superintendent of the railroad, was among the guests.

Dr. Matthew J. Hoey has been appointed quarantine officer at Panama, effective May 19.

Obituary.

The death of Robert Forest Craig, a time inspector in the Department of Examination of Accounts, residing at Empire, occurred at the nursing hostel at Kingston, Jamaica, on Sunday, May 4. He had arrived in that city only two days previously with the intention of spending his leave of absence on the island. He was born in Crockett County, Tenn., about 47 years ago, was unmarried, and first entered the service of the Canal Commission on August 13, 1904. He is survived by his brother, John L. Craig, living at Friendship, Tenn. The burial took place at Kingston on Monday, May 5.

The petition of 17 of the 35 holders of saloon licenses in the Canal Zone for an extension of their licenses for a period of two months after July 1, has been denied.

James Gordon, Jamaican, check No. 3185, a laborer in the employ of the McClintic-Marshall Construction Company, fell from the wall of the east chamber at Gatun Locks on Tuesday, May 13, and was killed.

CANAL WORK IN APRIL.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., May 17, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of April, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of construction work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d. Div.	5th Div.	6th Div.	Total.
Work excavation, dry	Cubic yards	29,649	1,178,000	6,125	3,225	356,942	1,674,900
Work excavation, wet	Cubic yards	440,028		182,125			979,053
Total work excavation	Cubic yards..	469,677	1,178,000	250,421	3,225	356,942	2,653,995
Plant excavation, dry	Cubic yards		1,100				1,100
Plant excavation, wet	Cubic yards						
Total plant excavation	Cubic yards..		1,100				1,100
Total Canal excavation	Cubic yards..	469,677	1,179,100	250,421	3,225	356,942	2,655,095
Material placed in dams	Cubic yards..	106,862			16,250		123,072
Concrete placed, locks, dams and spillways	Cubic yards..	24,000			2,625		45,850
Explosives used	Tons (Gross)	42.55	113.39	10.03	74.57	23.60	269.14
Rock drilled	Feet	15,262	317,681	15,440	107,555	18,109	474,047
Tracks removed	Miles		8.99	1.23	1.51		11.73
New tracks laid	Miles	2.03	21.52	3.38	1.51		28.44
Rock crushed	Cubic yards				50,092		50,092
Cement used	Barrels	28,102	232	4,487	20,604	12	53,471
New roads built	Miles				0.71		.71
Water mains laid	Feet	3,000			6,050		9,050
Sewers laid	Feet	48			1,306		1,354
Open drains and ditches dug	Feet	18,700		8,012	1,787		28,499
Average daily force		4,855	6,876	1,569	6,143	1,238	20,482
Average rainfall	Inches	4.03	1.62	0.06	1.04	0.06	1.83

*Accomplished by 6th division for the 2nd division.

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the division engineer of the Atlantic Division, the resident engineer of the Fifth Division, and the erection subdivision of this office. The inspection of this work is being cared for by the masonry and lock structures subdivision. This subdivision is also charged with general inspection of masonry work of all the locks.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY GATES AND CAISSONS, AND ASSEMBLY OF HYDRO-ELECTRIC DRAFT TUBES AT GATUN.

Inspection of the erection work on the eight spillway gates at Miraflores was continued and this work was completed during the month.

Work was commenced on the spillway caisson for Miraflores, about 80 per cent of which was accomplished during the month.

Work on the preparation of rising stem gate valve machinery chambers was continued; at the close of the month this work was about 98 per cent completed at Gatun, 92 per cent completed at Pedro Miguel, and 60 per cent completed at Miraflores.

Inspection of the assembly and riveting of draft tubes for the Gatun hydroelectric station was continued.

LOCK GATES AND PROTECTIVE DEVICES.

All the material for the 92 leaves has been completed and shipped, except the nickel steel bearing plates for four leaves. Shipments

of spare parts during the month totaled 211 tons. The progress in erection, reaming, and riveting was greater than in any preceding month. The status of the work in the several locks may be summarized, as follows:

Gatun—Work in progress on all the leaves, 40 in number; erection 95 per cent completed; reaming 96 per cent completed; riveting 90 per cent completed; finishing 25 per cent completed.

Pedro Miguel—Work was in progress on the entire 24 leaves: erection 95 per cent completed; reaming 96.5 per cent completed; riveting 88.5 per cent completed; finishing 10 per cent completed.

Miraflores—Work was in progress on all of the 28 leaves: erection 78.5 per cent completed; reaming 70.5 per cent completed; riveting 49 per cent completed.

LOCK GATE RECESS COVERS.

All recess covers are now erected and riveted, except the movable parts at the ends of some of the recesses.

CHAIN FENDERS.

Tests on the first chain fender, No. 812-813, were continued and consisted in exerting a heavy pull on the end of the chain in pit No. 813 by means of a Lidgetwood unloader and a double set of triple blocks and falls. These tests were made especially to ascertain whether the resistance valves will function properly in service and, so far as they went, the tests indicate that this result will be accomplished. The tests will be continued.

ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Installation of the machines keeps pace with the receipt of the various parts, but delay in the receipt of certain parts results in a great many machines being only partially completed. The following tabulations summarize this work:

HYDROELECTRIC PLANT.

The erection of the penstocks is about 95 per cent completed; all turbines have been set and the erection of the turbogenerators is approximately 45 per cent completed.

ELECTRICAL WORK—ATLANTIC LOCKS.

During the month, 2,719 feet of cable were pulled into the conduit system, the total amount pulled to May 1, being 303,860 feet.

ELECTRICAL WORK—PACIFIC LOCKS.

During the month 45,300 feet of cable were pulled into the conduit system, the total amount pulled to May 1, being 94,287 feet.

TESTS.

Tests in connection with the first towing locomotive were continued at Gatun. Tests were also continued at this point in connection with the raising and lowering of a spillway gate. At Pedro Miguel, tests were conducted in connection with the rising stem gate valve machines.

EMERGENCY DAMS.

Inspection was in progress in four localities in the United States, and 571 tons of material were accepted. At the end of the month, 14,143 tons had been fabricated and accepted. There were approximately 198 tons of material delivered on the Isthmus during the month: 1,180 tons were erected. On April 30, a total of 8,840 tons had been delivered and 6,382 tons erected. Work was in progress on the east and west dams at Gatun and the east and west dams at Pedro Miguel.

AIDS TO NAVIGATION.

There was one tower of the Atlantic and Pacific type completed, except that stair railing must be erected and permanent lights installed. Three concrete steel reference targets twenty feet high were completely erected. Work was in progress finishing range tower No. 12, Pacific side, erecting four range targets, setting fourth order range lens in tower No. 6, Atlantic Division, placing four gas buoys at the Pacific entrance to the Canal, and making necessary surveys and reconnaissances in Gatun Lake in connection with the construction of range towers, reference targets, and beacons.

Second Division—Office of the Chief Engineer. BALBOA TERMINALS.

The following work was accomplished during the month:

EXCAVATION.	Cu. Yds.
Preparing site.....	17,614
Drydock No. 1.....	30,783
Shop foundations.....	6,087
Shop tunnel.....	9,487
Quay wall.....	3,057
Pier No. 1.....	1,268

Total..... 68,296

FILLING AND EMBANKMENT.

	Cu. Yds.
Preparing site.....	37,263
Backfill—shop foundations.....	2,960
Dikes.....	5,160
P. R. R. coal pockets.....	280

Caissons.....	1,577.8
Drainage ditch.....	159.5
Caissons.....	1,011.5
Shop tunnel.....	185.0
Shop foundations.....	1,894.9

Total..... 4,828.7

There were 455,696 pounds of steel reinforcing placed, 15,440 linear feet of rock drilled, 22,475 pounds of dynamite used, and 23,450 linear feet of piling driven.

METEOROLOGY AND HYDROGRAPHY.

The usual observations and measurements were made and taken.

Fifth Division—Office of the Chief Engineer

DISTRICT NO. 1, LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation amounted to 398,955 cubic yards, of which 250,068 cubic yards were classified as rock and 148,887 cubic yards as earth.

Filling and embankment—The backfill at Pedro Miguel was increased by 57,165 cubic yards, the total quantity in place at the close of the month being 962,801 cubic yards. At Miraflores, the dry filling in the toes of the west dam was increased by 16,215 cubic yards, making the total quantities of dry and hydraulic filling in place at the close of the month 1,635,629 cubic yards, and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 116,654 cubic yards, the total quantity in place on April 30 being 1,472,201 cubic yards.

Pedro Miguel Lock—Concrete work consisted of the construction of the south guide wall extension and concrete base for guide wall buffer, lamp post bases, and miscellaneous finishing work. Installation of buffer springs and castings in the guide walls was continued during the month. The total amount of concrete laid was 1,645 cubic yards, placed, as follows: One thousand five hundred and ninety cubic yards in the walls, 30 cubic yards around ducts in area A, three cubic yards around ducts in area B, and 22 cubic yards around ducts in area C.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8 00
Average number of hours per day worked laying concrete, actual working time.....	6 49
Average number of mixers per day.....	.96
Average hourly output per mixer, actual working time (cubic yards).....	9 63
Concrete laid (cubic yards).....	1,561.00

Eighty-four cubic yards of concrete were mixed and placed by hand. Plant consisted of one 1-yard concrete mixer, output being placed by Decauville equipment, or mixer, discharged directly into forms.

Miraflores Locks—Concrete work for the locks was confined to the southeast and southwest wing walls and to miscellaneous finishing and operating tunnel work. Fixed irons,

aggregating 550,175 pounds, were placed in the lock masonry. The total amount of concrete laid was 12,149 cubic yards, placed, as follows: Eleven thousand, one hundred and six cubic yards in the walls, 838 cubic yards placed for the First Division, 120 cubic yards around ducts in area A, 20 cubic yards around ducts in area B, and 65 cubic yards around ducts in area C.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant	Auxiliary Plant
Length of working day (hours).....	8 00	8 00
Average number of hours per day worked laying concrete, actual working time.....	2 39	6 05
Average number of mixers per day.....	8 00	2 23
Average hourly output per mixer, actual working time (cubic yards).....	39 37	13 18
Average amount of concrete laid per hour per berm or chamber crane, actual working time (cubic yards).....	62 54	
Total concrete laid (cubic yards).....	10,007.00	8,548.00

The above totals include 105 cubic yards in connection with drainage plant, and 17 cubic yards for the United States Steel Products Company. Four berm cranes were operated. Chamber cranes on placing averaged 1.23 units per day. Locomotive cranes and derricks, placing, averaged 1.46 units daily.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers and oil pipe lines were maintained and extended as required to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER.

Length of working day (hours).....	8 00
Average number of hours per day, actual working time.....	6 39
Average number of cubic yards crushed per hour per working day.....	236 10
Average number of cubic yards crushed per working hour.....	332 60
Total output for the month (cubic yards).....	50,100.00

Sixth Division—Office of the Chief Engineer.

The following is a statement of the output of the seven dredges which were in operation during the month:

DREDGE.	Type.	WORK.			PLANT.		Total.	Remarks.
		Earth. Cu. Yds.	Clay. Cu. Yds.	Rock. Cu. Yds.	Earth. Cu. Yds.	Rock. Cu. Yds.		
Badger.....	Ladder.....	31,676	8,909	8,909			49,91	Place measurement
Cardenas.....	Dipper.....		328	10,222			10,550	Place measurement
Corozal.....	Ladder.....	15,719	48,022	44,662			108,403	Place measurement
Culebra.....	Suction.....	160,352					160,352	Scow measurement
Marmot.....	Ladder.....		11,545	4,626			16,174	Place measurement
Mole.....	Ladder.....	2,169	5,600	4,200			11,999	Scow measurement
No. 85.....	Suction.....				182,125		182,125	Place measurement
Total.....		209,916	74,477	72,619	182,125		539,067	

CHAMÉ SAND EXCAVATION.

Approximately 28,000 cubic yards of sand were excavated at Punta Chamé and delivered to the Balboa sand bins.

BALBOA SHOPS.

The manufacturing and repair work in the shops and shipways was satisfactorily performed during the month.

Atlantic Division.

The timekeeping for the Atlantic Division was transferred to the Examiner of Accounts on April 1.

GATUN LOCKS.

Excavation—Out of a total of 29,282 cubic yards of rock and earth excavated during the month, 2,333 cubic yards of earth were dug from the lock site in preparation of foundations of the north approach walls, and the remainder was taken from the Canal prism.

Backfill—There were 33,168 cubic yards of backfilling placed during the month. Due to

slides which were not anticipated, it has been necessary to increase the original estimate for backfill to 2,244,813 cubic yards, on which basis the locks' backfill at the close of the month was 92.84 per cent completed.

Receiving and issuing material—The issues of rock for the month amounted to 20,548 cubic yards. There were 7,640 cubic yards of sand issued. Cement receipts totaled 30,926½ barrels, and the issues amounted to 24,934½ barrels.

Concrete work—A total of 21,358 cubic yards of concrete was laid, distributed, as follows

Upper lock, 574 cubic yards; middle lock, 12 cubic yards; lower lock, 20,772 cubic yards, making a total of 21,358 cubic yards.

On April 30, the locks concrete work was 99 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	9.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	3.29
Average number of mixers per day.....	2.52
Average hourly output per mixer, actual working time (cubic yards).....	60.6
Average amount of concrete laid per hour, per strand of cableway, actual working time (cubic yards).....	30.05
Concrete laid, (cu. yds.) cableways.....	20,952
Concrete laid (cu. yds.) portable mixers.....	330
Concrete laid (cu. yds.) hand mixers.....	465

Total amount of concrete laid (cu. yds.)..... 21,747.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement, 129,323 cubic yards, making the total amount in place 21,568,077 cubic yards. On May 1, the dam was 98 per cent completed.

Hydraulic fill—There was nothing added to the hydraulic fill, the total in place remaining at 10,124,082 cubic yards.

Dry fill—There were added to the dry fill 106,862 cubic yards of material removed by steamshovels; this was placed on the north and south toes of the dam, east and west of

the spillway, making the total dry fill in place 11,385,362 cubic yards.

GATUN SPILLWAY.

Concrete—A total of 1,358 cubic yards of concrete was laid, making the total in place at the close of the month 222,852 cubic yards. Concrete work for the spillway is 97.3 per cent completed.

HYDROELECTRIC PLANT.

There were 10 cubic yards of rock removed by hand in the preparation of foundations, making a total excavation of 98,090 cubic yards. There were 941 cubic yards of concrete placed, making a total of 2,730 cubic yards.

HARBOR AND CHANNEL SECTION.

Dredging from the Ocean to Gatun Locks—Seven dredges removed 377,739 cubic yards of earth and 58,866 cubic yards of rock from the Canal prism. In addition, dredge No. 86 removed 52,190 cubic yards of coral sand

at Margarita Bay. On April 30, forty feet of water could be carried from zero to zero plus 2,100 feet; 35 feet to mile post 4 plus 2,600 feet; 30 feet to mile post 4 plus 3,600 feet; 20 feet to mile post 6 plus 2,350 feet, and 10 feet to mile post 6 plus 2,800 feet. Exclusive of the barrier at the north end of the locks and the silt in the channel, there remained to be excavated on May 1st, 852,979 cubic yards of material. The Terrier drilled 3,522 feet, used 22,250 pounds of powder, and shot 3,719 cubic yards of earth and 20,898 cubic yards of rock to minus 45 feet mean sealevel.

WEST BREAKWATER—COLON.

There were 19,515 cubic yards of Porto Bello rock placed upon the breakwater, of which 12,247 cubic yards were handled by cranes and 6,268 cubic yards by the derrick barges, making the total amount placed upon the breakwater to May 1st, 209,442 cubic yards.

MUNICIPAL ENGINEERING.

The work of constructing a tunnel between Brazos Brook reservoir and Gatun Lake was practically completed.

New Colon waterworks—Construction work was continued, although there was considerable delay due to the nonreceipt of pipe on order in the United States.

Central Division.

The total amount of material excavated during the month was 1,179,100 cubic yards, of which 353,646 cubic yards were classified as earth and 825,454 cubic yards as rock. The entire amount was removed by steam-shovels, 1,178,000 cubic yards being classified as primary excavation, and 1,100 cubic yards was from ditch for draining Old Culebra dumps. Of the total primary excavation, 517,300 cubic yards were taken from within the lines of the Canal prism, and 660,700 cubic yards from without the Canal prism, the latter amount being excavated from slides and from the high levels as a preventive against slides.

The daily average number of steamshovels at work was 40.90, and the number of shovel days was 1,063½, as compared with 38.52 shovels at work and 963 shovel days in March. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels	Classification of material		Av. No. of shovels at work	W. kg. days	Av. yards per shovel day.
		Rock	Earth.			
1912	Cu. Yds.	Cu. Yds.	Cu. Yds.			C. Y.
April 1912	1,622,947	1,087,364	535,583	45.78	25	1,414.30
April 1913	1,790,000	1,174	37,648	40.90	76	1,108.00

Rainfall at Empire 1912, 2.64 ins.; 1913, .90 ins.

The above table shows the average output per shovel to be 21.66 per cent less in April, 1913, than in the corresponding month of 1912.

The estimated amount of dry material removed and to be removed, according to the revision of February 1, 1913, is 111,751,472 cubic yards. Up to May 1st, 105,410,172 cubic yards had been removed, leaving 6,341,300 cubic yards to be removed in order to complete all dry excavation in this division. At the close of the month 94.33 per cent of all dry excavation was completed. On April 30, the status of the work in the two sections

which compose this division was, as follows:

CULEBRA CUT.	
Dry excavation accomplished	Cu. Yds. 93,025,517
Dry excavation to be accomplished	6,341,300
CHAGRES SECTION.	
Dry excavation completed	12,384,655
Wet excavation still to be accomplished	300,000

There were furnished during the month to the Panama Railroad Company, for the Cristobal mole, 1,605 cubic yards of stone, the total amount furnished to April 30 for this purpose being 227,270 cubic yards.

There were 78,677 cubic yards of material dumped from the Naos Island trestle, making a total of 1,362,212 cubic yards.

The daily average number of laborers employed was 6,264, while the average number of gold men working was 612.

Quartermaster's Department.

Labor—The force report for April 23 showed 39,554 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 5,107 men. There was no shortage of unskilled labor.

Buildings—The recreation at Corozal of eight buildings moved from Gorgona was completed, and eight others are in process of recreation. Work on the Gamboa engine shed at its new site near Gold Hill was completed. One Type 5 bachelor quarters and one standard laborers' barrack were moved from Gatun to Ancon. One laborers' barrack was also moved from Gorgona to Balboa, where it will be used as an addition to the European laborers' mess. An office and storehouse were moved from Bas Obispo to Corozal.

Quarters—Bachelor quarters at Culebra and Empire are very much congested as a result of moving the car repair work from Gorgona to Empire. Considerable difficulty is being experienced in vacating quarters at Gorgona fast enough to keep ahead of the gangs engaged in moving the buildings.

Material and supplies—The value of the material received was \$1,324,607.32. This material came forward in 38 steamers, the total weight of cargo, exclusive of lumber, piling and cross-ties, being 40,000 tons.

Subsistence Department.

The Hotel Tivoli showed a net profit of \$5,346.04. The operation of the line hotels, European laborers' messes, colored laborers' kitchens, restaurants, tugs, and dredges returned a net profit of \$206.21. The total profit on subsistence operations during the month was \$5,552.25.

Department of Civil Administration.

COURTS.

During the month eight civil and 47 criminal cases were disposed of in the Circuit Courts, and 64 civil and 463 criminal cases in the District Courts.

FIRE PROTECTION.

There were 58 fires reported in the Canal Zone. The total damage occasioned by these fires was \$58.40.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$424,108.82, and the fees to \$2,012.54. Receipts from stamp and card sales and newspaper postage aggregated \$9,257.40. The total collection of revenues was \$17,053.25, and the collections on account of court fines, costs, and fees \$2,109.70. A total of \$170,828 was deposited in postal savings accounts, and a

total of \$152,301 was withdrawn. At the port of Ancon, 24 vessels entered and 22 cleared; at the port of Cristobal, 27 entered, and 28 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 483, of whom 426 were men, and 57, women. Twenty-one nations, or 43 separate states and dependencies, were represented. There were 11 convicts committed to the penitentiary and eight were discharged, leaving 120 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,125.68 and the value of the work performed by them on the roads of the Canal Zone was \$2,147.70.

PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 1,866,033 gallons, and in Colon 1,157,912 gallons. The usual inspection and maintenance work was performed.

SCHOOLS.

The net enrollment in the white schools was 1,350; the average number of pupils belonging was 1,070.4, and the average daily attendance 1,009.6. In the colored schools the net enrollment was 1,523; the average number belonging was 959.2, and the average daily attendance 797.6. At the close of the month there were employed in the white schools 46 teachers, and in the colored schools 32 teachers, the total being one greater than at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 51, divided, as follows: From disease 24, and from violence 27, giving an annual average per thousand of 4.84 and 5.45, respectively. The annual death rate per thousand among employes for the month of April, 1912, was 11.38.

The annual average death rate per thousand in the Canal Zone, and in the cities of Colon and Panama, including both employes and nonemployes, was 21.18. This rate is based upon a population in the Canal Zone of 62,810 according to the census of February, 1912, and populations in Panama and Colon, respectively, of 47,172 and 20,232, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of April, 1912, was 17.21.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites 2.82; blacks 5.39, giving a general average for disease of 4.84. For the same month during 1911 the annual average death rate per thousand from disease among whites was 2.85; blacks 7.67, giving a general average of 6.42; and for the same month during 1912, whites 3.74; blacks 10.48, giving a general average of 8.77.

Among employes, deaths from the principal diseases were, as follows: Löbar pneumonia, five; organic disease of the heart, three; tuberculosis, seven, leaving nine deaths from all other diseases, and 27 deaths from external violence. No case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman.

FOURTH OF JULY.

Cristobal Selected as the Place for Holding This Year's Celebration.

Cristobal was selected as the place for holding the 1913 Fourth of July celebration at a meeting of representatives of the various departments and divisions of the Canal Commission; of the employees of the McClintic-Marshall Construction Company; and of the United States Marine Corps at Camp Elliott and Tenth Infantry at Camp Otis, held at the Administration Building, Ancon, on Saturday, May 17.

The preferences of the small percentage of employees that had been canvassed by the representatives present were reported, as follows: In favor of Ancon, 826; Cristobal, 800; Empire, 53; Gatun, 22; with a few expressions in favor of other places. The representatives of the McClintic-Marshall men were in favor of Gatun, while the representatives from Camp Elliott and Camp Otis were in favor of the place that would afford the best facilities for the athletic events. Upon motion, it was decided that the selection be made by a vote of the representatives present, dropping the town with the smallest number of votes in case no place received a majority at first. Three votes were taken, as follows:

First—Cristobal, 13; Ancon, 9; Empire, 6; Gatun, 3.

Second—Cristobal, 11; Empire, 11; Ancon, 9.

Third—Cristobal, 17; Empire, 14.

The appointment of the various committees was left to the chairman of the meeting, Commissioner M. H. Thatcher, who announced that he would make his selections later.

The question of confining the fireworks display to the main celebration at Cristobal, with the exception of Taboga, Palo Seco, and Porto Bello, or of following the plan of last year in which individual displays were held at several of the line towns, was discussed. It was the sense of the meeting that the plan adopted last year should be followed, and that the working out of details should be left to the executive committee.

Chairman Williams of last year's finance committee reported that the amount collected for the 1912 celebration was \$6,662.88; amount disbursed, \$6,463.82, leaving a balance on hand of \$199.06.

Joint Land Commission—Notice of Hearings.

The Joint Land Commission resumed public hearings on Monday, May 26, 1913, and the following calendar was set:

Monday, May 26, DeBosque estate.

Tuesday, May 27, estate of Tabernilla.

Wednesday, May 28, estate of Cuatro Calles.

J. C. LUITWIELER, Secretary.

Certificate Refused to Steamship "Arica."

The Board of Local Inspectors, through its chairman, Lieut-Col. W. V. Judson, refused on May 13 to grant a certificate to the master of the steamship *Arica*, permitting him to accept passengers at the port of Balboa, because of its general unseaworthiness. The *Arica* is a steel screw steamer of 1,771 tons, belonging to the Pacific Steam Navigation Company. It was built by Laird Brothers of Birkenhead, England, in 1881. It has a length of 300 feet, breadth of 36.2 feet, and depth of 19.3 feet; and sails under registry from the port of Liverpool. It was for a long time on the run between Valparaiso, Chile,

and Panama, but was taken off and only re-established in the service a short time ago, having made but four voyages. Since the action of the Board of Local Inspectors, the company has decided to use the vessel at its anchorage in Panama Bay for storage and other purposes, displacing in this service the hulk of the old *Panama*, which will probably be taken out to sea and sunk.

Tennis Tournament.

The Isthmian Tennis Association free-for-all tournament, in singles, held at Ancon, May 11 and 18, 1913, was won by J. T. Neely of Ancon.

The summary follows:

Geo. Newbold defeated J. I. Kuhn, 6-3, 6-1.
G. M. Wells defeated Dr. A. B. Herrick, 4-6, 7-5, 6-3.

B. C. Poole defeated E. W. Tupper, 11-13, 9-7, 6-3.

G. M. Wells defeated Geo. Newbold, 6-4, 8-10, 6-3.

B. C. Poole defeated A. C. Fechtig, 4-6, 6-4, 7-5.

D. T. Edwards defeated H. Bartholomew, 6-1, 6-4.

J. T. Neely defeated Major J. P. Jervy by default.

F. Pearman defeated J. B. Shropshire, 6-3, 6-2.

C. E. Nevius defeated A. N. Otis, 6-0, 6-0.

J. W. Ross defeated Geo. R. Goethals, 6-4, 6-2.

R. W. Hart defeated E. C. Smith, Jr., 6-2, 6-1.

J. T. Neely defeated F. Pearman, 6-4, 6-4.

G. M. Wells defeated C. E. Nevius, 6-3, 3-6, 6-2.

B. C. Poole defeated D. T. Edwards, 3-6, 6-3, 6-3.

J. W. Ross defeated R. W. Hart, 7-5, 6-4.

J. T. Neely defeated G. M. Wells, 6-0, 6-4.

B. C. Poole defeated J. W. Ross, 5-7, 6-2, 6-4.

J. T. Neely defeated B. C. Poole, 6-3, 6-4.

Sale of Brass and Copper Shavings.

Borings and turnings from the brass working lathes, boring mills, milling machines, and other tools operating in the various shops of the Commission, amounting to 162,000 pounds, have been sold to the Argus Smelting Company of Brooklyn, N. Y., for \$18,322.20, which is at the rate of 11.31 cents per pound. The brass stick, rough brass castings, and bearings from which these borings and turnings were made are chiefly the product of the foundry at Gorgona shops. The borings are packed in large iron dump buckets, containing approximately 3,500 pounds each. The contractor is to remove them on or before May 27, 1913.

The Librarian of Congress has requested that he be supplied with two copies of all public documents printed and issued on the Isthmus by the Isthmian Canal Commission and Panama Railroad Company. Of those printed in Washington, he receives two copies direct from the Government Printing Office.

A fire caused by the accidental ignition of gasoline, occurred in a building owned by the Panama Banking Company at Empire at 9.58 p. m., on Saturday, May 10. The damage to building was \$250; to personal property \$15.

SAND BLAST MACHINE.

Modern Equipment for New Foundry at Balboa.

Award has been made to Thomas W. Pangborn of Hagerstown, Maryland, for a modern high pressure sand blast installation, which will be placed in the north lean-to of the new foundry at Balboa. The contract price is \$6,051.90, and delivery at Colon is promised within 120 days.

In the installation of this equipment, the sand blast machine is a separate compartment from the sand blast room. This arrangement leaves the blast room entirely free of equipment, space is conserved, and the apparatus is not subjected to the action of the sand and dust, no small factor in the life and continued successful operation of one of these machines. The sand as blown falls through the grated flooring into the hopper, then onto the elevator boot. The elevator carries it to the sand separating machine, where pieces of material, larger or smaller than desirable, are separated and deposited into a waste bin.

The dust laden air is taken from the blast room through the medium of suction pipes located below the grating. In going through the dust arrester, the dust is thoroughly separated from the air and falls into the hopper below the arrester. The clean air is sent back into the room through spaces in the ceiling. The chief advantage of this feature is that of insuring a suction and pressure force, the former from near the grating, and the latter from the ceiling, thus producing a constant current of air through the room, by which the ventilating efficiency is nearly doubled. In handling practically the same air over and over again, a satisfactory uniform temperature is maintained in the room at all times regardless of the outside temperature. This result is especially desirable on the Isthmus where the moisture conditions that exist at times would probably seriously affect the arrester screens.

To obtain the maximum ventilating efficiency and other advantages, the dust laden air is drawn through a dust arrester by a motor-driven exhaustor, and then blown into the room. While the dust handled is practically a powdery substance, the exhaustors on this machine are made about three times as heavy as other standard exhaust fans. The chief end to accomplish in the ventilating of a sand blast room is to keep the dust from rising higher in the room than the operator's waist line, and to remove it as fast as it is made. By having the suction force near the floor and the pressure force from above this condition is nearly attained.

The sand blast machine is equipped with a moisture and oil separator. The sand separating machine has the same motion that a moulder gives a hand riddle. The sand elevator is equipped with a rubber belt and malleable iron buckets. The scroll sheet and wheel blades of the exhaustor are $\frac{3}{4}$ of an inch thick. The dust arrester casing is made of No. 16 steel strengthened by angle iron riveted to the plates and then galvanized. The shaking of the screens is accomplished by a large pneumatic vibrator direct-connected to the screens, which, in addition to being effective is not destructive to the screen frames. The piping for the dust-handling system is made of No. 16 and No. 20 galvanized sheet iron, riveted and soldered.

LOST—Light-colored raincoat, either at Gatun or Colon, about April 15. Reward, if returned to Waldo A. Reiszner, Gatun.

CANAL MEDAL BAR LIST.

(Continued.)

The attached list contains the names of employees and exemployees of the Isthmian Canal Commission, who at some time during the past year completed their fourth year of continuous service on the Isthmus and are now entitled to their first service bar. The date shown opposite each name is that from which the bar service begins.

All changes or corrections should be reported to the Office of the Chairman, at Culebra, at an early date.

As soon as the list is revised, numbers will be assigned by alphabetical order of surnames, on both medal and bar lists, and the lists will be forwarded to the Washington Office of the Isthmian Canal Commission, where final arrangements will be made for the proper engraving. Distribution will be made about October 1 of the present year.

The heads of divisions are requested to carefully check their lists of American employes on the silver rolls, and to report any omissions on this list to the Office of the Chairman.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week, May 26 to 31 is as follows: Monday, Cristobal; Tuesday, Gorgona; Wednesday, Gatun; Thursday, Culebra; Friday, Corozal and Porto Bello; Saturday, Empire.

Many people on the Isthmus will remember Miss Mary Lyon who was a reader in the Eberly Concert Company, which visited the Isthmus last year. This year Miss Lyon will head a company of her own, arriving on the Isthmus on May 26, for a series of concerts in the Commission clubhouses. The company will consist of Miss Lyon, reader; Miss Conover, soprano; Miss Carey, violinist; Mr. Cooley, baritone; and Mr. Boughten, pianist. The dates are, as follows: May 28, Corozal; May 29, Gorgona; May 30, Cristobal; May 31, Porto Bello; June 3, Gatun; June 4, Empire; June 5, Culebra.

The standing in the American duckpin bowling league on May 19, follows:

Team	Won.	Lost.	P. C.
Empire.....	10	8	.704
Cristobal.....	18	9	.667
Corozal.....	8	16	.333
Gatun.....	6	18	.250

EMPIRE.

A handicap pool tournament has been started in which the men working nights are playing. Ten men have entered.

The Spanish class for beginners started Wednesday, May 21, and will meet twice a week, namely, Wednesday and Friday mornings at 9.30 o'clock.

Empire took three games of duckpins from the Gatun team on Saturday, May 17. The games finished the American league schedule. The scores follow:

Empire.....	467	362	455
Gatun.....	424	401	430

On Saturday, May 24, the Camp Elliott indoor baseball team will play the Empire team at Empire.

CULEBRA.

Tuesdays and Thursdays have been set aside for bowling tenpins on the local alleys. A local tenpin tournament will be arranged shortly.

The excursion on May 30 over the locks and through the Cut, for the benefit of Culebra Y. M. C. A. members and their friends, will be run as originally stated.

GORGONA.

On account of the depopulation of Gorgona the attendance at the entertainments is smaller. Only 290 people attended the entertainment on Monday evening. The next picture show will be a special entertainment on Thursday evening; the regular show will be on Saturday evening, May 24.

The gymnasium classes meet on Tuesday and Thursday evenings. All men are invited.

The regular debating club will meet on Friday evening, and every one is invited. An especially entertaining program has been prepared.

On Sunday night, May 25, a special service will be given. The superintendent of schools, Mr. F. A. Gause, will give an address on Lincoln, and a piano recital will be given by Miss Cervera of Panama. Every one in Gorgona is invited to attend.

GATUN.

The Empire chess team came to Gatun Saturday night, May 17, winning most of the games. Corozal will play here Saturday.

The Cristobal and Corozal American league duckpin

bowlers bowled on the Gatun alleys Saturday night. The results of the games were, as follows:

Cristobal.....	418	426	443
Corozal.....	398	417	387

A new cabinet for the distribution of the mail has been placed in the lobby.

A two-man ragtime bowling tournament was started on the Gatun alleys on Monday night, May 19.

Mr. S. P. Verner of Matachin gave an interesting lecture at the Gatun clubhouse, Wednesday, May 21, under the auspices of the "Forum," his topic being "Fifteen years in Central Africa."

Gatun will play Cristobal a game of indoor baseball on the Gatun court, Saturday night, May 24. This will be the first game between these two teams.

CRISTOBAL.

There will be a meeting of the "Forum" on Wednesday, May 28. The program will be announced later.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending May 31, 1913 (75th meridian time):

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
May 25.....	1.01	7.13	1.26	7.23	
May 26.....	1.48	8.00	2.17	8.13	
May 27.....	2.40	8.50	3.12	9.08	
May 28.....	3.33	9.45	4.12	10.10	
May 29.....	4.28	10.40	5.10	11.13	
May 30.....	5.23	11.34	6.03		
		P.M.			
May 31.....	12.12	6.15	12.23	6.52	

OFFICIAL CIRCULARS.

Appointment of General Superintendent, Panama Railroad and Steamship Line.

CULEBRA, C. Z., May 7, 1913.

GENERAL ORDER:

Mr. John D. Patterson is hereby appointed General Superintendent of the Panama Railroad and Steamship Line on the Isthmus, vice Mr. J. A. Smith whose resignation takes effect May 31, 1913, and will relieve Mr. Smith of the duties of that position effective Monday, the 19th instant.

GEO. W. GOETHALS,
President.

Concessions to the Fourth of July Celebration.

CULEBRA, C. Z., May 20, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

I have approved the following in connection with the 1913 Fourth of July celebration for which arrangements are now under way:

1. Authority to use "penalty" envelopes in connection with official business of the celebration.
2. Work performed by any department or division of the Commission or the Panama Railroad Company, upon the request of the committee in charge of the celebration, will carry the same surcharge as work done by one department or division for another.

3. Floating equipment of the Commission and Panama Railroad Company may be used in connection with any program outlined for the celebration, with the understanding that such use will be in accordance with the rules and regulations prescribed by the Board of Local Inspectors of the Canal Zone.

4. Payments of amounts subscribed by employees toward the celebration may be made by payroll deduction, but such deduction shall be made only upon the written request of the employee subscribing. Employees may, of course, pay their subscriptions in cash.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Removal of Scrap.

CULEBRA, C. Z., May 20, 1913.

CIRCULAR No. 426-B:

The provisions of circular No. 426-A are hereby modified as follows:

No employee of the Isthmian Canal Commission or of the Panama Railroad Company shall inform any contractor or contractors, directly or indirectly, regarding any scrap that it is desired to have loaded on cars. In all cases where it is desired to remove scrap, the Depot Quartermaster must be requested either by letter or telephone to have the inspector report to the employee concerned to locate the scrap. The accountable official must be prepared to give information immediately regarding the original source (French or American), whether on his property records, and if French scrap, whether it results from scrap repairs to equipment which has been in use by the Isthmian Canal Commission.

Failure to observe the foregoing instructions may result in the discharge of the employee concerned.

GEO. W. GOETHALS, Chairman.

Installation of Tungsten Lamps.

CULEBRA, C. Z., May 20, 1913.

CIRCULAR No. 336-E:

The installation of tungsten or other metallic-filament lamps for all departments and divisions of the Isthmian Canal Commission and the Panama Railroad Company will be hereafter governed by the following rule, viz: Tungsten or other metallic-filament lamps may be installed in place of carbon-filament lamps when the latter require renewal, except in such locations as are considered by the electrical department of the Mechanical Division to be unsuitable for the use of tungsten or other metallic-filament lamps.

Circular No. 336-C is hereby annulled.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Increased Pay of Employees Appointed to Fill Vacancies.

CULEBRA, C. Z., May 16, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Sir: The receipt is acknowledged of your letter of May 10 on the general subject of allowing an employee the increased pay of a position to which he has been permanently assigned upon termination of service of the incumbent who has accumulated leave due, and

referring specifically to the case of Mr. C. O. Herring, who was assigned to fill the vacancy caused by the resignation of Mr. A. B. Caruthers, the latter having 84 days accumulated leave to his credit.

In the future, in any case where the exigencies of the service render it absolutely necessary to fill a position which has become vacant, the employee assigned to such vacancy if receiving a lower rate of pay may, upon recommendation of the head of his department and with my approval in each case, be promoted after not less than thirty days, provided he has demonstrated his ability to satisfactorily perform the duties of the higher grade position. I have accordingly approved Mr. Herring's increase in salary, effective May 1, 1913, as originally requested.

This cancels the instructions contained in my letter to the division engineer of the Central Division, dated September 25, 1912, copies of which were furnished heads of departments and divisions.

Respectfully.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Estimate of Gravel Required.

CULEBRA, C. Z., May 12, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

With a view to determining program of work in connection with the obtaining of a supply of gravel from the Chagres River, it is requested that you furnish, as soon as practicable, an estimate of the amount of gravel that you can economically use in your work for the next two years, assuming that the gravel mixed with sand is of suitable quality for concrete without a further addition of sand and that it can be furnished on cars at Gamboa for about thirty cents per cubic yard.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, arrived at the ports of Cristobal, Colon and Balboa, during the week ending May 17:

Sixola, May 11, from New York, with 600 pieces car wheels for Mechanical Division; 10 pieces castings, First Division; 41 cases babbitt metal, 10 cases sheet iron, 8 packages hardware, for stock.

Emil L. Boas, May 12, from New York, with 92 cases paper, for stock; 50 packages buoy parts, for Light-house Division.

Parissima, May 12, from New Orleans, with 558 pieces white oak lumber, 40 bundles brake wheels, for Mechanical Division; 20 pieces cast iron pipe, for Fifth Division; 916 bales alfalfa hay, 6 barrels wire clamps, 295 pieces-cross ties, 63 pieces piling, 3,667 pieces yellow pine lumber, 42 pieces white oak lumber, for stock.

Colon, May 13, from New York, with 3,347 pieces sewer pipe, for Fifth Division; 33 cases electrical material, for Panama Railroad Company; 40 cases gate machinery, 31 reels electric cable, 143 cases electric material, for First Division; 88 pieces steel rails, 45 bundles splice bars, 27 cases copper wire, 15 barrels brass castings, 15 cases tools, 300 pieces castings, for Mechanical Division; 36 bags cork, 29 cases paper napkins, 10 cases enameled cups, 400 pieces black pipe, 3,750 bundles, splice bars, 42 cases wire cloth, 32 crates handles, 14 bales mopheds, 20 cases muriatic acid, 25 pieces steel channels, 25 pieces steel beams, 17 cases chains, for

stock; and a miscellaneous cargo, the whole consisting of 8,700 packages, weighing 850 tons.

Almirante, May 14, from New York, with 8 cases hard ware, 13 cases rubber hose, for stock; 550 pieces car wheels, for Mechanical Division.

Turrialba, May 15, from New Orleans, with 41 pieces pipe and fittings, for Fifth Division; 4 reels steel cable, for Mechanical Division; 21 pieces castings, 15 rolls cotton duck, 63 pieces piling, 277 pieces lumber, for stock.

Pleiades, May 15, from San Francisco, with 73 cases salt water soap, 2,256 cases Trojan powder, for stock.

Misdirected Letters.

ANCON, C. Z., May 21, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Austin, D. A.	Matthew, Miss Julia
Brown, Hubert W.	McCarty, William
Camp, Dave D.	Mitchell, G. H.
Cano, C. E.	Montoute, Emile M.
Connad, A. J.	Parker, Dr. N. M.
Fischer, Robert H.	Phayne, F.
Forsberg, Ed.	Plummer, A.
Fotheringham, A. Y.	Rumble, Manley
Fouley, G. I.	Schuler, Mrs. Frank
Fuller, John N.	Searle, Roscoe
Gatiss, Robert B.	Smith, N.
Gardiner, Clifford	Thalheim, Allan
Hall, C. P.	Underwood, Rox
Henshaw, C. W.	White, C. J.
Holly, George F.	Whitelen, Mrs. Samuel
Johnston, F. L.	Woodman, N.
Jones, Wm. A.	Wuster, Charles

Legal Notice.

United States of America } First Judicial Circuit.

Canal Zone.

The following named Americans citizens died intestate leaving personal property within the Canal Zone to the amount stated:

	U. S. currency.
Andrew R. Murphy.....	3.70
John Ryan.....	2.40
George Peter.....	.83
John Williams.....	2.00
Michael, Coogan.....	29.50
Harry Tafel.....	8.00
Henry G. Day.....	63.58

The collector of revenues has filed a petition for the escheat of the above named estates, in accordance with Section 779 of the Code of Civil Procedure.

Notice is hereby given to all heirs or creditors of the above estates to appear before this Court in the courthouse at Ancon, on July 12, 1913, at 9 o'clock a. m., to establish their claims or to show cause why the said estates should not escheat to the Government of the Canal Zone.

WALTER EMERY,
Circuit Court Clerk.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa, at 9 o'clock Tuesday, Thursday and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

DRY SEASON RAINFALL.

The precipitation during the dry season now drawing to a close has been everywhere below normal, but much heavier than the rainfall during the corresponding period of 1911-1912.

The subjoined table presents the accumulated rainfall at selected stations, and for the whole Canal Zone, during the period from December, 1912, to April, 1913, inclusive, compared with the fall during the dry season of 1911-1912, and with the station normals for the same period.

STATION.	Normal rainfall December to April.	Years of Record.	Accumulated Dec. 1912 to April 1913.*	Per cent of normal.	Accumulated rainfall dry season 1912 (Dec. 1911 to April, 1912).	Per cent of normal.
Ancon	9.32	16	4.58	49	4.76	50
Culebra	14.33	23	8.50	59	8.85	27
Gamboa	13.96	29	8.11	58	3.01	22
Alhajuela	12.70	14	4.18	33	1.02	8
Gorgona	13.63	9	11.78	86	2.29	17
Colon	23.52	43	23.41	100	6.13	26
Porto Bello	42.32	6	22.90	54	5.61	13
Average for Zone (7 stations)	18.54		11.92	64	5.18	28

*Settled dry season weather did not begin this year until January, but the period from December to April inclusive is used for comparison with the previous dry season, which continued from December, 1911 to April, 1912, inclusive.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Retail prices of cold storage provisions for the week beginning May 21, 1913:

FRESH MEATS.	Price
Mutton—Stewing, per pound.....	6
Shoulder, neck trimmed off (4 pounds and over), per pound.....	9

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The Panama Steamship Company's steamer *Panama* will sail from Panama for Aguadulce and Federal on May 27, and the National Navigation Company of Panama will have sailings to those ports, from Panama, on May 30, June 10 and 25.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending May 17:

Arrivals—May 12, *Manavi*, from intermediate ports; May 12, *Quillota*, from Valparaiso; May 13, *Pachitea*, from Callao; May 14, *Pleides*, from San Francisco; May 16, *Ecuador*, from Guayaquil.

Departures—May 12, *Uribamba*, to Ilo, Peru; May 13, *Aysem*, to Valparaiso; May 11, *Santa Maria*, to San Francisco; May 16, *San Juan*, to San Francisco; May 17, *Lyra*, to San Francisco.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Massive Masonry of Gatun Locks Completed.

Massive masonry for Gatun Locks was completed on May 21, when the last of the piers for the north approach wall was brought to full height. The steel girders between piers, for supporting the tracks for towing locomotives, have all been placed. The work of encasing the girders in concrete will be done from the top of the wall, as will the grouting of tracks and the general finishing work. The cofferdam across the lower end of the locks has been removed, and water can be let in at the lower end whenever the sea gates are ready for operation. June 1 is the date set in the contract for the completion of these gates. As soon as they are finished, the barrier of earth between the locks and the Atlantic entrance channel can be removed. This will require the operation of three pipeline suction dredges for about three months.

Removal of Trestle over Gatun Spillway Dam.

The high trestle above the ogee of the Gatun Spillway is to be removed, from its west end to the first of the piers near the center which contains machinery for controlling the flow of water through the temporary sluice gates at the bottom of the ogee. The trestle crosses the tops of the piers between which the spillway gates have been placed; it will be removed a span at a time and coincidentally the piers will be built from their present elevation at 95 feet above sea-level to final height of 115 feet, and the permanent footbridge will be built between them.

The ogee of the dam having been completed to its height of 69 feet above sealevel during the past dry season, the sluice gates afford the present means of keeping the water below that level. When it is desired finally to close the sluices, the valves and their operating machinery at these openings will be removed, and the openings will be filled with concrete. To accomplish this, the valves will be shut, and weighted timber bulkheads will be dropped

in dead water into grooves on the upstream side of the dam, to close the apertures. When these have been satisfactorily adjusted, the machinery will be removed and the holes will be filled. The sluice gates are three in number, eight by 18 feet in section. When the apertures have been closed, the rest of the trestle will be removed, and the center piers and footbridge thereon completed.

Steamshovels Meet at Grade in Culebra Cut.

Steamshovel No. 222, manned by J. S. Kirk, engineer, and U. L. Hill, craneman; and steamshovel No. 230, manned by D. J. McDonald, engineer, and J. V. Rosenberry, craneman, met at Canal grade in Culebra Cut, at about 4.30 p. m., on Tuesday, May 20, at Station 1765, about opposite the residence of Col. H. F. Hodges in Culebra. This is the first through steamshovel cut to grade in the Culebra Cut section.

Repairs to Las Sabanas Road.

Repairs to Las Sabanas road, beginning at the Caledonia bridge and extending to the Zone boundary line, have been authorized at an estimated cost of \$1,700, of which about \$500 will be expended for material, and \$1,200 for labor. The estimate is based upon repairing the ruts and uneven places, some of which have been caused by cutting ditches across the road in making sewer and water connections, and some by the laying of the tramway tracks. In view of the fact that the heavy traffic over this road must be maintained while the repairs are being made, it was decided not to disturb more of the surface than is necessary to renew it where the ruts and low places occur. The Sabanas road, inside the Zone boundaries, was completely made over a few months ago.

Work at Porto Bello Quarry.

Additional rolling stock has been placed in service at Porto Bello in connection with the quarry operations at that point, and more will be available soon. The track conditions are better than formerly, and a 70-ton steamshovel, equipped with a crane boom, has been stationed at the dock for loading barges, in addition to the cranes in service. Three steamshovels are operated from 6.30 a. m. to 2.30 p. m., and two from 2.30 p. m. to 6.30 p. m. It is expected that the improved facilities will result in an increased output of rock for the west breakwater.

New Mules for Canal Work.

The need for teams for road construction work, scraping backfill at Gatun Locks, and grading the proposed new townsite at Balboa, in addition to the regular work for the Sanitary Department and in making deliveries, caused the Quartermaster's Department to order 50 mules from the United States, which arrived on May 26.

This is the first large importation of new stock since 1909. The public animals of the

Commission have been in service an average of seven years. Those now in service comprise 354 mules and 84 horses. About fifty die, or are condemned and sold, each year. In addition to this average, 22 mules died in 1910 during an epidemic of a trypanosoma disease, analogous to the surra of the Philippine Islands and to the "sleeping sickness" of Africa.

The lowest bid on the latest supply was \$211 each, delivered at the dock at New Orleans. Other purchases in the past have been, as follows: January, 1909, 45 mules at \$157.50, delivered at stockyards, Chicago; February, 1909, 50 mules at \$169.50, delivered at stockyards, Chicago; September, 1909, 50 mules at \$198.50, delivered at dock at New Orleans.

Renewed Activity of Slide at Culebra.

Another movement occurred in the slide on the east bank of Culebra Cut, opposite Culebra village, between 4 and 5 p. m., Monday, May 26, during the midst of a heavy rain. The action was identical with three or four similar movements which have characterized this slide in the past—a sinking of a mass of material in the bank, and an upheaval of the bottom.

All track but one, that on the west side of the Cut, were placed out of commission, and a train of Lidgerwoods, which was being loaded at this point, was partly covered. Two steamshovels were also caught, but one dug itself out.

Bids for Dynamite.

Bids were opened in Washington on May 17, under circular No. 775, for furnishing dynamite for the Canal work for the six months period beginning July 1 and ending December 31, 1913, in the following quantities:

1,644,750 pounds of 45 per cent dynamite, in cartridges 1½ by 8 inches;

410,500 pounds of 60 per cent dynamite, in cartridges 1½ by 8 inches;

130,000 pounds of 60 per cent dynamite, in cartridges 2 by 8 inches.

The Trojan Powder Company bid on one-third only of the explosives under Item 1, at \$0.10885 per pound, and one-third only of that under Item 2, at \$0.12135 per pound, offering a powder in substitution for dynamite.

The E. I. Dupont de Nemours Powder Company bid on the dynamite under Item 1, at \$0.1117 per pound, and the dynamite under Items 2 and 3, at \$0.1223 per pound.

Award of one-third of the quantity called for under Items 1 and 2 was made to the Trojan Powder Company at the prices named, and the remainder of the amounts ordered under these two items, and all of the dynamite under Item 3, were awarded to the Dupont de Nemours Powder Company, in accordance with its proposal.

Under the existing contracts, dynamite is being supplied by the Keystone Powder

NOTES OF PROGRESS.

(Continued).

Company, and the Trojan Powder Company, at the following prices: Keystone—\$0.1125 for 45 per cent dynamite; \$0.1245 for 60 per cent ordinary and 60 per cent special. Trojan—\$0.1095 for 45 per cent dynamite, and \$0.1122 for 60 per cent. Under the new awards, the prices are lower.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on May 24, being 4,457,568 cubic yards.

A statement of the concrete laid in the six locks of the Canal, and in Gatun and Miraflores spillways, as of May 24, follows:

*The figures for Gatun spillway include the concrete placed in the hydroelectric station, 235,000 cubic yards being the estimated amount required for both spillway and station.

Sailing of the "Ancon."

The sailing of the steamer *Ancon* has been set for Tuesday, June 3, at 3 p. m., from pier No. 11, Cristobal.

Swimming at Cristobal Docks.

The order prohibiting swimming from off the end of dock No. 11 at Cristobal has been revoked in view of the fact that those who engaged in the pastime have promised to provide lifeboat service at all times. As an additional precaution, the lifeboat will be equipped with four or five life rings, with

heaving lines attached. The Panama Railroad Company has been charged with the duty of seeing that these regulations are observed.

Nominations for Officers, I. O. P. K.

The regular bimonthly meeting of the Independent Order of Panamanian Kangaroos will be held at the Kangaroo Hall, Empire,

on Saturday evening, June 7, at 8 o'clock. There will be nominations of officers for the ensuing term, and other important business. Refreshments will be served. A large attendance is desired.

C. E. Wood,
Judge, I. O. P. K.

Gatun, C. Z., May 24, 1913.

LABOR FORCE AND QUARTERS IN APRIL.

The force report for April 30 shows the actual working force of the Canal Commission to be 32,825; of the Panama railroad, 6,319, and of the contractors, 5,048, a total effective working force of 44,192 men. While this shows a slight reduction in the number of men employed, as compared with March, the number actually at work continues to be greater than at any other period in the history of the Canal. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,358, a reduction of 129, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*											Total silver.	Total gold.	Grand total.	
	Artisans.					European laborers.		West Indian laborers.							
	Monthly	44 cents.	32 cents.	25 cents.	20 cents.	16 cents.	20 cents.	16 cents.	20 cents.	16 cents.	13 cents.				10 cents.

(1) Includes Sabanas police station, Taboga Island, Culebra Island, Palo Seco and Naos Island. (2) Includes 66 Panamanians. (3) Includes 18 East Indians. (4) Includes 70 Panamanians. (5) Includes Matachin. (6) Includes Colon Hospital. (7) Includes 56 East Indians, 84 Panamanians, and 12 U. S. citizens. (8) Includes 4 Asiatics. Gold force of contractors (included above), 41 families, 569 bachelors.

GROWTH OF COROZAL.

Additional Accommodations Made Necessary by Increased Population.

The erection at Corozal of the houses shipped from Gorgona has been expedited by the construction of a spur track from the Panama railroad, at the station, eastward beyond the Commission clubhouse and toward the high land on which the family quarters are being erected.

The recent growth of the village has made increased fire protection necessary. A 6-inch water main has been laid along the Corozal-Panama highway, from the station past the clubhouse; similar lines will pass along the two new streets being opened north of this road, and a four-inch main will be run to the fork of the two roads, south of the clubhouse.

The commissary store is being enlarged by a 10-foot addition on the east side of the main building, and half across each end. The Commission hotel is now the largest on the Isthmus, and tables have recently been placed on the front veranda, bringing the number in use to 56. An average of about 1,325 meals is served daily, which is the largest number ever served at any hotel during Canal construction; at lunch, about 320 meals are served in 35 minutes, between the passing of labor trains. The force of waiters employed by the steward numbers 51.

Fumigation of Vessels from Guayaquil.

Port authorities in Guayaquil, Ecuador, promulgated recently regulations under which vessels are required to anchor nearer the city, opposite its lower end. This renders such vessels liable to infection from infected mosquitoes. They must be fumigated and held to complete six days' quarantine after the fumigation. The officer of the United States Public Health Service stationed at Guayaquil has informed the Chief Quarantine Officer of the Canal Zone that he has not the equipment for fumigating the larger vessels; consequently the fumigation of ships bound for Balboa from Guayaquil has to be done after their arrival in Panama Bay. The completion of the quarantine period under these circumstances results in delay to the vessels, as the Commission quarantine service regards it as essential to maintain a strict quarantine against all infected ports.

Sale of the "Bolivar" Recalled.

The tug *Bolivar*, belonging to the Panama Railroad Company, has been withdrawn from sale and will be transferred to the Sixth Division, to become a part of the dredging fleet at Balboa. The transfer was determined by the necessity of retiring the tug *Cocoli* for several months for extensive repairs to its boilers. The *Bolivar* is in good condition. Its sale was authorized as a matter of economy, inasmuch as the Sixth Division was able to furnish tug service for the port at less cost than a separate service maintained by the railroad.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration building, Ancon, on Wednesday, June 4, 1913, beginning promptly at 2 p. m., for persons desiring to secure the following classes of license: Pilots, masters, mates, marine engineers, chauffeurs and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon,

forms for application and information respecting the filling out of same, not later than the day previous to the examination. In addition, applicants for chauffeur's licenses must provide themselves with automobiles.

New General Superintendent, P. R. R.

John D. Patterson, the new General Superintendent of the Panama railroad, began railway service in 1876 on an engine on the Southern Railway, being promoted later to engineer. He went into the train service in charge of a passenger train in 1880. Between 1880 and 1905, he served as conductor and trainmaster and had charge of terminals on the Southern Railway, acting as trainmaster, yardmaster, and terminal yardmaster. On May 14, 1905, he was made superintendent of terminals in the new passenger station at Atlanta, Ga., and on March 30, 1907, was made general superintendent of the old Mobile, Jackson, and Kansas City railroad. On October 8 of the same year, he was recalled to Atlanta to take the position of superintendent of joint terminals, which he held till he resigned to come to the Isthmus on May 5, 1913.

Canal Zone Postal Savings Bank Transactions

A statement of the postal savings bank transactions at Canal Zone postoffices for the month of April, follows:

NAME OF OFFICE.	Postal savings certificates issued.	Postal savings certificates paid.
Ancon.....	\$17,055.00	\$12,366.00
Balboa.....	11,084.00	7,873.00

Fourth of July Arrangements.

The members of the executive committee for the 1913 Fourth of July celebration at Cristobal will be, as follows:

Commissioner M. H. Thatcher, chairman; Capt. F. O. Whitlock, chairman, entertainment committee; Mr. E. J. Williams, chairman, finance committee; Capt. R. E. Wood, chairman, fireworks committee; Mr. W. C. Haskins, chairman, publicity and printing committee; Mr. J. D. Patterson, chairman, transportation committee; Dr. M. E. Connor, chairman, music and dance committee.

A meeting of the committee was held on Saturday afternoon, May 23, at the office of its chairman. Upon motion, it was decided to use blanks similar to those of last year in making collections of contributions to the celebration fund, and in issuing transportation and lunch tickets. Allotments of funds were made to the several committees to the same amount in the aggregate as last year. The allotment to the fireworks committee is \$1,550, of which amount \$1,000 will be used

for the display at Cristobal; \$200 at Ancon; \$200 at the joint Empire-Culebra display, the remainder to be distributed among Porto Bello, Palo Seco, and Taboga.

The chairman of the entertainment committee was authorized to act as purchasing officer for all purchases outside the Canal Commission or Panama railroad. The chairman of the dance committee was of the opinion that the new Pier 16 at Cristobal could be made ready for the evening dance, and could also be used to house the people in case of rain, and for serving refreshments. In case the pier is not available, dock No. 11 will be used. Two bands will be engaged, those of the Tenth Infantry, and United States Marine Corps.

Upon motion, it was voted to ask Colonel Goethals to deliver the Fourth of July address.

PERSONAL.

Capt. R. E. Wood, formerly Assistant Chief Quartermaster of the Isthmian Canal Commission, returned to the Isthmus on the *Panama* which arrived at Cristobal on Tuesday, May 27. Effective that date, he has been appointed Chief Quartermaster of the Isthmian Canal Commission, vice Brigadier-General C. A. Devol, resigned.

Mr. William L. Phillips has been appointed to the position of landscape architect in charge of the new townsite work at Balboa, and is expected on the Isthmus about July 1.

Mr. M. E. Gilmore, Superintendent of Public Works, has resigned, effective June 1, on which date he will become manager of the Panama Land and Development Company in charge of the improvements to the Bella Vista estate, in Las Sabanas, east of Panama city.

Dr. Malcolm Watson, at one time chief medical officer of the Estates Hospital Association and senior district surgeon in the Federated Malay States medical service, is visiting the Isthmus. Dr. Watson has been connected with sanitary work in the Federated Malay States for the past 13 years, and one of the objects of his visit is to inspect the work as it is being conducted here. On Wednesday afternoon, May 28, he gave an informal talk, descriptive of his labors in the East, at the gold mess hall at Ancon Hospital.

High School Notes.

The Canal Zone High School commencement exercises will be held on Saturday evening, June 27, in the Commission clubhouse at Empire, instead of at Gatun as announced in the last issue of *THE CANAL RECORD*.

College entrance examinations will be conducted at Ancon school house from June 16 to June 21, inclusive. Any high school graduate, including the seniors of the class of 1913, is eligible to enter the examinations. Credit is given on fourth year work for examinations passed on first, second, and third year courses. These examinations admit to any college or university in the United States.

Fatal Accidents.

George Atchison, Jamaican, check No. 44899, fell from a trestle on the east side of the Canal at Empire, on Monday, May 26, breaking his neck.

Samuel Thomas, a native of Montserrat, check No. 465185, employed on mud scow No. 14 at Balboa, was fatally injured on Monday, May 26, while attempting to loosen some steering gear on the vessel in which he became caught.

FLOATING CRANES FOR CANAL.

Permanent Equipment to Handle Parts and Cargo in Maintenance and Operation.

The Secretary of War has authorized award of contract for two floating cranes of the revolving type of 250 gross tons capacity each, to the Deutsche Maschinenfabrik A. G., of Duisburg, Germany, proposals for these cranes having been opened in the Washington office of the Commission on January 13, 1913. There were four bidders, one American, one English, one Dutch, and one German.

contractor. In general the execution of the contract will probably be, as follows:

The pontoons will be designed and built at the German shipyard, simultaneously with the design and fabrication of the superstructure and operating machinery at the contractor's works in Duisburg. The pontoons, after being fitted with a part of the machinery located below deck, will be towed to the Isthmus, and at the same time the superstructure will be shipped to the Isthmus in a knocked-down condition, final erection of the superstructure and placement of

remainder of the superstructure. A reference to the sketch accompanying this description will give an idea of the work involved.

After final erection and adjustment, each crane will be subjected to a comprehensive series of tests, during which it will be required to demonstrate its ability to handle all the specified loads at the specified reaches and to perform all of the required motions. The test loads will be 20 per cent in excess of the rated loads for the "main hoist," and $33\frac{1}{3}$ per cent in excess of the rated capacity of the "auxiliary hoist". This means that the maximum weight which must be handled without overstrain is 300 gross tons or 672,000 pounds.

There are many types of floating cranes which have been built in various parts of the world, but the type decided upon for purchase for the Canal is believed to be that which affords the greatest flexibility of movement combined with safety. Some types of floating cranes are so rigged that to move the load in any direction except in straight vertical and horizontal lines, it is necessary to maneuver the pontoon, an operation which requires considerable handling of lines, tug service, etc., and a large force of men, and involves considerable delay. Furthermore, a prime necessity for floating cranes for the Canal is their ability to operate in the restricted water areas of the Canal locks, as it may be necessary for them to assist in the removal of injured lock gates, and for this purpose the revolving type is unquestionably superior to any other.

In some types of cranes their stability when handling heavy loads is dependent on movable counterweights or water ballast, the operator being required not only to handle the load, but also to adjust properly the counterweight or water ballast. This is not only a great inconvenience, but it may also be a source of positive danger, for if the line holding the load should break, it is not impossible that the counterweight would be in such position as to capsize the crane backwards. In the cranes for the Canal, there are no movable counterweights or water ballast; on the contrary, such counterweights as are provided are fixed in weight and position, and the necessary stability when handling maximum loads is had solely by the dimen-

270-TON FLOATING CRANE—SIDE ELEVATION.

The proposal of the German firm was so much lower in price than any other, and the experience, facilities, and reputation of this firm were so excellent, that it was unquestionably the best of those received. The time of delivery for the two cranes is 580 days. The cranes will be constructed in Germany and a force is now being organized to take charge of the inspection at the works of the

machinery parts being made after arrival on the Isthmus. The cranes are so high, and the weights of the superstructure are so great, that the erection of the jib or arm which carries the loads will probably be effected by means of one of the Canal lock chambers, the water level in the lock being lowered sufficiently to permit the jib, which will be assembled on the lock wall, to be fitted to the

sions of the pontoon, considered in connection with the deadweights and loads to be carried.

The cranes for which contract has been awarded will each consist essentially of a steel pontoon 150 feet long, 88 feet wide, and of a depth of 15 feet 9 inches at the sides, and 16 feet 8 inches at the center. The pontoons will be strongly framed with beams and girders,

and will be subdivided into watertight compartments of such dimensions that any two exterior compartments can be flooded and the crane remain stable with full load at full reach in any position, and with wind blowing at the rate of ten pounds per square foot from the most unfavorable direction. The pontoons will contain a power generating installation, consisting of a Scotch marine steam boiler, supplying steam to marine type engines driving the main and auxiliary electrical and generating units. These units will furnish direct current at 220 volts to motors located on the superstructure, which latter will drive the wire ropes actuating the blocks to which the loads to be handled will be attached. The cranes will not be self-propelling, but the pontoons are fitted with towing bitts etc., so that they can be handled by tugs. Each pontoon is fitted with four steam capstans, one near each corner, whereby the cranes can be maneuvered to any desired position. To safeguard the cranes in possible heavy weather or other circumstances, each is provided with two 3,000-pound anchors and the necessary chain cable, two steam anchor winches being provided for each crane to handle the anchors.

An area, 20 feet by 60 feet of the deck of each pontoon is made especially strong, being capable of carrying a superimposed load of 2,000 pounds per square foot, this area being intended for the reception of loads up to a total of 300 gross tons. The cranes can therefore carry very heavy and bulky loads on their decks when it is necessary to transport them anywhere on the Canal, thus rendering unnecessary the use of barges, etc., for this purpose.

The pontoon supports the fixed and revolving superstructure at a point 39 feet distant from one end and midway of the width of the pontoon. Reference to the accompanying sketch will give an idea of this superstructure. In general it consists of three parts: first, the fixed superstructure, or mast, consisting of a four-sided truncated pyramid firmly secured to the pontoon framing; second, the revolving "bell" which is a four-sided, steel framed structure which is supported by a combination collar and roller bearing on top of the mast; and third, the arm or jib which is supported on the bell by two hinge pins, and is capable of motion about these pins, the motion being imparted to it by means of two links connecting it to two crossheads situated at the rear of the bell and actuated by two vertical screw spindles driven from the machinery house. The bell supports the machinery house which is situated, as shown in the sketch, at the rear of the bell, and a short distance above its bottom. This machinery house contains fixed counterweights, as well as the motors, gears, drums, etc., for operating the main and auxiliary hoists. The bell also supports the driver's cab at a point just below the hinge pins of the jib, from which the operator commands an unobstructed view of the entire field of work.

The bell terminates at its bottom on a circular steel girder carrying rollers which press against a roller path secured to the mast. The motors for revolving the bell and jib around the mast are fixed at the bottom of the mast and drive gears engaging a circular rack on the annular girder forming the base of the bell. All motions are in the complete control of one man whose station is in the driver's cab. In addition to the driver there will be required a machinist in the machinery house on the bell, another machinist in the generating plant in

the pontoon, and a fireman for the boiler; thus, with the exception of the deck force for handling lines, etc., but four men are necessary for the operation of each crane.

From the foregoing description of the superstructure, it will be seen that the entire revolving weight rests on the top of the mast and that the jib is prevented from overturning by the resistance of the collar bearing at the top of the mast and the rollers at the bottom of the bell. The clearances are such that no part of the revolving superstructure, except the jib, overhangs the pontoon in any position, thus rendering it possible to operate the crane in restricted spaces. The heights of the superstructure are such that unencumbered passage around it is provided in all positions.

The jib is provided with two hoists designated the "main hoist" and "auxiliary hoist," respectively. The main hoist is fixed at the point of the jib and will consist of two equal blocks, each of a rated capacity of 125 gross tons. These two blocks can be linked together by means of an "equalizer bar," whereby they may be made to form substantially one hoist of 250-ton capacity. Each block of the main hoist will be suspended in ten parts of two-inch wire rope.

The auxiliary hoist will have a rated capacity of 15 gross tons, and will consist of a two-part block swung from a traveling trolley running on a runway secured to the lower side of the jib in such manner that the auxiliary hoist can be operated at any point of this runway at any position of the jib.

The main hoist can handle its rated loads at any point in a full circumference of 360 degrees with the mast as a center. It can revolve completely under maximum loads and can in addition be luffed in or out by means of the above-mentioned links and screw spindles. The main hoist will have the following capacities at the reaches stated for each; by "reach" is meant the horizontal distance from face of pontoon fender to center of block:

	100 tons	150 tons	250 tons
Loaded reach over end....	80.1 ft.	59.0 ft.	21.0 ft.
Loaded reach over side....	81.6 ft.	62.4 ft.	22.3 ft.

From any of these reaches the main load can be luffed in sufficiently far to enable the crane to deposit such load on its own deck.

The time of hoisting main loads is as follows:

Tons	Per minute
250.....	3 ft. 6 in
125.....	7 ft.
62.5.....	14 ft.

The unloaded blocks are raised or lowered at not less than 20 feet per minute. The crane can make one complete revolution in from 5 to 8 minutes, depending on the load and wind, the lower figure being for the most favorable condition without wind. The jib loaded with 100 tons can be luffed in from its maximum to minimum reach in not more than 17 minutes, and luffed out in not more than 13 minutes. Without load the jib can be fully luffed in from maximum to minimum reach in not more than 10 minutes and luffed out in not more than 8 minutes.

The speed of hoisting the fully loaded auxiliary block will be not less than 40 feet per minute, and the unloaded auxiliary block can be raised or lowered at not less than 80 feet per minute. The speed of trolleying the auxiliary hoist along its runway will be from 40 to 80 feet per minute, depending upon the degree of inclination of the jib.

Each crane will be safely stable in a wind

exerting a pressure of 40 pounds per square foot, even with full 300-ton deck load on the pontoon. Of course the operation of the cranes would not be attempted in such a gale. The pontoon will have a freeboard of not less than 3½ feet when handling maximum capacity loads in any position without deck load; if the deck load be present this free load will be reduced to not less than 2 feet. The maximum longitudinal inclination of the pontoon will not exceed 2½ degrees, and the maximum transverse inclination will not be greater than 5 degrees.

Each crane will be provided with ladders, stairs, gangways, etc., for convenient communication, inspection, and repair, will be fully equipped with all necessary signals and means of communication, and will be electric lighted throughout.

Congressional Visitors.

Fourteen members of the House of Representatives arrived on the Isthmus, on the *Ancon*, on Sunday, May 25, on a visit of inspection to the Canal. The party is composed of the following: L. B. Stringer, and Mrs. Stringer; Frank T. O'Hair, and Mrs. O'Hair; Louis Fitz Henry, Illinois; J. W. Alexander, and Mrs. Alexander, son, and two daughters; Thomas L. Rubey, and Mrs. Rubey; C. C. Dickinson, and Mrs. Dickinson; Joseph J. Russell, Missouri; John I. Nolan, and Mrs. Nolan, California; H. D. Clayton, and Mrs. Clayton, Alabama; James F. Byrnes, and Mrs. Byrnes; A. F. Lever, and Mrs. Lever, South Carolina; Rufus Hardy, Sam Rayburn, Jack Beall, Texas. The party will return to the United States on the *Ancon*, which is scheduled to sail from Cristobal on Tuesday, June 3.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter, American National Red Cross, for the month of April, 1913, follows:

RECEIPTS.	
April 1, On hand.....	\$2,115.39
1, Membership dues.....	3.00
2, Membership dues.....	1.00
7, Donation, account Jamaican relief fund....	.50
24, Membership dues.....	1.00
28, Donation by Empire Lodge, Knights of Pythias, for relief of flood sufferers in the United States.....	50.00
30, Gross receipts of entertainment held at National Theatre, Panama.....	633.00
	<hr/> \$2,803.89
DISBURSEMENTS.	
April 1, Relief of American woman at Panama....	\$ 50.00
3, Printing envelopes.....	2.80
4, Relief of wife of Zone prisoner, Culebra.....	5.00
23, Relief of wife of Zone prisoner, Culebra.....	5.00
23, Relief of American, ill at Colon, and deported to San Francisco.....	25.00
28, Forwarded to National Red Cross, for relief of flood sufferers in the United States.....	50.00
30, Expenses of entertainment at the National Theatre, Panama.....	113.00
	<hr/> \$270.80
April 30, Balance on hand.....	\$2,533.09
JOHN L. PHILLIPS, Treasurer.	
Approved: EDW. SCHILDHAUER, Chairman.	

Gangs Nos. 1 and 4 of the Lighthouse Subdivision, which are in camp in the Gatun Lake region, will, at their request, work on Friday, May 30, Decoration Day, and have as a holiday the following day, Saturday.

ACTIVITIES OF ZONE WOMEN.

Review of Woman's Movement Initiated by the Government.

The Canal Zone Federation of Women's Clubs, which closed six years of activity on April 19, was composed of nine clubs that had been formed in the various villages of the Canal builders, in September and October, 1907. These clubs were unique in the history of the woman movement; they were the only clubs of women ever organized in any country by government authority. Their explicit purpose was to provide recreation and social intercourse for the wives and daughters of American employes, just as the Commission club-houses were established as centers of recreation for the men of the force. When it became obvious that an outside agency was needed to start a social movement among the women, Secretary Taft authorized the employment by the Canal Commission of Miss Helen Varick Boswell to undertake the task. Miss Boswell arrived on the Isthmus early in September, and at once set about traveling from village to village for the purpose of meeting the women in social gatherings. Her mission was successful, the club idea was received with enthusiasm, and when she left for New York, on October 17, she had organized clubs in the larger centers. Without a doubt, such clubs would have been organized in time by the more liberally inclined women, but it would have taken effort and time to put on its feet a movement, which, with the powerful aid of the government, was started in less than five weeks.

At the time of the organization of these clubs, there was an estimated population of American employes and their families of about 8,500, representing 15 or 20 classes of industry. The families were quartered in the scattered villages, 19 in number, along the line of the Panama railroad, and in few of these villages were there enough members of any one industrial class to form a basis for the development of social life. Indeed, there was no social life among the women. The churches had scarcely begun any regular activity, there were no libraries, no lectures, no theatres, no moving picture shows, the National Theatre in Panama had not been built, and the only recreation for the women was an occasional dance. The first public entertainment in the Canal Zone, notice of which was published in *THE CANAL RECORD* for November 13, 1907, was a minstrel performance, given in the Culebra clubhouse. Previous to that time, there had been occasional entertainments in Panama, one of the very first being held in the Sarah Bernhardt theatre, now destroyed. Minstrel performances were given by local companies from time to time, but in these, naturally, the women had no part.

The wives who had accompanied their husbands to the Canal Zone, preferring this exile to separation from them, led a dreary life in those days. Comfortable houses were furnished, health conditions were constantly improving, and the Commission did its best to keep the employes satisfied and contented, but the women were cut off from their natural environment; they were separated from relatives, from neighbors and friends; housekeeping under the new conditions was difficult, and problems hitherto unknown presented themselves daily. More than all, there was little or no "neighboring" among the women. In the minds of a few progress-

ive women the club idea began to stir, but no one felt the courage to take the first steps toward organization. This was the situation in 1907, when, as related above, the government found efficient means of relieving it.

While the nine clubs formed by Miss Boswell gave rise to a local social life of importance, the main purpose of the federation was to form a tie between the club women in the Canal Zone and those of the United States. This was accomplished by affiliation with the General Federation of Women's Clubs, an international organization of more than 1,000,000 members, with affiliated clubs throughout the United States, and in Great Britain, Canada, the Philippines, Western Australia, Sweden, and China. Membership in an organization composed of so large a body of kinswomen and foreign club women, formed the crux of club life in the Canal Zone; it gave to the women at once a sense of dignity and power in their work, and helped them to a broad outlook on the affairs of women throughout the world. The federation also drew visitors of national importance to its meetings. The program meetings, held in January of each year, included some of the most notable gatherings that have been held in the Canal Zone during the American occupation. Among the special speakers have been the Honorable William H. Taft, when president-elect of the United States, Mrs. Philip North Moore, then president of the General Federation, who came at the invitation of the Canal Zone Federation in 1909, the Honorable William Jennings Bryan, the Ven. Archdeacon Henry B. Bryan, Miss Helen Varick Boswell, Dr. J. Cueva Garcia, minister to the Republic of Panama from Ecuador, and Dr. Edward T. Devine of Columbia University, New York.

When the federation was organized, on October 12, 1907, in what was known as the "president's suite" in the Hotel Tivoli, there were delegates present from eight clubs, representing about 250 women (the ninth club was organized and admitted to the federation later in the year). Before April, 1908, the membership of the clubs had doubled. Conventions of the federation were held in April, October, and January, the annual meeting being in January. The executive board, which was composed of the officers of the federation, the chairmen of committees, and the presidents of the clubs, held three regular meetings during the year. By this means the club women were able to keep in touch with all the work of the federation, for the representation was broad, including members from each of the clubs.

In 1909, following the visit of Mrs. Moore, the federation received a gift of books for a juvenile library, from club women in Texas. This prompted the local clubs, which had already started libraries, to combine their books with those of the federation, and a library extension committee was formed. After four years of circulation in the Canal Zone schools, the library has been turned over to the Isthmian Sunday School Association for use among the American children of the Sunday schools. In the same year, —1909— the Eighth District Art Committee of St. Louis sent a collection of pictures for art extension work. The collection includes 37 large pictures, reproductions of old masters, handsomely mounted and suitable for exhibition purposes, note books and examples of

the different schools of art, including sculpture and architecture, and five text books on art. The entire collection, after circulation through the Canal Zone and exhibition in the public schools, and privately, has been presented to the Ancon Study Club for its own use and for future art extension work in the Canal Zone.

The bureau of information of the General Federation has supplied materials for the preparation of papers on various subjects, upon request of the local clubs. In 1908, a botany committee was formed to work in connection with the Field Columbian Museum of Chicago in procuring specimens of the flora of the Isthmus for classification.

The officers of the federation have been in constant correspondence with the officers of the General Federation, and, from time to time, have met the representatives of the General Federation visiting the Canal Zone, in conference. The chairman of the conservation committee was a welcome visitor in December, and later, the treasurer of the General Federation, a recently appointed sponsor to the Canal Zone organization, spent a short time in Panama.

Local activities of the federation have not been less interesting than those in connection with the General Federation. A cook book was compiled in 1910; civic work has been constantly in the minds of the women and, year by year, they have had the satisfaction of witnessing the putting into practice of some improvement in the general order of things which they had first seen or pointed out. The education department has always worked in cooperation with the division of schools and has been instrumental in promoting good feeling between parents and teachers. The federation annually sent a Christmas box to the patients in the government asylum for lepers at Palo Seco. It remained, however, for the annual meeting in January, 1912, to authorize the beginning of an important philanthropic work in the education of a native blind boy, the object being twofold; first, to fit the unfortunate youth for a life of self-support; and second, to enable him to demonstrate to the people of Panama that the blind are not necessarily helpless, and, therefore, paupers. With this work well in progress, and under the direction of a committee formed of the executive board of the federation, the organization closed, as has been stated, on April 19, 1913.

Although it was considered expedient to close the federation at that time, the work of women's clubs in the Canal Zone is by no means at an end. There are still general clubs, all holding their officers over until the opening of the club year in October, and unwilling to disband, but rather inclining to affiliate separately with the General Federation, one study club, already affiliated, and 23 other organizations of varying character, the membership of the entire body of organizations of women being reduced only by about 50 in the closing of the federation.

The Secretary of Foreign Affairs of Panama has submitted to the head of the Department of Civil Administration a statement of expenditures made for the street cleaning service in the city of Panama, from January, 1909, to May, 1913. In 1909, the expenditures amounted to \$39,909.03; in 1910, to \$50,009.40; 1911, to \$52,262.04; 1912, to \$72,152.30; first four months of 1913, to \$19,863.17½.

OFFICIAL CIRCULARS.

Appointment of Chief Quartermaster.

CULEBRA, C. Z., May 27, 1913.

CIRCULAR No. 487:

Effective this date, Capt. R. E. Wood, U. S. A., is hereby appointed Chief Quartermaster in charge of the Quartermaster's Department of the Isthmian Canal Commission, vice Brig.-Gen. C. A. Devol, resigned.

GEO. W. GOETHALS.

Chairman and Chief Engineer.

Mechanical Committee Abolished.

CULEBRA, C. Z., May 20, 1913.

CIRCULAR No. 383-B:

The mechanical committee, appointed by circular No. 383, dated April 18, 1911, is hereby abolished.

GEO. W. GOETHALS.

Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Permits to Jump On or Off Trains.

CULEBRA, C. Z., May 20, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to circular No. 379-A, prohibiting employees from jumping on and off locomotives, cars, or trains while in motion, except with permission in writing from the head of the department or division:

Please furnish the Head of the Department of Civil Administration the names of all employees to whom this permission has been granted or may be granted in the future.

GEO. W. GOETHALS, Chairman.

Claims of Employees Before Joint Land Commission.

CULEBRA, C. Z., May 20, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Employees who have claims to present to the Joint Land Commission may be excused from their duties for this purpose, but will be required to submit on their return to duty a certificate, signed by the Joint Land Commission, or its secretary, that they have been before the commission in connection with the presentation of their claims on the date or dates when they were absent, and they will not be allowed pay for that time.

GEO. W. GOETHALS, Chairman.

Daily Report of Cars.

CULEBRA, C. Z., May 21, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Until further advised, send daily report to this office, with a copy to the General Superintendent of the Panama railroad, showing the numbers of all classes of cars which had been under load in your custody for more than 24 hours at the close of business the preceding day, together with a statement of the reasons for delay in unloading for each car. This report must be in this office by one of the midday trains, without fail.

GEO. W. GOETHALS,

Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Estimates for Fiscal Year Ending June 30, 1915.

CULEBRA, C. Z., May 24, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Please prepare, and submit to this office not later than June 1, 1913, preliminary estimates for appropriations for the fiscal year ending June 30, 1915. These estimates should be made in total only, under each appropriation head, and do not refer to the detailed estimate which will be submitted at a later date. It is expected, however, that these preliminary estimates will agree substantially with the detailed estimates. It will be assumed that the appropriations for the fiscal year 1914 will be sufficient for that period and that no deficiency or surplus will be carried forward to the fiscal year 1915.

I enclose blank on which I desire you to submit these estimates, one copy to be retained for your file.

While it is desired that the information called for by the blank be furnished, it will not be necessary that they be worked up in detail at the present time. All that is required is the total requirements for your work for the fiscal year 1915, giving the assumption on which they are based. Your estimates should include work done for you by the Mechanical Division.

GEO. W. GOETHALS,

Chairman and Chief Engineer.

Telephone Pay Stations at Hotels Tivoli and Washington.

PANAMA RAILROAD COMPANY,

OFFICE OF PRESIDENT,

CULEBRA, C. Z., May 23, 1913.

To ALL CONCERNED:

Effective June 1, 1913, the telephones in the Hotels Tivoli and Washington will be placed on a strictly pay station basis, and, in order that no inconvenience may

be caused to those entitled to the privilege, telephone franks will be issued to the heads of divisions and departments and to others to whom it may be necessary to use telephones at the above points on official business.

Holders of telephone franks will be entitled to use pay station telephones in the railroad stations at Colon and Panama, and also the telephones of the Isthmian Telephone Company's, and Panama Telephone Company's systems.

Party holding telephone frank wishing to use telephone at any of the above points, will give frank number to telephone operator, who will enter same on toll ticket to show disposition of charge.

Franks will not be necessary at other places than above mentioned.

Telephone franks may be secured upon written application to the General Superintendent, Panama Railroad Company, Colon.

GEO. W. GOETHALS, President.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, May 24, 1913. All heights are in feet above mean sealevel.

Misdirected Letters.

ANCON, C. Z., May 28, 1913.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received in the office of the Director of Posts, and may be secured upon request of the addressees:

Acker, Percy	Hinds, E. Garfield
Arnold, John H.	Holmelin, Gerst
Barnum, C. D.	Loewe, Chas.
Berry, Miss Mattie	Malphosin, John
Booth, R. K.	McDaid, Jack
Box, Ernest	Moreland, C.
Bravo, Luis A.	Panton, Wm.
Brown, Miss M. E.	Ragsdale, Mrs. H. C.
Brown, Washington (2)	Riffenberg, W.
Camp, D. D.	Russell, S. M.
Carter, Mrs. John P.	Sammus, Hubert I.
Clarity, Mrs. P. J.	Samuels, W.
Conklin, Chas. T.	Sensenbach, W. F. R.
Crosley, C. G.	Sherry, E.
Ford, W. H.	Skinner, Miss Dolly
Gallagher, Thomas	Skinner, Frank
Galt, Harry	Sporer, G. D.
George, Alexandre	Stauffer, Titus L.
Gibbs, Charles	Thweatt, Robert
Gibson, O. P.	Tull, Capt. Richard E.
Heimer, Mrs. F. R.	Vickery, W. J.

LOST—On May 22, between House 114 and engine house, Pedro Miguel, a black leather bill fold containing one \$10 bill and several receipts. Finder kindly return to H. W. Swanson, engine house, Pedro Miguel, and receive reward.

LOST—Between Third street, Colon, and Naos Island breakwater, a black seal combined pass and card book, with name of owner stamped in gold on the inside of front flap; book contains Panama railroad annual passes for the years 1911, 1912, and 1913; Y. M. C. A., and Train Dispatchers' Association cards, 1912-1913; numerous Masonic lodge receipts, etc. Liberal reward, if returned to dispatcher's office, Colon.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving picture entertainments for the week June 2 to 7 is, as follows: Monday, Corozal; Tuesday, Culebra; Wednesday, Gatun; Thursday, Gorgona; Friday, Empire; Saturday, Cristobal; Friday, Porto Bello.

On account of Corozal's withdrawal from the indoor baseball league, a new schedule will be arranged.

COROZAL.

The Corozal American League duckpin team lost two out of three games to the Empire team here on Saturday night, May 24.

A "smoker" was given to the members of the Y. M. C. A. on Friday night, May 23, with the following program: Filipino string quartet; clog dancing, O'Tool, 10th Infantry; yodeling solo, R. King, Corozal; Filipino string quartet; reading, E. J. Rall; blackface comedy act, Furmeister and Morrison; Gorgona; bag-punching exhibition, R. Connors, Paraiso; banjo solo, Charles Ray, Paraiso; song and dance act, R. F. J. Cogan, Gorgona; wrestling matches, L. C. Wright vs. Hugh Connors, and J. Quinn vs. Eddie Andrews.

The Mary Lyon concert company will make its first appearance at the Corozal clubhouse on Wednesday, May 28.

EMPIRE.

On Sunday evening, May 25, Dr. Poole of Philadelphia gave an interesting talk on the Chinese revolution and the humor of the Chinese written language. Two hundred and fifty people attended.

The Gorgona shop duckpin bowling team, composed of King and Sims of Gorgona, and Gustaveson, Rodeghiero and Lowande of Empire, which challenged any duckpin team on the Isthmus, was defeated by the Empire team on Saturday, May 25, Empire winning two out of three games.

Empire has invited all the Isthmian bowling men to enter a duckpin tournament to be rolled on the Empire alleys, on May 30.

Entries have been called for the June handicap pool tournament, which will start the first week in June.

GORGONA.

The Mary Lyon company will be at the Gorgona clubhouse on May 29; admission, members free; non-members 50 cents; children 25 cents.

The gymnasium classes meet every Tuesday and Friday evening.

The Empire indoor baseball team will play at Gorgona on May 30. Every one is invited to attend; admission free.

The regular debating meeting was held Friday evening, when 50 people enjoyed the discussion, whether women shall have the right to vote. The affirmative won.

Eighty people attended the entertainment given on Sunday evening, when Miss Anais Cervera rendered several piano selections, and Mr. F. A. Gause, the superintendent of schools, delivered an address on Lincoln.

GATUN.

Gatun defeated Cristobal Saturday night in an interesting game of baseball, the score being, Gatun 37, Cristobal 25. In the absence of Drayton Thompson, who is now on vacation, George Duer acted as captain. Thomas Charnley was the umpire.

The high scores for duckpins for the week were: Wells 102; Barte 102, 100, 102; Harper 101, 113, 108, 112; Clarity 112, 113, 106; Conley 104, 111, 101, 102; Gray 102, 101; Dumville 103, 102; Carkeet 113; Gamble 102; Hodges 100; Grover 108; and Wurster 105, 116.

The high school dramatic club will stage the play, "She Stoops to Conquer," at the Gatun clubhouse on Friday night, June 13. The club is being drilled by Mr. C. C. Carr, and costumes have been ordered from the United States. The local players will come to the clubhouse on the same basis as entertainers from the United States, and the admission will be the same; 50 cents for nonmembers, members free.

The Mary E. Lyon concert company is booked for Gatun on June 3.

The chess team will go to Corozal on Saturday, May 31, to try conclusions with the Corozal team. Gatun will be strengthened by Mr. W. J. Shutes, one of the best players on the Isthmus.

CRISTOBAL.

On Friday night, May 30, the Mary Lyon concert company will give an entertainment. All seats will be reserved.

The "ragtime" duck and tenpin tournament on the local alleys will be started during the first week in June. New covers are being placed on the billiard and pool tables.

The indoor baseball team will go to Gorgona to play the next game.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal 8 a. m. to 12.30 p. m., and 2 to 7 p. m.

Parismina.....	U. F. C. Saturday.....	June 7
Turrialba.....	U. F. C. Thursday.....	June 12

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

The National Navigation Company of Panama will have sailings for Aguadulce and Pedregal, from Panama, on May 30, June 10 and 25.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

The following ships, arrived at, or departed from, the port of Balboa during the week ending May 24:

Arrivals—May 20, *Limari*, from south ports; May 23, *Chile*, from Guayaquil; May 24, *Pennsylvania*, from San Francisco; May 24, *City of Para*, from San Francisco; May 23, *Stephan*, (cable ship) from Germany.

Departures—May 19, *Manavi*, to intermediate ports; May 19, *Quillota*, to south ports; May 21, *Pachitea*, to south ports.

STATEMENT OF
CONSTRUCTION EXPENDITURES
TO MARCH 31, 1913

(Part II of The Canal Record, May 28, 1913.)

STATEMENT OF CONSTRUCTION EXPENDITURES TO MARCH 31, 1913.

Table No. 1.

Includes administrative and general expenses, but does not include "General Items" or expenditures for sanitation, hospitals, or civil administration.

ITEMS.	THIRD QUARTER, FISCAL YEAR 1913.			TO DECEMBER 31, 1912			TOTAL TO MARCH 31, 1913.		
	Quantities.	Amount.	Unit Cost.	Quantities.	Amount.	Unit Cost.	Quantities.	Amount.	Unit Cost.
<i>Atlantic Division—</i>	<i>Cubic Yards.</i>

Total expenditures, constr. and eng'nr'g.....								\$176,860,951.32	

Item No. 45—Central Division Dredging Excavation Prism, preliminary surveys.
Item No. 47—Represents operation of cement gun used in facing walls of the Cut.
Item No. 65—Pacific Division, Miraflores Dam, Hydraulic Filling. Expenditures represent cost of pipe lines, flumes, etc. 661,048 cubic yards have been deposited in the dams from dredges and hydraulic excavation in lock chambers and in prism below the locks. The expense thereof has been charged to excavation.
Items Nos. 86, 87, 88—Pacific Division, La Boca Locks and Dams. This expense was incurred prior to the adoption of Miraflores as the site for the lower locks and dam at the Pacific entrance of the Canal.
Item No. 89—Naos Island Breakwater. Though shown under Pacific Division, the breakwater is being constructed entirely by the Central Division with material from the Cut. Only the excess cost of dumping here as compared with regular dumps is charged to this item.
Items Nos. 42, 48, and 91—The expenditures from plant and equipment are absorbed in the construction costs on the basis of estimated cost of the plant and estimated quantities of work to be done. The amounts shown under these items represent the balances which were to be absorbed into construction costs after March 31st, 1913.
General—When the excavated material is used for filling, such as dams, back-filling, etc., the cost of dumping only is charged to the item benefited, other expenses being charged to Excavation.

DAM CONSTRUCTION.

Table No. 2.

Detailed cost per cubic yard for quarter ending March 31, 1913.

CANAL

RECORD

Volume No. VI.

ANCON, CANAL ZONE, WEDNESDAY, JUNE 4, 1913.

No. 41.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Plans for Crossing the Canal.

The plan of crossing the Canal after its completion by means of a tunnel in the vicinity of Paraiso Junction, which was at one time given consideration, has been abandoned on account of the excessive cost, and a committee consisting of Mr. A. S. Zinn, chairman; Lieut. Frederick Mears, and Mr. W. G. Comber, has been appointed by the Chief Engineer to investigate and report on a plan for utilizing car floats as a means of communication between the east and west sides of the Canal after the removal of the dike at Gamboa. One of the locations, which will probably be considered in connection with this plan is that opposite Camp Elliott, where the work of making the approaches and preparing the recesses for receiving the boats, it is believed, could be accomplished without much difficulty.

Hydraulic Work on Slides About to Begin.

The hydraulic plant installed on the plain opposite Culebra for lightening the tops of the slides on either side of Gold Hill by sluicing material away from the Cut and into the valley in rear of the hill, as outlined in THE CANAL RECORD of April 16, 1913, is to be put into operation the latter part of this week. Pipeline connections with the main of the Union Oil Company at Paraiso should be completed on Thursday, and the 4,000-barrel fuel oil tank at the pumping station will be filled quickly, while the final adjustments are being made at the engine house. Damming the Obispo River nearby has backed up enough water to start with, and it is anticipated that during the rainy season there will be no lack of supply.

The operating organization for this work took charge on June 1. It includes one assistant engineer, one general foreman, one foreman, three shift foremen, one station engineer, three steam engineers, three booster-

pump operators, and four skilled laborers; a total of 17 "gold" men. The "silver" roll includes two clerks, one messenger, three shift foremen, seven oilers, four firemen, 12 nozzlemen; 38 artisans of various designations, with rates of pay ranging from 13 to 20 cents an hour; and 30 laborers at 13 cents an hour. The total number of "silver" men is 97, and the whole force is to include 114 men.

Washington House and Hotel Washington Consolidated.

The operation of the mess at the Washington House, the frame structure on Avenue de Paez, Colon, was discontinued on June 1, and 30-cent meals will hereafter be served at the new Hotel Washington. A portion of the veranda overlooking the ocean has been screened for this purpose from the area devoted to the *à la carte* service. The second and third stories of the Washington House building will be continued in use as bachelor quarters by employees of the Panama railroad.

Towboat "Exotic" to be Sold.

The stern wheel towboat *Exotic* has been appraised by the Board of Local Inspectors, and will be offered for sale. The vessel was purchased by the Isthmian Canal Commission from the firm of Pusey and Jones, Wilmington, Del., and cost \$25,493 at the builders' yards. It was shipped to the Isthmus knocked down, and by the time it was ready for service, its total cost was approximately \$40,000. It has been in service ever since its arrival in connection with the dredging operations in the Atlantic entrance. It was believed at one time that the boat might be used to advantage on Gatun Lake, but this necessity is not now apparent.

Awards for Motor Planer Equipment.

Five reversing motor planer equipments for operating metal-cutting planers in the new machine shop at Balboa, bids for which were opened under circular No. 766, have been ordered from the General Electric Company, at a total cost of \$5,620. Delivery is promised within 130 days from date of receipt of notice of award. The equipments are for driving the following planers:

Size of planer.	Maker.	Rated hp.
60 x 60" x 24"....	Niles-Bement-Pond Co....	30
49 x 62" x 17"....	Cincinnati Planer Co....	20
42 x 42" x 12"....	William Sullers and Co....	15
42 x 42" x 8"....	Cincinnati Planer Co....	15
33 x 33" x 10"....	Cincinnati Planer Co....	10

The equipment for each planer is to consist of one motor, one contactor control panel and case, one master switch, two field rheostats, one pendant switch, one circuit breaker and one coupling. The motors will be of the commutating type, suitable for coupling direct to the driving shaft; they will be wound for operation on a direct circuit, with a normal potential of 220 volts, and must have a speed range of from 250 to

1,000 revolutions per minute. The Commission will install the equipment, and will supply all conduit and exterior wiring, with the exception of 25 feet of wire with each pendant switch.

Changes in Union Oil Company's Pipeline.

In order to serve the Canal Commission's power plants on the west bank of the Canal until such time as they can be abandoned, the Union Oil Company's pipeline is being laid across the Cut at Bas Obispo, south of Gamboa dike, and also at Paraiso, near the former site of bridge No. 57½. As this pipeline will probably remain in service until about July 1, 1914, it is being buried below the bottom of the Canal, so as not to interfere with future dredging operations. The bottom of the Canal at these points will be 39 feet above sealevel, and the pipeline is being laid two feet lower, or at plus 37 feet. On May 7, the President signed a supplementary contract with the Union Oil Company to run until July 1, 1914. Under this contract, fuel oil may be purchased by the Canal Commission in amounts up to 100,000 barrels a month.

Parkway on E Street in Colon.

The Panama Railroad Company is placing a parkway on E street, Colon, extending from Second to Ninth streets. The parking extends 36 feet on either side of the street and is to be finished with a 4-foot concrete walk along which concrete benches will be placed at convenient distances. Each section of the park will be bordered with royal palm trees, a private donation, and there will be a low hedge of hibiscus plants on the inner sides, bordering on the railroad track. The beds will be planted with shade trees, crotons, high shrubs, and flowering bushes, including oleander, crepe myrtle, and residue, a perfumed tree introduced by the French and known to the natives as French forget-me-not. The work is being carried out under the direction of the Sanitary Department, at the expense of the railroad company.

Hay for Commission Animals.

Bids for furnishing 1,800,000 pounds of hay were opened in Washington on May 3, under circular No. 771-A. The lowest bid received was, as follows: Timothy, \$1.107 per hundredweight; upland prairie hay, \$1.06 per hundredweight; alfalfa, \$1.315 per hundredweight. An award was made at these prices for supplying 600,000 pounds of upland prairie hay, and 1,200,000 pounds of timothy, delivery to be made at the rate of 300,000 pounds each month, on the basis of two-thirds timothy and one-third prairie hay. As a comparison with previous prices paid, in September, 1911, an award was made for supplying 1,600,000 pounds of wheat and oat hay at \$1.24 per hundredweight, and 1,600,000 pounds of alfalfa at \$1.1125; in October, 1912, an award was made for supplying 1,200,000 pounds

of upland prairie hay at \$1.18 per hundred-weight, and 1,200,000 pounds of alfalfa at \$1.375 per hundredweight. Under the new bid the prices for both alfalfa and prairie hay are lower than in either of the two previous years.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on May 31, being 4,459,356 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of May 31, follows:

*The figures for Gatun spillway include the concrete placed in the hydroelectric station, 235,000 cubic yards being the estimated amount required for both spillway and station.

Immigration to the Isthmus During May.

According to the figures of the quarantine service, the number of persons who landed at the port of Colon from foreign ports during the month of May was 4,553, consisting of 1,371 cabin, and 3,182 steerage passengers. The number of persons who embarked for foreign ports during the same period was 3,885, consisting of 1,979 cabin, and 1,906 steerage passengers. The number of persons who landed over those who embarked was 668. Two thousand three hundred and twenty-five of the persons arriving in steerage were from Jamaica and other West India islands; 313 were from Colombia, and 131 from

Costa Rica. The passengers arriving "in transit" numbered 1,552, consisting principally of people bound for the west coast of Central and South America, and tourists. This number is 1 779 less than in April, due largely to the falling off in tourist travel. One hundred and nine vessels arrived at Colon during May, as compared with 103 in April.

The number of persons who landed at the ports of Panama and Ancon during the month from foreign ports was 783, consisting of 584 cabin, and 199 steerage passengers. The number of persons who embarked for foreign ports was 451, consisting of 263 cabin, and 191 steerage passengers. The number of persons who landed over those who embarked was 329. The net immigration to the Isthmus during May was 997.

Fires in Colon and Cristobal.

Fire originating in a Chinese store on Hudson Lane, Colon, between Tenth and Eleventh streets, at 1 a. m. in the morning of June 3, resulted in the burning of six two-story frame buildings—four on Hudson Lane, and two on E street. The estimated loss on buildings was \$18,300, and on contents, \$5,000. Both the Cristobal and Colon fire departments responded to the first alarm.

At 1.50 a. m. on Wednesday, June 4, fire broke out in the Panama railroad paint shop at Cristobal, but was extinguished with damage of only \$15.

Tennis Tournament.

The Isthmian Tennis Association all-comers' tournament, in doubles, held at Ancon, on May 25 and 30, was won by J. T. Neely and Dr. Troy W. Earhart of Ancon. The summary follows:

D. T. Edwards and H. Bartholomew defeated J. B. Shropshire and J. C. Russell 6-3, 6-3.

B. C. Poole and G. M. Guerin defeated L. S. Rowe and E. F. Ohlson 6-8, 6-3, 6-2.

J. T. Neely and Dr. Troy W. Earhart defeated D. T. Edwards and H. Bartholomew 6-4, 6-1.

J. W. Ross and A. G. Snyder defeated J. I. Kuhn and E. W. Tupper 6-4, 7-5.

A. C. Fechtig and C. E. Nevius defeated R. W. Hart and L. H. Farquharson 6-1, 6-3.

J. T. Neely and Dr. Troy W. Earhart defeated B. C. Poole and G. M. Guerin 6-4, 6-3.

A. C. Fechtig and C. E. Nevius defeated J. W. Ross and A. G. Snyder 6-3, 7-5.

J. T. Neely and Dr. Troy W. Earhart defeated A. C. Fechtig and C. E. Nevius 8-6, 6-1.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry for the week ending May 31:

DATE.	Cubic yards.	Hours worked
May 26.....	541	2.05
May 27.....	1,800	4.40
May 28.....	1,885	6.55
May 29.....	2,841	7.50
May 30.....	Holiday	
May 31.....	1,832	7.05
Total.....	8,899	28.35

An unknown white man was found dead along the railroad track, near El Diablo, on Monday, May 26, having evidently been struck by a train. He had no papers or other articles on his person that would lead to his identification. A description of him has been sent out by the police department.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Rev. H. R. Carson of the Panama Mission of the Episcopal Church, has returned from his annual leave of absence. He has been appointed chaplain of Ancon Hospital, and of St. Luke's chapel; and, in addition, will have charge of St. Paul's church, Panama, St. Mary's church, Empire, and supervision of St. James' church (West Indian) in the same village. A schedule of services for the mission has been arranged, as follows:

St. Luke's, Ancon—Divine service with holy communion at 10 a. m., on the first Sunday in each month; holy communion at 7 a. m., and morning prayer at 10 a. m., on the second Sunday; divine service, with holy communion at 10 a. m., on the third Sunday; holy communion at 7 a. m., and morning prayer at 10 a. m., on the fourth Sunday. The Sunday school will meet at 9 a. m. every Sunday. On the second Sunday in each month, instruction on missions will be given, and the offering for that day will be used for mission work in the church.

St. Mary's church, Empire—Evening prayer every Sunday evening at 7 o'clock; when there is a fifth Sunday in the month, there will be a celebration of the holy communion at 7.30 a. m.

Culebra Commission chapel—Celebration of holy communion on the third Sunday in each month at 7 a. m.

St. Paul's church, Panama—Holy communion on the first and fourth Sundays in each month at 6 a. m. Morning service every Sunday at 11 a. m. Baptisms and marriages in the church from 12 noon to 3.45 p. m.

Rev. Mr. Carson will be at St. Luke's chapel every day from 8 to 9 a. m., and from 2 to 3 p. m.

The Altar Society of St. Ferdinand's church, Empire, will hold a euchre party in the parish house on Saturday evening, June 14. Hereafter, a similar entertainment will be held on the second Saturday evening in each month. The men's club of the church will unite with the society in carrying out the plans for these parish events. The proceeds will be for the church treasury and for mission work.

Thirteen members of the Pan-Presbyterian Congress, which has just closed in Atlanta, Ga., were visitors to the Isthmus, arriving at Colon, on Thursday, May 29. Dr. W. E. Biederwolf, an eminent Presbyterian evangelist, of Chicago, Ill., was in the party, and held mission meetings in the Commission chapel at Gatun, from Thursday to Sunday. On Sunday morning, he preached in the Cristobal Union church, returning to Gatun for the evening meeting. During the mission, the congregations were very large, the maximum being reached on Sunday evening, when there were 400 present. Dr. Biederwolf left Colon on Monday for a trip up the coast, expecting to return to sail for New Orleans on Thursday, June 5.

Case of Francisco Zaldivar.

The Supreme Court of the Canal Zone, on May 28, affirmed the decision of the lower court in the case of Francisco Zaldivar, the Panamanian, who was tried and found guilty of murder in the first degree, Justice Jackson dissenting. The date for the prisoner's execution, as fixed by the lower court, is July 11, 1913.

CANAL MEDAL SECOND BAR LIST.

Below are published the names of American employees of the Isthmian Canal Commission, who completed six years of continuous service on the Isthmus during the twelve months ending December 31, 1912, and are, in consequence, entitled to receive a second service bar for their Canal Medal. The date shown opposite each name is that on which the bar service began.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the office of the Chairman, at Culebra, for correction.

The heads of divisions are requested to check carefully their lists of American employees on the silver rolls, and report any omissions on the second bar list to the above office.

Names of employees of the Isthmian Canal Commission, entitled to a third bar, and employees of the Panama Railroad Company, entitled to medals or bars, will be published in subsequent issues.

Medal and bar service begins at the time of an employee's arrival on the Isthmus; not at the time of his departure from the United States.

(To be continued.)

BUFFERS TO PROTECT SHIPS.

Approach Walls at Locks to have Crib Fenders for Vessels which May Collide with Them.

A vessel approaching one of the Canal locks for passage will make its way toward the center guide wall, which extends over a thousand feet from the guard gates, to be taken in tow by the electric locomotives. In approaching the wall the ship may be so shifted by wind or currents as to be in danger of ramming against the end of the wall and damaging its hull. For protection against such injury, special timber buffers, wedge-shaped, are to be built in crib construction at the ends of the walls. The fenders for the sides of the approach walls and flare walls were described in *THE CANAL RECORD* of October 11, 1911; they consist of two rows, seven feet six inches apart, of 12 by 16-inch stringers, the lower of which will be about a foot above mean water level.

If a vessel strikes slantingly against a face of the wedge it will normally veer off. If the prow strikes the buffer head-on, it will plow into the timbers and the latter will suffer the greater part of the damage. Their comparatively elastic resistance will normally bring the vessel to a stop without serious injury.

The buffers for the six guide walls of the three sets of locks will be generally similar in construction, but their supports will vary according to conditions. Each buffer will project 65 feet from the end of the wall. The wedge part will be 42 feet deep, with each face about 50 feet long. In rear of the wedge, cribbing will be built on either side to extend back about 23 feet and embrace the end of the guide wall. The crib construction will be a facing around the interior support and will be about five feet thick. It will consist of 12 by 12-inch timbers, laid in the style of a log cabin, and the face will be made solid, with about seven feet overhang, by the interposition of extra timbers laid lengthwise.

Three types of supports will be used, determined by the degree of cohesiveness of the earth at the ends of the walls, and whether the surrounding water is to be fresh or salt.

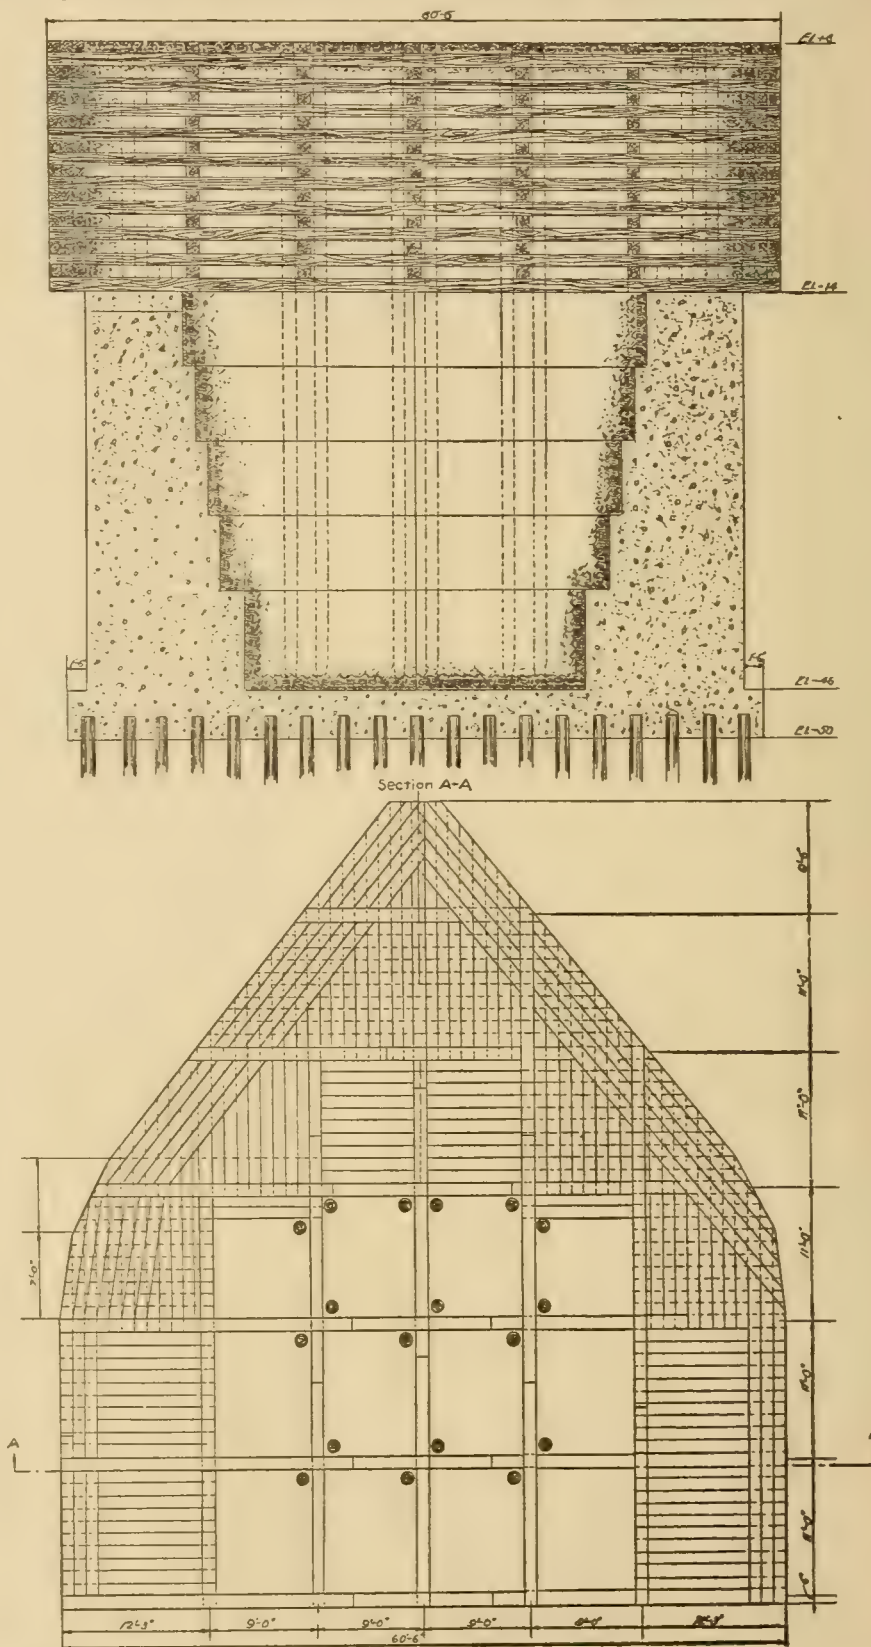

Lower ends of Gatun Locks and Miraflores Locks.—The cribs at the ocean ends of these locks are the ultimate type to which the others will eventually conform. The crib work will rest on a firm base of mass concrete, and be anchored by upright timbers to prevent side thrusting. The base will be a wall 62 feet high, following the projection of the crib. The wall will be 13 feet thick at the base, vertical on the outside, but stepped-in on the interior to a thickness of eight feet at the top. The plan and elevation of wall and surmounting crib are shown in Sketch A. At Miraflores, the base will rest on solid rock; at Gatun, the material at the outer end of the lower approach wall is soft mud in a layer as deep as 60 to 70 feet above rock, and the base for the crib will rest on piles, as the greater part of the approach wall itself does. The piles will be driven to rock, on 3-foot centers, and surmounted over all by a binding cap of concrete, three feet thick.

Upper ends of Gatun and Miraflores Locks.—The upper approach walls of these locks rest on piles and concrete caissons, respectively, sunk to rock through firm earth, which has considerable cohesiveness. On this kind of earth it is feasible to support the crib construction on four rows of piles, driven

on 3-foot centers. The crib will be held stationary, by galvanized steel bolts passing through the piles (Sketch B). The whole structure will be firm, but resilient, able to "give" to the impact of a vessel, much like the dolphins alongside a dock. When the tops of the piles above the water surface have rotted they will be sawed off and the crib

will be built and anchored upon piles wholly submerged.

Upper and lower ends of Pedro Miguel Lock.—Both center guide walls rest on rock, and this firm base extends in both directions. A reinforced concrete wall will be built (Sketch C) following the projection of the cribbing, to a height of 20 feet above the

A—PLAN AND ELEVATION OF FENDER CONSTRUCTION AT LOWER APPROACH WALLS, GATUN AND MIRAFLORES. (FOUNDATION PILES OMITTED AT MIRAFLORES)

Canal bottom. The walls will be 18 inches thick, reinforced with square twisted bars of steel. They will be tied together by bars embedded in concrete cross walls. The interior of the box will thus be divided into cells, four of which will be rectangular in plan and four triangular. The cells will be filled with earth, into which piles will be driven to anchor a floating crib. The crib

B—SUPPORT AT END OF UPPER APPROACH WALL, MIRAFLORES.

will move up and down freely with the fluctuations of the water surface. If a crib is struck by a vessel it will transmit the blow to the piles, and the combined structure through its elastic resistance will minimize the damage done to the vessel. When the parts of the piles exposed to air have rotted the piles will be sawed off below the water sur-

C—ARRANGEMENT AT UPPER APPROACH WALL, PEDRO MIGUEL.

face, and cribs will be built and anchored upon them.

The construction of the boxes at the ends of the two approach walls of Pedro Miguel Lock and the base at the end of the lower approach wall at Gatun has been completed. Contract has been awarded through the Washington office of the Commission to W. R. Grace and Company for furnishing 912,000 feet, board measure, of 12 by 12-inch yellow pine, or Douglas fir lumber. Bids have also been invited on the requisite quantities of drift bolts, anchor bolts, etc., heavily galvanized. Of the lumber, 636,000 feet will be creosoted, for use where exposed alternately to water and air, and in sea water.

PERSONAL.

Col. Geo. W. Goethals, accompanied by Mrs. Geo. R. Goethals, sailed for New York on Tuesday, June 3, on the steamer *Pastores* of the United Fruit Company's service.

Mr. Joseph Bucklin Bishop, accompanied by his wife and daughter, sailed for New York on the *Ancon* on Tuesday, June 3, on his annual leave.

Justice Thomas E. Brown, Jr., accompanied by Mrs. Brown, sailed on the *Panama* on Sunday, June 1, on his annual leave of absence.

Justice William H. Jackson, accompanied by his family, will sail for the United States on the *Allianca*, which is due to leave Cristobal on Saturday, June 7.

Mr. J. A. Smith sailed for New Orleans on the *Heredia* of the United Fruit Company's service, on Saturday, May 31.

Dr. C. A. Hearne, quarantine officer at Colon and Cristobal, sailed for the United States on Sunday, May 22, on vacation leave.

Tramways Nearly Ready for Operation.

The delay in operation of the new Panama-Ancon-Balboa tramways system has been due to the nonreceipt of cars. The first shipment of these cars, three in number, is due to arrive on Thursday of this week, and, hereafter, two will be shipped from the United States each week until the entire 15 has been received. The cars are of wooden body, single-truck type, and cost about \$6,000 each. The two rotary converters for transforming the current from the Miraflores power plant arrived last week and are in position, so that construction work is now practically completed. The local system will be under the same management as that of the Costa Rica Electric Light and Traction Company of San José, with Mr. W. N. Brand in charge of both enterprises. A representative of the consulting engineer for the tramways company has been engaged during the past week in examining the system, and arranging for liquidation of the contract under which Messrs. R. W. Hebard and Company undertook to complete the system ready to operate.

Notice to Mariners.

COLON, R. P., June 1, 1913.

Information has been received from the commander of the West India and Panama cable ship *Henry Holmes* that there will be, until further notice, "Telegraph buoys" in the following named position, namely: Lat. 11° 50' N. and Long. 78° 50' W. These buoys will be in the track of vessels plying between Colon and Jamaica, and should be given a wide berth. J. St. C. HUNT,

Port Captain.

FOURTH OF JULY EVENTS.

Program Outlined for Athletic and Aquatic Contests.

The following tentative program of field and aquatic athletic events contemplated for the Fourth of July celebration at Cristobal is published for the information of prospective entrants:

FIELD EVENTS.

1. 100-yard low hurdles
2. Shot put
3. Boys' 75-yard dash
4. 100-yard dash, preliminaries and semi-finals.
5. 880-yard run
6. Running high jump.
7. 100-yard dash, finals.
8. 440-yard run.
9. Running broad jump.
10. Wall-scaling contest.
11. Boys' relay.
12. Pole vault.
13. Potato race.
14. Tug-of-war.
15. 220-yard dash.
16. One mile relay.
17. Marathon race. This will start at Colon Hospital gate, thence down the Colon Beach road to Christ Church, thence down Bolivar street to Eleventh street, up Eleventh street into Cristobal, and along Palm avenue to finish line in front of building No. 2, Cristobal Point. Total approximate distance of race course, one and three-quarter miles.

Entry blanks may be procured at the different Commission clubhouses within a few days. Entries, and communications regarding entries, should be addressed to Assistant Secretary Woolworth of the Gatun Y. M. C. A., who will act as clerk of the course. Mr. C. C. Carr of Empire is chairman of the subcommittee on athletic events

AQUATIC EVENTS.

1. 50-yard swimming race.
2. 100-yard swimming race.
3. 1-mile swimming race.
4. 200-yard relay race
5. Fancy diving contest.
6. Form dive.
7. 1-mile paddling canoe race.
8. 50-yard ladies' swimming race.
9. 50-yard boys' swimming race.

There will be exhibition drills by the Tenth Infantry and the United States Marine Corps, wall-scaling contest, equipment races, etc.

The Canal Zone fire department will also participate in the celebration.

TENNIS TOURNAMENT.

The tennis tournament will be held, as follows:

June 15, 23, and 30—Preliminaries, in singles and doubles, to be played at Ancon.

July 4—Finals in singles at Cristobal, at 10 a. m.

July 4—Finals in doubles at Cristobal, at 2. 30 p. m.

An entrance fee of 25 cents will be charged. Entries close on Wednesday, June 11, and are to be forwarded to Mr. H. Bartholomew, Pedro Miguel, C. Z.

A new edition of the Manual of Information regarding employment for service on the Isthmus, with certain revised specifications, will be issued from the Washington office of the Commission about June 15.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week June 9 to 14 is, as follows: Monday, Gatun; Tuesday, Gorgona; Wednesday, Culebra; Thursday, Empire; Friday, Cristobal and Porto Bello; Saturday, Corozal.

CULEBRA

Dr. Frederic Poole of Philadelphia gave a talk on the "Chinese revolution and the humor of the Chinese written language," illustrated by chalk on blackboard, on Tuesday evening, May 27. Dr. Poole was for 10 years a missionary in China and more recently spent seven months there taking moving pictures. He is also a personal friend of Dr. Sun Yat Sen. On the excursion of May 30, Dr. Poole joined the party at Gamboa and made moving pictures of the Canal through the Cut and the Pacific entrance. A basket lunch was eaten on the train and lemonade was served.

High scores for the week in duckpins were, as follows: DeCora 103, 103, 109; Kiernan 100, 100; Johnson, C. J., 101; Leonard 100; Anderson 102, 106; Case 102.

High scores for the week in bigpins were, as follows: Warner 223, Johnson 200; Hobbs 200.

All interested in a tenpin tournament are requested to sign their names to the poster in the bowling alley.

EMPIRE.

On Sunday evening, June 1, about 300 people heard Dr. Poole give his second lecture on "Old China and the Great Wall." Special music was furnished by Miss Cervera of Panama.

An invitation duckpin bowling tournament was held on May 30, in which men from Cristobal, Gatun, Gorgona, Culebra, and Corozal took part. There were 61 entries in all. The results were:

Singles—First, Huson of Empire, score 304; second, Wurster of Gatun, score 297; third, Herrington of Cristobal, score 288.

Doubles—First, Pinney and Rodeghiero of Empire, score 564; second, Graham and Diedrich of Empire, score 555; third, Sims and King of Gorgona, score 553.

High single score was made by Wurster of Gatun, score 111; he also made high score for six games, score 578, an average of 96 1/3 per game.

Fifty-eight new library books have been placed in the library.

The play, "She stoops to conquer," will be given by the Canal Zone high school on Monday evening, June 9.

GORGONA.

Two extra reels were shown at the motion picture entertainment on May 27. Special music was furnished by Mrs. Kramer, who sang several solos, and Mr. and Mrs. Kramer, in a duet.

The debating club postponed its meeting on account of the concert given by the Lyon company.

The Gorgona men are training steadily for the celebration on the fourth of July.

The gymnasium classes meet twice a week. The times for meeting are Tuesday and Friday nights. There is room in the classes for more, and men are urged to join. A special class has been organized to meet three times a week from 5.10 to 6.30 p.m. for the purpose of playing volleyball, and other games. There are now 12 members enrolled. The teams are being organized for a special contest, and will be ready to meet any other on the Isthmus.

The Gorgona indoor baseball team defeated Gatun at Gorgona on Saturday evening by a score of 37 to 7. Following was the lineup:

Gorgona—J. Ridge, C. Sims, Clements, Christensen, S. Ridge, Herring, Johnson.

Gatun—Roberts, Caruthers, Wright, Stevens, Duer, Mathers, Carter.

Umpire—Dickson. Linesman—Emery.

Dr. Frederick Poole gave an interesting lecture on the humor of the Chinese and their language. He was requested to make a return engagement.

CRISTOBAL.

Miss Anais Maria Cervera gave a number of piano selections, and Mr. S. P. Verner gave a lecture on the cannibals and pigmies of Central Africa, at the meeting of the "Forum," on Wednesday evening, May 28.

A return engagement of the Mary E. Lyon Concert Company will be given on June 11. This will be the last of the United States entertainments for some time. The company will give an entirely new program.

The next number in the series under the direction of the "Forum" will be a lecture on the "Humor of the Chinese written language," by Dr. Frederic Poole, on Friday, June 6. Judging from the large houses that have listened to Dr. Poole at other points, this will prove

an interesting event for the Cristobal people. The lecture will be illustrated by chalk on blackboard.

COMMISSARY DEPARTMENT.

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

Cold Storage.

Prices of cold storage supplies remain as published last week, with these exceptions:

Eggs, per dozen, 27 cents; half-dozen, 14 cents;
Butter, creamery special, per pound, 34 cents;
Cucumbers, per pound, 8 cents;
Squash, per pound, 4 cents.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission, and Panama Railroad Company, arrived at the ports of Cristobal and Colon, during the two weeks ending May 31:

Carrillo, May 18, from New York, with 200 pieces car wheels, 14 barrels journal bearings, Mechanical Division; 49 pieces structural steel, Administration building; 74 barrels paint, 127 cases soap, 257 coils Manila rope, 12 cases hardware, for stock.

Cuban, May 18, from Liverpool, with 19 pieces dredge parts, 6 packages cable and parts, for Sixth Division.

Niederwald, May 18, from Hamburg, with 12 cases valve machinery, for First Division.

Cartago, May 19, from New Orleans, with 70 pieces piling, 9,266 pieces lumber, 278 pieces cross-ties, 1,090 bales alfalfa hay, 4 crates ranges, for stock; 1,204 pieces lumber, 6 reels steel cables, 84 tons pig iron, Mechanical Division; 35 pieces cast iron pipe, Fifth Division.

Prins Joachim, May 19, from New York, with 50 packages switches, 12 cases hardware, for stock.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa, at 9 o'clock Tuesday, Thursday and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

The National Navigation Company of Panama will have sailings for Aguadulce and Pedregal, from Panama, on June 10, and 25, and the Panama Steamship Company on June 7, 16, and 25.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba on Tuesdays; the *Prins Joachim* and *Prins August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurs* at 2 p. m.

OFFICIAL CIRCULARS.

Acting Chairman and Chief Engineer.

CULEBRA, C. Z., June 2, 1913.

CIRCULAR No. 488:

During my absence from the Isthmus, Col. H. F. Hodges will be in charge of the work as Acting Chairman and Chief Engineer, effective June 3, 1913.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Commissary Coupon Books.

CULEBRA, C. Z., May 28, 1913.

CIRCULAR No. 256-K:

Effective June 1, 1913, the issue of commissary coupon books of the value of \$2.50 and \$5.00, for which collections are to be made on payrolls, may be limited in any one month to two 5-dollar books for gold employes and two \$2.50 books for silver employes.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Redemption of Unused Hotel or Commissary Books

CULEBRA, C. Z., June 1, 1913.

CIRCULAR No. 256-L.

Hereafter, employees leaving the service of the Isthmian Canal Commission may have unused coupons in hotel or commissary coupon books redeemed by the Disbursing Officer of the Commission at Empire or at the branch pay office at Cristobal or Ancon.

Employees of the Panama Railroad Company leaving the service should present hotel and commissary coupon books containing unused coupons to the Local Auditor of the Panama Railroad Company at Colon for redemption.

Unused coupon books of deceased employes should be forwarded to the Examiner of Accounts at Empire for refund to their estates in case of Commission employes, and to the Local Auditor of the Panama Railroad Company at Colon in case of railroad employes.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Port Captain, Port of Cristobal.

CULEBRA, C. Z., May 31, 1913.

CIRCULAR No. 410-B:

Effective May 25, 1913, Mr. J. St. C. Hunt was appointed captain of the port of Cristobal.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Hand Oilers and Oil Containers.

CULEBRA, C. Z., June 1, 1913.

CIRCULAR No. 338-D (Superseding Circulars Nos. 338, 338-A, 338-B, and 338-C):

Hereafter, the following hand oilers and oil containers only shall be used, and shall be considered as the I. C. C. and P. R. R. standard. Any other hand oilers or oil containers that may be in stock, however, may be used until the supply is exhausted. All replenishment of same shall be in accordance with the following list:

No. 40. 'Twenty-four-inch spring hand oiler, for use on standard gage locomotives only, capacity, 2 pints.

No. 41. Locomotive tallow pot, for use on locomotives, steamshovels, pumps, portable and stationary plants, and at power plants for filling lubricators, etc., capacity, 2 quarts.

No. 42. Stationary engine oilers, for general use around stationary power plants, on air compressors, and marine engines, etc., capacity, 2 pints.

No. 43. Standard squirt oiler (length of nozzle 4 1/2" diameter 4 3/32"), for use on floating equipment, on portable and stationary plants, and on machinery in general, capacity, 1 pint.

No. 44. Oil can with screw cover and spout, for use on locomotives and small equipment, capacity, 1 gallon

No. 45. Oil can with screw cover and spout, for use on locomotives and small equipment where 1-gallon can is not suitable, capacity, 2 gallons.

No. 46. Oil can with screw cover, for use on steamshovels and floating equipment, capacity, 5 gallons

No. 47. Eighteen-inch spring hand oiler (same as type No. 40) for use on dredges, cranes, cableways, steamshovels, narrow-gage locomotives and smaller equipment, capacity, 2 pints.

All hand oilers and oil containers shall be plainly marked with the I. C. C. and P. R. R. standard number given in the above list and with the name of the oil contained. They shall be kept clean and in good repair.

Requisitions for the above will be honored by storekeepers only for the purpose indicated, and they may be specified on requisition either by number or by name.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Method of Submitting Daily Car Reports.

CULEBRA, C. Z., May 31, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The following form should be used by departments and divisions in submitting the daily car reports required by the Chairman's instructions of the 21st instant:

"The following cars had been held under load by this division (or department) for more than 24 hours at the close of business.....
Car No..... Kind..... Date rec'd.....
Contents..... Cause of delay....."

If there are no cars to report the form should be submitted, nevertheless, with the information "None to report."

These reports are required from the First Division, Second Division, Fifth Division, Fortifications Division, Atlantic Division, Central Division, Mechanical Division, Quartermaster's Department and Subsistence Department.

It is noted that some divisions are failing to send copies of these reports to the General Superintendent of the Panama Railroad. A copy of each report must be sent to him.

By direction of the Chairman.

C. A. McILVAINE,
Chief Clerk.

Acting Chief Dispatcher, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., May 28, 1913.

CIRCULAR No. 92:

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Concrete Work at Pacific Locks.

The concrete work on Miraflores Locks proper was completed on May 17, on which date the finishing course was placed on the end of the southwest wing wall. The uncompleted concrete at that time consisted of miscellaneous work, such as bracket extensions for supporting the return tracks on some of the wing walls; reinforced concrete floor and stairway at junction of upper and lower middle wall; lamp post and snubbing button bases, etc. The reinforced concrete floor and stairway in the middle wall at the junction between the upper and lower locks at Miraflores was completed on Tuesday, June 10. Total amount of concrete in the Miraflores Locks to date, is 1,481,518 cubic yards.

The concrete work in the Pedro Miguel Lock proper has been finished for some time, with the exception of opening in side of wall and caisson dam sill, left in August, 1911, through which the drainage water from Culebra Cut enters the main center wall culvert just north of the emergency dam sill, to be discharged through the outlet openings at the south end.

The total amount of concrete placed in Pedro Miguel Lock is 909,292 cubic yards, making a grand total of 2,390,810 cubic yards for both Pedro Miguel and Miraflores Locks.

The first concrete was placed in the Pedro Miguel Lock on September 1, 1909, with auxiliary equipment. The concrete-handling plant used in building both Pedro Miguel and Miraflores Locks, consisting of four berm and four chamber cranes, began operations at Pedro Miguel in April, 1910.

The first concrete was placed in the Miraflores Locks in July, 1910, with auxiliary equipment. The two berm cranes, which were originally erected at Miraflores, were both in service in April, 1911, and those used at Pedro Miguel (two berm and four chamber cranes) were moved one at a time, covering

a period of about one year, all being reerected and in full service at Miraflores on March 26, 1912.

During the construction of Pedro Miguel and Miraflores Locks high records in making and placing concrete were established, as follows:

	Cubic yards.
Concrete placed in one day.....	5,560
Concrete placed in one week.....	26,959
Concrete placed in one month.....	107,000
Concrete placed in one year.....	934,410

Highest record for making and delivering concrete to wall forms by one berm crane was 962 cubic yards in 8 hours and 30 minutes, during which time this crane made a high run of 160 cubic yards in one hour.

Dredge Excavation Records Made in May.

The total excavation by dredges during May was greater than during any previous month since the beginning of the Canal construction. The total output from Atlantic and Pacific entrances was 1,522,102 cubic yards. Of this, 957,889 cubic yards were from the Atlantic entrance channel; a large part of it, however, was in the removal of silt from the previously excavated channel. About 300,000 cubic yards of this relatively light material were pumped out by the pipeline suction dredge No. 4, operating opposite the mouth of the Mindi River, in the French Canal.

Excavation in the first district of the Sixth Division, covering the Pacific entrance channel and Balboa harbor, amounted to 564,213 cubic yards, about an average output for the fleet. The dipper dredge *Cardenas* established a local record for rock excavation in deep water; on June 4, it removed 1,750 cubic yards of hard rock from a depth of 45 feet below mean sealevel in nine hours and 45 minutes of actual working time. On account of the great depth of the channel, the dredge is able to work only between mean ebb tide and mean rising tide, which allows two watches of five hours each in 24 hours. A delay of 15 minutes was caused by a hot bearing.

Navy Radio Station at Balboa.

The radio station at Balboa, operated by the Navy Department, has opened for commercial business, transmitting messages to ships on the Pacific side of the Isthmus at the rate of eight cents a word. The range of delivery is about 200 miles in the daytime, and up to approximately a thousand miles at night, when the atmospheric conditions are favorable. The station has direct wire connection with the Panama railroad telegraph and telephone lines.

The 2-kilowatt plant, with which the station is equipped, was made by the Wireless Improvement Company of New York. It uses a "break system", which allows a receiving station to break in on the transmission of a message, in order to ask for repetition or explanation. In the intervals when the send-

ing key is released between dots and dashes it opens a relay in the receiving circuit and the operator is able to hear calls from other stations. Electricity is received from the nearby power plant of the Isthmian Canal Commission and transferred by the apparatus to a high frequency oscillating current, and as such, is radiated by the antenna at 12,500 volts. The antenna is attached at one end, to the smokestack of the power plant, and at the other, to a steel frame tower, about 110 feet high. Messages are sent with the Continental code, under the rules of the Berlin Convention of 1912, governing international wireless telegraphy. Four operators are employed at the station, working on 4-hour shifts, day and night.

Preparations for Dredging Cucaracha Slide.

A relay pumping station is being installed on the west side of Culebra Cut, near the bridge of the Panama railroad over the Rio Grande, in anticipation of dredge excavation at the foot of Cucaracha slide. The plan as at present contemplated involves passing the discharge pipeline of two suction dredges across the Cut on pontoons, and up the west bank to the relay station; thence down the valley of the Rio Grande about 4,000 feet to discharge west of Cerro Luisa, the hill at the outer end of Pedro Miguel Dam. It is probable that an earth dam will be thrown from the lower end of Pedro Miguel Lock to the hills on the other side of the river, a distance of about 1,500 feet, and the swamp west of the lock will be filled with spoil from the slide.

Bridge on Ancon-Corozal Road.

The only stream crossed by the Ancon-Corozal wagon road over which it will be necessary to construct a bridge is the Curundú River, which flows across the Panama railroad right-of-way a little south of the Balboa wye. The plans for this bridge, which have been approved, provide for a reinforced concrete structure, consisting of a single span 20 feet long between piers, with a width of 17½ feet over all, and a clear width of 15½ feet. The floor supports will consist of concrete beams, two center beams, each 13 inches wide, and two outer beams, one on each side of the center beams, each two feet six inches wide, all placed longitudinally. These beams will carry the floor slabs, five inches thick, laid transversely. The outside beams will be formed into parapets about a foot high, to be surmounted by iron railings, consisting of two rows of 1½-inch gas pipe, with posts of 2-inch gas pipe spaced seven feet apart. The floor of the bridge will have a 2-inch slope from the center toward the sides to insure proper drainage.

The bridge span will be supported by two abutments of T-shaped design, 12 feet in height and 14 inches thick at the bottom, resting on concrete bases, each six feet wide and

two feet thick, resting, in turn on 25 piles. The piers will narrow toward the top, and from their sides, wing walls will be built out for a distance of 10 feet, at an angle of 45 degrees. These wing walls are designed to protect the approach fills; they will slope toward the top, and are provided with counterforts at the bottom of the outer ends.

About 8,750 pounds of steel, 92 feet of 1½-inch pipe, 28 feet of 2-inch pipe, and 131 cubic yards of concrete will be required for the work, which is estimated to cost \$2,500. Preliminary work on the bridge was begun on Friday, June 6.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on June 7, being 4,461,597 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of June 7, follows:

*Includes hydro electric station.

Following the petition of persons representing 16 families living at Camp Diablo, for 'bus service to and from the Corozal station of the Panama railroad, it has been arranged to have the 'bus make a trip from Diablo to the station to meet trains Nos. 2 and 3, at about seven in the morning, and also to meet the train from Panama at 5.33 p. m.

FOURTH OF JULY PROGRAM.

Complete List of the Day Events at Cristobal Announced—Reports of Committees.

A meeting of the executive committee of the Fourth of July celebration was held at Ancon on Tuesday, June 10, the chairman, Mr. M. H. Thatcher presiding. Reports were submitted showing that the plans for the day's events were well under way, and summarized, are as follows:

Entertainment—The official program for the day was presented and adopted. Pier No. 16 will be used as general headquarters, including the serving of refreshments, which will begin at 12 noon. It will be extensively decorated, as well as the houses along Roosevelt avenue, and at night, both the pier and street will be illuminated with colored electric lights. A request received from the superintendent of the Palo Seco leper asylum for a supply of bunting and Chinese lanterns for decorative purposes in the grounds of the institution will, if practicable, be granted.

Finance—The most of the blank forms for the use of this committee have been printed, and the canvass for funds will be begun at once.

Fireworks—The order for fireworks went forward on May 26, and the shipment is expected to reach the Isthmus the latter part of this month.

Dance and music—The dance in the evening will be held at pier No. 16, and, in case of rain, the dancers will be protected by a canvas roof. The bands of the Tenth Infantry and the United States Marine Corps have been engaged for the day events, and the Tenth Infantry orchestra for the dance.

Transportation—Arrangements for the running of trains are well in hand. The first train to arrive in Colon will be the one carrying the men of the Tenth Infantry and Marine Corps. It is expected that the last of the morning trains will have discharged their passengers by 9 o'clock.

A letter was read from Colonel Goethals stating that it would be impracticable for him to deliver the Fourth of July address, and Col. W. C. Gorgas has been chosen for this feature.

The matter of appointing a new chairman of the executive committee to succeed Mr. M. H. Thatcher, who has resigned as a member of the Isthmian Canal Commission, was referred to Col. H. F. Hodges, the Acting Chairman and Chief Engineer.

The program for the day events, in full, follows:

- A. M.
- 8.45 Musical drill, Butt's Manual, by a company of the Tenth Infantry.
 - 9.00 100-yard low hurdles. Prizes; gold, silver, and bronze medals.
 - 9.00 Shot put. Prizes; gold, silver, and bronze medals.
 - 9.00 Start of tennis finals, in singles, Prizes; gold, silver, and bronze medals.
 - 9.00 Sailing canoe race. Distance, 1½ miles. Course, start from between piers Nos. 16 and 17, around buoy in bay, and return. Prize; pennant.
 - 9.15 Boys' 75-yard dash. Prizes; sterling silver watch, gold cuff links, and gold stick pin.
 - 9.15 Lifeboat race, Class 1. Four-oared, single-scutt, and coxswain. Distance, one mile, straight-away. Start from buoy in bay, finish between piers Nos. 16 and 17. Prizes; \$25 and \$15.
 - 9.20 Navy steam cutter race. Distance, about five miles. Triangular course in bay; start and finish opposite pier No. 15. Prize; pennant.
 - 9.30 100-yard dash. Preliminaries and semifinals.
 - 9.40 Gasoline boat race. Gasoline boats, *Dixie*, *Psyche*, and *Lirio*. Distance, about five miles.

- Triangular course in bay, start and finish opposite pier No. 15. Prize; \$15.
- 9.45 880-yard run. Prizes; gold, silver, and bronze medals.
- 9.45 Running high jump. Prizes; gold, silver, and bronze medals.
- 10.00 100-yard dash. Finals. Prizes; gold, silver, and bronze medals.
- 10.00 Gasoline boat race, free for all. Distance, about five miles. Triangular course in bay, start and finish opposite pier No. 15. Prize; \$15.
- 10.15 440-yard run. Prizes; gold, silver, and bronze medals.
- 10.15 Running broad jump. Prizes; gold, silver, and bronze medals.
- 10.15 Wall-scaling contest. Prize; \$40 to winning team.
- 10.15 Paddling canoe race. Distance, one mile. Course from buoy in bay to finish between piers Nos. 16 and 17. Two-man teams. Prizes; two gold, two silver, and two bronze medals.
- 10.30 Boys' relay. Prizes; sterling silver watches to winning team.
- 10.30 Pole vault. Prizes; gold, silver, and bronze medals.
- 10.45 Potato race. Prizes; \$5, \$3, and \$2.
- 10.45 Tug-of-war. (8-men teams). Prizes; \$40 to winning team.
- 11.00 220-yard dash. Prizes; gold, silver and bronze medals.
- 11.15 One mile relay (four men). Prizes; Four gold medals to winning team.
- 11.15 Marathon race, to start at Colon Hospital gate, thence down Colon beach road to Christ Church, thence down Bolivar street to Eleventh street, thence into Cristobal, and along Roosevelt avenue to finish point opposite building No. 2. Prizes; gold, silver, and bronze medals.
- 11.30 Patriotic exercises. Address to be made by Col. W. C. Gorgas.
- 12.00 Lunch.
- P. M.
- 1.00 Drill by boy scouts.
- 1.30 Tugboat race, between the *Empire*, *Porto Bello*, *Mariner*, *Bohio*, and *Gatun*. Distance, five miles. Course, straightaway from starting buoys opposite end west breakwater to finish at buoys opposite pier No. 16. Prize; \$60.
- 2.00 50-yard swimming dash for men. Course, between piers Nos. 16 and 17. Prizes; gold, silver, and bronze medals.
- 2.10 Fancy diving contest for men. Height, 16 feet. Each contestant to have five dives, three specified-front, back, and 1½; two optional. Prizes; gold, silver, and bronze medals.
- 2.10 50-yard tub race. Course, between piers Nos. 16 and 17. Prizes; \$10 and \$5.
- 2.15 Aquatic wrestling match, free for all. To take place on 30-foot greased floating platform between piers Nos. 16 and 17. Winner to be last man on platform. Prize; \$25.
- 2.30 Swimming race for men. Distance, one mile. Course, between piers Nos. 16 and 17. Prizes; gold, silver, and bronze medals.
- 2.30 Tennis finals, in doubles. Prizes; two gold, two silver and two bronze medals.
- 2.35 50-yard swimming race for women. Course, between piers Nos. 16 and 17. Prizes; gold, silver, and bronze medals.
- 2.50 100-yard swimming race for men. Course, between piers Nos. 16 and 17. Prizes; gold, silver, and bronze medals.
- 3.00 60-foot form dive. Each contestant to make three dives. Prizes; gold, silver, and bronze medals.
- 3.00 Upset canoe race. Two-man teams. Distance, 1,000 feet. Course, between piers Nos. 16 and 17. Contestants to start at first pistol shot; at second pistol shot to upset canoes, filling them with water, righting same, re-entering canoes entirely, and resume paddling to finish. Prize; pennant.
- 3.15 Aquatic jousting tournament. Two-man teams. Between piers 16 and 17. Prize; \$20.
- 3.30 50-yard swimming race for boys under 16 years of age. Course, between piers Nos. 16 and 17. Prizes; sterling silver watch, gold cuff-links, and gold stick pin.
- 3.35 Relay swimming race for men. Distance, 200 yards. Four-man teams. Course, between piers Nos. 16 and 17. Prizes; four gold medals to winning team.
- 4.00 Volunteer fire company races.
- 6.00 Fire department exhibition.

Address entries for the aquatic events to Mr. W. J. White, dock No. 13, Cristobal; for the athletic events to Mr. P. T. Woolworth, Y. M. C. A., Gatun.

WORK AMONG THE SAN BLAS.

Miss Annie Coope, American Missionary, Establishes Mission with Rio Diablo Tribe.

Miss Annie Coope, the American missionary, who left on February 20 to open a mission among the San Blas Indians at San José Nirgana, a settlement on an island of the Mulatas Archipelago, at the mouth of the Rio Diablo, returned to Colon on May 28, to lay in a fresh stock of supplies. She is the first American woman missionary, and possibly the first English-speaking missionary, who has ever succeeded in obtaining a foothold among these Indians, who, from time immemorial, have been noted for their exclusiveness.

Miss Coope made her first attempt in 1909, stopping at two of the Indian villages, but could not obtain permission to stay. She then turned her attention to other fields, but never relinquished the idea of making another effort. During the interval between her first and last visits, negotiations were conducted with the chief of the Rio Diablo tribe, with the result that she ultimately succeeded in obtaining from him an invitation to take up her residence in his village.

She made her second voyage in a sailing vessel that stopped at various trading points along the coast, and nine days were spent on the way, although the distance from Colon is only about 100 miles. Her trunk and part of her supplies were sent on ahead. She was hospitably received, notwithstanding an attempt had been made previous to her arrival to prejudice the feeling of the people against her and her work. The Indians, however, were very desirous that their children should acquire a knowledge of English, and it is to this task that Miss Coope has principally applied herself during her three months' stay among them.

She was assigned quarters in the only house with a corrugated iron roof in the village, which, with the lean-tos, gave her ample living accommodations, as well as room for the school. In the class which she formed, there were several boys who displayed considerable aptitude in the spelling of English words. In a particular instance, one boy was able to spell 100 words correctly within the space of one month after his entry in the school. Miss Coope's method has been to impress the words on the student's memory with the aid of some object familiar to them, as a table, lamp, candle, etc. The parents evince considerable interest in the children's progress, and always appear pleased when informed that they are learning rapidly. The girls of the village, she found, took less interest in the school, and were more difficult to handle. Now and then, she holds an old-fashioned spelling "bee," in which the elders join, for they appear equally desirous of understanding the language. She has made some progress in acquiring the Indian speech, and devotes a part of her time regularly in perfecting her knowledge of it.

Life in Nirgana is very simple, and, while exceedingly lonely at times, Miss Coope feels that it is the beginning of a great work, and is well satisfied with the progress she has made so far. Food supplies, to which the average person is accustomed, cannot be obtained in the village, and have to be brought from Colon. The Indians live principally on fish, turtle meat, a few native vegetables, and fruit. Beefsteak is never seen, as there are no cattle. Formerly, Miss Coope received her mail about

once in from six to eight weeks. A new trading line was recently established, which operates a gasoline launch along the coast east of Colon, and it has reduced the time of traveling between that city and Rio Diablo to about 16 hours. Miss Coope returned to her mission, accompanied by the chief's little son, who was with her on the trip, on Saturday, June 7.

PERSONAL.

Mr. H. Percival Dodge, Envoy Extraordinary and Minister Plenipotentiary of the United States at Panama, sailed for the United States on the *Tivives* of the United Fruit Company's service, on Tuesday, June 10, on three months' leave of absence.

Congressman Harry H. Seldomridge of Colorado, accompanied by his wife and two daughters, arrived on the Isthmus on the *Colon*, which docked at Cristobal on Sunday, June 8.

Congressman Michael F. Conry of the Fifteenth New York District, with residence in New York City, accompanied by his secretary, arrived on the *Cristobal* on Tuesday, June 10. He is a member of the House Committee on Accounts and Committee on Rules.

The resignation of Mr. L. D. Cornish, who for the past five years has been designing engineer under Col. H. F. Hodges at Culebra, became effective on June 1. He was born on March 30, 1877, at Lee Center, N. Y., and served as a private from June 17 to November 30, 1898, in the Spanish-American War, in Company C, Third New York Volunteers. In June, 1902, he graduated from Syracuse University, with degree of civil engineer, and was with the New York Central and Hudson River Railroad from June to September, 1902. From September, 1902 to September, 1906, he was with the United States Engineer's Department at Pittsburgh, Pa., on design and construction of locks and movable dams on the Ohio River, and for the last three years of this period was under Lieut.-Col. William L. Sibert. He was next ordered to Washington by the Chief of Engineers, U. S. A., to assist in the work of the International Consulting Board, appointed to decide upon the type of Canal, and served with the Board from October, 1905, to February, 1906. In September, 1906, he received his appointment with the Isthmian Canal Commission, and was assigned to the work of designing the spillways and protective features of the Canal. In June, 1907, he was ordered to the Isthmus by Colonel Goethals, and appointed designing engineer under Colonel Sibert. In September, 1907, he was placed at the head of the subdivision of the Chief Engineer's office, charged with the general lock design, masonry, reinforced concrete, and valves, which post he held until the designs were completed. Mr. Cornish will return to the United States about June 17.

Deposits Required from Canal Zone Water Users.

In order to avoid loss to the Government from uncollected water rents, the Acting Chairman of the Commission has approved the recommendation of the Head of the Department of Civil Administration that, due to the early depopulation of the Canal Zone and the abandonment of towns therein, it has been deemed necessary to require all water consumers in the Canal Zone to deposit the estimated quarterly rental for each water connection not later than July 15, 1913.

Regular quarterly bills will be rendered thereafter, as contemplated by the ordinance, which must be paid by the water consumer within the time allowed. When the connection is eventually disconnected final payment of water rental due will be deducted from the amount on deposit, and the balance will be returned to the water consumer. Deputy Collectors of Revenues have been instructed to mail to each consumer in the Canal Zone written notice of this change from the procedure heretofore followed.

Resignation of Mr. Thatcher.

The resignation of Mr. Maurice H. Thatcher, as a member of the Isthmian Canal Commission, and Head of the Department of Civil Administration, to take effect at the expiration of his vacation leave on August 8, 1913, was forwarded to the Secretary of War on Tuesday, June 3. He was appointed a member of the Canal Commission by ex-President Taft on April 12, 1910, and on May 13, was placed in charge of the Department of Civil Administration of the Canal Zone, and entered upon the discharge of his duties.

Mr. Thatcher was born in Chicago, Ill., but was reared in Kentucky. In 1898, in Frankfort, he was admitted to the practice of law, and shortly afterward was appointed assistant attorney general of the state, a post he held until 1900. He was made Assistant United States Attorney for the Western District of Kentucky, on July 1, 1901, an office he held until he resigned on August 1, 1906, and entered upon the general practice of his profession in Louisville. He continued the practice of law until March, 1908, when he was appointed state inspector and examiner for Kentucky, from which position he resigned to take membership on the Canal Commission.

Mr. and Mrs. Thatcher will sail for New York on the *Colon*, leaving Cristobal on Saturday, June 14, and from there will go to Frankfort, Kentucky.

Death by Asphyxiation.

Jonathan Bentley, a native of St. Vincent, check No. 178122, employed in the Second Division at the Balboa terminals, was asphyxiated at the bottom of a caisson pit, 75 feet below the surface, at pier No. 1, at 6.45 a. m., Thursday, June 5. Joseph Velox, St. Vincentian, check No. 160859, who went down the pit to investigate Bentley's case, was also overcome, and as the bucket in which he was lowered was drawn to within seven or eight feet of the top, he fell to the bottom, and was dead when reached. A third man, Joseph Williams, who went down into the pit, became unconscious, but afterward revived.

I. B. of S. S. and D. M.

The International Brotherhood of Steamshovel and Dredgemen will hold its next meeting at the Empire lodge hall, on Sunday, June 15, at 12.15 p. m. All members are requested to attend.

Empire, C. Z. June 8, 1913.

JOHN I. MAJOR,
Secretary and Treasurer.

Missing Men.

Any one having information regarding the whereabouts of John Bradley, formerly with McClintic-Marshall Company; Valdemar Anderson, alias Walther Anderson; and T. R. Brazil, is requested to communicate with the American Consulate-General, Panama.

SAFETY IN THE TUNNEL.

Staff System Makes Collision In Territory Mechanically Impossible.

The staff system recently installed by the Panama Railroad Company at Miraflores offers the maximum factor of safety to congested traffic passing through the tunnel, with as little delay as local conditions will permit. Sixteen to 20 trains per hour can be handled safely between the interlocked limits of North Cabin and South Cabin, depending on the time consumed by each train while passing through the staff territory.

The possession of a staff by any train gives it absolute rights between the two cabins, regardless of previous train orders or time table authority. Without a staff a train has no rights whatever within the staff territory.

The system consists of two high speed staff instruments, identical in design, and one of which is located in either cabin. They are electrically interconnected in such a manner that but one staff can be removed from the two machines at the same time. A track circuit extends between the two cabins, its function being to actuate indicators for the information of the signalmen on duty, and the presence of a car or engine within the tunnel also opens the line circuit, making manipulations of the staff instruments impossible at that time.

The staff instruments are electrically connected to the mechanical interlocking machines in such a manner that a signal cannot be brought to its "proceed" position for any trains entering the tunnel, without a staff to first unlock the master lever. This same arrangement forces the signalman to place all signals in their "stop" position as soon as a train has passed under them. The arrangement thus gives absolute protection against both rear and head-on collisions.

To illustrate the manipulation let it be assumed that the sketch accompanying this article represents the staff instrument at North Cabin and that a southward train is about to enter the tunnel. The signalman at North Cabin signals by three contacts on his bell key "F," giving a corresponding number of rings on the single stroke bell at South Cabin. South Cabin acknowledges with two rings, holding in bell key "F" on the second contact until the second deflection of his indicator "I" assures him North Cabin has removed the staff. The contact of bell key "F" at South Cabin deflects indicator hand "I" on the other instrument, to the right. The signalman at North Cabin noting this, turns the preliminary spindle "D" to the right and releases it, changing disc "B" from red to white. The first staff "E" in left hand side of staff spiral is then moved upward and enters drum "C" through its slot "B," drum "C," having been previously rotated to allow the staff to enter slot "B". The staff is then used as a handle to rotate drum "C" clockwise to a point where the staff can be removed.

North Cabin then signals four taps to indicate a train is about to enter the tunnel; South Cabin acknowledges with two taps and these bell code signals automatically change indicators "A" on both instruments to read "staff out." The staff is then inserted in the aperture on the staff lever lock, the master lever reversed, the signals brought to "proceed" and the staff delivered to the forward end of the train as it passes the

cabin. These manipulations appear complicated and cumbersome, but in actual practice a staff is removed and the unlock given in less than six seconds.

When the train passes South Cabin the staff is handed to the signalman who inserts and locks it in his machine without assistance from the other cabin. An exchange of code signals, given on bell keys "F" after the train has left the track circuit, restores the indicators "A" on both instruments to read "staff in", and places the machines in synchronism for the next manipulation. If the staff is replaced in the same instrument from which it was removed the scheme of operation is similar.

The staff instruments in use at Miraflores are a development of the English staff machines in use as early as 1840 in that country.

STAFF INSTRUMENT.

The early models were slow in operation and delivered staffs three feet long and weighing about four pounds. The staff in use at Miraflores is a turned key, three-quarters of an inch in diameter, seven inches long, and weighing but 10 ounces, when in its rubber holder. The old style staff had to be delivered from a crane, constructed similarly to those used in delivering mail pouches at small stations.

Experience has proved that the high speed staff, held vertically and loosely supported by the hand, can be picked up easily by an engineman when running at the rate of 25 miles per hour. This also applies to the delivery of the staff to the signalman when the engineman holds it loosely at its upper end and allows it to hang vertically.

Identification has been established in the case of the man found dead on May 26 along the railroad track, near El Diablo. He was José Felix Gutierrez, a married Panamanian, who was employed in the Fifth Division, and lived at Corozal.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of May.

During the month of May, the total amount of material excavated in the Central Division was 921,000 cubic yards, of which 354,061 cubic yards were classified as earth, and 566,939 cubic yards as rock. Of the total, 896,600 cubic yards were primary excavation in the Canal prism, and 24,400 cubic yards were from ditch for draining old Culebra Dump. The total—921,000 cubic yards—was removed by steamshovel.

The high record for the month was made by shovel No. 208, working 25½ days in the Culebra district, which excavated 44,785 cubic yards, of which 24,900 cubic yards were rock, and 19,885 cubic yards earth.

The second best record for the month was made by shovel No. 207, working 25 days in the Culebra district, which excavated 39,505 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 26 days in the Culebra district, which excavated 31,400 cubic yards, 18,980 of which were earth and 12,420 rock.

Shovels Nos. 208 and 207, working in the Culebra district, both made a high record for one day by each excavating 2,430 cubic yards of rock on May 1 and 13, respectively.

Shovel No. 224, working on a 12-hour shift in the Culebra district, made a high record of 2,432 cubic yards of earth on May 6.

Except where noted, monthly reports are computed by place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown below:

BEST RECORDS FOR THE MONTH.

SHOVEL No.	CULEBRA DISTRICT.			
	CUBIC YARDS.			
	Earth.	Rock.	Total.	No. of days at work.
208.....	19,885	24,900	44,785	25½
207.....	39,505	39,505	25
206.....	17,300	17,300	34,600	37
224.....	34,600	34,600	37½

SHOVEL No.	EMPIRE DISTRICT.			
	CUBIC YARDS.			
	Earth.	Rock.	Total.	No. of days at work.
221.....	24,238	11,443	35,681	27½
262.....	35,580	35,580	33½
232.....	21,823	13,195	35,018	35½

BEST RECORDS FOR ONE DAY.

Shovel.	LOCATION.	Date.	Character of material excavated.	Cubic yards.
232	Empire.....	May 1	Rock.....	2,318
232	Empire.....	May 3	Rock.....	2,299
262	Empire.....	May 5	Rock.....	2,299
208	Culebra.....	May 1	Rock.....	2,430
207	Culebra.....	May 13	Rock.....	2,430
207	Culebra.....	May 14	Rock.....	2,250
206	Culebra.....	May 5	Rock and earth..	2,380

The excess number of days over and above the actual number of working days in the month of May (26), is due to double shift and night work.

Fatal Accident at Pedro Miguel Lock.

Olaf P. Stevenson, a naturalized American, employed as an erector by the First Division at Pedro Miguel Lock, was killed at 1.45 p. m., on Friday, June 6. He was engaged in adjusting a roller under a heavy casting, when the latter became overbalanced and fell on him, causing his death almost instantly. He was a native of Bergen, Norway, was 36 years of age, married, and had been on the Isthmus for several years. He is survived by his wife, Mrs. Olga M. Stevenson, residing at Empire.

MOSQUITO DEVICE.

Local Invention for Detecting Direction of Flight.

An instrument for the detection of the direction of flight of adult mosquitoes has been invented by Mr. E. Frederick Quimby, division inspector in the Department of Sanitation. It consists of a metal frame holding four plates of glass, each 12 by 12 inches in size, placed upon a tripod. The glass plates are held stationary at right angles to each other, so that when the instrument is set up, they point north, east, south and west. To catch the mosquitoes a coat of tanglefoot, composed of one-half pound of rosin to one liter of castor oil, is prepared, and when applied to the glass is practically transparent.

The first experiment with the instrument was made west of oil tank No. 62, at Mount Hope, on March 8. It was set up at 6.30 p. m. The first mosquitoes were noticed at 6.35 p. m., and were *Culex* coming from the east in a straight line. The *Anopheles* flight followed at 6.40 p. m. from the same direction, but these mosquitoes were moving low and slow in zigzag flights, as if seeking lulls in the wind. The first mosquitoes caught on the plate were noted at 6.55 p. m. At this time the wind was blowing at a velocity of 19 miles an hour from the north, but between 7 and 8 o'clock it increased to 25 miles an hour, still from the north. The first mosquitoes were caught on the east side of the south plate, but a few minutes after 7 o'clock, adults were caught on the north side of the east plate. The flight stopped at 7.15 p. m., and no adults were caught until 8.05 p. m.

An all-night test was made on the night of March 13 and morning of March 14 on a point of land, situated between the French and East Divisions, about 1,000 feet west of the power house at Gatun. During this experiment, the following points were brought out: That the adult *Culex* and *Anopheles* flew on the quarter of a 17 to 19-mile wind; that the evening flight occurred between 6.10 and 7.10; that there was a complete lull in the flight after 7.10 o'clock; that there was

a return flight between 5.50 and 6.40 in the morning, also on the wind's quarter; that the mosquitoes fly much higher and swifter in the morning than they do at night; and that, with possibly few exceptions, only adult females are in flight.

On the night of March 19, and morning of March 20, another all-night test was con-

DEVICE FOR INDICATING DIRECTION MOSQUITOES FLY.

ducted at the same place as above. During this experiment, an *Anopheles* mosquito was caught for the first time on the opposite side of the plates from the direction of the flight. This adult was a male, the only one captured during the experiments up to that date. It is believed that this male may have been flying about aimlessly when caught. The

instrument has proved to be useful in locating breeding places by eliminating the area facing the plates that do not show a catch. It also identifies the species of mosquitoes in the dark, as well as in the light, thereby determining the direction of flight, if any, during the night. Experiment shows that there is no direct flight during the night, after a certain period. Further, this is the first time that a return flight has been recorded on the Isthmus; and it was shown to take place within a period.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, June 18, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms for application and information respecting the filling out of same, not later than the day previous to the examination. Applicants for chauffeur's licenses must also bring automobiles with them.

Odd Fellows' Election.

At the meeting of Pacific Lodge, No. 4, Independent Order of Odd Fellows, Ancon, held on Thursday night, June 5, officers were elected for the ensuing term, as follows: Noble grand, A. F. Holzapfel; vice-grand, Karl P. Curtis; secretary, Emil J. Rall; treasurer, A. S. Curtis. The installation of officers will take place after the first regular meeting of the lodge in July, at the lodge room, Ancon Hall.

Obituary.

The death of John H. Nicholson, a white American employed by the American Cement Tile Company at Paraiso, occurred at Ancon Hospital on Sunday, June 1. He was 22 years of age, unmarried, and had been on the Isthmus five months. His home in the United States was at Wampum, Pa., where his parents reside.

CANAL MEDAL SECOND BAR LIST.

(Concluded.)

Below are published the names of American employees of the Isthmian Canal Commission, who completed six years of continuous service on the Isthmus during the twelve months ending December 31, 1912, and are, in consequence, entitled to receive a second service bar for their Canal Medal. The date shown opposite each name is that on which the bar service began.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the office of the Chairman, at Culebra, for correction.

The heads of divisions are requested to check carefully their lists of American employees on the silver rolls, and report any omissions on the second bar list to the above office.

Names of employees of the Isthmian Canal Commission, entitled to a third bar, and employees of the Panama Railroad Company, entitled to medals or bars, will be published in subsequent issues.

Medal and bar service begins at the time of an employee's arrival on the Isthmus; not at the time of his departure from the United States.

SOCIAL LIFE OF THE ZONE.

Ancon Study Club Tea.

The Ancon Study Club will give a tea at Ancon Hall on Tuesday afternoon, June 7, in commemoration of Bunker Hill Day. There will be an art exhibit and a short program of music, readings, and recitations. Tea and homemade cakes will be served. Tickets may be purchased by the members of the club, or admission, 25 cents, may be paid at the door. The program will begin at 2.30.

The study club has received a gift of 112 books from the women of Pedro Miguel, being a portion of the library of the Pedro Miguel Woman's Club, purchased in 1908. The library has been kept well up to date and the volumes include many desirable works of fiction, as well as standard works. This gift brings the number of books in the study club library up to 300. The library is open to nonmembers of the club upon payment of a deposit of \$1, United States currency, this money to be returned upon the withdrawal of the depositor's name from the librarian's list. The books are kept at the home of Mrs. Mark White, house No. 31, Tivoli district, Ancon.

The regular dance of the Cristobal Dancing Club will be held on Saturday, June 14. Membership card or invitation must be presented at the door.

Church Notes.

The Reverend Alfred B. DeRoos, an American missionary connected with the Baptist Church, is conducting evangelistic meetings in the churches of the Canal Zone. Mr. DeRoos arrived on the Isthmus in May, and held missions in New Gatun, and Colon in the churches under the direction of the Rev. S. Witt. On Sunday, June 1, a mission was begun in the Baptist Church, Culebra, meetings being held every evening during the week. This mission has been very successful, the church being crowded every evening. The special services will continue in Culebra until after the middle of June, and following this, a series of meetings will be held in Cucaracha, Haut Obispo, and Matachin. Rev. Mr. DeRoos has been engaged in missionary and evangelistic work in Central America since 1896, working for many years in Nicaragua. Since 1911, he has been in Costa Rica, making his headquarters at San José.

There will be a sacred concert in aid of the new organ fund at St. Mark's Church, Culebra, on Sunday afternoon, June 15. The music will be given by the choir of the church. The organ has been ordered and the entertainment is being given to pay the remaining sum for its purchase.

Tennis Tournament.

The final Isthmian Tennis Association tournament for the season of 1913, in singles, held at Ancon, June 8, was won by J. T. Neely, representing the Gatun Tennis club. The summary follows:

J. T. Neely, representing Gatun, defeated J. W. Ross, representing the Ancon Hospital club, 3-6, 8-6, 7-5.

C. E. Nevius, representing the Pacific Club, defeated George Newbold, representing the Empire club, 8-6, 6-3.

E. W. Tupper, representing the Culebra club, defeated J. B. Shropshire, representing the Colon club, 6-3, 6-2.

J. T. Neely defeated C. E. Nevius 7-5, 6-3.
D. T. Edwards, representing the Tivoli club, defeated E. W. Tupper, 6-1, 8-6.
J. T. Neely defeated D. T. Edwards 6-1, 6-0.

OFFICIAL CIRCULARS.

Bills for Labor and Material for Individuals and Companies.

CULEBRA, C. Z., June 9, 1913.

CIRCULAR No. 455-A:

Circular No. 455, dated August 9, 1912, is hereby modified to require the itemizing in detail of charges for labor and material appearing on bills rendered for work performed for individuals and companies only when specifically required by the request covering the performance of the work.

When the rendering of itemized bills is requested by individuals and companies, the prescribed surcharge on material will be increased by five per cent and the prescribed surcharge on labor will be increased by ten per cent, to cover the cost of the additional clerical labor.

All bills covering work performed for the purpose of remedying defects in supplies or equipment purchased under contract, the cost of which is to be charged to a contractor, will be rendered in complete detail and only the surcharge heretofore prescribed on material and labor will be applied.

H. F. HODGES,
Acting Chairman, Isthmian Canal Commission,
Second Vice President, Panama Railroad Company.

Acting Manager of the Hotel Washington.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT.

COLON, R. P., June 2, 1913.

CIRCULAR No. 98:

TO ALL CONCERNED:

Effective today, June 2, Mr. J. D. Bennett is appointed acting manager of the Hotel Washington, vice Mr. P. T. Murphy.

J. D. PATTERSON,
General Superintendent.

Findings in Court Martial.

HEADQUARTERS, EASTERN DEPARTMENT,
GENERAL COURT MAR- } GOVERNORS ISLAND,
TIAL } NEW YORK CITY,
ORDERS, No. 417. } May 21, 1913.

Before a general court martial which convened at Camp E. S. Otis, C. Z., pursuant to paragraph 4, Special Orders, No. 3, Headquarters, Eastern Department, February 18, 1913, was arraigned and tried:

Private William H. Guthrie, Company E, Tenth Infantry.

Charge.—Conduct to the prejudice of good order and military discipline, in violation of the 62d Article of War.

There are 12 specifications under the charge which are not published, since they allege slanderous statements by the accused concerning a young lady residing at Las Cascadas, Canal Zone, Panama.

PLEAS.

SENTENCE.

"To be dishonorably discharged the service of the United States, forfeiting all pay and allowances due him, and to be confined at hard labor at such place as the reviewing authority may direct for three (3) years; this sentence to be published on the Canal Zone, Panama."

The sentence is approved and will be duly executed. Fort Jay, N. Y., is designated as the place of confinement, but pending further orders this general prisoner be held at Camp E. S. Otis, Canal Zone. (711 D. J. A.)

By command of Major General Barry:

W. G. HAAN,
Official: Lieut.-Colonel, General Staff,
W. A. SIMPSON, Chief of Staff,
Adjutant General,
Adjutant.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week June 16 to 21 is, as follows: Monday, Gorgona; Tuesday, Cristobal; Wednesday, Culebra; Thursday, Corozal; Friday, Empire and Porto Bello; Saturday, Gatun.

COROZAL.

The high score prize in duckpins for the month of May was won by Fred Whiston.

A local tenpin tournament was started on June 2. Mr. W. L. Dalton succeeds Mr. M. C. Schaffer, as manager of the pool and billiard room, the latter having left for the United States on June 2. Mr. Beall takes Mr. Dalton's place with Mr. Ruggles as manager of the bowling alleys.

One hundred and seventy-five people were present at the sacred concert given by the Mary Lyon Concert Company on Sunday, June 8.

CULEBRA.

The following high scores in duckpins were made during the past week: Bechem 109; Kiernan 101, 104; Case 102, 103, 112, 110, 102. High scores bowled in tenpins: Warner 204; Case 202; Harrington 214.

A special moving picture exhibition will be given on Friday night, June 13, showing the Panama carnival, a trip through Ceylon, the making of the first American flag, and the naval battle between Paul Jones and the British, the entertainment consisting of several reels. The usual prices will obtain.

Mr. Sandrook, the new barber, arrived on June 8. His hours are from 9.30 till 10.30; 11.30 to 4.30; and 5.30 till 10 p. m.

EMPIRE.

The return engagement of the Lyon Concert Company will take place on Friday evening, June 13. An entirely new program will be given.

The recent tenpin bowling tournament had an entry of thirty men. They divided into six teams, each taking the name of one of the baseball teams. Each team competed against the other teams twice. The standing was, as follows:

Team.	Won.	Lost.	P. C.
Giants.....	21	9	.700
Senators.....	19	11	.633
Athletics.....	18	12	.600
White Sox.....	14	16	.467
Tigers.....	9	21	.21
Cubs.....	9	21	.300

The members of the winning team were Huson (captain), Hobbs, Johnson, Burwell, Rhodes. High score, made by Huson, 243; high three games, by Huson, 604.

There will be a special moving picture entertainment on Monday night, June 16.

GORGONA.

A special moving picture exhibition will be given on Thursday evening to which every one is invited. Special music will be given.

The high school graduating class of the Canal Zone presented the play, "She stoops to conquer," on Friday evening to a good-sized audience.

Members moving to other towns along the Canal Zone are requested to withdraw their library deposit before they leave.

The men that are interested in volleyball meet four times a week, from 5.15 to 6.30, and are in good shape to meet the Culebra team this week. A practice game played between the office force and the draftsmen resulted in 4 to 1 in favor of the draftsmen. Points were 104 to 62. The following was the line-up:

Draftsmen—King, Ellington, Goree, and Whipple, Office Force—Taylor, Herring, Swanson, and Johnson. (Referee McFee, scorer Kramer).

The regular gymnasium class meets every week.

GATUN.

The chess match between Gatun and Corozal was played at Gatun, with the following results:

Gatun.	Won.	Lost.	Corozal.	Won.	Lost.
Logan.....	1	1	Snarrard.....	1	1
Bull.....	1	1	Fields.....	1	1
Honer.....	2	0	Hall.....	0	2
McQueen.....	0	2	Morehead.....	2	0
Morgan.....	2	0	Wechler.....	0	2
Brown.....	1	1	Kingsbury.....	1	1
Shopshire.....	0	2	Gartrell.....	2	0

Total..... 7 7 Total..... 7 7

A return match will be played in the near future. Ladies' night was observed in the Gatun bowling alleys on Wednesday night, June 11.

Gatun defeated Empire in a closely contested game of indoor baseball on Saturday, June 7, the final score being Gatun 28, Empire 19.

Dr. Frederic Poole of Philadelphia gave an interesting address on "Modern China and the revolution,"

on Thursday, June 5. He held the attention of his audience closely, and many expressed the hope that he would return to the Isthmus and lecture again.

The high school dramatic club, under the direction of Prof. C. C. Carr, will present the play, "She stoops to conquer," at the clubhouse on Friday night, June 13. Y. M. C. A. members will be admitted free; nonmembers will be charged 50 cents, children 25 cents.

The Marines from Bas Obispo will play the Gatun indoor baseball team at the clubhouse on Saturday night, June 14. This is the first visit of the Marines to Gatun, and as they have one of the best teams in the Isthmian League, the spectators are promised a good game.

CRISTOBAL.

The next moving picture date will be Friday night, June 13.

Fifty new books have just been placed in the library. Those interested in the track and field meet to be held on July 4 are urged to meet at the clubhouse on Tuesday and Thursday nights.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal and Colon during the week ending June 7:

Tivies, June 1, from New York, with 23 reels electric cable, 68 cases electrical material, 10 cases gate moving machinery, for First Division; 178 tons structural steel, Second Division; 16 cases structural steel, emergency dams; 93 tons structural steel, Panama Railroad Company; 84 crates asbestos shingles, Fortifications; 13 cases tape fuse, 1,229 bundles steel bars, 18 cases brass rods, 12 crates water closets, for stock.

Tagus, June 1, from New York, with 185 bundles galvanized roofing, for stock.

Allianca, June 2, from New York, with 15 bundles double trees, 10 barrels compound, 16 cases toe calks, 10 bundles ladders, 133 kegs horse shoes, 55 kegs wire nails, 80 cases signal oil, 275 bundles tie plates, 31 barrels glassware, 20 cases copper wire, 10 cases steel bars, 43 barrels glass jugs, for stock; 3,500 pieces hollow tile, Second Division; 76 cases electrical material, First Division; 102 pieces cast iron pipe, Atlantic Division; 587 bundles steel bars, Fortifications; and a miscellaneous cargo, the whole consisting of 5,470 packages, weighing 350 tons.

Parissima, June 2, from New Orleans, with 684 barrels paving bricks, Panama Railroad Company; 1,318 pieces yellow pine lumber, 273 pieces white oak lumber, Mechanical Division; 322 pieces cross ties, 12,700 pieces yellow pine lumber, 172 pieces piling, 150 sacks dairy feed, 18 rolls cotton duck, 18 pieces steamshovel castings, 10 cases hardware, for stock.

Prinz August Wilhelm, June 2, from New York, with 75 bundles truck springs, 10 cases electrical material, Mechanical Division; 50 packages buoy parts, Light-house Division; 55 cases paper, 400 cases soap polish, for stock.

Zacapa, June 4, from New York, with 99 pieces structural steel, Panama Railroad Company; 28 packages valve machinery, First Division; 30 cases deck brushes, 1,033 bundles steel bars, 111 packages switch parts, 15 cases hardware, for stock; 1,044 pieces structural steel, Second Division.

Turriaba, June 5, from New Orleans, with 86 pieces white oak lumber, 699 pieces yellow pine lumber, 6 crates coal screens, Mechanical Division; 400 cases scouring bar, 18 pieces cast iron pipe, 697 drums oils, 810 cases oils and greases, 318 bales straw, 197 pieces lumber, for stock.

The total value of material received during the month of May was \$1,359,081.29 distributed, as follows:

Mount Hope (stock), \$270,836.88; Atlantic Division, \$109,713.02; First Division, Chief Engineer's office,

\$505,774.16; Second Division, Chief Engineer's office, \$185,596.23; Fourth Division, Chief Engineer's office, \$2,435.54; Fifth Division Chief Engineer's office, \$98,419.50; Sixth Division, Chief Engineer's office, \$9,418.40; Mechanical Division, \$123,583.79; Sanitary Department, \$8,213.51; Civil Administration, \$511.27; Department of Law, \$290.50; Examiner of Accounts, \$450; Disbursing Officer, \$232.17; Fortifications, \$9,197; Panama Railroad Company, \$34,409.32; Total \$1,359,081.29. The material came forward in 40 steamers; total weight of cargo, exclusive of lumber, pilings and ties, being 33,334 tons.

Rainfall from June 1 to June 7, 1913, Inclusive.

WEATHER CONDITIONS, CANAL ZONE, MAY, 1913.

The general rains that fell during the first week of May marked the beginning of the 1913 rainy season. The rainfall on the Isthmus during May was above normal at all stations, except Ancon, Juan Mina, and Alhajuela. The monthly totals ranged from 8.04 inches at Balboa to 30.51 inches at Porto Bello. The maximum precipitation recorded in 24 consecutive hours was 10.65 inches at Porto Bello on May 14-15. This 24-hour record has been exceeded once only on the Isthmus during the period covered by Commission records.

Approximately normal conditions of air temperature, relative humidity, and atmospheric pressure prevailed during the month. The average cloudiness and wind movement were well above normal. There was a marked increase in night foginess with the return of the rainy season weather conditions. Of the fogs observed 61 per cent were dissipated by 6.30 a. m.; 90 per cent by 7.30 a. m.; and 100 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Press're (reduc'd to mean of 24 hours.)	Temperature.					Precipitation.			Wind.					
		Mean.	Maximum.	Date.	Minimum.	Date.	Mean relative humidity.	Total inches.	Station aver- age.	Number of rainy days.	Total move- ment (in miles.)	Prevailing direction.	Max. velocity (in miles.)	Direction.	Date.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 10 a. m. and Thursdays at 10 a. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m.; and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the Prinz Joachim and Prinz August Wilhelm at 10 a. m., and the Emil L. Boas and Carl Schurz at 2 p. m.

The following ships arrived at, or departed from the port of Balboa during the week ending June 7:

Arrivals—June 1, Huallaga, from Valparaiso; June 4, Huasco, from Valparaiso; June 4, Manavi, from Guayaquil; June 7, Santa Rita, from Port La Hartford. Departures—June 1, Mantaro, to Valparaiso; June 2, Guatemala, to Valparaiso; June 3, Pennsylvania, to San Francisco; June 4, Quilo, to Guayaquil; June 5, Plevades, to San Francisco.

CANAL

RECORD

Volume No. VI.

ANCON, CANAL ZONE, WEDNESDAY, JUNE 18, 1913.

No. 43.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Last Section of Atlantic Entrance Excavation.

The lower guard gates of Gatun Locks were brought to practical completion and closed on June 14. They protect the lower and middle lock chambers from inundation by water from the sea. Within a few hours after their closing, two pipeline suction dredges began to pump water into the forebay and when the forebay has been filled to sea-level the dredges will proceed with the removal of the barrier between it and the completed portion of the Atlantic entrance channel. Dredge No. 83, which has been on the ground in the approach at 55 feet below sealevel since it pumped out the forebay to allow the construction of center guide and flare walls, is afloat and will take part in the removal of the barrier.

Canal Excavation in May.

During the month of May, the grand total of Canal excavation passed the 200,000,000-cubic yard mark, the exact total to June 1 being 200,737,132 cubic yards, leaving to be excavated 17,401,167 cubic yards.

The total excavation for May was 2,779,532 cubic yards, as compared with 2,506,916 cubic yards for the corresponding month last year, and 2,570,592 cubic yards in May, 1911.

The dry excavation last month amounted to 1,254,039 cubic yards, entirely by steamshovels. The dredges established a new record for one month's performance on the Canal by excavating 1,525,493 cubic yards.

In the Atlantic Division, the total excavation was 963,109 cubic yards. Of this amount, all but 5,220 cubic yards consisted of material dredged from the Atlantic entrance, a large quantity of which was silt.

The total excavation in the Central Division was 921,000 cubic yards, 896,600 cubic yards from the Culebra Cut section, and the remainder from diversions.

In the Fifth Division, (Pacific section) the total excavation amounted to 895,423 cubic

yards, 331,210 by steamshovels and 564,213 by dredges. Steamshovels excavated 3,905 cubic yards from the site of Miraflores Spillway, 66,291 cubic yards from the Balboa terminal site, and 261,014 cubic yards from the Canal prism, south of Miraflores Locks. The dredges took out 369,703 cubic yards from the Pacific entrance, and 194,510 cubic yards at the terminal basin.

A detailed statement of the excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total Excavation.

Fill placed in dams.	93,449	12,670	106,119

Mean rainfall along Canal (ten stations), 1.89 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc., that is, it represents material taken from the area to be occupied

by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Wharf Work at New Balboa Harbor.

The number of caissons for the wharves at Balboa sunk to rock during May amounted to 31, the greatest number in any month since the beginning of operations. The total penetration amounted to 1,875 linear feet. The caisson shells are of concrete, with an outside diameter of 8 feet, each foot of penetration necessitating the excavation of about 50 cubic feet of soft material. On one day, a caisson was sunk 37 feet in three hours and 43 minutes, 42 minutes of which were devoted to setting the successive sections.

The work on the quay wall piers has advanced from the east end of the present concrete wharf, through the west toe of the abandoned Sosa dam. Forms and reinforcing steel for the beams and girders to support the floor of the extended quay wall are being placed, and the work of pouring the concrete for them is under way.

Operations at Corozal Farm.

Plowing is in progress at the Corozal farm, and some planting has been done. A part of the farm, which, altogether, contains about 715 acres of land, the greater part of which is the property of the Panama railroad, has been placed under fence, using old iron rails for posts, and barb wire for the enclosure. A nursery for young plants, such as cabbages, tomatoes, eggplant, avocados, mangoes, cassava, etc., has been started at the end of the fenced-in section nearest the village. The soil in this vicinity contains a great many stones, the larger of which are collected and carted off. On a part of the farm, west of the railroad, where there is an hydraulic fill, 1,200 coconut plants, obtained from the interior, will be set out. About 1,500 young banana plants have also been received and set out. Not much has been done so far in planting ordinary garden truck, but it is proposed to utilize an adjacent hillside for the growing of onions, cabbages, and tomatoes, as, during the rainy season, the superabundance of moisture on level ground tends to an excessive growth of tops. There is a promising field of corn to the north of the village, which has been planted along with plantains and papaya, and to which will be added later, pumpkins, making four crops in all from the one piece of ground. It is possible that the raising of fodder corn, with the view of using it in a silo, will be tried later to furnish food for the Ancon dairy herd. The farm contains a number of full grown mango, avocado, and orange trees, but it is planned to add to these

considerably, especially as regards mangoes and avocados.

There are only four inmates at the farm at present. The services of these are utilized as far as possible, but outside help has to be procured to carry on the work. The inmates sleep in the farm building, but take their meals at the silver laborers' mess. The office of the farm is located temporarily in the building containing the offices of the Resident Engineer of the Fifth Division.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on June 14, being 4,464,228 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of June 14, follows:

GATUN LOCKS.		Concrete laid

*Includes hydroelectric station.

Framework of Two Permanent Buildings in Place.

The erection of the steel framework for the permanent planing mill at Balboa has been completed, and that for the pattern storage building is about done. While the erection forces advance on the foundry building, the skeletons now in place are being riveted and painted with two coats of white paint. The planing mill will have a floor space of 49,000 square feet; the pattern storage building, 14,400 square feet, and the foundry,

37,600 square feet. With the rapid advance in this erection, in the excavation for the dry dock, and the advance on the wharves, the outlines of the terminal are becoming distinguishable where recently stood the American and native villages, flanked by a tidal swamp.

Shooting Match.

A match shoot between teams from the Tenth Infantry and United States Marine Corps was held at the new range at Camp E. S. Otis on Sunday, May 15, beginning at 8 a. m. The number of spectators was large, and included people from towns along the line, as well as from the Army and Marine camps.

The members of both the competing teams consisted entirely of officers. Captain Coleman was captain of the Army team, and Captain Beaumont of the Marine Corps team. Lieutenant Crenshaw of the Navy shot in the Marine Corps team.

The Marines finished the 200-yard stage with a lead of 11 points. At the 300-yard stage, the Army gained six points, cutting down the lead of the Marines to five points. In the 200-yard rapid fire, which followed, the Army gained 16 points, giving it a lead of 11 points. At 600 yards, the Army team gained 16 points more, making its total lead at this time 27 points. The Marines gained 13 points on skirmish, leaving the Army team winner of the match by 14 points. The individual scores follow:

TENTH INFANTRY TEAM	200 yds. slow fire.	300 yds. slow fire.	600 yds. slow fire.	200 yds. rapid fire.	Skirmish run.	Total

After the match, Colonel and Mrs. Greene entertained at a buffet luncheon all of the officers and ladies of both camps who were present.

New Chairman, Fourth of July Committee.

The Acting Chairman of the Canal Commission has appointed Mr. Tom M. Cooke, chairman of the executive committee of the Fourth of July celebration, vice Mr. M. H. Thatcher, resigned.

Turning of Seats in P. R. R. Passenger Coaches.

An order was issued to all conductors and collectors on Panama railroad passenger trains on June 9, prohibiting the turning over of seats in any of the first-class coaches, south of Gorgona, unless occupied by at least three passengers. This precludes, in future, the practice of two passengers sitting facing each other, or the turning over of a seat by a single passenger and the placing of his feet thereon, except between points north of Gorgona. In no case will passengers be permitted to turn the seats to sit facing, or to place their feet thereon in the forward first-class coach, known as the ladies' car, of any passenger train.

CULEBRA CUT SLIDES.

Increased Activity During the Past Week.

Slides in the Culebra Cut section have been unusually active during the past week. On Thursday morning, June 12, another downward and upward movement occurred in the break on the east bank of the Cut, opposite Culebra, which overturned shovel No. 260, destroyed all tracks but two, and filled the drainage ditch. This is distinct from the break further north, which first developed on February 5, and in which, since then, five different movements have occurred, each of which upheaved the bottom of the Canal, destroyed construction tracks, and, in some cases, caused damage to the excavation equipment. The last movement left the line of cleavage in clear view in one section of the disturbed area, which now extends nearly back to the last level where terracing operations are in progress, and cracks have developed back of this line. The extreme limit of the break on the east bank is now about 300 feet from the line of the Canal.

Late Friday afternoon, Cucaracha slide again became active, and when the movement ceased, the Cut had been filled across to the 67-foot level on the west side, leaving but one through track in service. The last movement was a repetition of the others that are constantly occurring at this point, the pressure from above forcing in an additional amount as the material is removed at the bottom of the slide. The whole slope is in motion, and some cracks have developed farther back on the hill. On the side of Gold Hill, the slide drops sheer, and as far as is known, the rock buttress remains firm. The rock shoulder in about the center of the face line of the slide, which gave way under the pressure a few months ago, is moving with the remainder of the mass, and is now about 80 feet west of its original position.

Of all the slides in the Culebra Cut section, Cucaracha is, perhaps, the most graphic. The movement can be easily comprehended by a spectator standing on the west bank at Culebra, by comparing it with the proper line of the Canal above and below this point. To the engineers, however, the break on the east bank presents the more difficult problem of the two.

The slide, near La Pita, caused by the Obispo Diversion breaking into the Canal in August, 1912, involving about 250,000 cubic yards, has been nearly removed. A double dike now separates the Canal from the diversion channel.

Between Empire and Bas Obispo, there are half a dozen or more small slides, which the shovels are busy clearing away. Apart from these, and the cleaning up of the bottom, which will probably be done by hand, this part of the Canal is nearly finished. In some of the slides, where the shovels are working close up against a high bank of loose material, the work is attended with a certain amount of peril, on account of the danger of a sudden land slip. The engineer and craneman are kept constantly on the alert for signs of danger, and back their machines away from the spot at the first manifestations.

United Spanish War Veterans.

Chagres Camp will hold a meeting in the lodge hall, Ancon, on Sunday afternoon, June 22, at 3 o'clock.

CANAL MEDAL AND SERVICE BAR LIST.

Below are published the names of American employes of the Isthmian Canal Commission, who completed eight years' service on the Isthmus during the twelve months ending December 31, 1912, and are, in consequence, entitled to receive a third bar. The date shown opposite each name is that from which the bar service is computed.

On this page also will be found the list of employes of the Panama Railroad Company who completed two years of continuous service at some time during the year ending December 31, 1912, and are, in consequence, entitled to medals; also, the lists of employes of the Panama Railroad Company who are entitled to first bars for four years of continuous service; and the lists of employes of the Panama Railroad Company who are entitled to second and third bars for six and eight years of continuous service, respectively, ending during the year 1912.

Heads of divisions are requested to check carefully their lists of American employes on the silver roll, and to report any omissions on the medal lists to the Office of the Chairman, at Culebra.

Medal and bar service begins at the time of an employe's arrival on the Isthmus; not at the time of his departure from the United States.

Progress of the Tramways.

Five of the 15 cars for the Panama Tramways Company have arrived, but the motor equipment for only one of them has been received so far. As soon as six cars are ready for service, a part of the system, that of the Central avenue and Ancon lines, will be placed in operation. One of the cars is being operated for the purpose of instructing applicants for the position of motorman.

The cars are of the semiconvertible type, vestibuled at both ends, with automatic regulation of doors, and are painted green. They are 30 feet in length over all, with inside measurement of 20 feet six inches, and each car will seat 32 people. The seats are cane-

covered and reversible. The prepayment plan will be placed in effect, and fare boxes have been installed at each end of the cars.

It is planned to operate the Central avenue line, the Tivoli and Ancon spurs; and the Balboa line on a 10-minute schedule. The line from Santa Ana plaza to the Corozal road, via North avenue and the Caledonia road, will be operated on a 20-minute schedule, and, until the traffic situation in Las Sabanas can be more carefully studied, only three trips a day will be made as far as the police station. On Sundays and holidays, cars will be run at frequent intervals between the city and bathing beach.

The fare from one point to another within

city limits will be five cents, United States currency; from Panama to the present terminus of the line, near the East Balboa commissary, 10 cents; from Panama to the bathing beach, 10 cents; and to the police station in Las Sabanas, 15 cents. The service cannot be extended to Balboa until the crossings over the Central Division tracks, near the commissary, have been installed. Under the franchise, the cars will have to be operated from 5.30 a. m., until 12, midnight.

Mr. W. L. Black, who was formerly connected with the Porto Rico Railway, Light, and Power Company, at San Juan, Porto Rico, is the local manager of the tramways.

PERMANENT BUILDINGS.

Architects for the Commission Preparing Plans in Uniform Style.

The designing of the permanent buildings to be used in the operation and maintenance of the Canal is based upon requirements outlined by heads of departments of the present constructive and administrative force, who used as indices their experience and tentative knowledge of the future organization. Within these outlines, the architectural plans are being worked out by Mr. Austin W. Lord of the firm of Lord, Hewlett, and Tallent, New York, and his assistant on the Isthmus, Mr. Mario J. Schiavoni.

The new administration building, the permanent quarters for the white members of the operating force, the office building for the Balboa terminals, and the projection of town sites are the most conspicuous portions of this work. In addition, the architects have designed the general architectural treatment and preparation of the plans, elevations, and details of the hydroelectric station at Gatun, and of the three control houses for the three sets of locks. Mr. Schiavoni has also evolved a new style of concrete bracket for the lamp reflectors of all locks, and has designed the architectural treatments for the new filtration plant at Miraflores, and the two pumping stations, one at Ancon, and the other at Miraflores, besides the general plan for the West Indian camp at Balboa. Altogether, the drafting work assigned to the architect's office covers 14 different projects.

The plans and details for the hydroelectric station, the three control houses, the lamp bracket, and the architectural treatments for the Mount Hope filtration plant have been completed, and the erection work is now in the hands of Isthmian Canal Commission forces. Preliminary plans and elevations have been approved for the administration building, the shops' office buildings at Balboa, and the Toro Point lighthouse, which are all being worked out by the assistant architect at Culebra, with his six draftsmen. Plans for the official quarters and the permanent quarters for white employees, and for the town buildings at Balboa, including a postoffice, police station, fire station, dispensary, telephone building, clubhouse, hotel, social hall, church, commissary store, and schoolhouse, are being prepared in Mr. Lord's office in New York, four draftsmen being engaged there on this work. The landscape architect, Mr. William L. Phillips, who is due to arrive on the Isthmus in July, will work in conjunction with the permanent building architects. He will have special charge of the details of townsites, streets, parks, etc.

The style of the buildings of Italian design, has been determined principally by utility and conformation with tropical weather and topography, using arcades or exterior colonnades, and arched windows where feasible. They will be built substantially of reinforced concrete and hollow concrete blocks, stuccoed on the outside, and will be covered by dark red tile roofs.

Removal of Sand Crane at Balboa.

One of the three steel cantilever cranes used for unloading sand barges at Balboa has been dismantled and stored in the yards of the Depot Quartermaster at Mount Hope. This crane stood at the southern end of the sand wharf and occupied a part of the site

of one of the permanent terminal buildings. Its removal is made practicable at this time by the reduced consumption of sand as the lock construction draws to a close. About 80 lineal feet of storage bin have been removed in connection with the dismantling of the crane, and the approach tracks are to be shifted outward, to clear the site for the new building.

PERSONAL.

Don José Buigas de Dalmau, who has been the Chargé d'Affaires and Consul of Spain at Panama for the past two years, has been transferred to Larache, Morocco, and sailed for there, accompanied by his family, on the Spanish line steamer *Montserrat*, on Thursday, June 12. He was formerly consul at Mobile, Ala., and, prior to the time Spain obtained suzerainty over a part of Morocco, he represented his government in that country in the capacity of adviser to the Sultan. Don José Teixidor y Jugo has been named as his successor in Panama, with the title of Consul of the first-class.

Obituary.

Hartwell Bishop, the eldest son of Joseph Bucklin Bishop, Secretary of the Isthmian Canal Commission, died in Boston, Mass., on Wednesday night, June 4. Mr. Bishop was thirty-three years of age, married, and was a graduate of Harvard University, class of 1903. For some time past he had lived in San Francisco, where he was employed as a civil engineer by the United Railways Company. He is survived by his wife, who was with him on his visit east.

Customs Examination of Household Goods of Employes Prior to Shipment.

Advice has been received that the Treasury Department has approved a plan whereby the Canal Zone Customs Service will examine the boxes, cases, etc., containing household goods of all American employes of the Isthmian Canal Commission and the Panama railroad and army officers on duty as such in the Canal Zone, where the boxes, cases, etc., are shipped other than as personal baggage. Invoices covering the shipment will be declared to by the shipper before a customs officer in the Zone, and will be submitted to the collector of customs at the port of arrival, together with a certificate of the Canal Zone collector of customs, or his deputy, as to personal examination.

Under this arrangement, shipments of returned American goods, and household goods purchased abroad and actually used as such by the shipper, or his family, for at least one year, will pass the customs without further examination on arrival at a port in the United States. Where goods are to be shipped in accordance with the approved plan, they will be packed under the personal supervision of a representative of the customs division, and the boxes, cases, etc., will then be sealed and a certificate of inspection, signed by the deputy collector of customs, attached to each piece.

This examination and certificate of inspection will not apply to goods taken as baggage whether packed in trunks, boxes, or other receptacles. Persons, who are returning to the United States taking with them a shipment other than as baggage, must notify the Collector of Customs at Ancon, or the Deputy Collector of Customs at Cris-

tobal in ample time, giving the date of sailing, if known, so that arrangements can be made to send a representative to make the inspection. Goods must be ready to be packed at the time agreed upon, and will have to be packed under the supervision of the inspector, otherwise the examination will not be made on the Isthmus. It is not proposed that more than one visit will be made by an inspector for the purpose of making an examination.

Fourth of July Bathing Facilities.

The subcommittee on water sports for the Fourth of July celebration has made arrangements for dressing rooms for men and women at dock No. 16, in order that those desiring to bathe in the slip between the piers may avail themselves of the opportunity to do so. The Police Department will notify the bathers in time for them to leave the water before the commencement of the aquatic contests. A police launch, with crew, will be on hand to protect the bathers while they are in the water.

Trouble Among Laborers on a Labor Train.

At Miraflores, on Monday, June 9, a number of colored laborers attempted to board a car reserved to white silver employees, but were prevented by the men inside. Some of the colored laborers then began throwing rocks, one of which struck José Nolasco, a Peruvian, check No. 175405, injuring him fatally. A number of arrests were made, and in the Circuit Court of the First Judicial Circuit at Ancon, on Monday, June 16, five of the participants were convicted and given penitentiary sentences of five months each. The identity of the person who threw the stone that killed Nolasco was not established.

Civil Service Examinations.

Examination will be held, probably on July 27, for the positions of stenographer and typewriter, Isthmian Canal Service; stenographer and typewriter, Philippine Service; and typewriter, Isthmian Canal Service. Applications will not be received after July 2; this date may be changed if necessary. Persons interested should request a copy of Form 1424, which contains information in regard to the abovenamed examinations.

Competitors in the abovenamed examinations must bring their own typewriting machines to the examination room.

The examinations will be held probably in the Commission clubhouse at Empire, but the place and date should be omitted in applications.

A card of admission will be sent to those found eligible to be admitted, just before the examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., June 14, 1913.

Independent Order of Panamanian Kangaroos.

The Independent Order of Panamanian Kangaroos will hold its annual memorial services in the I. C. C. chapel at Empire, on Sunday, June 22, at 3 p. m. All members and friends are invited to attend.

H. H. HUDSON, *Comptroller*.

Empire, C. Z., June 14, 1913.

Mr. G. M. Guerin has received his appointment as vice-consul for the kingdom of Norway in the city of Panama and village of Ancon.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The unveiling and dedication of a new pipe organ in Christ Church on Colon Beach, took place at the morning service on Sunday, June 15. Mr. Tracy Robinson, who was present at the consecration of the structure in 1865, was chosen to unveil the new instrument, the dedication by the rector following.

The installation of the organ, which cost \$4,000, completes the work of improvement which has been going on in the church since the beginning of the present year. In addition, the building has been entirely renovated, and a permanent altar of concrete, the gift of the altar society, presented at Easter, has been placed in the chancel. The altar was consecrated by the Bishop of Cuba on March 30.

For nearly 50 years, Christ Church has been an architectural feature of Colon Beach. It was built by the Panama Railroad Company in 1864 for the use of its employees engaged in the construction of the road, a large number of whom were West Indians, who were allied with the established church of England. For a time, it was under the jurisdiction of the Episcopal church of America, but was subsequently transferred to the Anglican church in whose charge it remained until 1907, when, owing to the exercise of sovereignty over the Canal Zone, by the United States, it reverted to the American church. It has always been the official church of the Panama railroad, and the cost of its maintenance was borne by the company up to 1911, when, under the authority of the Secretary of War, the property was transferred to the church mission in America, and the church became self-supporting.

The parish is governed by an advisory board, of which the rector and two wardens are members. While the majority of the members are West Indians, by whose contributions the church is mainly supported, a number of American and English families attend its services and contribute liberally. The average congregation is about 400, but the ministry of the church is wide, and embraces a much larger number of souls than indicated by the above figure. In addition, there is a Sunday school, with an enrollment of 175 pupils, and a parochial school.

The societies in connection with the church are an altar society, composed of American and English women, an altar service guild, composed of young men and boys, a chapter of the Brotherhood of St. Andrew, a junior chapter, and a choir guild. In February, 1911, social service extension work was begun by the establishment of a dime savings bank. This venture has met with unlooked-for success, and, although the number of depositors varies, owing to the transient nature of the population upon which the church draws for its members, and, although the amount deposited fluctuates, a maximum of 100 depositors, has been reached, and as much as \$5,000, Panamanian currency, has been in the bank at one time. A boy scout movement, which was started a few years ago, but in which interest subsequently waned, has been revived.

Christ Church has two missions for the West Indians, one at Mount Hope, and one at New Gatun.

The Cristobal Union Sunday school observed Children's Day on Sunday, June 8.

There was an appropriate service in which the pupils of the school participated.

On Sunday, June 15, Children's Day was celebrated by the Empire Sunday school. The program used was entitled, "The light bearers." It consisted of songs and hymns by the school, special musical numbers by the classes, readings, and recitations. The record attendance of the Sunday school for the year was reached on Sunday, June 8, when there were 116 present.

On Sunday, June 29, Children's Day will be celebrated in the Methodist Sunday school in Panama.

In the absence of the chaplain, Mr. George A. Barte delivered an address at the Gatun

Christian League service at the Commission chapel at Gatun, on Sunday evening, June 15.

OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., June 12, 1913.

CIRCULAR No. 109:

TO ALL CONCERNED:

Effective this day, Mr. J. C. Angel is appointed acting receiving and forwarding agent, Colon agency, during the absence of Mr. R. W. Bergin, on leave.

JOHN D. PATTERSON,
General Superintendent.

Rates and Rules for Hotel Tivoli.

CRISTOBAL, C. Z., May 31, 1913.

CIRCULAR No. 96-B:

Circular No. 96-A., effective November 9, 1910, prescribing rates and rules for the Hotel Tivoli, is hereby revoked.

The following rates and rules for the Hotel Tivoli are published, effective June 1, 1913:

EMPLOYEES.

Daily—Same as daily rates for first month non employees.

Monthly—Same as monthly rates for nonemployees.

Special rates will be made for room and meals for women employees for whom no quarters are provided at Ancon.

RATES FOR ROOM WITHOUT MEALS—NONEMPLOYEES AND EMPLOYEES.

Guests at "room and meals" rate may be rented second-grade rooms for use as parlors at the following rates:

Transient, daily, \$3.

Weekly, per day, \$2.75; per week, \$19.25.

Monthly, per day, \$2.50; per month, \$75.

EMPLOYEES ONLY.

Grade of room.	Number persons in room.	Daily, or for night's lodging only.
1	1	\$2.00
1	2	3.00
2	1	1.50
2	2	2.00
3	1	1.25
3	2	1.75

Rooms without meals will not be rented to employees for a longer period than two days, at which time bills

will be rendered and collected. No other rates for rooms without meals will be made.

RATES FOR MEALS.

	TRANSIENT		TABLE BOARD.	
	Nonem- ploys.	Em- ploys	Nonem- ploys.	Employees.
Breakfast.	\$0.75	\$0.75	\$14.00	\$12.00 per week.
Lunch....	1.00	.75	48.00	45.00 per month
Dinner....	1.00	.75		

NOTE—(At table board no credit will be given for meals not taken.)

Meal tickets will be purchased at the office before entering dining room by employees at "room without meals" rate, and by all persons without rooms.

RATES FOR MEALS A LA CARTE.

Minimum charge per meal, \$1.

This service will supplement the regular service for lunch and dinner.

Guests at "room and meals" rate, as well as all purchasers of regular meal tickets, may order a la carte, not to exceed \$1 without additional charge, but when exceeding \$1, will be required to pay amount of such excess in cash or to sign check for same before leaving dining room.

Children at the \$1 or the \$1.25 per day rate will pay 25 cents extra for each a la carte meal taken, and, in addition, when bill for such a la carte meal exceeds \$1 will pay the amount of such excess.

TEA ROOM SERVICE.

Hours—3 to 6 p. m. Minimum charge, 25 cents.

An extra charge of 25 cents per day per person will be made for grade-2 rooms en suite with grade-1 rooms with bath.

FAMILIES OR PARTIES AT "ROOM AND MEALS" RATE OCCUPYING A GRADE-2 ROOM EN SUITE WITH A

GRADE-1 ROOM.

NO. OF PERSONS.*	CHARGE.
Two.....	One in grade 1 One in grade 2 En suite charge for one, 25 cents.
Three.....	One in grade 1 Two in grade 2 En suite charge for two, 50 cents.
Four.....	Two in grade 1 Two in grade 2 En suite charge for two, 50 cents.

*Not including children under 12.

If in any of the three above-mentioned groups one of the persons is a nurse or servant, the nurse or servant will be considered located in the grade-1 room and be charged two-thirds the regular rate for same. An extra charge of 25 cents will be made for breakfast served in room, and an extra charge of 50 cents for lunch or dinner.

Two in a room is ordinarily the full capacity of grade-1 and grade-2 rooms, but if it be necessary for more than two persons to occupy a room temporarily, the charge for each additional person will be \$4.50 for grade-1 rooms, \$3.75 for grade-2 rooms, and \$3 for grade-3 rooms. Grade-3 rooms will ordinarily not be rented to more than one person by day or week.

The rate for servants when occupying room will be two-thirds the regular rate, when occupying cot in room or bathroom or in regular servant's quarters, one-half the usual rate for grade-3 room.

The rate for children under 12, when occupying room with parents or nurse and requiring no extra bed, but old enough to occupy seat at table, will be a flat rate of \$1.25 per day for daily rate and \$1 per day for weekly or monthly. Over 12 years of age, full rates will be charged. An extra charge of 50 cents per day per cot or bed will be made for children where a cot or extra bed is required in room with parents or nurse.

Children under 12 will not be put alone in a grade-1 room unless parent or nurse or another child of family

over 12 occupies grade-2 room en suite. Whenever there are more than one person over 12 in a suite, the "families or parties" rate for suites applies.

In case a room is occupied by one or more children under 12, without nurse or other person over 12 in room, a room charge per room will be made as follows:

NONEMPLOYEES.

Grade of room.	Transient Daily.	WEEKLY.	
		Per day.	Per week.
1	\$2.25	\$2.00	\$14.00
2	2.00	1.75	12.25
3	1.75	1.60	11.20.

NONEMPLOYEES.

Grade of room.	MONTHLY.			
	First Month.	Second Month.	Per day.	Per month.
	Per day.	Per month.	Per day.	Per month.
1	\$1.50	\$45.00	\$1.25	\$37.50
2	1.25	37.50	1.00	30.00
3	1.15	34.50	.75	22.50

EMPLOYEES.

Daily—Same as daily rates for first-month nonemployees.

Monthly—Same as monthly rates for nonemployees.

The "per room" charge for rooms occupied by children under 12, is in addition to regular charge for children and in addition to any charge made for extra bed or cot or any en suite charges.

Employees will be required to pay bills at time of leaving in coupons. If properly identified as employees to the satisfaction of the manager, bills may be paid in currency. Persons at "room and meals" rate must pay for all meals, unless one day's meals or more are missed consecutively, in which case notice must be given to the clerk in advance in order to secure credit. Credit for meals will be allowed to nonemployees at the rate of \$2.50 per day on daily rates and at the rate of \$2.25 per day on weekly rates, and to employees at the rate of \$2 per day on daily rates.

If rooms be occupied by the month and guests are absent, credit will not be given for the room. If absence is for one full week, credit will be allowed for meals from the full monthly rate at the rate of \$1.50 per day for first month nonemployees and \$1.25 per day for second-month guests. Notice must be given to the clerk in writing or in person, in advance, to secure credit.

When one day's meals or more, are missed consecutively and required notice given in advance, children under 12 will be given credit for meals at rate of 75 cents per day and servants at rate of \$1 per day.

Open accounts will not be permitted. Guests will be required to pay their bills upon leaving. Accounts of transient employees unpaid at time of leaving will be made up at the proper nonemployees rate and sent to the Examiner of Accounts. Weekly bills will be rendered when due. Monthly bills will be made up on the 7th, 14th, 21st, and last day of the month. All bills are due and payable upon presentation. No variations from this rule will be made without authority from the Subsistence Officer.

The weekly rate does not apply unless stay has been for a full week and the monthly rate does not apply unless stay has been for a full month. And, since bills are made up once a week, the weekly bills of nonemployees who have expressed their intention of staying at the Tivoli by the month will be made out during the first month at weekly rates and proper correction will be made at the end of the first month's stay.

No employee of the hotel has authority to make any other rates or to modify any of the foregoing rules.

EUGENE T. WILSON.

Subsistence Officer.

Married.

EVERSON-GOODACRE—In the Union Church, Cristobal, on Sunday afternoon, June 15, Miss Doris

Mary Goodacre of Wakefield, Mass., to Lieut. John Horace Everson, U. S. N., of Syracuse, N. Y., Rev. Carl H. Elliott officiating.

Cold Storage Prices.

The prices of cold storage articles at the commissaries, as published in *The Canal Record* of June 11, remain unchanged.

Family Quarters.

Applications for married quarters on file on May 31 were, as follows:

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week June 23 to 28 is, as follows: Monday, Empire; Tuesday, Gatun; Wednesday, Corozal; Thursday, Culebra; Friday, Cristobal and Porto Bello; Saturday, Gorgona.

On May 31, the total membership in the Canal Zone clubhouses was 1,965, of which 110 were boys.

During May, 8,923 games were rolled on the alleys and 24,506 games of pool and billiards were played; 16 tournaments were in progress; 1,093 members of the libraries withdrew 3,072 books; 4,140 people attended 18 entertainments given by companies from the United States, and 8,316 people attended 36 local entertainments; 148 people were called on in the hospitals, and 504 cots were occupied in the dormitories.

Although the membership at the Gorgona clubhouse is naturally diminishing on account of the fact that the building is soon to be demolished, the transfers and new members in other associations have more than made up for this loss during the first eleven months of the fiscal year, 1912-13, the average membership for this period being 2,029, as compared with 1,930 for the same period during the fiscal year 1911-12.

CULEBRA.

Twenty-one men have entered in the "Drop out" bigpin tournament which will start this week. The prize for the first place will be a gold medal.

A special entertainment, with moving pictures, was given by Mr. E. H. Hagy of New York on Friday night, June 13.

EMPIRE.

The regular moving picture show will be held on Friday, June 20, the one held Monday, June 16, being a special show of selected reels belonging to Mr. Hagy. Nineteen men have entered the handicap pool tournament. Each man is to play every other man, the winner of the tournament being the one who has the most games to his credit. Gold and silver medals will be awarded as prizes.

As a number of men have requested that a gymnasium class be started, arrangements have been made whereby the first class will meet on Thursday evening, June 19. The class will meet every week according to announcement, and will be open to all.

Twenty-four men have entered the elimination bowling tournament.

The Empire "American League" duckpin tournament team bowled the Corozal team on the Culebra alleys on Wednesday, June 11, winning two out of three games. The Empire and Cristobal teams are tied for first place. They will roll off three games on the Gatun alleys to decide the winner.

GORGONA.

On Tuesday evening, June 10, Mr. Friedman furnished special piano music for the moving picture entertainment. A special moving picture exhibition was given by Mr. Hagy on Thursday night.

The Camp Elliott indoor baseball team played the local team on Wednesday night, June 11, which resulted in a score of 16 to 4 in favor of Gorgona. The following men composed the teams:

Gorgona—Ridge, Loudon, Sims, Ridge, S. Carpenter, Johnson, Christensen.

Camp Elliott—Harper, Dejuie, O'Brien, Johnson, Coleman, McDonald, Anderson.

Empire played the Gorgona team on Saturday night, June 14, and lost by a score of 27 to 3. The following was the lineup:

Gorgona—Ridge, Loudon, Sims, Ridge, S., Herring, Christensen, Hilty, King.

Empire—Rose, Gardener, Sawyer, Shafer, Watson, Alley, Crites Hall.

GATUN.

A good-sized audience was present to see the game of indoor baseball played between Camp Elliott and Gatun on the latter's floor on Saturday evening, June 14. Gatun won by a score of 20 to 11. The lineups were, as follows:

Gatun—Walton, Cauthers, Wright, Stevens, Mitchell, L., Carter, Duer.

Camp Elliott—Walbridge, Johnson, Harper, O'Brien, McDonald, Anderson, Donahue.

Linesman, Galloway; scorer, Loulan; umpire, Charnley. After the game, a social hour was spent, during which refreshments were served.

The regular weekly motion picture exhibition will be held on Saturday evening, June 21.

A lecture on "The volume of form" will be given by Chas. W. McDonald on Thursday evening, June 19, at 8 o'clock.

Oliver Goldsmith's play, "She stoops to conquer" was given at Gatun on Friday evening, June 13, by

a number of the students of the Canal Zone high school, under direction of Prof. C. C. Carr. Three hundred people were present.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending June 14:

Colon, June 8, from New York, with 33 pieces lumber, 30 pieces galvanized iron, 40 kegs bolts, 24 cases brass valves, 100 cases lanterns, 11 cases boiler covering, 50 cases sal soda, 20 drums lubricating oil, 36 cases paint, 270 pieces steel plates, 20 cases lantern globes, 26 cases paper, 50 bundles paper, 22 cases horseshoe nails, 34 reels sash cord, 60 crates buckets, 11 barrels water bottles, 68 cases caustic soda, 100 cases welding compound, 116 bales cotton waste, 167 cases candles, 89 barrels brick, for stock; 150 cases electrical material, 28 reels copper cable, 32 cases panel boards, 42 casks tile, 300 pieces structural steel, for First Division; 25 cases brake shoes, 16 casks crucibles, 200 bundles car springs, 129 packages car knuckles, for Mechanical Division; 100 pieces steel plates, for Second Division; 807 pieces steel bars, for Atlantic Division; 590 pieces structural steel, for Administration building; and a miscellaneous cargo, the whole consisting of 4,690 packages, weighing 840 tons.

Sixtoia, June 8, from New York, with 164 pieces structural steel, for Panama Railroad Company; 160 pieces steel plates, for fortifications; 240 pieces steel bars, for Second Division; 12 cases castings, for First Division; 10 packages steel bars, for stock.

Emil S. Boas, June 8, from New York, with 8 cases electrical material, for emergency dams; 50 packages buoys, for lighthouse subdivision; 217 kegs bolts and rivets, for stock.

Cartago, June 9, from New Orleans, with 1,115 pieces yellow pine lumber, for Mechanical Division; 350 tons pig iron, for emergency dams; 286 pieces cross-ties, 124 pieces piling, 458 bales straw, 180 crates handles, 9,327 pieces yellow pine lumber, for stock.

Cristobal, June 10, from New York, with 80,696 bags cement, 10 cases lead washers, 63 drums paint, for stock; 150 pieces steel knuckles, 205 pieces steel couplers, 15 kegs wire nails, 66 cases incandescent lamps, for Mechanical Division; 111 pieces iron pipe, for Fifth Division; 50 pieces steel plates, 447 rolls roofing felt, 120 barrels pitch, 89 bundles steel bars, for Second Division; 44 cases electrical material, 17 cases steel treads, for First Division.

Almirante, June 11, from New York, with 1,180 kegs wire nails, 25 pieces steel beams, for stock; 120 pieces iron pipe, for Fifth Division; 253 pieces structural steel, 14 cases structural steel, 12 bundles structural steel, for Panama Railroad Company.

Abangarez, June 12, from New Orleans, with 197 pieces lumber for stock; 100 pieces castings, 1,822 pieces lumber, for Mechanical Division; 312 barrels brick, two crates inspection cars, for Panama Railroad Company; 15 pieces piling for stock.

Atala, June 13, from San Francisco, with 2,432 pieces redwood lumber, 62 cases salt water soap, 7 cases flax packing, for stock.

Proposals for Furnishing 1,200 Coconut Seeds.

OFFICE OF THE DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., June 16, 1913.

Sealed proposals will be received at the office of the Depot Quartermaster, Mount Hope, until 3 p. m., June 30, 1913, when they will be opened in the presence of attending bidders, for furnishing in cars at any station of the Panama Railroad Company, 1,200 coconut seeds for planting. Best quality only is desired and samples must be submitted. Proposals should show unit price. Coconuts are to be supplied at the earliest practicable date. The right is reserved to reject any or all bids. Envelopes must be plainly marked: "Proposals to furnish coconut seeds, to be opened at 3 p. m., June 30, 1913."

C. NIXON,

Depot Quartermaster.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m. and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

The following ships arrived at, or departed from, the port of Balboa during the week ending June 14:

Arrivals—June 8, *Yorktown* from Corinto; *City of Sydney*, from San Francisco; June 9, *Mexico*, from south; *Ucayali*, from south; June 10, *Hualaga*, from south; June 12, *Aztec*, from San Francisco; *Barrocauta*, from Central America; June 13, *Chile*, from Guayaquil; *Ecuador*, from Guayaquil and intermediate ports.

Departures—June 9, *Hualaga*, to south; *City of Sydney*, to San Francisco; *Huasco*, to south; June 10, *Ucayali*, to south; June 12, *Peru*, to San Francisco.

CANAL

RECORD

Volume No. VI.

ANCON, CANAL ZONE, WEDNESDAY, JUNE 25, 1913.

No. 44.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Acting Chairman's Report.

The report of the Acting Chairman of the Isthmian Canal Commission for the month of May is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Gatun Lake to Rise After July 1.

The gates controlling the three sluices through the ogee of the Gatun spillway dam are to be closed on July 1. Unless circumstances demand a change of policy, Gatun lake will be allowed to fill to operating level.

In preparation for the rise, forces of the Atlantic Division are installing horizontal bulkheads in three counterweight pits which intersect the sluices. These are to protect the operating tunnel against flooding by water forced into the pits from below. The permanent arrangement contemplates filling the sluices with concrete; after this, the bulkheads may be removed from the pits and the remaining counterweights installed.

Dredges in Forebay of Gatun Locks.

During the time the forebay at the lower end of Gatun Locks was protected from inundation by the means of the earth barrier to the north, pipeline suction dredges advanced the completion of the channel to the outer side of the barrier. Following the completion and closing of the lower guard gates, the forebay was filled to sealevel with water pumped in by the dredges outside. Sealevel was attained on June 20, and on the morning of June 21, the dredges began to cut through, and during the night of June 23-24, pipeline suction dredges No. 4 and No. 86 passed into the forebay. They, and No. 83, which was already in the forebay, after excavation of the lower approach, are now engaged on the south, or locks, side of the barrier.

The barrier supports the railroad connecting the tracks on the west side of the locks,

and on Gatun Dam, with the Panama railroad. A committee is seeking a plan for preserving this track as long as it is compatible with excavation progress. The entrance of the dredges was made through the steel queen-truss bridge with a 40-foot span, erected by the Atlantic Division at the time the first dredging was performed south of the barrier. The span was lifted out by a wrecking crane to allow the passage of vessels, and then replaced for the resumption of traffic to the west side.

Reduced Consumption of Cement.

When the masonry construction of the locks was in full swing, delivery of cement from the United States at one period amounted to as much as 7,000 barrels for each working day, though the average daily delivery was less; and a stock supply of from one hundred to two hundred thousand barrels was maintained on the Isthmus to provide against delays in shipment. As the mass masonry has been completed, the rate of delivery has been gradually reduced until at the present time the rate is only 1,500 barrels per day. It is estimated that receipts at this rate with stock on hand will maintain a reserve, beginning July 1, of about 50,000 barrels.

Erection of Administration Building Begun.

Erection of steel framework for the permanent Administration building, on a knoll on the north side of Ancon Hill, overlooking the new Balboa townsite, began on June 20, and about a dozen of the columns for the exterior walls are now in place. Some of the steel for this building was stored temporarily at the east end of the site for the foundry building of the Balboa terminals, awaiting the completion of track facilities at the Administration building. It is to be removed before the end of the month and the space used for the storage of coke and pig iron, preparatory to the occupation of the foundry. Further shipments of structural steel for the Administration building are expected to arrive as fast as the erection force can handle the construction.

Progress on New Planing Mill.

The first roofing for the Balboa terminals was laid on June 18, when forces of the American Cement Tile Manufacturing Company began operations on the north slope of the north half of the planing mill. Work on this slope began at the western end and advanced toward the east; the section was practically completed on June 24. Progress in this work is rapid; the three-foot slabs are hoisted to the roof by a donkey engine, and placed like shingles, grooves in their edges engaging the purlins and the adjoining slabs. Six box cars have been transferred from the regular freight service of the Panama railroad, to haul roofing from the company's manufacturing plant at

Paraiso to the various permanent buildings at the terminals.

The riveting of the erected framework for the planing mill was completed on June 24. Machinery foundations and the reinforced concrete flooring for the building are being advanced by forces of the Second Division, under the supervision of Mr. J. A. Close, and should be completed by July 5. Arrangements are being made to obtain on the Isthmus motors for driving the machines in this building until the motors under order from the United States shall have been delivered and installed. A temporary transmission line is being carried into the building from the East Balboa electric plant, in the expectation of having the new planing mill in readiness for the scheduled moving of machinery from the Gorgona mill about July 7.

Framework for Four Buildings Shipped.

The local representative of the United States Steel Products Company, which has the contract for the steel for the permanent buildings at Balboa, has been advised that the framework for the machine shop, the steel shed, the paint shop, and the gas house, were shipped complete on June 17, from Baltimore. Forces of the Second Division at Balboa are engaged in setting the masonry plates on the foundation piers for these buildings, and in laying tracks to facilitate their erection.

Conversion and Transfer of Launch "Ruth."

The Sixth Division has transferred to the Mechanical Division the steam launch *Ruth*, heretofore a part of the dredging fleet in the Atlantic entrance. Under the arrangements for transfer, the boiler, engine, etc., will be turned into the Quartermaster's Department for re-issue, and the Mechanical Division will install in the hull the 6-cylinder gasoline engine recently removed from motor car No. 4. The *Ruth* has been in use by forces of the Second Division, engaged in measuring currents in Limon Bay; it will be required by them about a month longer, after which it will be assigned to the Cristobal marine shops for hauling employes and material.

Hollow Concrete Tile Block Manufacture.

Mr. Albert A. Pauley, patentee of a special process for making concrete tile blocks, has been employed by the Canal Commission to superintend the erection of a plant on the Isthmus for the manufacture of these blocks, out of which most of the permanent buildings at the new town of Balboa will probably be constructed. Mr. Pauley will remain until the work of making the blocks is well under way, and until others have been thoroughly instructed in the operation of the machines. The hollow blocks will be produced by what is known as the Pauley steam jacket process, making it possible to turn out a block with each machine every five minutes. The blocks are kept under a constant spray for one day,

and are then allowed to set for about a week, when, normally, they are ready for use. Twelve machines for the manufacture of these blocks have been purchased, as follows: Two machines for foundation blocks, 12 by 12 by 18 inches; four for main wall blocks, eight by 12 by 12 inches; two for corner blocks, 8 by 8 by 16 inches; one for partition blocks, 6 by 12 by 12 inches; two for partition blocks, 4 by 12 by 12 inches; and one for interior columns, 3 by 12 by 12 inches. The hollow concrete tile block plant will be under the general supervision of the resident engineer of the Fifth Division.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on June 21, being 4,471,463 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of June 21, follows:

PLANS FOR THE FOURTH.

Means Taken for the Convenience of Guests—List of Committees.

Col. W. C. Gorgas finds that he will be unable to deliver the address at the Fourth of July celebration at Cristobal, and Judge H. A. Gudger, has consented to fill his place on the program. Mr. Frank A. Gause, superintendent of schools, will read the Declaration of Independence. In all other respects, the program will be carried out as published in THE CANAL RECORD of June 11.

Captain Sukeforth of the *Ancon*, and Captain Mowbray of the *Colon*, have agreed to the use of their ships as resting places for women and children on the Fourth. Maids will be in attendance on both ships.

Rest and toilet rooms for women and children, with maids in attendance, will also be found in the Cristobal schoolhouse, located between the Y. M. C. A., and the I. C. C. hotel; and on the lower floor of building No. 2, on Roosevelt avenue.

There will be a parcel check room at the south end of the Cristobal commissary, open from 8.30 a. m., until the departure of the last train.

Lemonade and ice water will be served at several points on Roosevelt avenue and Dock 16 during the day and evening.

There will be a free merry-go-round for the children on Roosevelt avenue, at which a number of soldiers will be stationed to afford protection to the children while it is running.

Swimming will be permitted in the slip between Piers 16 and 17, except during the afternoon aquatic events. Dressing rooms for men and women will be provided on Pier 16. The police department and the Cristobal bathing club will have a launch and rowboats in the slip to protect the bathers.

Articles lost and found should be reported to Scoutmaster Ernest C. Bell, in charge of boy scout headquarters, in tent north of Cristobal fire station. A squad of boy scouts will be on duty to give any assistance required.

For the information of those desiring to find friends, etc., a map of Cristobal, and list of occupants of quarters will be available at boy scout headquarters.

Ice cream will be served to all at lunch, and, during the afternoon to children holding tickets, which may be obtained from any member of the refreshment committee. A booth for the sale of ice cream throughout the day will be located on Roosevelt avenue.

If the demand warrants it, an orchestra will be provided for informal dancing on Dock 16 between the hours of 4 and 5 p. m.

The reception committee of the Strangers Club will welcome visitors all day at their clubhouse. The dining room will be open for breakfast from 6 to 9.30; luncheon, 11.30 to 1.30; dinner, 6 to 8; coffee and light refreshments will be served any hour. The ladies' room will be provided with all necessary conveniences, and a matron will give any assistance necessary. Visitors' cards may be had from members.

The final meeting of the executive committee will be held at the Strangers' Club, Colon, on Saturday, June 28, at 2 p. m.

The complete list of committees is, as follows:

Executive committee—Mr. Tom M. Cooke, chair-

Fireworks committee—Capt. R. E. Wood, U. S. A., chairman; James A. Avery, C. O. Simmons, A. D. Fisher, F. H. Stephens, Geo. Buchan.

Transportation committee—John D. Patterson, chairman; R. L. Mock, A. K. Stone, C. W. Northrop, A. S. Jussen, J. C. Angel, W. C. Chester, A. B. Simkins.

Finance committee—E. J. Williams, chairman; George A. Arias, Harry E. Bovay, J. O. Childers, C. D. Christie, J. C. Craddock, W. L. Daniels, P. G. Eastwick, John Ehrman, L. H. Farquharson, W. A. Fawks, Robert Feuillebois, Joseph Fidanque, F. Fitzpatrick, Ralph Fogle, James Forsythe, M. L. French, L. L. Gilkey, Capt. Frank Halford, E. B. Hartley, H. A. Haywood, H. A. Jackson, Ben Jenkins, A. S. Jussen, J. C. Keller, E. R. King, H. Livingston, C. H. Mann, Joshua L. Maduro, J. W. Mullin, A. D. McElroy, W. E. McFee, Fred C. Nichols, G. A. Ninas, E. W. Palmer, Claude C. Pierce, S. C. Potts, A. Richardson, W. G. Russell, W. R. Sergeant, R. P. Seyse, W. M. Sterritt, W. A. Torbert, James C. H. Van Reed, Maj. P. R. Ward, R. H. Wardlaw, Robert Wilcox, H. R. Wilford, J. C. Wood, J. W. Wright.

Publicity and printing committee—W. C. Haskins, chairman; A. P. E. Doyle, John O. Collins.

Dance committee—Dr. M. E. Connor, chairman; C. W. Lee, Wm. F. Bennyhoff.

Entertainment committee—Capt. F. O. Whitlock, chairman.

Subcommittee on athletics—C. C. Carr, chairman; F. G. Swanson, W. H. Payne, Lieut. J. H. Malony, Lieut. E. A. Osterman, H. H. Hammer, D. T. Edwards, J. W. Wright, R. A. Koperski, Herbert Bartholomew, J. T. Neeley, P. T. Woolworth.

Subcommittee on water sports—W. J. White, chairman; C. L. Vandeburg, C. T. Owens, D. Wilson, J. St. C. Hunt, Earl R. Parsons, George B. Ward, A. B. Hendricks, W. J. Shutes, William Carter, S. P. Hughlings, L. A. McMahon.

Subcommittee on stands and decorations—Capt. Courtland Nixon, chairman. Stands—Mr. J. T. B. Bowles, Mr. Jury, Mr. J. M. Weaver, Mr. Gallagher, Mr. Mohrman. Decorations—Messrs. W. F. Bennyhoff, W. T. McCormack, W. E. Stevens, J. A. Avery, Holland, Horle, Robert Beverly, C. W. Lee, J. W. Barrett, A. L. Kunce, Carl J. Yeiser, W. H. Davenport, Neilson, A. L. Chambers, W. E. Burrell, R. V. French, W. H. Payne, P. W. Reese.

Subcommittee on Tenth Infantry—Capt. O. S. Eskridge, chairman; Lieut. J. H. Malony.

Subcommittee on U. S. Marine Corps—Lieut. Edward A. Osterman.

Subcommittee on reception—Mr. John Burke, chairman; Messrs. W. G. Comber, H. O. Cole, Col. H. A. Greene, J. M. Hyatt, Col. W. V. Judson, Dr. C. C. Pierce, A. L. Robinson, Col. W. L. Sibert, W. F. Shipley, Robert Wilcox, E. J. Williams, Col. E. T. Wilson.

Subcommittee on refreshments—Mr. C. M. Bullard, chairman; Messrs. William Brugge, Walter Poore, E. R. Bradford, C. B. Austin, S. M. White, H. G. Sivell, G. S. Edwards, Maynard Benson, R. R. Watson, Carl Strom, John Doyle, W. C. Cousineau.

Subcommittee on program and prizes—Mr. D. W. MacCormack, chairman; Messrs. J. G. Barber, G. K. Weston, E. J. Schulte, W. H. Davenport, W. V. Callahan, H. W. McCally.

Subcommittee on exercises—Mr. A. B. Dickson, chairman; Mr. Ernest C. Bell.

Subcommittee on fire department—Mr. C. E. Weidman, chairman.

Subcommittee on police department—Lieut. Guy Johannes, chairman; Sergt. L. C. Callaway, Sergt. John H. Poole.

OFFICIALS FOR ATHLETIC MEET.

C. C. Carr, chairman, subcommittee on athletics; referee, F. G. Swanson; clerk of course, J. H. Weller; assistant clerk of course, R. H. Sartor; starter, Gus Gustavson, announcer, E. L. Emory; assistant announcers, G. K. Weston, William Fraser; timekeepers' Lieut. J. H. Malony, U. S. A., Fred Huber, G. Keller, A. L. Prather, J. E. Siler, Lieut. E. A. Osterman, U. S. M. C.; track judges, E. L. Koperski, Lieut. A. A. Vandegrift, U. S. M. C., Q. A. Hall, Lieut. W. H. Wilbur, U. S. A.; field judges, Lieut. J. C. Smith, U. S. M. C., Lieut. F. C. Sibert, U. S. A., Reed Morris, E. D. Christopherson; scorer, W. H. Payne; inspectors, Mark A. Hall, Stanley R. Ford, I. H. Fleischman; marshal, Lieut. Guy Johannes.

OFFICIALS FOR AQUATIC EVENTS.

W. J. White, chairman, subcommittee on water sports; referee, Lieut.-Col. W. V. Judson; judges, Capt. M. W. Mowbray, Capt. G. E. Sukeforth, Messrs. F. C. Stanton, N. Langvardt, A. F. Symms, R. E. Tull, J. Constantine, R. Osborn; sergeant-at-arms, Mr. C. A. Black; clerks, J. F. Everett, F. F. Zundell, J. F. Prager; starters, C. J. Reilly, A. R. MacDaniels; timekeepers, J. G. Claybourn, A. M. Vaughn, R. Granger; announcers, G. C. Dow, S. E. Foster.

JOINT LAND COMMISSION.

Opinion of the Commission on Questions Governing Awards to Certain Claimants.

Status of settlers or occupiers on public lands in the Canal Zone who went upon such lands prior to the conclusion of the Treaty of November 18, 1903, and who did not subsequently receive leases or licenses issued by the Isthmian Canal Commission.

With reference to the status of such occupiers, it is clear that under the provisions of the Laws of the United States of Colombia and subsequently of the Republic of Panama, cultivators on public lands acquire a right to compensation for improvements, which rights were not divested by anything contained in the Treaty of November 18, 1903, or by the change of sovereignty effected by that Treaty.

The rights of occupiers on public lands of the United States of Colombia to compensation for improvements made thereon, are governed by Law No. 48 of 1882, which contains the following provisions (Art. V.):

"Cultivators settled on public lands with dwelling, and cultivating such lands, shall be considered as possessors in good faith of such lands, and shall not be deprived of the possession of such lands, except by due process of law. (Art. 2.)

"In case a cultivator should be deprived of his property through due process of law, he shall not be dispossessed of the land occupied by him without first being indemnified to the extent of the value of the improvements made on the land, as possessor in good faith of the land.

"Improvements shall consist of clearing of the land, embankments, cultivation, and dwellings, the value of which shall be appraised by experts, as provided for in the Judicial Code of the nation or of the state in which the adjudicated land is located.

"Until the value of such improvements shall have been paid, there shall not exist against the possessor any action for ejectment from the land." (Art. 5.)

In the case of the United States vs. Andrade (I Canal Zone Supreme Court Reports, 64) the Supreme Court of the Canal Zone had under consideration the status of an occupier of public lands of the United States of Colombia, and subsequently of the Republic of Panama.

In passing on the rights of such occupier, the lower court said (Circuit Court of the Second Judicial Circuit):

"The fact that the defendant remained in undisturbed possession of the land for such a length of time, and that he has improved the same, would certainly give him a moral right, if indeed he has not a legal one, for any and all improvements that he has placed on the land."

On appeal to the Supreme Court of the Canal Zone, the Court (Vol. 1, p. 75, Canal Zone Supreme Court Reports), after citing the provisions of Articles 2 and 5 of Law No. 48 of 1882, said:

"The defendant, besides being considered to all effects by law as a possessor in good faith of the land occupied by him and having occupied it undisturbedly with the knowledge and consent of the Colombian authorities, is entitled to the rights provided for by Article 739 of the Civil Code*, which article provides for the payment of the improvements made on the land."

The Commission rules, therefore, that in all those cases in which rights accrued prior to November 18, 1903, to occupiers or settlers on public lands, such rights were not divested by the Treaty of November 18, 1903, and that such settlers or occupiers are entitled to compensation for such rights as have accrued.

II.

Status of settlers or occupiers who were found by the United States occupying public lands, who went upon such lands prior to the Treaty of November 18, 1903, and who subsequently accepted leases or licenses issued by the

Isthmian Canal Commission.

With reference to such persons the Commission rules that the rights which accrued to such persons prior to the conclusion of the Treaty of November 18, 1903, were not divested by the subsequent acceptance of leases or revocable licenses, and that such claimants are, therefore, entitled to compensation for such rights as have accrued, and that awards by the Commission will be made accordingly.

III.

The Commission reserves for further consideration the status of the following persons:

1. Occupiers on public lands of the United States of America situated in the Canal Zone, who went upon such lands subsequent to the conclusion of the Treaty of November 18, 1903 (It is understood that the persons herein referred to do not hold Isthmian Canal Commission leases.)

2. Occupiers on public lands of the United States of America within the Canal Zone, who went upon such lands after the Treaty of November 18, 1903, and who subsequent to such entry accepted leases or revocable licenses from the Isthmian Canal Commission.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE—JOINT LAND COMMISSION.

* Art. 739. "The owner of land upon which another person without his knowledge, shall have built, planted, or sowed, shall have a right to make the building, planting, or sowing his own, upon the compensation prescribed in favor of possessors in good or bad faith in the Title of *Revendication*, or to oblige the person who built or planted to pay him a just price for the land with legal interest, for all the time he may have had possession thereof, and the one who sowed to pay him the rental and indemnify him for damages.

"If the building, planting, or sowing shall have taken place with the knowledge and consent of the owner of the land, he shall be obliged, in order to recover it, to pay the value of the building, planting, or sowing." (Civil Code of Panama, p. 166.)

Announcement of Awards.

The Joint Land Commission announced three awards on Tuesday, June 24, as follows:

1. *In the matter of the estate of Bailamonos Sur*—To the owners of the land for all rights, claims, or interest, including any improvements which may be claimed by them, the sum of \$23,000 to be distributed, as follows: Rafael Aizpuru, \$11,500; Gustavó Barrio, \$2,300; Aurora Barrio, \$2,300; Abigail Barrio, \$2,300; heirs of Narciso Barsallo, \$4,600. The sum last mentioned is to be paid into the Circuit Court of the Second Judicial Circuit at Empire to be distributed by that Court among the Barsallo heirs. The award provides, in addition, the distribution of \$12,455, in varying sums, among 65 persons, as owners of improvements, for the settlement of all rights, claims, or other interest in all growing crops, fruit trees, buildings, and all other improvements of all other kinds and all other rights claimed in land located on this estate. There are 20 occupiers of land on this estate, whose claims are still pending before the commission.

2. *In the matter of the estate of Juan Grande, located on the west bank of the Chagres River*—To the owners of the land, for all right, claim, or interest therein, including any improvements which may be claimed by them, the sum of \$10,000, to be paid into the Circuit Court of the Second Judicial Circuit at Empire, to be distributed by that Court to the several parties in interest, as the amount of their interest shall be adjudicated by the Court. The award provides, in addition, the sum of \$10,640 to be distributed among 79 persons,

as owners of improvements, for the settlement of all rights, claims, or other interest in all growing crops, fruit trees, buildings, and all other improvements of every kind, and all other rights claimed in land located on this estate. There are 12 occupiers of land on this estate, whose claims are still pending before the commission.

In connection with this claim, an opinion was handed down by the commission on Tuesday, June 24, setting forth that "On the seventeenth day of June, 1908, Manuel Espinosa B., and Manuel Amador Guerrero signed a memorandum of agreement, under which they contracted to convey to the United States the high and dry lands of the estate of 'Juan Grande,' whether improved or unimproved, at the rate of \$5 per hectare.

"Counsel for the United States has urged that, under the terms of this agreement, Manuel Amador Guerrero and Manuel Espinosa B., are under legal obligations to execute warranty title to the United States for all of their interest in the lands of 'Juan Grande,' or at least for that portion as might reasonably have been contemplated by the parties at the time of the making of this agreement.

"The United States, for reasons which were no doubt good and sufficient, refrained from taking any steps looking to the enforcement of this agreement prior to the institution of proceedings before this commission. It is clear that in no case can this commission be the proper forum in which to secure the specific performance of such a contract.

"It is of the essence of expropriation proceedings, not only in the United States, but in all countries of the world, that just compensation for property taken be given, and that the determination is vested in some tribunal whose decision rests on its estimate of the fair value of the property. The willingness of the owners of such property to sell at a certain price cannot in any case govern the conclusions of such a tribunal, especially when such willingness was expressed five years before the institution of expropriation proceedings. The powers conferred on this commission by Article 6 of the Treaty concluded between the United States of America and the Republic of Panama, November 18, 1903, places upon this commission the obligation to appraise the value of this estate.

"The commission rules, therefore, that the provisions of Article 6 of the Treaty of November 18, 1903, places upon it the obligation to appraise the value of the estate of 'Juan Grande' independent of the provisions of the memorandum of agreement of June 17, 1908."

3. *In the matter of the claims of occupiers, located in the area comprised within the relocated line of the Panama railroad and the Canal prism, extending from Gatun to Gamboa*—To 16 owners of improvements, for settlement of all rights, claims, or other interest in all growing crops, fruit trees, and buildings, and all other improvements of every kind, and all other rights and claims in the above lands, the sum of \$2,080.

In each of the above cases, the awards are to be paid to the respective claimants within 15 days from the date of their certification to the Examiner of Accounts, and if payment, or tender of payment of any of the items of the awards are not made on or before that date, such items shall, thereafter, bear interest at the rate of six per cent per annum until paid,

CANAL WORK IN MAY.

Monthly Report of the Acting Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., June 15, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of May, 1913:

Department of Construction and Engineering.

Effective May 1, 1913, the following changes were made in the organization of this department:

The dredging work in the Atlantic Division, together with the dredges, barges and forces in that service, were transferred to the Sixth Division of the Chief Engineer's Office, thus consolidating all dredging under the supervision and direction of the resident engineer, Mr. W. G. Comber.

The dry dock and its shops were transferred to the Mechanical Division.

Arrangements were effected between the division engineer of the Atlantic Division and the resident engineer of the Sixth Division for the joint use of tugs, as well as other facilities, forces, etc., that can be utilized to advantage by both interests.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	1,829	921,000	53,215	264,919	369,703	1,240,963
Work excavation, wet.	Cubic yds...	688,554		*194,510			1,252,767
Total work excavation	Cubic yds...	690,383	921,000	247,725	264,919	369,703	2,493,730
Plant excavation, dry.	Cubic yds...			13,076			13,076
Plant excavation, wet.	Cubic yds...	272,726					272,726
Total plant excavation	Cubic yds...	272,726		13,076			285,802
Total Canal excavation.	Cubic yds...	963,109	921,000	260,801	264,919	369,703	2,779,532
Material placed in dams.	Cubic yds...	93,449			12,670		106,119
Concrete placed, locks, dams and spillways.	Cubic yds...	14,645			26,837		41,482
Explosives used.....	Tons (Gross)	28.42	98.35	10.31	57.18	44.3	238.56
Rock drilled.....	Feet.....	14,125	245,700	30,196	89,094	23,004	402,119
Tracks removed.....	Miles.....	0.33	5.49	1.85	1.33		9.00
New tracks laid.....	Miles.....	2.56	13.61	2.33			18.50
Rock crushed.....	Cubic yds...				29,274	41	29,315
Cement used.....	Barrels.....	19,778	161	4,872	25,719		50,530
New roads built.....	Miles.....				0.47		0.47
Water mains laid.....	Feet.....	1,840			11,858		13,698
Sewers laid.....	Feet.....				5,264		5,204
Open drains and ditches dug.....	Feet.....	38,300		3,700	475		42,475
Average daily force.....		3,616	6,962	1,883	5,706	2,245	20,412
Average rainfall.....	Inches.....	19.83	14.30	8.04	13.48	8.04	14.70

*Accomplished by 5th division for the 2d division.

First Division, Office of the Chief Engineer.

INSPECTION OF INSTALLATION OF RISING STEM GATE VALVES, ERECTION OF SPILLWAY CAISSONS, AND OF ASSEMBLY OF HYDROELECTRIC STATION DRAFT TUBES AT GATUN.

Inspection work was continued in connection with the erection of the spillway caisson for Miraflores and the inspection reports show that the same was completed on May 31.

Work on the preparation of rising stem gate valve machinery chambers was continued; at the close of the month this work was about 99 per cent completed at Gatun, 95 per cent completed at Pedro Miguel; and 75 per cent completed at Miraflores.

Inspection of the assembly and riveting of draft tubes for the Gatun hydroelectric station was continued.

LOCK GATES AND PROTECTIVE DEVICES.

At the close of the month, a total of 51,664 tons of riveted structural steel had been shipped from the Rankin shops for the 92

leaves which are being erected. Shipments for these leaves have now been completed, with the exception of a few odd parts. The status of the work in the several locks may be summarized, as follows:

Gatun—Work in progress on all the leaves, 40 in number: Erection, 97 per cent completed; reaming, 99 per cent completed; riveting, 95 per cent completed; finishing, 25 per cent completed.

Pedro Miguel—Work was in progress on the entire 24 leaves: Erection, 96.4 per cent completed; reaming, 98.5 per cent completed; riveting, 93 per cent completed; finishing, 25 per cent completed.

Miraflores—Work was in progress on all of the 28 leaves: Erection, 86.6 per cent completed; reaming, 86.5 per cent completed; riveting, 64 per cent completed.

At the close of the month, a total of 4,904,980 field rivets had been driven, of which about 490,000 were driven during the month.

CHAIN FENDERS.

The casting of material for the chain fenders at the works of the contractor in the United States has been rather slow, although a considerable number of heavy steel castings for the main cylinder, which are cast steel and somewhat difficult to cast, have been successfully made, with practically no rejections.

HYDROELECTRIC STATION.

The erection of the penstocks was completed at the end of the month, and concreting of the penstocks was commenced.

ELECTRICAL WORK—ATLANTIC LOCKS.

During the month, 9,779 feet of cable were pulled into the conduit system, the total amount pulled to June 1, being 313,639 feet. Tests were continued in connection with the towing locomotives; spillway gate and machine, miter forcing machine, rising stem valve machines, cylindrical valve machines, and miter gate moving machines; hydrostatic tests were also conducted and inspection made in connection with the three penstocks of the hydroelectric station.

ELECTRICAL WORK—PACIFIC LOCKS.

At Pedro Miguel, there were 11,881 feet of cable pulled into the conduit system during the month, the total amount pulled to June 1, being 106,169 feet. Tests were continued in connection with rising stem valve machines, auxiliary culvert valve machines, and cylindrical valve machines.

EMERGENCY DAMS.

Inspection was in progress in four localities in the United States, and 635 tons of material were accepted. At the end of the month, 14,778 tons had been fabricated and accepted. Approximately, 848 tons of material were delivered on the Isthmus during the month; 885 tons were erected. On May 31, a total of 9,324 tons had been delivered, and 7,267 tons erected. Work was in progress on the east and west dams at Gatun and Pedro Miguel, and the east dam at Miraflores. The first part of the tests, consisting of three complete operations, was begun on May 19. The first test was performed in the following time:

	Time.	
	Mins.	Secs.
Drawing wedges	20

The other two complete operations required in the first part of the final tests were made, during which operations minor adjustments were necessary. The second part of the tests is not yet finished.

AIDS TO NAVIGATION.

Work was in progress erecting four range targets, setting 4th order range lenses in towers Nos. 1 and 2, Pacific end, and making the necessary surveys and reconnaissances in Gatun Lake in connection with the construction of range towers, reference targets, and beacons.

Second Division—Office of the Chief Engineer.

SHOPS.

Studies and plans for the various buildings, machine foundations, motorizing of machines, and illumination system were advanced during the month. Orders were made for all of the piping above ground for all of the shops; for structural steel framework of the sand house, and for supporting the shafting of the machine shop tool room; for material for the roof drainage system of the car shop, planing mill, and lumber and equipment shed; for the gravel stop on the roof and roofing

material of the pattern storage building, and for pipe railing around the stairs of that building.

Awards were made to the General Electric Company for five reversing motor planer equipments and twenty cloth pinions; the Thomas W. Pangborn Company for sand-blast equipment; the Niles-Bement-Pond Company for three 60-ton overhead cranes, and to the Cleveland Crane and Engineering Company for two 25-ton and two 20-ton overhead cranes. Specifications were prepared and requisition made for one annealing furnace, one core oven, one mold oven, and three small core ovens, and for trolley wire, insulators, and strain insulators for all crane runways.

Excavation for shop foundations amounted to 2,640 cubic yards, and for the pipe and electric conductor tunnel to 270 cubic yards; filling on the site of the shops and yard to 44,194 cubic yards. Pile driving for the foundations was completed on May 31. Twelve hundred and eighty-four cubic yards of concrete were placed in foundations, and 533 cubic yards in the tunnel, 413 linear feet of which were constructed during the month.

Four hundred and forty-five tons of structural steel were erected in shop buildings, making the total at the end of the month 484 tons, or 8.4 per cent of the whole. Steel for the planing mill is 73 per cent erected, foundry 25 per cent, and pattern storage shed 10 per cent.

DRY DOCKS.

Studies were made during the month for the granite work required in connection with the miter gate and caisson seat of dock No. 1, and for the caisson seats of dock No. 2, with the end in view of obtaining information as to the comparative cost of granite brought from the United States and that quarried on the Isthmus. Studies are in progress on the structure to carry the pressure of the floating caisson of dry dock No. 1, and on the general pumping and drainage system for both docks. The type of valve to be used in controlling the flooding culverts has been decided upon, and plans for the valves and valve operating machinery are in progress. Excavation for the dry dock amounted to 39,230 cubic yards.

TERMINAL WHARVES AND PIERS.

Plans for two sections of the quay wall, pier No. 1, and the small boat landing were advanced. Excavation for the quay wall amounted to 6,686 cubic yards, and for pier No. 1 to 1,605 cubic yards. Thirty-one caissons were sunk to rock for the foundations, the total penetration being 1,875 feet; the amount of concrete used as filler for the caissons was 1,351 cubic yards.

Fifth Division—Office of the Chief Engineer

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation amounted to 264,919 cubic yards, of which 183,383 cubic yards were classified as rock and 81,536 cubic yards as earth.

Filling and embankment—Dry filling in the prism of the west dam at Pedro Miguel was increased by 100 cubic yards, the total amount of material used for this purpose being 692,978 cubic yards. The backfill at Pedro Miguel was increased by 31,987 cubic yards, the total quantity in place at the close of the month being 994,788 cubic yards. At Miraflores,

the dry filling in the toes of the west dam was increased by 12,570 cubic yards, making the total quantities of dry and hydraulic filling in place at the close of the month 1,648,199 cubic yards and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 90,404 cubic yards, the total quantity in place on May 31 being 1,562,605 cubic yards.

Pedro Miguel Locks—Concrete work consisted of the construction of the reinforced concrete base for the north guide wall buffer, lamp post bases, and miscellaneous finishing work. Installation of buffer springs and buffer timbers on the guide and wing walls was in progress. The erection of forms for the construction of the control house was started. Fixed irons aggregating 128,751 pounds were placed in the masonry. The total amount of concrete laid was 1,135 cubic yards.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT PEDRO MIGUEL.	
Length of working day (hours)	8.00
Average number of hours per day worked laying concrete, actual working time	4.52
Average number of mixers per day	1.08
Average hourly output per mixer, actual working time (cubic yards)	8.94
Concrete laid (cubic yards)	1,135.00

Auxiliary plant consisted of a daily average of 1.08 3-cubic yard mixers. One hundred and twenty-five cubic yards of concrete were mixed by hand.

Miraflores Locks—Concrete work in the Miraflores locks proper was completed on May 17, on which date the southwest wing wall was brought to grade. Other concrete work consisted of miscellaneous finishing work for operating tunnels, intake bridges, emergency dam quadrants, stairway parapets, and towing and return tracks. Fixed irons aggregating 386,880 pounds were placed in the masonry.

The excavation for the spillway dam was completed during the month.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day worked laying concrete, actual working time	2.60	7.27
Average number of mixers per day	5.23	3.04
Average hourly output per mixer, actual working time (cubic yards)	40.79	19.03
Average amount of concrete laid per hour per berm or chamber crane, actual working time (cubic yards)	54.42
Total concrete laid (cubic yards)	2,830.00	20,848.00

Permanent plant consisted of a daily average of 1.65 berm cranes and 19 chamber cranes. Auxiliary mixing plant consisted of a daily average of 1.54 1-cubic yard and 1.5 3-cubic yard mixers, which discharged 10,243 cubic yards of concrete directly into forms. Permanent mixing plant consisted of a daily average of 3.3 2-cubic yard mixers. Locomotive cranes and derricks, placing concrete, averaged 2.65 units per day.

DISTRICT NO. 3—MUNICIPAL AND SANITARY ENGINEERING.

Reservoirs, water mains, sewers, roads, and oil pipe lines were maintained and extended, as required, to facilitate construction work.

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.	
Length of working day (hours)	8.00
Average number of hours per day, actual working time	6.11
Average number of cubic yards crushed per hour per working day	180.58
Average number of cubic yards crushed per working hour	266.13
Total output for the month (cubic yards)	29,274.00

Sixth Division Office of the Chief Engineer.

PACIFIC END.

Seven dredges were engaged in channel and inner harbor excavation at Balboa, removing

316,103 cubic yards of earth and 53,600 cubic yards of rock from the Canal prism, and 194,510 cubic yards of earth from the inner harbor and turning basin, a total of 564,213 cubic yards. At the close of the month, there remained to be removed from the Canal prism 3,632,087 cubic yards. The French ladder dredge *Gopher*, engaged in sand excavation at Punta Chamé during the entire month, removed 24,910 cubic yards.

ATLANTIC END.

Eight dredges were in operation during the month, removing 563,173 cubic yards of earth and 121,990 cubic yards of rock from the Canal prism, and 272,726 cubic yards of earth from the French canal at Mindi, a total of 957,889 cubic yards. On May 31, there remained to be excavated 2,279,598 cubic yards. The drill barge *Terrier* drilled 6,355 feet of rock, used 41,600 pounds of powder, and shot 33,790 cubic yards of material. On May 31st, 40 feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 6 plus 2,200 feet, 30 feet to mile post 6 plus 2,250 feet, 20 feet to mile post 6 plus 2,300 feet, and 10 feet to mile post 6 plus 2,800 feet.

Atlantic Division.

GATUN LOCKS.

Excavation—Out of a total of 27,159 cubic yards of rock and earth excavated during the month, 4,720 cubic yards of earth were dug from the north forebay, and the remainder was borrow pit excavation for locks backfill.

Backfill—During the month there were 27,986 cubic yards of backfilling placed. On May 31, the backfill was 94.06 per cent completed.

Receiving and issuing material—The issues of rock amounted to 13,986 cubic yards. There were 6,507 cubic yards of sand issued. Cement receipts totaled 30,926½ barrels, and the issues amounted to 17,293¼ barrels.

Concrete work—A total of 12,377 cubic yards of concrete was laid distributed, as follows:

Upper locks, 468 cubic yards; lower locks, 11,909 cubic yards.

On May 31, the locks concrete work was 99.65 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	8.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	1.93
Average number of mixers per day.....	2.00
Average hourly output per mixer, actual working time (cubic yards).....	59.99
Average amount of concrete laid per hour, per strand of cableway, actual working time, (cubic yards).....	30 12
Concrete laid, (cu. yds.) cableways.....	12,216
Concrete laid (cu. yds.) portable mixers.....	287
Concrete laid (cu. yds.) hand mixed.....	321

Total amount of concrete laid (cu. yds.).... 12,824.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement, 108,477 cubic yards, making the total amount in place 21,677,554 cubic yards. On June 1, the dam was 98.5 per cent completed.

Dry fill—Additions to the dry fill amounted to 93,449 cubic yards, which were placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 11,478,811 cubic yards.

GATUN SPILLWAY.

Concrete—Concrete laid during the month amounted to 717 cubic yards, making the total in place 223,569 cubic yards. Concrete

work for the spillway was 97.6 per cent completed.

Hydroelectric plant—In preparing foundations, 500 cubic yards of rock were removed by hand and crane, making a total excavation of 98,590 cubic yards. Eight hundred and eighty-two cubic yards of concrete were placed, making a total of 3,612 cubic yards.

WEST BREAKWATER—COLON.

Out of a total of 19,772 cubic yards of Porto Bello rock placed on the breakwater, 7,995 cubic yards were unloaded by cranes and 11,777 cubic yards by derrick barges. The total amount placed upon the breakwater to June 1 was 229,214 cubic yards.

MUNICIPAL ENGINEERING.

The floor of the sedimentation basin for the Colon waterworks was completed and the east wall of the basin erected to a distance of 130 feet. The steel trusses supporting the roof of the pump station were erected and riveted. The installation of the new 20-inch main pipelines from Brazos Brook reservoir to the purification plant was continued, 3,400 linear feet of pipe being laid. This work was 90 per cent completed at the close of the month.

Central Division.

The total amount of material excavated during the month was 921,000 cubic yards, of which 354,061 cubic yards were classified as earth, and 566,939 cubic yards as rock. The entire amount was removed by steam-shovels, 896,600 cubic yards being classified as primary excavation, and 24,400 cubic yards as from ditch for draining Old Culebra dumps. Of the total primary excavation, 275,300 cubic yards were taken from within the lines of the Canal prism, and 621,300 cubic yards from without the Canal prism, the latter amount being excavated from slides, and from the high levels as a preventive against slides.

The daily average number of steamshovels at work was 40.54, and the number of shovel days was 1,054, as compared with 40.90 shovels at work, and 1,063½ shovel days in April. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is given:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1912: Cu. Yds.						
May.....	1,412,380	1,187,872	224,508	40.54	26	1,340.01
1913: Cu. Yds.						
May.....	921,000	566,939	354,061	40.54	26	873.00

Rainfall at Empire: 1912, 6.21 ins.; 1913, 11.74 ins.

The above table shows the average output per shovel to be 34.85 per cent less in May, 1913, than in the corresponding month of 1912.

The estimated amount of dry material removed and to be removed, according to the revision of February 1, 1913, is 111,751,472 cubic yards. Up to June 1, 1913, 106,306,772 cubic yards had been removed, leaving 5,444,700 cubic yards to be removed, in order to complete all dry excavation in this division. At the close of the month, 95.13 per cent of all dry excavation was completed. On May 31, the status of the work in the two sections which compose this division was as follows:

CULEBRA CUT. Cubic Yards.	
Dry excavation accomplished.....	93,922,117
Dry excavation to be accomplished.....	5,444,700
CHAGRES SECTION.	
Dry excavation completed.....	12,384,655
Wet excavation to be accomplished.....	300,000

Deliveries of 13,287 cubic yards of spoil were made to Quebrancha siding to be used in

reinforcing the Quebrancha and Brazos embankments of the relocated line of the Panama Railroad.

Material dumped from the Naos Island trestle during the month totaled 42,413 cubic yards.

The daily average number of laborers employed was 6,337, while the average number of gold men working was 625.

Quartermaster's Department.

Labor—The force report of May 21 showed 37,209 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 4,533 men. The supply of unskilled labor was sufficient to meet all demands.

Buildings—Eight buildings were demolished. Fifteen buildings were completed; of this number, 11 are at Corozal, three at Balboa, and one at Ancon. At Pedro Miguel, one building was moved to a new site; five others were raised and moved to permit filling of the low ground.

Quarters—Employees' applications for married quarters are filed on two lists, applications of employees who entered the service prior to January 1, 1908 being placed on list No. 1; those of persons employed after that date being carried on list No. 2. On May 31, there were 22 names on the No. 1 list and 762 names on the No. 2 list.

Material and supplies—The value of material received was \$1,359,081.59. This material came forward in 40 steamers, the total weight of cargo, exclusive of lumber, piling, and ties, being 33,334 tons.

Subsistence Department.

The Hotel Tivoli showed a net profit of \$2,422.36. The operation of the line hotels, European laborers' messes, colored laborers' kitchens, restaurants, tugs, and dredges returned a net loss of \$396.89. The total net profit on subsistence operations during the month was \$2,025.47.

Department of Civil Administration.

COURTS.

During the month, five civil and one criminal case were disposed of in the Supreme Court, 68 civil and 42 criminal cases in the Circuit Courts, and 43 civil and 593 criminal cases in the District Courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$413,297.41, and the fees to \$1,980.46. Receipts from stamp and card sales, and from newspaper postage, aggregated \$8,557. The total collection of revenues was \$15,243.28, and the collection on account of court fines, costs, and fees \$2,857.55. A total of \$152,987 was deposited in postal savings accounts, and a total of \$147,512 was withdrawn. At the port of Ancon, 20 vessels entered and 21 cleared; at the port of Cristobal, 22 entered and 21 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 588, of whom 523 were men, and 65 women. Thirteen convicts were committed to the penitentiary and five were discharged, leaving 128 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,238.55, and the value of the work performed by them on the roads of the Canal Zone was \$2,065.70.

FIRE PROTECTION.

Seven fires were reported in the Canal Zone.

The total damage occasioned by these fires was \$265.

PUBLIC WORKS.

In the city of Panama the daily average consumption of water was 1,597,161 gallons and in Colon 962,300 gallons.

SCHOOLS.

The net enrollment in the whiteschools was 1,364, the average number of pupils belonging was 1,058.9, and the average daily attendance 998.5. In the colored schools the net enrollment was 1,568, the average number belonging was 921.5, and the average attendance, 736.3. At the close of the month, there were employed in the white schools 47 teachers, and in the colored schools 32 teachers, the total being one greater than at the close of the preceding month.

Department of Sanitation.

The total number of deaths from all causes among employes was 38, divided, as follows: From disease 27, and from violence 11, giving an annual average per thousand of 5.42 and 2.21, respectively. The annual death rate per thousand among employes for the month of May, 1912, was 8.01.

The annual average death rate per thousand in the Canal Zone, and in the cities of Panama and Colon, including both employes and non-employes, was 19.66. This rate is based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and populations in Panama and Colon, respectively, of 47,172 and 20,232, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of May, 1912, was 19.01.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was; Whites 3.65; blacks 5.92, giving a general average for disease of 5.42. For the same month during 1911, the annual average death rate per thousand from disease among whites was 5.81; blacks 8.97, giving a general average of 8.17; and for the same month during 1912, whites 1.95; blacks 5.50, giving a general average of 4.61.

Among employes, deaths from the principal diseases were: Dysentery, one; hæmoglobinuric fever, one; lobar pneumonia, five; organic disease of the heart, three; tuberculosis of the lungs, one; typhoid fever, two, leaving 14 deaths from all other diseases and 11 deaths from external violence. No case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus during the month.

Respectfully,

H. F. HODGES,

Acting Chairman and Chief Engineer.

Break in West India and Panama Cable.

The service of the West India and Panama Cable Company has been interrupted for the past six weeks, due to a break in its cable between the Isthmus and Jamaica, about 150 miles out from Colon. The company's cable ship *Henry Holmes* has been engaged in recovering the broken ends since Monday, June 2, but progress has been slow, owing to the depth of water where the trouble occurred. There is a narrow, but deep valley in the ocean at this point, and when the cable was first laid it was necessary to span this valley. When it parted recently, the ends sunk,

making it necessary to grapple for them in deep water. The work of grappling has to be conducted with care, for, when the broken sections are brought to the surface, it must be done as near the ends as possible, in order to avoid another break, and the consequent loss of a length of the cable. The cost of the cable was approximately \$2,500 a mile.

Small Accident at Miraflores Locks.

When the forces of the gate contractors began removing the wedge supports of one of the 81-foot leaves in the lower gate of the east chamber of the upper lock at Miraflores, on Saturday, June 21, for the purpose of swinging it, one of the anchor arms was found to have been left partly exposed on account of certain work in connection with the control house. This was not noticed at the time, as the place was hidden by the bridge and tracks used by the gate contractors. The anchor being jointed offered no resistance, thus permitting the yoke casting to move, and the gate to sag slightly at the outer end. The occurrence gave rise to a number of rumors, spread by visitors, who happened to be in the vicinity at the time. No damage was caused to the lock wall, and the leaf will be returned to its former position without difficulty.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry for the three weeks ending June 7, 14, and 21, respectively:

DATE.	Cubic yards.	Hours worked
June 2.....	2,614	7.10
June 3.....	2,379	6.25
June 4.....	2,006	5.50
June 5.....	1,275	2.40
June 6.....
June 7.....
Total.....	8,274	22.05
June 9.....
June 10.....	2,239	7.45
June 11.....	2,446	6.55
June 12.....	2,154	7.15
June 13.....	2,442	7.35
June 14.....	2,463	6.30
Total.....	11,744	36.00
June 16.....	2,195	7.20
June 17.....	2,494	6.30
June 18.....	2,134	7.15
June 19.....	4,069	10.50
June 20.....	3,117	10.00
June 21.....	3,294	7.40
Total.....	17,303	52.35

Fatal Railroad Accidents.

Frederick A. Phillips, a Barbadian laborer, employed by the McClintic-Marshall Construct Company, living at Las Cascadas, was struck and killed by I. C. C. engine No. 203, northbound, as he stepped from the southbound track to avoid a passing labor train, at 5.15 p. m., on Wednesday, June 18.

Margarita Dixon, a colored Panamanian woman, living at Paraiso, was struck by an I. C. C. labor train in the Paraiso yards at 5.25 p. m., on Thursday, June 12, receiving fatal injuries. The train crews were exonerated by the coroner's juries in both cases.

Palms have been planted in the garden of the Hotel Washington, and the grass plots on the Colon side of the garden have been bordered with hedges of coleas and crotons. The present plans for the garden provide for two tennis courts on Second street.

PREPARING FOR LAKE RISE.

Dates Set for Dismantling Buildings in Area to be Inundated.

There were still standing at Gorgona on June 1, twenty-nine American type quarters, 107 old French houses, and 88 miscellaneous buildings, the latter class including the clubhouse, police station, schoolhouse, shop buildings, etc. All of the American buildings of any value are to be removed by September 1. The material in the old French buildings that can be used to advantage in the construction of quarters elsewhere will be saved, and authority has been granted to sell such other of the French buildings as may be deemed advisable, the price to be set by the surveying officer.

No definite arrangements have as yet been made concerning the removal of the privately owned buildings at Gorgona, Matachin, Miraflores and Pedro Miguel.

There are only a few buildings in the Bas Obispo district that will be flooded, the top of the rail at the railroad station being at 84.5 feet above sealevel. Practically all of the American buildings in this settlement, with the exception of hotel, commissary, and quartermaster's storehouse, are on the hill.

There are a few houses on the west side of the Panama railroad at Pedro Miguel, including the commissary, quartermaster's storehouse and office, and corral, which are below the 55-foot contour, and outside of the area to be filled in. These will be vacated and dismantled by October 1.

All laborers' barracks within the flooded area in the Miraflores district are to be vacated by September 1. Communication with the cement shed on the west side of the Canal and the quartermaster's storehouse at Cocoli will probably be cut off by September 1. These buildings will be torn down before that date.

The Chief Quartermaster is of the opinion that surplus laborers' barracks, silver quarters, and gold quarters can be utilized as married quarters for silver men to provide for any force of laborers that may be required at the Pacific terminus after the Canal is opened. He has recommended the use of the material from the old buildings in the construction of the married quarters for silver laborers at the new colored settlement, near Balboa, and the recommendation has been approved.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, July 2, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms for application and information respecting the filling out of same, not later than the day previous to the examination. Applicants for chauffeurs' licenses must also bring automobiles with them.

Knight of Pythias.

All Isthmian friends and members of the Knights of Pythias on the Isthmus are invited to attend funeral services of the late Thomas J. Myers to be held in Ancon chapel, at 3 p. m., Sunday, June 29. Knights of Pythias will assemble in Ancon hall at 2.15 p. m.

SOCIAL LIFE OF THE ZONE.

"Bunker Hill" Tea.

The program given at the "Bunker Hill" tea held by the Ancon Study Club at Ancon hall on Tuesday, June 17 was, as follows: Piano selections, Mrs. Madler and Miss Whitney; recitation, Mrs. Ewing; vocal solo, Miss McDonald; reading, "Paul Revere's ride," Malcolm Holt of the Ancon public school; historical sketch of the Old North Church, Mrs. Luce; vocal solo, Mrs. Keyser. The hall was decorated with flags and a variety of cut flowers, contributed from Ancon Hospital gardens. The pictures exhibited were arranged against a background of dark red velvet curtains. A "Bunker Hill" cake, donated by one of the members, bearing the decorations of a flag and the date, "1776," was raffled at the close of the entertainment. The club meeting for June 19 was omitted, and the next meeting will be held at house No. 31 on Thursday, June 26.

Mrs. Harrison's School.

Mrs. W. S. Harrison's school for little children, which has been conducted in the Cristobal Union Church since last October, will close on Friday, June 27. In addition to the kindergarten preparatory work for the first grade, Mrs. Harrison has employed the Montessori system, of which she has the first-year equipment. The school will reopen in October, and the Montessori system will be made a special feature for the teaching of the children from three to five years old.

Church Notes.

The new parish hall for the Church of the Immaculate Conception, Colon, is nearly completed. The roof is on, and the images of St. Joseph and the Virgin Mary have been placed in the arched niches over the two entrances. The parish school will occupy the lower story of the building, and the upper story will be devoted to the use of the Knights of Columbus.

The members of the Chinese class in connection with the Union Church, Cristobal, have been drilling in military tactics under Mr. Leander Larson, a member of the executive committee of the church. The young men have become very proficient in their work, and have ordered guns and uniforms for the company.

The subject of the sermon at the evening service in the Cristobal Union church on Sunday, June 22, was "Defending the home; legitimate and illegitimate methods."

Receipts from Selfdenial Week.

The collections from the Isthmian branches of the Salvation Army for the annual self-denial week, in May, amounted to \$1,260, being the largest sum that has ever been collected on the Isthmus. The offering from Jamaica was \$1,200; from Barbados and Demerara, \$1,250, and from Trinidad, \$400. There are nine sections in the entire division.

The project of erecting a hall and quarters for officers in New Gatun is being held in abeyance, pending the decision on the site for the permanent native village at that place.

Lodge Notes.

Isthmian Canal Rebekah Lodge, No. 1, Independent Order of Odd Fellows, has been transferred from Gorgona to Empire, where meetings will be held in the lodge hall on the

second and fourth Fridays in each month, at 7.30 p. m. The first meeting of the lodge in Empire will be on Saturday evening, June 28, at 8.30 o'clock. All visiting Rebekahs in good standing have been invited.

The Pythian Sisters of Las Cascadas held an election and installation of officers in the lodge hall on Thursday, June 19.

Odd Fellow Memorial Services.

The annual memorial service of Canal Zone Lodge, No. 3, Independent Order of Odd Fellows, will be held at the I. C. C. chapel at Empire, on Sunday, June 29, at 7.30 p. m. The following program has been arranged:

1. Prelude—*Adoration*.....Gaul.
2. Opening hymn—*All hail the power of Jesus' name*.....Holden.
3. Baritone solo—*One sweetly solemn thought*. Ambrose.
4. Remarks in memory of the members who have died.
5. Invocation, closing with recital of the Lord's Prayer in unison.
6. Male quartet—*Nearer my home*.....Bilhorn.
Messrs. Dohrmann, Mulherr, Skinner, and Conner.
7. Scripture lesson.
8. Hymn—*Lead, kindly light*.....Dykes.
9. Offertory and voluntary.
10. Tenor and alto duet—*Redeemed*.....Towner.
Mrs. J. L. Wise and Mr. Dohrmann.
11. Sermon.
12. Male quartet—*The wayside cross*.....Palmer.
13. Hymn—*Onward, Christian soldiers*.....Sullivan.

Mrs. Julius F. Storing will assist as organist, and Mr. H. W. Dohrmann, as musical director. An invitation has been extended to all Odd Fellows, and their friends, to attend the service.

High School Commencement.

The third annual commencement exercises of the Canal Zone high school will be held in the Commission clubhouse, Empire, on Friday evening, June 27. The arrangements are under the direction of the high school faculty, and junior class. Following the program, which will occupy about one hour and a quarter, the junior class, assisted by the under classes, will hold a reception in honor of the seniors. The clubhouse will be decorated in black and gold, the high school colors; and in green and gold, the colors of the senior class. During the evening, music will be furnished by the Tenth Infantry orchestra. A special train for the accommodation of those wishing to attend the commencement will leave Colon at 6 p. m., stopping at Gatun, Gorgona, Bas Obispo, and Las Cascadas, arriving at Empire at about 7.40. Returning, the train will leave Empire at 10.15.

The program will be, as follows:

1. Overture.....Orchestra.
2. Song—*Greetings*.....Franz Abt.
High school chorus, assisted by Empire Choral Club.
3. Salutatory.....Corrine Browning.
4. Piano solo.....Arthur Howard.
5. Class poem.....Helen Calkins.
6. Song—*Ship of State*.....Words by Longfellow
High school chorus, assisted by Empire Choral Club.
7. Debate—"Resolved, that California has the right to pass laws restricting the acquisition of land by aliens."
Fred Barber and Emmanuel Perry.
8. Selection.....Orchestra.
9. Contralto solo.....Adeline Babbitt.
10. Valedictory.....Emma Stubner.
11. Selection—*Il Trovatore*.....Verdi.
High school chorus, assisted by Empire Choral Club.
12. Presentation of diplomas.....Frank A. Gause.
13. Selection.....Orchestra.

Farewell Celebration of West Indians at Gorgona.

The West Indian population of the native town at Gorgona is preparing for a farewell celebration to be held on July 4. An interesting program is being arranged. The athletic events and other pastimes, including races and dancing, will take place on the vacant lot

adjoining the baseball park. Music will be furnished throughout the day by a band from New Gatun.

Gorgona Catholic Club Disbands.

At the June meeting of the Gorgona Catholic Club, held Thursday, June 19, it was decided to disband on account of the removal from Gorgona of the majority of its members. The club was organized in 1907, and at one time had a membership of 85 men.

PERSONAL.

Six members of the House of Representatives arrived on the *Panama*, on Thursday, June 19, on a visit to the Canal. The party consists of William B. Francis, Mrs. Francis, and two daughters, Ohio; Eugene E. Reed, and son, New Hampshire; P. G. Ten Eyck, Mrs. Ten Eyck, and son, New York; J. B. Thompson, Mrs. Thompson, and two sons, Oklahoma; William E. Williams, and Mrs. Williams, and Charles M. Borchers, Illinois.

Col. William C. Gorgas, accompanied by Mrs. Gorgas, returned to the Isthmus on the *Panama*, which arrived at Cristobal on Thursday, June 19.

Mr. J. A. LePrince, accompanied by his family, returned from his annual leave on the *Panama*, on Thursday, June 19.

Obituary.

The death of Dr. Facundo Mutis Durán occurred on Friday, June 20, at Ancon Hospital. He was born in 1852, in the department of Santander, Colombia, and was graduated from the College of Bogotá, with the degree of LL. D., in 1874. From 1880 to 1904, he was closely identified with the affairs of Colombia, and of the State of Panama; and was twice governor of Panama. He was a delegate to the conference held in Washington, in 1902, to discuss the Treaty for an interoceanic canal, and, in 1904, was made a commissioner for the compilation of the Codes of the Republic of Panama. On June 1, 1905, he was appointed the first Chief Justice of the Supreme Court of the Canal Zone, continuing in the office until the expiration of his term on January 4, 1909. He afterward retired to private life, but during the presidential term of Dr. Pablo Arosemena, he served as a justice of the Supreme Court of Panama until the enactment of a law establishing citizenship as a qualification for the office. He is survived by his wife, Mrs. Lotta Durán, who resides in Panama city.

William Joseph Allen, an American, employed in the Atlantic Division, died at Colon Hospital, on Tuesday, June 17. He was 53 years of age, formerly lived at Eddyville, Iowa, and had been on the Isthmus since November 22, 1907. He is survived by his wife, residing at Gatun.

Joseph Gallagher, an American, employed as a fireman on the *U. S. S. Hannibal*, died at Colon Hospital, on Tuesday, June 17. He was 32 years of age, unmarried, and had been on the Isthmus 10 days. His brother, Michael Gallagher, lives at Kingston, N. Y.

With the approval of the Secretary of War, the death sentence of Francisco Zaldivar, a Panamanian convicted of murder in the Canal Zone, and sentenced to be executed on July 11, 1913, has been commuted to life imprisonment.

OFFICIAL CIRCULARS.

Closing of Planing Mill and Carpenter Shop at Gorgona.

CULEBRA, C. Z., June 18, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The planing mill and carpenter shop at Gorgona will be closed on July 7, 1913, and during the week beginning on that date, the machinery, tools, templates, material, and so forth, will be transferred to and installed in the planing mill of the permanent shops at Balboa. It is not expected that the Mechanical Division will be able to do planing-mill and carpenter work during the week ending July 12, 1913.

Heads of departments and divisions should arrange to have all planing-mill and carpenter work, for which they are dependent upon the Mechanical Division, and which they will require before the middle of July, completed prior to July 5, 1913.

Work requests upon the Mechanical Division requiring planing-mill and carpenter work will continue to be made on the headquarters of the Mechanical Division at Gorgona until further notice.

H. F. HODGES,

Acting Chairman, Isthmian Canal Commission.
Second Vice-President, Panama Railroad Company.

Repairs to Lidgerwood Flat Cars and Steel Dump Cars.

CULEBRA, C. Z., June 19, 1913.

CIRCULAR No. 349-D:

Construction work is considered to have reached the stage that will enable Lidgerwood flat cars and steel dump cars that would require extensive repairs to put them in serviceable condition to be retired.

Before extensive repairs are commenced on any Lidgerwood flat car or steel dump car, the superintendent of the Mechanical Division will inform the head of department or division concerned of the condition of the car and of the estimated cost of repairing it, and will recommend that the car be surveyed and condemned and that the car be stripped if any of the parts are required or can be used for repairing other cars.

The head of department or division should request the survey and condemnation of cars recommended by the superintendent of the Mechanical Division if such action will not decrease the desired rate of prosecution of construction work. Before disapproving the recommendation of the superintendent of the Mechanical Division that a bad-order car be surveyed and condemned on account of interference with the construction work, it should be ascertained from the inspector of shops whether or not cars can be obtained from other departments and divisions.

The stripping of a sufficient number of cars that are surveyed and condemned to provide necessary spare parts will be authorized when recommended on survey request.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Charges for Electric Power.

CULEBRA, C. Z., June 19, 1913.

CIRCULAR No. 336-F:

Effective July 1, until further notice, the charges for electric power furnished by the Mechanical Division to all departments and divisions, including the Panama Railroad Company, the United States Army, the United States Navy, the United States Marine Corps, and the Santo Tomas Hospital will be, as follows:

Item.	Per month.	Per kilo-watt hr.
Each 16-candle power lamp, or equivalent, with lamp renewals..	\$.30	
Each arc lamp.....	5.00	
Lighting, on meter basis, with lamp renewals.....		.04
Lighting, on meter basis, without lamp renewals.....		.02½
Each 15-horsepower motor, without meter.....	50.00	
Each 10-horsepower motor, without meter.....	30.00	
Each 5-horsepower motor, without meter.....	15.00	

These rates do not apply to nor change the existing charges for electric power furnished for private consumption.

The rates fixed by Circular No. 336-A, dated December 30, 1910, and by Circular No. 336-B, dated April 28, 1911, are revoked. H. F. HODGES,
Acting Chairman and Chief Engineer.

Acting Superintendent of Public Works.

ANCON, C. Z., June 16, 1913.

HEAD OF DEPARTMENT OF CIVIL ADMINISTRATION:

CIRCULAR No. 112:

Mr. J. J. Reidy is designated Acting Superintendent

of Public Works, effective today, vice Mr. M. E. Gilmore, resigned.

H. F. HODGES,
Acting Chairman.

Passing Loaded Work Trains.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., June 18, 1913.

G. S. BULLETIN No. 4.

G. S. Bulletin No. 3, dated June 16, in regard to Panama railroad trains, when passing I. C. C. work trains loaded with rock, on double track, coming to full stop until after I. C. C. trains had passed, is hereby cancelled.

J. D. PATTERSON,
General Superintendent.

Fourth of July Train Service.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., June 17, 1913.

CIRCULAR No. 110:
TO ALL CONCERNED:

On July 4, 1913, passenger trains will be run on the regular published Sunday and holiday schedule, with the following additions thereto:

A special train will leave the Panama passenger station at 7 a. m., making stops at Corozal, Miraflores, Pedro Miguel, and Gatun, arriving at Colon 8.30 a. m. This train will be run over the Gold Hill line.

A special train to take care of the enlisted men of the Tenth Infantry, at Las Cascadas, and the Marines, at Bas Obispo, will leave Las Cascadas at 7 a. m., and Bas Obispo, at 7.05 a. m., arriving at Colon 8.15 a. m. This train will make no other stops, and will not carry any one, except Marines and enlisted men from the Tenth Infantry.

Returning, the Marines and Tenth Infantry special train will leave Cristobal on track opposite commissary, at 6 p. m., making stops only at Bas Obispo and Las Cascadas, and carry Marines and enlisted men from the Tenth Infantry only.

A special train will leave Colon passenger station at 9.30 p. m., making all stops.

A special train will also leave Colon passenger station at 1 a. m., July 5, making all stops.

The shuttle train service between Colon and Gatun will be operated on the following schedule, making stops at New Gatun, Mindi, and Mount Hope:

Leave Colon 7.30 a. m., arrive Gatun 7.50 a. m.
Leave Gatun 8 a. m., arrive Colon 8.20 a. m.
Leave Colon 11 a. m., arrive Gatun 11.20 a. m.
Leave Gatun 1.30 p. m., arrive Colon 1.50 p. m.
Leave Colon 9.15 p. m., arrive Gatun 9.35 p. m.
Leave Gatun 10 p. m., arrive Colon 10.20 p. m.

J. D. PATTERSON,
General Superintendent.

Acting Local Auditor, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., June 18, 1913.

CIRCULAR No. 114:

TO ALL CONCERNED:

During the absence of Mr. R. W. Hart, local auditor, on leave, Mr. M. L. Duff is appointed acting local auditor, effective Wednesday, June 18, 1913.

JOHN D. PATTERSON,
General Superintendent.

Notice to Mariners.

PANAMA RAILROAD COMPANY,
OFFICE OF PORT CAPTAIN,
COLON, R. P., June 23, 1913.

The notice to mariners, dated June 1, 1913, is hereby cancelled.

Under date of June 21, the commander of the cable steamer *Henry Holmes* advises that he has placed two cable buoys in the following positions:

1 buoy, Lat. 12° 06' 05" N. Long. 78° 43' 42" W.
1 buoy, Lat. 12° 11' 45" N. Long. 78° 40' 22" W.

These buoys are down in 2,000 fathoms, and are in the track of vessels plying between Colon and Jamaica.

J. Sr. C. HUNT,
Port Captain.

Sale of Towboat "Exotic."

OFFICE OF DEPOT QUARTERMASTER,
MOUNT HOPE, C. Z.,
June 21, 1913.

Sealed bids will be received at this office until 2 p. m., Tuesday, September 2, 1913, for the steel-hull, stern-wheel towboat *Exotic*, built for the Commission in 1908 by Pusey and Jones, Wilmington, Del., at an approximate cost of \$40,000.

Gross tonnage, 150; two tandem compound engines, 7-inch by 14-inch, 48-inch stroke; two horizontal

tubular boilers, Mississippi River type, 44-inches by 190-inches; indicated horsepower, 70; equipped with boiler feed pumps; boat equipped with capstan, steam steering gear, etc.; retired from service in 1911.

This boat can be inspected and further particulars obtained on any working day between 7 and 11 a. m., and 1 and 5 p. m., upon application at this office; any further information desired by intending bidders at a distance will be furnished by letter on request. Right, s reserved to reject any or all bids.

Bids should be addressed to the Depot Quartermaster Mount Hope, Canal Zone, plainly marked, "Proposal to purchase towboat *Exotic*, to be opened September 2, 1913."

COURTLAND NIXON,
Depot Quartermaster.

Rainfall from June 1 to June 21, 1913, Inclusive.

Married

HALLOWELL-JORDAN—On June 7, at the home of the bride's parents at Pedro Miguel, Ida May, daughter of W. B. Jordan to Mr. Cooper Hallowell, of Arkansas, the Rev. Harry Compton officiating. Canal Zone residence, Ancon.

DAVIES-BRENEA—At St. Joseph's Church, Colon, on Saturday, June 21, by the Rev. Father Pouget, assisted by the Rev. Father Fitzpatrick, Maria, daughter of Mr. and Mrs. Juan Brenea of Cartago, Costa Rica, to Mr. E. D. Davies, Canal Zone residence, Mount Hope.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week June 30 to July 5 is, as follows: Monday, Cristobal; Tuesday, Corozal; Wednesday, Empire; Thursday, Gatun; Friday, Gorgona and Porto Bello; Saturday, Culebra.

CULEBRA.

The personnel of the executive council has been increased by the appointment of Messrs. J. H. Smith, Jr., and H. G. Cornthwaite. Mr. H. O. Hostetter has resigned on account of his removal to Empire.

High scores in bigpins for the week are, as follows: Anderson, 201; Case, 220.

Twenty-four men are competing for the championship in a local handicap bowling tournament which will close this week.

An informal social for the grown-ups will take place on Friday, June 27, at 8 p. m. A program is being arranged and refreshments will be served. A special invitation is extended to the ladies, bachelors, and new arrivals.

All those interested in the formation of a current events discussion club, to meet during alternate weeks, are requested to hand their names to the secretary.

EMPIRE.

Entries have been closed for the ragtime and tenpin bowling tournament. Each man is to play two games with each other man.

Considerable interest is shown in the handicap pool tournament. The standing of the first three men is: Walcott won 9, lost 5; Shafer won 9, lost 4; Jacques won 7, lost 2.

The glee club meets every Wednesday night at 8 o'clock. A program will be given in the near future. Persons wishing to join the club are requested to attend the rehearsals.

GORGONA.

The Culebra volleyball team played at Gorgona on Friday evening, June 20. The score was 3 to 2 in favor of Culebra. The lineup was, as follows:

Gorgona—King, Gorce, Whipple, Ellington, Herring, and Kramer.

Culebra—Warner, Van Zandt, Becklem, Hoffman, Herrington, and Coppin.

Gorgona will arrange for another game soon. The regular gymnasium class will be held twice a week, and special training for the track will be offered to those who wish to train for the meet on the Fourth of July.

The standing in the head pin bowling tournament is, as follows:

Singles—Sims, high score, 100.

Doubles—Morrison and Stewart, 565; Trieber and Denst, 558; Sims and Denst, 549.

GATUN.

The married men's gymnasium class, which is held twice a week, continues to draw a good attendance. This class meets at 5.30 p. m., and new members will be welcomed.

Two evening gymnasium classes are held each week. Members who have taken work are pleased with the results.

The Spanish classes continue. The pupils in several of the classes have nearly completed the course and will be graduated soon.

CRISTOBAL.

On Friday night, a "smoker" was given to the members and their friends. The attendance was about 275. The main part of the program consisted of special moving picture films and music by the saxophone orchestra from Camp Elliott. Irish dialect sketches and songs were given by Master Richard Roberts, and Scotch songs by Mr. Archie Harper. Refreshments were served, and there was a liberal distribution of cigars.

The Cristobal indoor baseball team won the game played with the Gatun team by a score of 12 to 11. The teams were, lined up, as follows:

Gatun—Stevenson, first base; Roberts, second base; Wrights, shortstop; Walton, third base; Schad fielder; Watter, catcher; Duer, pitcher.

Cristobal—Levy, first base; Carpenter, fielder; Mathuse, pitcher; Russel, shortstop; D. Raymond, second base; A. Fraser, third base; MacSparran, catcher.

Moving pictures will be held on Saturday night, owing to a change in date with Gorgona.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal Colon, and Balboa, during the week ending June 21.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m. and for Limon direct, Tuesdays at 3 p. m.

The following ships arrived at, or departed from, the port of Balboa, during the week ending June 21:

Arrivals—June 16, *Tricolor*, from Puget Sound; June 18, *Aysen*, from Valparaiso; June 20, *Luckenbach*, from San Francisco; June 20, *San José*, from San Francisco. Departures—June 16, *Ucayali*, to south; June 16, *Manari*, to intermediate ports; June 17, *Mexico*, to south; June 18, *U. S. S. Yorktown*, to Corinto, Nicaragua; June 20, *Ecuador*, to Guayaquil; June 21, *Chile*, to Buenaventura and Tumaco.

Lost—On train No. 28, leaving Panama at 7 p. m., on Sunday, June 22, mileage book No. 93054S. Finder is requested to notify T. B. Gardiner, Box 43, Paraiso, C. Z.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, JULY 2, 1913.

No. 45.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Increased Facilities at Balboa Commissary.

An addition has been built at the rear of the Balboa commissary store to house the grocery department for "silver" employees. The building is 30 by 64 feet in plan, and one-story in height, with a ridge roof having a slope of one on two. A 64-foot counter extends along the west wall, and customers have access to it through windows from a 10-foot covered porch, without entering the building. Connection with the cold storage is made at the west side of wareroom over a covered platform. The space heretofore used for "silver" employees' groceries will be devoted to dry goods for them.

Following the increased activities around the Pacific terminus of the Canal, the sales at the Balboa commissary have been steadily increasing; for the month of May they amounted to \$59,745.57, an increase of 75 per cent over the sales for May, 1912. The force employed numbers 75 men and three women.

Lots on Cristobal Water Front.

There are four lots on the water front at Cristobal, situated between the fire station and the new docks, known as lots Nos. 1, 2, 3, and 4. Lots Nos. 1 and 2 have a frontage on Roosevelt avenue of 150 feet each, and a depth extending back from it of about 75 feet each. Lot No. 3 is irregular in size, having a frontage on the street of 150 feet, and a depth of 20 feet at one end, and 94 feet at the other, facing lot No. 5. The latter is also of irregular size, approximately 100 by 120 feet. Lots Nos. 1 and 2 are being filled in to bring them up to the street level, the other two lots having already been filled. About 6,000 cubic yards of material will be required, the cost of which will be borne by the Panama Railroad Company. This work has necessitated the removal of house No. 344, formerly standing on lot No. 1, to the plot of ground in Cristobal used until recently as a tennis court, the latter having been transferred to

a vacant space in the rear of the clubhouse.

Applications for the rent of lots Nos. 1 and 2 have been received and approved. The United Fruit Company plans to build an office on lot No. 1, and the Hamburg-American Line proposes to erect a two-story building for its use on lot No. 2. All of these lots will be in charge of the land department of the Panama railroad.

Permanent Cement Storage.

A committee, consisting of Lieut.-Col. T. C. Dickson, Capt. R. E. Wood, Mr. H. O. Cole, Mr. E. E. Lee, and Mr. C. W. Northrop, representing, respectively, the Second Division, the Quartermaster's Department, the Fifth Division, the First Division, and the Panama railroad, has been appointed by the Acting Chairman and Chief Engineer to consider and report upon the facilities required for handling cement after August 1. The report is to include the size and location of a new building for storage purposes. Lieutenant-Colonel Dickson is chairman of the committee.

Trestle for Dumping Mud.

Since the advent of the rainy season, much of the material from slides in the Culebra Cut section has been reduced to mud, the handling of which at the dumps causes a delay in track shifting operations and other work, holding the dirt trains for longer periods, and curtailing the output. To remedy this, the plan of driving a trestle at dump No. 7, on the Panama railroad relocation, about two miles north of Gamboa has been approved. It will be about 35 feet in height, and of the length of one train; it will be used solely for the dumping of mud, and it is estimated that from 90,000 to 100,000 cubic yards of soft material can be dumped therefrom without changing the track.

It was the intention to start driving this trestle at once with piles now on hand, as a big shipment of piles was expected last week. As the Central Division has just been advised that the piles ordered will not be here for a week or two, the trestle will not be started until arrival of new piles, as the present piles must be held for immediate use in case the Naos Island trestle requires redriving.

Tunnel for Empire-Gamboa Wagon Road.

Instead of crossing the Panama railroad relocation at the point where the Obispo Diversion is spanned by it, as provided for in the original survey, the new Empire-Gamboa highway will be continued on the east side of the railroad, passing through the present railroad cut at a distance of about 30 feet from the track. A railing will be placed on the west side of the road through the cut as a protection to traffic. The road on leaving this cut will follow the slopes of the hills until the Sardinilla River valley is reached into which it will dip and cross to

the west side of the railroad by means of a tunnel, thus avoiding the necessity of a grade crossing as originally planned. This tunnel will be about 125 feet long, concrete lined, and of sufficient size to permit the passage of a team and wagon. From the tunnel, the road will climb out of the valley on an easy gradient, and thence it will continue in a nearly direct line to its point of intersection with the Las Cascadas plantation road.

Final Rise of Lake.

Anticipating the schedule, the last gate of the three 8-by-18 foot sluices through the ogee of the Gatun spillway dam was closed at 10.40 a. m., on June 27, with the surface of the lake 48.25 feet above sealevel. It is not expected to open the gates again, and the lake may be considered to be on its final rise to operating level. Under conditions of normal runoff, as determined by measurements recorded over the watershed for the past 23 years, the lake should reach 85 feet about December 1, 1913; it should rise to 71 feet, the elevation of the railroad at Gorgona, about the first of October. At that height it would afford a 21-foot channel. The top of the dike at Gamboa, protecting Culebra Cut from flooding through its north end, is 78.2 feet above sealevel, but it is anticipated that the water will be let into the Cut before the lake has reached that elevation, which it may do about the first of November.

The channel between Gatun and Gamboa has been completed since July, 1912, with the exception of about 300,000 cubic yards of gravel, washed into it by the Chagres River, which are to be removed by dredges. From Gatun to Bohio no excavation was required, except a small quantity at Peña Blanca; the surface of the ground was less than 40 feet above sealevel, and the full lake will afford depth enough for the ships. The channel needed only to be cleared of vegetation and marked with lights and buoys. From Peña Blanca to Tabernilla the excavation was mostly in cutting off the tops of peninsulas formed by the tortuous course of the Chagres. The heavy work was from San Pablo to Gamboa. Total excavation in the Chagres district to date has amounted to 12,384,655 cubic yards. Including what remains to be done, the total excavation for the channel through Gatun Lake is less than the excavation accomplished in Culebra Cut every year since 1907.

Gatun Lake came into existence on April 25, 1910, when the west diversion at Gatun Dam was closed, and the flow from the Chagres and Trinidad rivers was forced through the spillway channel. The head of the spillway was 10 feet above sealevel, which caused the water to rise to a normal surface of 14 feet above the sea. In times of flood, the surface rose to about 18 feet, inundating parts of the

NOTES OF PROGRESS.

(Continued).

Panama railroad through the Black Swamp. On February 15, 1912, the relocated line of the railroad, between Gatun and Gamboa, was placed in use and immediately afterward the removal of the old line was begun. About the same time the sluice gates were closed and the lake was allowed to rise. It attained a maximum elevation of 56.3 feet on November 30, 1912. At this height the water poured over a gap, at 50 feet above sealevel, in the uncompleted ogee, and, in order to allow the completion of the dam during the dry season, the sluice gates were opened in December. On January 1, 1913, the surface of the lake was 48.3 feet above sealevel, around which it has been maintained since, though the completion of the ogee to its elevation of 69 feet was accomplished in April.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on June 28, being 4,466,397 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of June 28, follows:

Shift of Track Between Mount Hope and Mindi.

About a mile and a half south of Mount Hope the main line of the Panama railroad will be shifted slightly to the east, for the

complete elimination of one curve, and of 11 degrees of the central angle on another. At the same time a rise or fall of four feet in grade will be done away with, and the line will be shortened by 26 feet. The change will straighten the track, allowing greater speed of trains. The chief engineer of the railroad made an estimate for the work in December, 1910, but it was deferred, pending dredging and filling

operations in the vicinity by the forces engaged in the Atlantic entrance channel.

Permission has been granted to an agent of the Spanish-American Iron Company, operating mines in Cuba, to recruit not more than 300 Spanish laborers in Colon and Panama who are not employed by the Isthmian Canal Commission or Panama railroad.

LABOR FORCE AND QUARTERS IN MAY.

The force report for May 28 shows the actual working force of the Canal Commission to be 32,255; of the Panama railroad, 6,213, and of the contractors, 4,565, a total effective working force of 43,033 men. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,337, a reduction of 21, as compared with the previous month. A statement of the Canal force, by divisions, follows:

SOCIAL LIFE OF THE ZONE.

Ancon Club in General Federation.

The president of the Ancon Study Club has received notification of the admission of the club on June 7 to membership in the General Federation of Women's Clubs. The study club was organized on January 24, 1911, and is now the only club in the Canal Zone which is affiliated with the General Federation. There are 14 members. Beginning with July, the monthly dues for active members will be 15 cents, instead of 25 cents, as heretofore. Associate members are admitted on election and payment of annual dues of \$1. The report of the librarian shows the number of subscribers drawing books from the library to be 50. On Thursday, July 10, there will be a semiannual election of officers.

Church Notes.

During the three weeks' absence of the Rev. H. R. Carson, chaplain of Ancon Hospital, and rector of St. Mary's Church, Empire, the services at St. Luke's Hospital Chapel, Ancon, will be maintained as usual, the Rev. Edward J. Cooper, rector of Christ Church, Colon, assuming the charge. The services at St. Mary's will be discontinued until the chaplain's return.

The quarterly meeting of the Isthmian Sunday School Association will be held in the Commission chapel, at Empire, on Sunday afternoon, July 13. The delegates from Cristobal and the intermediate stations will take the train leaving Colon station at 1.10 p. m., and delegates from Panama and the intermediate stations will leave on the 1 o'clock train. The devotional services will begin at 2.15. The principal features of the exercises will be addresses by the Rev. A. A. Nellis, the retiring president; Mr. W. H. Kromer of the Union Sunday School, Cristobal, and Mr. J. T. Page of Porto Bello. There will be an election of officers.

The ladies' auxiliary to the Empire Christian League held an election of officers at the meeting in June, when the following members were chosen: President, Mrs. Phil Kelly; first vice-president, Mrs. W. D. Stanton; second vice-president, Mrs. J. G. Garwood; secretary-treasurer, Mrs. T. M. Drake. At the meeting on Friday, July 11, the mission study class will take up Headland's book on "China's new day."

The Canal Commission has granted a plot of ground in Ancon to the Southern Baptist Convention, for the erection of a permanent church building. The plot, which is 150 feet square, is situated on the road leading to Bishop's Hollow, northeast from Ancon Hospital laundry, and opposite the schoolhouse. It is proposed to erect a small but adequate concrete building on the site. Arrangements are under way for further extension work of the Baptist mission in the permanent town of Balboa. The Rev. J. L. Wise is superintendent of the mission in Panama and the Canal Zone.

The Woman's Altar Guild of St. Luke's Hospital Chapel, Ancon, has resumed its meetings, the first having been held at the home of Mrs. Frank Feuille on Tuesday, June 24, when there was a good attendance. Two new members were enrolled, and the guild welcomed the newly appointed chaplain, the Rev. H. R. Carson. The next meeting will be held at the residence of Mrs. Gorgas, on Tuesday afternoon, July 8, at 3.30 o'clock.

A new Mason and Hamlin cabinet organ

has been purchased for the seawall Methodist Episcopal Church, Panama, and will be dedicated on Sunday morning, July 6. Children's day will be observed on the same day, and morning service will be combined with the Sunday school exercises, the service to begin at 10 a. m. A special program has been arranged for the occasion. Mr. Skinner will be the soloist.

The Woman's Foreign Missionary Society of the Methodist Church will meet at the residence of Mrs. E. M. Keyser, on Saturday afternoon, July 12, at 2.30 o'clock.

Third Annual Commencement of the Canal Zone High School.

There was a large attendance at the third annual commencement of the Canal Zone High School, held at the Commission clubhouse at Empire, on Tuesday evening, June 27. The hall was decorated with yellow and black, the high school colors, and green and gold, the colors of the senior class, with school pennants between the doors. While the audience was assembling, the orchestra of the Tenth Infantry played popular airs and selections from operas. The procession of the school through the hall, which marked the opening of the exercises, took place at 8.30. The under school preceded, then came six girls of the sophomore class bearing chains of pink and white blossoms before the seniors. The graduating class occupied the platform, accompanied by the faculty. The program announced in the last issue of THE CANAL RECORD was carried out. Following the exercises, the juniors gave a reception to the seniors. There was informal dancing until about 11 o'clock, refreshments being served during the time.

PERSONAL.

Lieut.-Col. D. D. Gaillard is a passenger on the *Colon*, due to arrive at Cristobal on Wednesday, July 2.

Mr. C. G. Van Riper, passenger agent of the Panama Railroad Company at its office in New York city, accompanied by Mrs. Van Riper and two daughters, arrived on the *Ancon*, which docked at Cristobal on Friday, June 27.

Obituary.

The death of Thomas J. Myers, an American, employed as a locomotive engineer in the Fifth Division, occurred at Ancon Hospital on Monday, June 23. He was 53 years of age, a widower, and had been on the Isthmus five and one-half years. He was a native of California, and had no immediate relatives. The funeral services were held at Ancon Hospital chapel on Sunday, June 29, under the auspices of the Knights of Pythias, of which order he was a member.

Mrs. John Cameron, the wife of Mr. John Cameron, living at Cristobal, died in Colon Hospital on June 28. She was 45 years of age, and had been on the Isthmus six months.

Revenue Collections for May.

Collections other than postal collections during the month of May, 1913, were, as follows:

Bicycle, chauffeur and navigator licenses.....	\$25.00
Motor vehicle licenses.....	53.00
Steamboat inspection.....	40.00
Insurance collections.....	50.00
Taxes, licenses, etc., (deputy collectors of revenues.....)	4,537.82

NONREVENUES.

Cash received from estates.....	6,188.78
Value of estates closed.....	3,723.04

FUNDS FOR CANAL WORK.

Appropriations for Fiscal Year 1913-14 for Various Departments, and for Fortifications.

Provision for carrying on work on the Canal, and on the fortifications, including the armament thereof, during the fiscal year ending June 30, 1914, was made in the Sundry Civil Act, approved June 23, 1913. The appropriation for the Canal work amounts to \$16,265,393, divided into the following items:

Salaries of officers and employees in the United States.....	\$153,393
Incidental expenses in the United States, including rent of the Panama Canal building in the District of Columbia, \$7,500; textbooks, and books of reference, \$1,000; and additional compensation to the Auditor for the War Department for extra services in auditing accounts of the Panama Canal....	\$63,000
Salaries of members of the Canal Commission, and officers and employees on the Isthmus, other than skilled and unskilled labor, in the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts; and for those employed in connection with the preservation of plans, drawings, and other records.....	2,725,000
Skilled and unskilled labor on the Isthmus in the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts.....	6,125,000
Material, supplies, and equipment, and other expenses not in the United States, including the construction in the United States in Government or private yards, in accordance with plans and specifications to be prepared by the Navy Department, and to have a cargo capacity of 12,000 tons of coal and a speed of not less than 14 knots per hour, two colliers to cost not exceeding \$1,000,000 each; and including the payment of damages caused to the owners of private lands, or private property of any kind, by reason of the grants contained in the Treaty between the United States and the Republic of Panama, proclaimed February 26, 1904, or by reason of the operation of the United States, its agents or employees, or by the reason of the construction, maintenance, operation, sanitation, and protection of the Canal, or of the works of sanitation and protection therein provided for, whether compromised by agreement between the claimant and the Chairman of the Commission, or allowed by a joint commission, and the payment for land and land under water as authorized in Section 3 of the Panama Canal Act, for the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts.....	5,000,000
Miscellaneous expenditures, including recruiting and transportation of laborers, transportation of employees from the United States, repatriation of laborers and employees, and all other incidental and contingent expenses, not otherwise provided for, in the departments of construction and engineering, quartermaster's, subsistence, disbursements, and examination of accounts.....	725,000
Salary of member of the Canal Commission in charge of the Department of Civil Administration, and of the officers and employees, other than skilled and unskilled labor, in the departments of civil administration and law, together with the necessary portion of such sums as shall be paid as water rentals or directly by the Government Panama for the maintenance of water works, sewers, and pavements in the cities of Panama and Colon.....	500,000
Skilled and unskilled labor in the Department of Civil Administration, together with the necessary portion of such sums as shall be paid as water rentals or directly by the Government of Panama.....	

ma for the maintenance of water works, sewers, and pavements in the cities of Panama and Colon; and for material, supplies, etc., and contingent expenses of the departments of civil administration and law, including not exceeding \$500 for law books, together with the necessary portion of such sums as shall be paid as water rentals or directly by the Government of Panama for the maintenance of water works, sewers, and pavements in the cities of Panama and Colon.....	74,000
Salary of member of the Canal Commission in charge, and of officers and employes, other than skilled and unskilled labor, of the Department of Sanitation on the Isthmus, including those temporarily detailed for duty away from the Isthmus	450,000
Skilled and unskilled labor of every grade and kind for the Department of Sanitation on the Isthmus	150,000
Material, supplies, etc., including medical aid and support of the insane, and of indigent persons permanently disabled, while in the line of duty and in the employ of the Isthmian Canal Commission, from earning a livelihood, and contingent expenses of the Department of Sanitation on the Isthmus, including \$100,000 for the construction of a quarantine station.....	300,000
Total.....	\$16,265,393

The foregoing sums, so far as necessary, shall be available for the operation of the Canal, for the permanent organization authorized to be established under the Panama Canal Act; for dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances; for the purpose of providing coal and other materials, labor, repairs, and supplies; for the office buildings, quarters, and other necessary buildings; for the payment of claims arising out of injuries to, or death of employes; and for the consolidation and preservation of the files of papers and other records which have accumulated, or may accumulate during the construction of the Canal, and needed or useful or have a permanent value or historical interest.

The entire appropriation is made available until expended, and, exclusive of fortifications, and of the amount used for operating the Canal and for the permanent organization after the Canal is opened for use and operation, shall be paid from out of the proceeds of the sale of bonds. In cases of emergencies arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress, 10 per cent of the foregoing amounts shall be available interchangeably for expenditure on objects named, but not more than 10 per cent shall be added to any one item of the appropriation. No part of the appropriations shall be applied to the payment for longevity service or layover days, other than such as may have accumulated prior to July 1, 1909.

FORTIFICATIONS.

The appropriation for continuing the work of fortifying the Canal, and for providing the armament thereof, amounts to \$4,870,000, and is apportioned, as follows:

SURVEYS.

For detailed surveys of the areas of the Canal Zone required for military purposes, including the cost of marking permanently the boundaries of such areas.....	\$12,000
---	----------

PURCHASE OF LAND.

For the purchase of land on the Canal Zone required for military purposes....	50,000
---	--------

SEACOAST BATTERIES.

For the construction of seacoast batteries on the Canal Zone.....	2,635,000
---	-----------

ELECTRIC LIGHT AND POWER PLANTS.

For the purchase and installation of electric light and power plants for the seacoast fortifications on the Canal Zone.....	173,000
---	---------

SEARCHLIGHTS.

For the purchase and installation of searchlights for the seacoast fortifications on the Canal Zone.....	285,000
--	---------

SANITARY CLEARING.

For sanitary clearing, filling, and drainage in vicinity of camps, posts, and defensive works on the Canal Zone, as follows:	
--	--

Margarita Island, for filling swamp in rear of defensive works.....	180,000
For clearing and improving permanent post site and drill ground at Miraflores.....	30,000

ARMAMENT OF FORTIFICATIONS.

For the purchase, manufacture, and test of seacoast cannon for coast defense, including their carriages, sights, implements, equipments, and the machinery necessary for their manufacture at the arsenals, to cost ultimately not to exceed \$2,506,000; provided, that the Chief of Ordnance, is authorized to transfer to and use in the fortifications of the Panama Canal one 16-inch gun and carriage, procured, or to be procured, out of appropriations heretofore made under armament of fortifications for continental United States.....	1,000,000
For the purchase, manufacture, and test of ammunition for seacoast cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenals.....	575,000

FIRE CONTROL.

For the construction of fire control stations, and the purchase and installation of accessories therefor.....	200,000
Total.....	\$4,870,000

CANAL ZONE FUNDS.

Section 2 of the Act provides that all funds collected by the government of the Canal Zone from rentals of public lands and buildings in the Canal Zone and the cities of Panama and Colon, and from court fees and fines, and collected or raised by taxation in whatever form under the laws of the government of the Canal Zone, are appropriated until and including June 30, 1914, as follows: The revenues derived from the postal service to the maintenance of that service; the remaining revenues, including any balances unexpended in prior years, after setting aside a miscellaneous and contingent fund of not exceeding \$10,000; to the maintenance of the public school system in the Zone; to the construction and maintenance of public improvements within the Zone; to the maintenance of the administrative districts; and for the expenses of the subdivisions of the Canal Zone after they are established under Section 7 of the Panama Canal Act; to the maintenance of Canal Zone charity patients in the hospitals of the Isthmian Canal Commission, and to the maintenance of administrative district prisoners.

CANAL APPROPRIATIONS.

A statement showing the appropriations by Congress for the Isthmian Canal, and for fortifications, and the armament thereof, up to and including the present fiscal year, is given below:

ACT OF CONGRESS APPROVED.	Appropriation.	Deficiency.
June 28, 1902	*\$40,000,000.00
April 28, 1904.....	110,000,000.00
June 28, 1902.....	10,000,000.00
December 21, 1905.....	11,000,000.00
February 27, 1906.....	5,990,786
June 30, 1906.....	25,456,415.08
March 4, 1907.....	27,161,367.50
February 15, 1908.....	12,178,900
May 27, 1908.....	29,187,000.00

Joint Land Commission Award.

In the matter of the estate of Palenquillo and Frijol Grande—To Margaret Rose Smith for the entire interest in 100 acres reserved by her in deed of sale to Martin Linczer, dated March 17, 1913, together with all improvements to which she is entitled under the terms of certain leases issued to tenants, together with all other rights thereto, \$1,000.

To Martin Linczer for his entire interest in that portion of the estate acquired from Margaret Rose Smith under date of March 17, 1913, together with all improvements thereon and rights relating thereto, \$11,250, subject to such equities, if any, as may be possessed by third parties, the amount of the award to be deposited with the Circuit Court of the Second Judicial Circuit of the Canal Zone for distribution in accordance with the terms of the award.

To Mrs. George Francis Hill for the entire interest in the improvements on 10 acres of land leased from Martin Linczer, with all rights relating thereto, \$700.

To Mesma Chichi for the entire interest in improvements on the lands of Margaret Rose Smith, \$25.

BARRIER AT GATUN LOCKS.

Railway Connection Over Atlantic Entrance Channel to be Maintained Until September 15.

The committee, consisting of Maj. G. M. Hoffman, chairman; Mr. E. E. Lee, Mr. W. J. White, and Mr. Charles L. Parker, designated by the heads of the Atlantic, First, and Sixth Divisions, and Quartermaster's Department, respectively, at the request of the Chairman and Chief Engineer, to report on the most advantageous procedure in the removal of the barrier beyond the lower end of Gatun Locks, submitted to the Acting Chairman and Chief Engineer three plans, from which he should choose on grounds of general policy.

The barrier supports a railway track connecting the tracks on the west side of the locks and about Gatun Dam, with the Panama railroad, east of the Canal, and the principal problem was the maintenance of this connection. The Atlantic entrance channel is completed up to the line of the track, and if the dredges could proceed without hindrance, they would operate from both sides of the barrier and remove economically the 1,060,000 cubic yards contained in it, by August 1.

The departments concerned agreed that the plan of immediate excavation was feasible, but that it would involve the segregation of all the plant engaged on the west side, principally in the construction of the spillway and hydro-electric station, and in excavation for Gatun Dam. It would require that the locomotives be repaired, coaled, and hosted on the west side, and that all supplies, including coal, be handled by water across the Canal, with the necessity of constructing wharf facilities. A wrecking crane would have to be isolated on the west side, for use in railway accidents and in handling the heavy timber bulkheads for the sluices in the spillway dam. Moreover, it is regarded as necessary to have track connections until July 15, at least, for the two daily trains of hard rock from Balboa for paving Gatun Dam.

The committee pointed out that a trestle could be constructed across the completed channel, near the barrier, for the maintenance of connection as long as desired. The removable truss span in the present track could be installed in the trestle for the passage of dredges and auxiliary vessels, and larger vessels might be passed by the removal of an additional bent adjacent to the span. The trestle would be 750 feet long, and the estimated cost, \$18,000.

The third plan, which the Acting Chairman has approved, allows three pipeline suction dredges to proceed with the excavation of the barrier from the side toward the locks, leaving until September 15, an embankment across the channel, 75 feet wide and containing approximately 180,000 cubic yards, to support the connecting track. After that date, the work on the west side will be so far advanced as not to be seriously affected by lack of railway connection; and the dredges will be able to remove the greater part of the remaining material in the last 14 working days of September, and clear the channel for the passage of vessels by October 1.

Levelman and Transitman Examination.

Examination for promotion to the positions of levelman and transitman is scheduled to be held in the Commission clubhouse at Empire, on Sunday, July 20.

The examination will commence promptly

at 9 a. m., and will be divided into three parts, which will be given in the order indicated, viz: Written and oral examination, and a statement of education and experience. Competitors will be required to complete the written portion of the examination before 1 p. m.

Applications for examination should be addressed to the undersigned, *through the head of department or division*, before the close of business on Thursday, July 17.

Applicants should bring to the examination room pens, pencils, triangles, and tables of circular functions, but no paper, ink, or blotters.

Applicants who fail to appear for examination before 9 a. m., or who do not apply for examination through the proper channels before the close of business on Thursday, July 17, will not be admitted to the examination.

No card of admission will be needed.

A. B. NICHOLS,
Chairman, Examining Board.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter, American National Red Cross, for the month of May, 1913, follows:

RECEIPTS.		
May 1,	On hand.....	\$2,533 09
	Repaid to Red Cross on money advanced destitute American family, Panama.....	30.00
31,	Membership dues.....	2.50
		\$2,565 59
DISBURSEMENTS		
May 5,	Postage.....	\$2 00
5,	Disbursing officer, printing.....	22.76
5,	Relief of American at Culebra.....	30.00
12,	Relief of destitute Spanish woman, Empire.....	10.00
20,	Transportation for Colombian, deported.....	25.00
20,	Relief of wife of Zone prisoner, Culebra.....	5.00
21,	Relief of destitute woman, Ancon.....	5.00
26,	Relief of tuberculosis patient, Colon Hospital.....	25.00
31,	Deportation of Jamaican woman and child.....	15 00
Total.....		\$139.76
May 31,	Balance on hand.....	\$2,425.83
	JOHN L. PHILLIPS,	
Approved:	<i>Treasurer.</i>	
	EDW. SCHILDHAUER, <i>Chairman.</i>	

Missing Men.

Any one having information regarding the whereabouts of Messrs. John Hastings, formerly of Findlay, Ohio, and Frank L. Miles, formerly of Washington, D. C., who are supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

Any one having information regarding the present whereabouts of Mr. Edward Mooney, formerly of West Philadelphia, Pa., who is supposed to be on the Isthmus, is requested to communicate with THE CANAL RECORD.

Counterfeit Money.

A few counterfeit two-dollar United States bills have made their appearance on the Isthmus; the quantity in circulation is unknown. The bill is described in *The National Counterfeit Detector*, as follows:

"A 110. Series 1899. W. T. Vernon, Register. Chas. H. Treat, Treasurer. Printed from etched plates of fair workmanship on good quality bond paper; no attempt to imitate the silk fibre. Blue seal, large numerals, and numbers good. Portrait of Washington worst feature of note, lacking the lifelikeness of genuine. Green ink on back much darker than genuine."

CONCRETE-HANDLING CRANES.

Lofty Steel Structures Used in Pacific Locks Are Offered for Sale.

Proposals are invited for the purchase of the eight steel cantilever cranes used in handling about 98 per cent of the concrete for Pedro Miguel and Miraflores Locks. Bids will be opened in the Washington office of the Commission on July 14. It is anticipated that all of the cranes will be out of service in the Canal construction by September 1, though it is possible the four berm cranes may be transferred for service at the permanent coal-handling plants. Bids have accordingly been invited under seven separate specifications as follows:

For the berm cranes, complete as they stand, including repair parts in stock; for the chamber cranes, under the same conditions; for dismantling the berm cranes, and handling to storage yard; for the berm crane structures, exclusive of concrete mixers, machinery, motors, cables, etc.; for the chamber crane structures only; for all the motors, machinery, etc., excluded under the bids on the structures only of the berm cranes; and for the motors, etc., of the chamber cranes.

The berm cranes, so-called, because they operate from a berm alongside the lock wall, are equipped with concrete mixing plants, in the lower portion of the tower. They are of the cantilever type, with a fixed cantilever, 150 feet long, on one side, for supplying sand and stone, and a swinging boom, 144 feet in length, for delivering concrete, on the other. The bottom of the cantilever is 62 feet six inches above the supporting track; to the top of the machinery house, each crane is 90 feet high, and weighs, with the machinery, approximately 1,200,000 pounds. The four chamber cranes, which work from the bottom of the lock chambers, are without mixing plants. They are of the balanced cantilever type with arms extending on either side, which afford a continuous runway 191 feet in length; the height is 97 feet six inches to the bottom of the cantilever, and 115 feet to the top of the machinery house, and the weight, including machinery, is approximately 500,000 pounds. A complete description of the two types of crane was published in THE CANAL RECORD of January 4, 1911.

The cranes have been in service approximately three years, during which time they have delivered about 2,300,000 cubic yards of concrete to the lock walls. The structures have been painted from time to time and are in excellent preservation. All cranes are now at Miraflores Locks.

The following table shows the dates on which the cranes go out of service, and the dates by which they must be removed, under terms of sale:

LOCATION OF CRANES.	Out of service.	To be removed.
Berm cranes, west side of lower lock.....	June 1	Aug. 27
Chamber crane, upper east chamber.....	June 20	Aug. 27
Chamber crane, south guide wall.....	July 1	Aug. 27
Chamber crane, south guide wall.....	July 10	Aug. 27
Chamber crane, lower east chamber.....	July 20	Aug. 27
Berm cranes, east side of lower lock.....	Sept. 1	Nov. 1

Cost of New Hotel Washington.

The total expenditure chargeable to the completed Hotel Washington to June 1, was

\$633,436.86, including \$15,255.79 for construction charges in April, 1913, and \$23,964.99 in May. The total is itemized, as follows:

Construction cost, hotel proper.....	\$565,913.28
Swimming pool, seawall, etc.....	30,823.58
Sidewalks, grading, etc. (estimated).....	19,500.00
Moving buildings and clearing site.....	15,000.00
Employees' barracks (estimated).....	4,200.00
Total.....	\$633,436.86

Final Preparations for the Fourth.

The final meeting of the executive committee for the Fourth of July celebration was held at the Strangers Club in Colon, on Saturday afternoon, June 28, with all members present. Reports from the heads of the various committees showed that the arrangements were well in hand. The chairman of the entertainment committee reported that about 400 feet of dock No. 16, where the dance is to be held, will be protected with canvas. A stand for use as a speaker's platform during the patriotic exercises, and for service in viewing the athletic and aquatic contests will be erected on Roosevelt avenue. Work on the decorations was begun on Monday. It has been decided to eliminate the tugboat races from the day's program. Upon motion, an additional allotment of \$300 was made the entertainment committee, \$100 of which will be for use of the reception committee.

The chairman of the fireworks committee reported that the shipment of fireworks was received on the steamer *Ancon*, on June 27, and that the Cristobal display will be set off from dock No. 17 in full view of the spectators that may assemble on dock No. 16, Roosevelt avenue, and Front street, Colon. It has been decided to hold the combined display for the villages of Culebra and Empire at the baseball park in Culebra, instead of at Empire, as originally planned.

The chairman of the music and dance committee reported that the plan is to have the Tenth Infantry band play during the forenoon, the Marine band at the patriotic exercises and during the afternoon, and the Tenth Infantry orchestra at the dance on pier No. 16, at night. About 20 numbers have been provided for the dance, during which refreshments will be served.

The chairman of the transportation committee reported that all trains will stop at Cristobal, and the Fourth of July visitors, therefore, will not be required to go to the Colon station. The official programs for the day's events will be handed out by boy scouts, who will meet the trains, and circulate among the people on the grounds.

A special effort is being made by those in charge of this year's athletic events to see that they are carried out promptly. It is requested that all contestants report punctually for the events in which they may be entered. No contest will be delayed after it is once called.

Special preparations have been made at the new Hotel Washington for the Fourth. A cold luncheon will be served from 11.30 a. m., until 1.30 p. m., at 50 cents, and a special *table d'hôte* dinner will be served from 5.30 until 7.30 p. m., at \$1. There will be no 30-cent meals served at the hotel after breakfast on that day. Meal tickets may be received in payment.

Besides the dinner concert on the evening of the Fourth, the Strangers Club will hold an old-time "stag" dinner, July 3, at 8 p. m. Holders of visitors' cards are entitled to all club privileges.

OFFICIAL CIRCULARS.

Sale of Material and Supplies.

CULEBRA, C. Z., June 25, 1913.

CIRCULAR No. 399-A:

1. Sales of materials and supplies from stock, including fabricated articles, printed matter, rock, sand, and gravel, excluding only sales of medical and surgical supplies and sales of school books and supplies, which latter may continue to be sold by the Chief Sanitary Officer and the Superintendent of Schools as now authorized, may be made by the Depot Quartermaster, as follows:

(a.) Materials and supplies that can be spared may be sold to officers and employees of the Isthmian Canal Commission and the Panama Railroad Company, and other departments of the United States Government, for their personal use, and to clubs, societies, and other organizations of such employees.

(b.) Materials and supplies that can be spared may be sold to the Canal Zone Government, to the Panama Railroad Company, to the Commission clubhouses, and to other departments of the United States Government; also, to steamship companies and their agents for use on ships.

(c.) Materials and supplies that can be spared and are not obtainable in the local markets may be sold to individuals and companies, except that if the amount of the sale in any case will exceed \$250, prior authority from the Chairman must first be obtained.

2. Stock materials and supplies, including all other articles covered by Section 1, shall be delivered at the nearest storehouse from which such articles may be spared to the purchaser, at cost or price-book prices plus the usual surcharge, except in such cases as may be provided for otherwise by contract. In case the articles purchased must be shipped, the purchasers shall pay the regular rates of the Panama Railroad Company applicable thereto.

OBsolete AND SURPLUS MATERIALS, SUPPLIES, AND EQUIPMENT.

3. The value of all materials, supplies, and equipment no longer needed or no longer serviceable shall be appraised by a Board of Appraisal appointed by the Chairman, which shall meet weekly. The Board of Appraisal shall fix the selling price for such materials, supplies, and equipment, and, after such prices are approved by the Chairman, sales may be made by the Depot Quartermaster at the prices thus fixed without additional authority to an amount in any one case of \$100. Sales amounting to \$100, or over, shall be referred to the Chairman for approval.

4. If shipment of materials, supplies, and equipment no longer needed and no longer serviceable which are sold is to be made by freight, the purchaser shall be entitled to and shall pay to the Panama Railroad Company the freight rates fixed by the tariff for Isthmian Canal Commission business effective January 1, 1907, and supplements thereto, namely: \$2.25 per ton of 2,000 pounds, minimum carload weight of 20,000 pounds, and minimum charge of 20 cents; \$50 each movement, dead weight in train, for special equipment, such as steam shovels, locomotives, cranes, and pile drivers, and \$5 for each empty car. If the general local tariff rates are lower than the rates specified above, such rates will apply. The Depot Quartermaster at Mount Hope will specify on shipping papers the cases in which these rates apply.

GENERAL PROVISIONS COVERING BOTH STOCK AND OBSOLETE MATERIAL.

5. Delivery of materials, supplies, and equipment shall be made only after submission to the Depot Quartermaster at Mount Hope or the District Quartermaster at Ancon of two copies of bills on which are endorsed certificates signed by the Treasurer of the Republic of Panama, or by his authorized representative in Panama or Colon, that customs duties on such materials, supplies, and equipment have been paid, or that they have been remitted, unless sales are made to individuals and companies who have been granted blanket authority by the Republic of Panama to make purchases without payment of customs duties, and with the exception that this requirement shall not apply to sales to the Panama Railroad Company, the Canal Zone Government, the clubhouses, and other departments of the United States Government, nor to sales to contractors with the Commission or the Panama Railroad Company, where the articles purchased are for use in connection with their contracts; to sales to steamship companies and other individuals and companies, where the articles are purchased for use solely outside of the territorial limits of the Canal Zone and the Republic of Panama; to sales to churches, charitable organizations, etc.; to sales to officers and employees of the Isthmian Canal Commission and the Panama Railroad Company; to officers and enlisted men of the Army,

Navy, and Marine Corps; and to officers and employees of other departments of the United States Government on duty on the Isthmus, where the articles are purchased for personal use; and to sales to clubs, societies, and other organizations of such officers and employees.

6. All sales shall be for cash, unless otherwise specifically authorized by the Chairman, except that sales in the following cases may be made without the payment of cash at time of delivery:

(a.) Sales to other departments of the United States Government, the Canal Zone Government, the Panama Railroad Company, and the Commission clubhouses.

(b.) Sales to contractors with the Isthmian Canal Commission and Panama Railroad Company, to steamship companies and others in cases in which such individuals or companies secure the payment for material, supplies, equipment, and services furnished by the Commission by making a deposit of cash or satisfactory certified check, or by giving bond in form and with sureties satisfactory to the Examiner of Accounts of the Commission in an amount to be fixed by the Depot Quartermaster to cover the credit which it is deemed advisable to grant, and conditioned for the payment for material, supplies, equipment, and services furnished by the Commission within thirty days from the end of the month within which delivery of the materials, supplies, and equipment is made, or the services rendered.

(c.) Sales to contractors, with the Isthmian Canal Commission and the Panama Railroad Company, and to steamship companies in case the Isthmian Canal Commission or the Panama Railroad is indebted to such contractors or companies for material furnished or services rendered by them to the Commission or the railroad company, in an amount equal to or in excess of the value of any material, supplies, and equipment sold or services rendered by the Commission to such contractors or steamship companies.

The above instructions shall be effective July 1, 1913.

H. F. HODGES,
Acting Chairman.

New Account, Classified Expenditures.

EMPIRE, C. Z., June 21, 1913.

CIRCULAR No. 44:

The following new account in the classified expenditures of the Isthmian Canal Commission is hereby authorized under Department of Construction and Engineering-General:

Account No. 366—PERMANENT OIL PIPE LINE.

A—Construction. To this account will be charged all expenses incurred in connection with constructing a permanent oil pipe line across the Isthmus, including salaries and wages, material and supplies, and other incidental expenses in connection therewith.

B—Maintenance. To this account will be charged all expenses in connection with the maintenance of a permanent oil line after it has been constructed and put into operation.

Approved: H. A. A. SMITH,
Examiner of Accounts.
H. F. HODGES,
Acting Chairman and Chief Engineer.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving pictures for the week July 7 to 12 is, as follows: Monday, Corozal; Tuesday Empire; Wednesday, Gorgona; Thursday, Culebra; Friday, Gatun and Porto Bello; Saturday, Cristobal.

COROZAL.

The local chess team played a return series of games with a team from Gatun and Cristobal, with the following results:

Corozal.	Gatun.
Gartrell..... 2	Logan..... 0
Sherrard-draw..... 2	Honer..... 1
Morehead..... 1	McQueen..... 0
Kingsbury..... 0	Connor..... 2
Mills..... 1	Ogden..... 1
Fields..... 1	Shropshire..... 1

CULEBRA.

A social and entertainment was held at the schoolhouse on Friday night, June 27. The following program was given: Piano solo, Mr. C. C. Pearsall; mandolin and piano selection, Mr. Ramsey, Mr. Arbuckle, and Mr. Pearsall; solo, Mr. H. T. Critchlow; reading, Mr. J. T. Silver; quartet, Messrs. Case, Newbold, Dickson, and Ross; sketches, Mr. Geo. W. K. Newbold; solo, Mr. W. G. Ross. Popular songs were sung between the numbers. The game "A trip to Copenhagen" was played, and Miss Steelman won the prize, a Culebra pennant. In the bean bag contest for the bachelors, Mr. Koperski won first place, with a cake as a prize. Refreshments, consisting of ice cream, punch and cake, were served.

Entries are being received for a July handicap bowling tournament. All those desiring to enter are requested to do so promptly, as the tournament will be started on Monday night, July 7.

EMPIRE.

The elimination bowling tournament was won by Mr. Casey. The ragtime tenpin tournament has started with 31 men entered. Each player is to bowl each other player two games.

The gymnasium class meets every week. All interested are invited to join; also, to take part in the handball tournament which started on Monday, June 30.

The standing of the handicap pool tournament is, as follows:

Name.	Won.	Lost.
Dryden.....	11	2
Jacques.....	11	3
McCullough.....	10	5
Potter.....	9	4

It is planned to close the tournament by July 10.

A farewell reception to which the public is invited will be given the Rev. A. A. Nellis and family in the Empire clubhouse, on Friday evening, July 11, at 8.15. Rev. Nellis entered the service of the Commission as a chaplain on January 17, 1910, and has been located at Empire the greater part of the period. He and his family expect to leave for the United States, on or about July 15, and will locate permanently in Columbus, Ohio. The following program has been arranged:

1. Selection..... J. P. Prochaska's orchestra
2. History of the Empire Christian League..... Mr. H. A. A. Smith
3. Duet—*Ever of Thee*..... Denza
Mrs. Frank Roberts, soprano.
Mrs. Diedrich, contralto.
4. Piano solo—*Romance*..... Sebellius
Mr. C. C. Pearsall.
5. Tenor solo—*Wrecked and rescued—"The Raft"*..... Pinsuti
Mr. H. W. Dohrmann.
6. Selection..... J. P. Prochaska's orchestra
7. Tenor solo—*When the sands of the desert grow cold*..... Ball
Mr. W. G. Ross.
8. Piano solo—*Concert March*..... Wollenhauff
Mr. C. C. Pearsall.
9. Baritone solo—*The little hero*..... Adams
Mr. Frank Skinner.
10. My experiences on the Isthmus..... Rev. A. A. Nellis
11. Duet—*At the balmy breath of spring*..... Marzo
Mrs. Frank Roberts, soprano.
Mrs. Diedrich, contralto.
12. Selection..... J. P. Prochaska's orchestra
13. Reception and refreshments.

There will be a patriotic address by Mr. W. B. Childers on Sunday evening, July 6. Special instrumental music will be furnished.

On Sunday evening, July 6, Mr. F. A. Gause, superintendent of schools, will deliver an illustrated lecture on Panama and the Panama Canal.

GORGONA.

A special "home" social will be held on Thursday

evening, when home made cake and other refreshments will be served.

The bowling tournament will be continued.

The handball tournament for the night men will begin this next week. Eight men have entered, making a total of four teams.

The volleyball team is now preparing to play the Culebra team a return game.

GATUN.

All Isthmian records for duckpins were broken on Friday evening, June 27, when D. C. Galloway of the Gatun Y. M. C. A. rolled a score of 149. The score by frames was, as follows:

1—18, 2—36, 3—56, 4—75, 5—84, 6—100, 7—109, 8—124, 9—140, 10—149. Spares were made in the 1st, 2nd, 3rd, 6th, 8th, and 9th frames, a strike in the 4th, and splits in the 5th and 7th.

Mr. Benton Childers, superintendent of the McClintic-Marshall Construction Company at Gatun, was the speaker at the meeting of the "Forum," held on Tuesday evening, July 1. His subject was "Natural law in the world of labor." The labor question was discussed from a scientific standpoint. A tropical quartet, Messrs. Ross, Dickson, Newbold, and Case, sang several numbers, and Mr. Pearsall played selections on the piano.

A progressive pool tournament was conducted at the Gatun clubhouse on Wednesday evening, July 2. A match game of pool was also played between Louis DePoorter and Theodore Weidmyer of Cristobal.

A special effort is being made to build up the gymnasium class, which meets twice a week at 5.30 p. m. Those who cannot attend the class which meets at 8 p. m., are urged to join this earlier class.

The working boys defeated the schoolboys in a lively game of indoor baseball on Thursday evening, June 26. Score, 28 to 18.

CRISTOBAL.

The moving picture schedule has been changed from Monday to Friday night, July 4, on which date the moving picture show will be free to all. The program will begin at 8 p. m., and continue until 10 p. m.

On July 4, there will be free billiards and pool, and a general open house to all. Special arrangement for using the entertainment hall as a resting place is planned. There will also be an all-Isthmian, two-man team ragtime bowling tournament open to all men on the Isthmus. A bowler may enter with as many different men as he chooses. Each team of two men to bowl one game of tenpins and one game of duckpins. An entry fee of 50 cents per man will be charged for each entry. The entry fee must be paid in advance to the bowling alley manager, and entry may be made at any time during the day or evening from 8 a. m., to 10 p. m. Suitable prizes will be offered for first, second, and third places. Special prizes for high scores in tenpins and duckpins will be given for the highest scores made during the day, whether made while rolling in the tournament, or individually.

PORTO BELLO.

The Sunday school observed Children's Day on Sunday evening, June 15. Mrs. Cecil Wilkes gave a solo, in addition to the selections by the children.

A moonlight swimming party was held on Thursday night, June 19. A bonfire was lighted to assist in the illumination. Coffee and home made cake were served. About 50 participated.

At the Sunday night song service on June 22, the stereopticon was used to illustrate Henry Van Dyke's story, "The other wise man." The slides were furnished by the Rev. Carl H. Elliott of Cristobal.

An interesting program was given on Friday night, June 28, wholly by home talent, as follows: A talk, by Mr. H. E. Spangler on "Love;" who, in addition, sang a solo, and gave a clog dance; vocal selections, "In the garden of my heart," and "A Japanese love song," by Mrs. James Murray, accompanied by Mrs. S. G. Allen; jig, by Mr. C. M. Chase, accompanied by Mrs. Joseph Mackintosh on the piano; doll drill, by the children of the Sunday school, who had been trained by Mrs. Keene and Mrs. Wilkes; vocal selections, "Mammy's shufflin' rag;" "Honeyman;" and "Carita," by Mrs. Wilkes; clog dancing exhibition, by Mr. T. B. VanVoy. During the evening, moving pictures were shown, and from tables, distributed about the hall, refreshments were served. The following ladies were in charge of the booths: Ice cream and punch, Mrs. Colberg and Mrs. O'Connor; candies, Mrs. Baker, Miss Mary Fisher, and Miss Pauline Smith; cakes, Mrs. Smith and Mrs. Browne; sandwiches and hot drinks, Mrs. Hoehne and Mrs. Keene, costumed as Japanese. The ladies in charge of the tables were Mrs. Lyons, Mrs. Wilkes, Mrs. Nylen, Mrs. Coyle, and Miss Sawtelle. Messrs. Walter Thomson and Ira Lyons acted as auctioneers. The proceeds from the entertainment were turned over to the Sunday school.

Mr. W. F. Bennyhoff of Cristobal, gave a lecture

on the Panama Canal, illustrated with over 100 slides, on Sunday night, June 29.

Rainfall from June 1 to June 28, 1913, Inclusive.

Sale of Towboat "Exotic."

OFFICE OF DEPOT QUARTERMASTER.
MOUNT HOPE, C. Z., June 21, 1913.

Sealed bids will be received at this office until 2 p. m., Tuesday, September 2, 1913, for the steel-hull, stern-wheel towboat *Exotic*, built for the Commission in 1908 by Pusey and Jones, Wilmington, Del., at an approximate cost of \$40,000.

Gross tonnage, 150; two tandem compound engines. 7-inch by 14-inch, 48-inch stroke; two horizontal tubular boilers, Mississippi River type, 44-inches by 190-inches; indicated horsepower, 70; equipped with boiler feed pumps; boat equipped with capstan, steam steering gear, etc.; retired from service in 1911.

This boat can be inspected and further particulars obtained on any working day between 7 and 11 a. m., and 1 and 5 p. m., upon application at this office; any further information desired by intending bidders at a distance will be furnished by letter on request. Right is reserved to reject any or all bids.

Bids should be addressed to the Depot Quartermaster Mount Hope, Canal Zone, plainly marked, "Proposal to purchase towboat *Exotic*, to be opened September 2, 1913."

C. NIXON,
Depot Quartermaster.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m. and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m. and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

Sailing of the "Ancon."

The sailing of the *Ancon* has been set for Sunday, July 6, at 3 p. m., from Pier 11.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, JULY 9, 1913.

No. 46.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information, will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Removal of Public Buildings at Gorgona.

The Commission clubhouse at Gorgona will be closed about August 1, after which it will be taken down and moved to Pedro Miguel. The site upon which it will stand has not yet been decided upon. The clubhouse was opened in June, 1912, when 433 men were enrolled. The fire and police stations will be dismantled shortly and moved to Pedro Miguel; the commissary will be moved there about August 1. It will be erected on the east side of the Panama railroad, about a hundred yards south of the Pedro Miguel station.

The postoffice will be taken down and re-erected at Balboa. A temporary postoffice will be established in one of the other vacated buildings, pending the final abandonment of the town.

Steel and Concrete Contract for Cristobal Terminals.

The Central American Construction Company, Ltd., entered into contract with the Panama Railroad Company, on June 30, for the erection of steel work and concrete walls and roofs for Docks 15 and 16 at the Cristobal terminals. The contractor is to complete the 918 feet of shed covering the north end of Dock 16 within 152 days from the date of contract, and all of the work in the contract, comprising principally the shed for Dock 15, by April 1, 1914, for \$201,000. Under a prior bid the contractor proposed to do the work on Dock 16 within 120 days, and all of the work in the contract by February 15, 1914, for \$211,000. These were the lowest bids submitted, the others being: R. W. Hebard and Company, \$230,000; Lombard and Company, \$232,952.26; W. E. Weigle, \$239,800.

All of the steel frame for the 918 feet of shed on Dock 16 has been erected and riveted by the Panama railroad. It has purchased the balance of the structural steel for the framework, which is now being delivered by the

United States Steel Products Company. The part of the contractor will be erection. Mr. John H. Lloyd has been awarded a sub-contract for the electrical work, including installation of telephone equipment.

Change in Designation of Canal Rolling Stock.

A change in the designation of cars, and other rolling equipment, assigned to the various divisions of Canal work has been made necessary by the abolition of the Pacific Division, and the creation of the Second, Fifth, and Sixth Divisions. The letter "P" enclosed in a diamond, signifying Pacific Division, will be replaced by the figures "2", "5," and "6". The authorized designations of rolling stock, excavation equipment, and hand and push cars in the service of the various divisions, and of the contractors, as of July 1, 1913 is, as follows:

Atlantic Division, diamond enclosing letter "A;" Central Division, diamond enclosing letter "C;" assistant engineer, Balboa terminals, Second Division, diamond enclosing figure "2;" resident engineer, Fifth Division, diamond enclosing figure "5;" resident engineer, Sixth Division, diamond enclosing figure "6;" Fortifications Division, diamond enclosing letter "F;" superintendent of erection, Canal locks, diamond enclosing letter "E;" Mechanical Division, diamond enclosing letter "M;" I. C. C. cars in the service of the Panama railroad, yellow disc; I. C. C. cars in the service of the McClintic-Marshall Construction Company, "M. M. C. Co.;" I. C. C. cars in the service of the United States Steel Products Company, "U. S. S. P. Co."

Head Tax Not Applicable to Canal Employees.

An order of the Republic of Panama requiring tickets for steamers outbound from Colon to be viséd by the governor of the province, was recently made the subject of protest by the Department of Civil Administration. The Republic of Panama collects a tax on each outward ticket, but as employees of the Isthmian Canal Commission and Panama Railroad Company are not subject to such tax, it was held that the order subjects them to unnecessary inconvenience. The department represented that the official request for reduced transportation is sufficient proof that the holder of the ticket is an employee of the Commission or railroad, and this has been acceded by the Secretary of Finance of the Republic.

Installation of New Cable.

On a work request from the Central and South American Telegraph Company, forces of the Fifth Division have installed four fibre conduits beneath the street paving from the office of the company on Central Avenue, Panama, to the foot of Eleventh street, a distance of about a thousand feet. The company's local construction gang has drawn cables through to supplant those suspended

from poles in the street. A marine cable has been laid from the foot of the street across the tidal flats to the landing hut at Punta Mala; altogether, about 15 miles of aerial cable are to be removed. Along with this work the company has made the local connections with a new line direct to Santa Elena, its landing station near Guayaquil. The cable ship *Stephan* left Panama Bay on May 27, paying out cable at the rate of seven knots an hour. It arrived at Santa Elena on June 3. The new line, 771 nautical miles in length, has been tested and placed in service, paralleling the original line between Panama and Santa Elena, which touches at several intermediate points along the coast.

Reoccupation of Empire Shops.

In preparation for the work to be done at Empire shops during the transfer from Gorgona to the permanent buildings at Balboa, the Empire shops are being put in repair for an occupation of about three months, beginning the first of August. The wood floor in the machinery and erecting shops, as well as the galvanized iron roofing for these buildings and the boiler and blacksmith shops, are being repaired, and the equipment is to be augmented by the transfer of two steam hammers, a flue rattler, and certain milling machines, planers, air-brake equipment and locomotive cranes.

Tug Changes at Balboa Harbor.

Following the transfer of the tug *Bolivar* from harbor service at Balboa to general towing service in connection with the dredging in the Pacific entrance, it has been decided to transfer the fire pump on the *Bolivar* to one of the clapnets of the Sixth Division fleet. The tug *Cocoli*, which the *Bolivar* will replace temporarily, has been sent to the marine shops at Balboa for overhauling. A new boiler, due to arrive from the United States early in July, will be installed, in connection with a system for utilizing crude coal oil for fuel.

Cofferdam for Dry Dock Excavation.

The first trainload of rock to be placed in the construction of the cofferdam, for completing the excavation for the dry docks at Balboa in the dry, was dumped on July 5. The large docks and its approaches are to be excavated to a depth of 45 feet below mean sealevel, and a large part of the site of the approaches is at present under water. The completion of the cofferdam will allow the area to be pumped out, and made accessible to steamshovels.

The cofferdam is to extend from the southwest end of the sand wharf, opposite the Sixth Division's floating landing for small launches and pangas, to the site of the old coal wharf of the Panama railroad. It follows an approximately elliptical curve, about 1,350 feet long, subtended by the present shore line. Its construction consists essentially of two

railway trestles, separated by a distance of 15 feet between inside rails, between which will be dumped a core of earth, to be armored with rock dumped outside the trestles. The driving of trestle began on April 2, from the sand wharf. It is now almost completed, with a piledriver working outward from the other end; a gap of 100 feet will be left as long as practicable, to allow the passage of vessels to the shipways and repair shop of the Sixth Division.

This construction has necessitated the removal of the old coal wharf and the construction of a new pocket beyond the site of the cofferdam. The new pocket was erected on the site of the wharf which collapsed on August 17, 1912, when the steamship *Newport* sank. The dredging landing was also moved, to a point just east of the new coal pocket.

Concrete Work in Locks and Spillways.

Concrete work in the Canal Locks is nearly completed, the aggregate amount in place at the close of work on July 5 being, 4,467,097 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of July 5, follows:

Squatters on Canal Zone Lands.

A notice to squatters occupying lands in the Canal Zone, which have been adjudicated by the Joint Land Commission, is being prepared by the General Counsel of the Canal Commission. It will advise the occupants of these lands to move their buildings within a certain date, or else they will be destroyed

by the Commission. It will also warn them not to settle on any other lands in the Canal Zone, as such are declared to be reservations within the meaning of the Executive Order of the President of the United States, dated April 17, 1912. These notices will be posted by the police at different points on the lands in question.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry for the two weeks ending July 5:

DATE.	Cubic yards.	Hours worked

Patriotic Service at Gatun.

A patriotic service was held at the Commission chapel, Gatun, on Sunday evening, June 29, in honor of Independence Day. A program of music was rendered by the church choir, a flag drill was executed by the members of Mrs. Purdy's Sunday school class, and Mr. W. B. Childers delivered an appropriate address.

Immigration to the Isthmus During June.

According to the figures of the quarantine service, the number of persons who landed at the port of Colon from foreign ports during the month of June was 4,672, consisting of 1,606 cabin, and 3,066 steerage passengers. The number of persons who embarked for foreign ports during the same period was 4,090, consisting of 1,807 cabin, and 2,283 steerage passengers. The number of persons who landed over those who embarked was 582. Two thousand one hundred and sixty-eight of the persons arriving in steerage were from Jamaica and other West India islands; 569 were from Colombia, and 106 from Costa Rica. The passengers arriving "in transit" numbered 1,328, consisting principally of people bound for the west coast of South America, and tourists. This number is 224 less than for the month of May. Eighty-eight vessels arrived at Colon during June, as compared with 109 for May.

The number of persons who landed at the ports of Panama and Ancon during the month from foreign ports was 649, consisting of 462 cabin, and 187 steerage passengers. The number of persons who embarked for foreign ports was 655, consisting of 422 cabin, and 233 steerage passengers. The number who embarked over those who landed was six. The net immigration to the Isthmus during June was 576.

Fatal Accident at Porto Bello.

Ruperto Duvesa, a white Spaniard, check No. 14217, employed by the Atlantic Division at Porto Bello, was struck on the head by a rock from a quarry blast at about 6.45 a. m., Tuesday, July 1, and instantly killed.

STEAMSHOVEL RECORDS.

Work of Central Division Machines During the Month of June.

During the month of June, the total amount of material excavated in the Central Division was 878,300 cubic yards, of which 821,026 cubic yards were excavated by Central Division forces, and 57,274 cubic yards were removed by sluicing at Gold Hill, the latter work being in charge of the Fifth Division of the Chief Engineer's Office. Of the amount removed by the Central Division, 258,740 cubic yards were classified as earth, and 562,286 cubic yards as rock.

Of the total, 862,383 cubic yards were primary excavation for the Canal, 2,900 cubic yards were from ditch for draining the old Culebra dump, and 13,017 cubic yards were classified as plant excavation. Eight hundred and twenty-one thousand and twenty-six cubic yards were removed by steamshovels.

The high record for the month was made by shovel No. 256, working 37 days in the Empire district, which excavated 36,800 cubic yards of rock.

The second best record for the month was made by shovel No. 262, working 37 days in the Empire district, which excavated 36,280 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 122, working 24½ days in the Culebra district, which excavated 26,089 cubic yards of earth.

Shovel No. 208, working in the Culebra district, made a high record for one day by excavating 1,976 cubic yards of rock on June 4.

Shovel No. 256, working on 12-hour shift in the Empire district, made a high record of 2,574 cubic yards of earth on June 26.

Except where noted, monthly reports are computed on place measurement, while the daily reports are based on car measurement. The best records for the month and for one day are shown in the following table:

BEST RECORDS FOR THE MONTH.

SHOVEL No.	CULEBRA DISTRICT.			No. of days at work.

SOCIAL LIFE OF THE ZONE.

Gatun Sunshine Society Disbands.

The Gatun Sunshine Society held its final meeting and disbanded on Monday, June 16. The records were ordered burned, and the total amount in the treasury, \$55, was forwarded to the international headquarters in New York to be applied to the fund for the carrying on of the Gatun dormitory in the Arthur Home for Blind Babies at Summit, New Jersey. The closing of this society marks the end of the activities of one of the oldest organizations of women in the Canal Zone. The Sunshine Society was organized in September, 1907, and affiliated with the international organization in the same year. Its work, covering a period of five years and nine months, has been concentrated on the blind babies work in the United States. It has equipped and maintained a dormitory in the Arthur Home, its entire expenditures for this purpose being more than \$1,500. The society's activities have been confined to a few months in each year, although annual dues were paid by the members. Money has been raised by "Sunshine teas," which were pleasant social features, as well as a profitable means of adding to the treasury; apron and fancy work sales; dances and suppers. One year a baby show was held. Members have contributed personal work by sewing for families at 25 cents an hour, the amount thus earned being placed in the treasury. The largest membership since its organization was 45. The closing of the Sunshine Society has been deemed a wise step in view of the expected changes in the Canal force during the coming year.

Ancon Study Club.

At the meeting of the Ancon Study Club on Thursday, July 3, the semiannual election of officers was held, the following being chosen: President, Mrs. H. C. Shick, reelected; secretary, Mrs. E. L. Luce; librarian, Mrs. Mark White, reelected, with Mrs. Johnson McDonald as assistant. A General Federation secretary was added to the officers, and Miss J. Macklin Beattie was chosen for the office. The meetings for the remainder of the month will be held at the home of Mrs. Anson Mason, House 26, Tivoli district.

Colon Humane Society to Continue.

A special meeting was held by the Colon Humane Society on June 17, for the purpose of determining the advisability of dissolving the organization, because of lack of interest displayed by the members. Examination of the books, however, showed a satisfactory number of active members, and it was decided that efforts should be made to continue the work of the society. The municipal council of the city of Colon was urged to ask the humane agent, who is a member of that body, to cooperate with the work of the society.

Church Notes.

The Gatun Christian League held its business meeting with an election of officers on Thursday evening, June 26. The Rev. C. O. Purdy was elected chaplain to the league for the ensuing six months. The following were chosen as officers: President, C. O. Jones; vice-president, Edward Duckworth; secretary, C. E. Wood; treasurer, W. E. Wells.

The chaplain's duty at Ancon hospital was taken by the Rev. A. A. Nellis of Empire from June 29 to July 5; from July 6 to July 12, the

charge will be assumed by the Rev. J. L. Wise of Gorgona, and during the week ending July 19, the Rev. S. Moss Loveridge will be the acting visiting chaplain. Services at St. Luke's Hospital chapel on Sunday, July 13, will be conducted by the Rev. Edward J. Cooper, rector of Christ Church, Colon.

The second in the series of monthly euchre parties in the parish house of St. Ferdinand's Church, Empire, under the auspices of the altar society, will be held on Saturday evening, July 12. Attractive prizes will be given and there will be music and refreshments. Tickets are on sale at 50 cents each.

Prison Library.

The Chief of Police has authorized the construction of bookcases for the penitentiary library at the Gamboa stockade. The books have been catalogued alphabetically, by both titles and authors, and copies of these lists have been placed in the cells for the convenience of the prisoners in selecting books and to encourage their use of the library. The library was established in January, 1910, through the efforts of a prison relief committee which was organized at Culebra during the previous year. One hundred and ninety-three books were purchased from the New York Navy Yard, and 97 were selected from a publisher's catalogue. Thirty books have recently been donated by the Ancon Study Club.

Visit of Shriners.

Osman Temple, Ancient Arabic Order, Nobles of the Mystic Shrine, of St. Paul, Minnesota, will make a pilgrimage to the Isthmus for the purpose of initiating a class of candidates. The party, which will include Shriners from other parts of the United States, is expected to arrive at Colon on August 28, and the ceremony of initiation will be held on Labor Day, September 1. The imperial potentate of the order will probably accompany the party.

Roster of Masons.

A souvenir roster of Masons engaged in the construction of the Canal is being compiled under the auspices of the Masonic Club of Empire. This will show an alphabetical roster of all Master Masons, the name, number, and location of the lodge of which each is a member, and will also contain a roster of members of all Masonic bodies on the Isthmus. Application blanks will be ready for issue within the next week, and may be obtained on application to John I. Major, president, Masonic Club, Empire, Box 105.

Fourth of July Events.

Rain, which began during the lunch hour at the Independence Day celebration at Cristobal, kept many visitors from witnessing the afternoon events, and to some extent interfered with the fireworks display in the evening. There was an unusually large crowd from the Canal Zone towns. Dock No. 16, where most of the people congregated to see the various events and the patriotic exercises, the police and fire stations, clubhouse, and Commission hotel, were effectively decorated. Canvass spread over a part of Dock 16, together with the sightseeing cars alongside the dock, afforded shelter to the people during the rain. For the children the merry-go-round was the center of attraction throughout the day. The program was carried out practically as printed in THE CANAL

RECORD. Following are the winners of the various athletic and aquatic events, as well as the fire company contests:

FIELD EVENTS.

100-yard hurdle—J. N. Kenealy, Corozal; R. A. Koperski, Culebra; W. F. Mathues, Cristobal. Time, 13 seconds.

Shot-put—C. O. Herring, Gorgona; J. R. Scheel, Camp Elliott; F. G. Miller, Empire. Distance, 45 feet, 11½ inches.

880-yard run—K. Scherzberg, Ancon; W. F. Mathues, Cristobal; J. C. Russell, Ancon. Time, 2 minutes, 11 1/5 seconds.

Running high jump—J. R. Scheel, Camp Elliott; R. A. Koperski, Culebra; B. Robinson, Gorgona. Distance, 5 feet, 3 inches.

100-yard dash—H. S. Warner, Corozal; C. O. Herring, Gorgona; D. Whitver, Cristobal. Time, 10 4/5 seconds.

440-yard run—D. T. Edwards, Ancon; H. D. Simons, Camp Elliott; J. W. Harper, Camp Elliott. Time, 51 seconds.

Running broad jump—E. I. Baldwin, Camp Elliott; C. O. Herring, Gorgona; F. W. Hoff, Ancon. Distance, 19 feet, 10½ inches.

Pole vault—G. A. Barcroft, Toro Point; J. G. DeCora, Culebra; G. W. Rose, Culebra. Distance, 10 feet.

220-yard dash—H. S. Warner, Corozal; C. O. Herring, Gorgona; B. Robinson, Gorgona. Time, 26 2/5 seconds.

Marathon—K. Scherzberg, Ancon; J. C. Russell, Ancon; A. A. Simka, Cristobal.

One mile relay—United States Marine Corps; Corozal; Culebra.

Boys' 75-yard dash—A. Farrell, Cristobal; A. Roe, Ancon; C. P. Grey, Gatun.

Potato race—D. V. Raymond, Cristobal; W. Fraser, Cristobal; A. Farrell, Cristobal.

Wall scaling—United States Marine Corps.

Tug-of-war—Tenth Infantry.

Boys' relay—Ancon; Gatun.

Mr. C. O. Herring won the trophy for scoring the greatest number of individual points in the athletic meet, with 14 points.

AQUATIC EVENTS.

Event No. 1—Sailing canoe race. First, L. D. Simons.

Event No. 2—Sailboat race. First, J. E. Welch.

Event No. 3—Lifeboat race. First, U. S. LaValley; second, U. S. Bohio.

Event No. 4—Navy steam cutter race. First, launch Mary S.

Event No. 5—Gasoline boat race. First, launch Lirio.

Event No. 6—Gasoline boat race, free for all. First, launch Manzaniello.

Event No. 7—Paddling canoe race. First, J. C. Moons and W. L. Brown; second, M. J. Tuttle and A. B. Forsstrom; third, L. D. Simons and E. C. Dazeveado.

Event No. 8—Tugboat race. Not run.

Event No. 9—50-yard swimming dash for men. First, R. Nelson; second, D. Simons; third, W. Greene.

Event No. 10—Fancy diving for men. First, L. H. France; second, J. M. Jimenez; third, F. E. McEwen.

Event No. 11—50-yard tub race. First, W. Fraser; second, N. Giavelli.

Event No. 12—Aquatic wrestling match. First, R. Nelson.

Event No. 13—Swimming race for men. First, W. Greene; second, J. E. McGrath; third, W. H. McCarthy.

Event No. 14—50-yard swimming race for women. First, Harriett Crafts; second, Harriet U. Keenan; third, Gabrielle Butler.

Event No. 15—100-yard swimming race for men. First, J. E. Carpenter; second, D. C. Galloway; third, N. Giavelli.

Event No. 16—60-foot form dive. First, R. Nelson; second, J. J. McGrath; third, H. Aldrich.

Event No. 17—Upset canoe race. W. Fraser, first; J. Raymond, second.

Event No. 19—50-yard swimming race for boys. First, S. Carpenter; second, C. P. Gray; third, H. Wardlaw.

The winner of event No. 20, the relay swimming race, has not yet been decided.

WINNERS IN VOLUNTEER FIRE DEPARTMENT CONTESTS.

1. 125-yard run to hydrant, laying hose, etc., and getting water; Won by Gatun Company, No. 2. Time, 38 seconds.

2. Laying four parallel lengths of hose, making running connections, straightening line, and getting water; Won by Gatun Company, No. 2. Time, 19 seconds.

3. Replacing length of hose in second section of a charged line with one taken from cart; Won by Gatun Company, No. 2. Time, 20 seconds.

The result of the tennis tournament will be announced as soon as the finals in doubles and the finals in singles, consolation, are played off.

CONCRETE LAMP BRACKETS.

Amended Type, for Use in Illuminating Canal Locks, Approved.

An article on the system of lighting for the Canal locks was published in THE CANAL RECORD of January 8, 1913, together with sketches showing type of lamp standard, bracket, and reflectors; and the general scheme of illumination. Since then, an amended design for the concrete brackets to

LAMP STANDARD AND BRACKET.

support the concrete lamp reflectors, as shown in the accompanying sketch, has been approved.

The accepted design was worked out by Mr. M. J. Schiavoni, the assistant architect of the Canal Commission, and answers the criticisms of the Fine Arts Commission. The model made according to the original drawings, now on the locks at Gatun, will be replaced with the new type, which shows the concrete arm or bracket supporting the two reflectors, spaced four feet three inches on centers.

The entire bracket, reflectors, and ball finial will be of reinforced concrete cast in iron

forms manufactured at Gorgona shops, from drawings furnished by the Lighthouse Subdivision, which will also fabricate the concrete brackets, 511 in number, consisting of 302 single arm, and 307 double arm brackets. Each concrete double arm bracket and reflectors will weigh approximately 1,610 pounds, and the solid ball finial, weighing 730 pounds, will be employed to counterbalance the weight of the single arm brackets on the middle locks.

Corrections and Additions to Medal and Bar Lists, for 1912.

A list of corrections and changes to be made in the service medal and bar lists recently published in THE CANAL RECORD is given below:

I. C. C. MEDALS—ISSUE OF APRIL 23, 1913.

Kundall, John C., January 8, change to Kendall, John C.
Harvey, Walter S., January 15, change date to January 16.
LeSassier, Charles, January 21, change to Le Sassier, Charles.
Hollin, Alexander, February 10, omit (Alien).
Grojean, Eugene E., February 16, omit (Alien).
Emmet, Eugene, March 13, change to Emmett, Eugene.
Yomey, William N., March 13, change to Tomey, William N.
Berglund, Nils G., April 16, add name to list.
Burford, Earl, May 4, change to Burford, Earl L.
Schwalenberg, Henry J., May 9, add name to list.
Nichel, John, May 31, change to Michel, John.
Harfield, Benjamin G., June 27, change to Harfield, Benjamin G.

ISSUE OF APRIL 30, 1913.

Wilkins, Rinard B., July 15, add name to list.
Cannon, Carl E., August 11, omit, on P. R. R. list.
de Montell, Oscar, August 25, add name to list.
Hallin, Frank W., October 10, omit (Alien).
Borgen, Alexander W., October 11, change date to October 13.
Sherbourne, Walter F., November 10, change to Sherburne, Walter F.
Surprenant, Rolland W., November 15, add name to list.
Keller, Theodore, November 19, omit (Alien, correct name R. W. T. Keller).

ISSUE OF MAY 7, 1913.

White, Clarence A., November 24, change date to May 24.

Stephos, Nicholas C., December 1, add name to list.

FIRST BARS—ISSUE OF MAY 14, 1913.

Merritt, Henry F., January 2, add name to list.
Caruthers, Albert B., January 26, change date to January 27.
Akins, Carl C., February 3, add name to list.
Hollowell, Cooper, March 10, add name to list.
DePew, Jasper H., March 15, change to De Pew, Jasper H.
Phipps, John H., March 25, add name to list.
Vickerey, Wm. J., March 30, change to Vickery, Wm. J.
Hugblings, S. D., April 18, change to Hughlings, S. P.
Howe, Wm. H., April 13, omit (Alien).
Macfarlane, James, May 19, add name to list.
Bonnell, Leander P., May 21, change date to May 25.
Devol, Carroll A., June 30, add name to list.
Hodges, H. F., July 15, add name to list.
Carson, Arthur, July 16, omit (duplication).
Morton, Brett A., August 4, add name to list.

ISSUE OF MAY 21, 1913.

Darrow, Samuel P., add name to list.
Louner, Edward, August 17, add name to list.
Whitlock, Frank O., October 8, add name to list.
Britten, Cyrus C., October 13, add name to list.
Collins, John O., November 11, change date to May 5, 1910.

West, William J., November 13, add name to list.

ISSUE OF JUNE 4, 1913.

Vanderburgh, C. L., February 5, change to Vanderburgh, C. L.
Bentley, Enoch W. A., February 22, change to Bentley, Enoch A.
Kimball, Melvin J., March 23, add name to list.
Major, John I., May 11, add name to list.
Cosgrove, James, June 9, add name to list.
Morley, John E., June 9, change to Morley, John F.
Taber, Charles S., June 24, change to Tabor, Charles S.
Pulsifer, Chase, July 14, add name to list.

Major, Bessie, September 17, add name to list.
Fein, John W., October 18, add name to list.
Jones, John W., October 21, add name to list.
Stevens, Frank C., October 24, add name to list.

THIRD BARS—ISSUE OF JUNE 18, 1913.

Davis, John, May 4, add name to date.

Schuber, J. B., May 4, add name to list.

P. R. R. MEDAL LIST.

Hunter, R. B., April 23, change date to April 24.
Bernsee, W. F., September 3, change date to September 30.
Logasa, Charles, September 30, add name to list.
P. R. R. SECOND BAR LIST.
Newbold, W. R., Jr., February 2, change date to December 29.

PERSONAL.

Col. George W. Goethals returned from the United States on the steamship *Zacapa*, from New York, which docked at Colon on Wednesday, July 2.

Mr. H. H. Rousseau, accompanied by his family, returned on the *Cartago*, on Saturday, July 5, from Costa Rica, where he spent his annual leave.

Mr. T. B. Mönniche, accompanied by Mrs. Mönniche, sailed for Pedregal, the port of David, in the province of Chiriqui, on Saturday, July 5, and from there will go to the valley of Boquete, where he will spend his vacation leave.

Mr. F. A. Gause sailed for the United States on the *Colon*, on Tuesday, July 8, on his annual leave of absence.

Dr. Charles A. Hearne, quarantine officer at Colon and Cristobal, returned from his annual leave on the *Cartago*, from New Orleans, on Monday, June 30.

Mr. W. L. Thompson, formerly in charge of the sluicing operations back of Gold Hill at Culebra, resigned from the Canal service on July 2, and left for New Orleans on the *Turrialba*, on Thursday, July 3, having accepted the position of chief engineer of the Mississippi State Levee Board for the southern part of the Yazoo delta, with headquarters at Greenville. He arrived on the Isthmus on May 31, 1905, and was with the old Culebra division until it was reorganized into the Central Division in September, 1906, when he was placed in charge of excavation operations in the north part of Culebra Cut, with headquarters at Las Cascadas. This work completed, he was transferred on May 8, 1911, to the Pacific Division, and placed in charge of hydraulic operations in the vicinity of Miraflores Locks. After the suspension of this work in December, 1912, he was charged with installing a sluicing plant back of Gold Hill for removing material pressing against the slide on the east bank. The plant was installed, and began operations on June 17. Mr. W. D. Stanton, formerly assistant engineer in the Central Division, has been appointed to succeed Mr. Thompson at the sluicing plant.

European Plan Only at New Washington Hotel.

Commencing July 15, 1913, the Hotel Washington will run on European plan only. All service in dining room and restaurant will be *à la carte*.

O. F. Wood, Manager.

Married.

CALHOUN-CRESPI—On July 1, at the home of Mrs. Julia M. Frost, Cristobal, Clelia Delia, daughter of Mr. and Mrs. Albert Crespi of Brooklyn, N. Y., to Mr. Crede Haskins Calhoun of Columbia City, Ind. Canal Zone residence, Corozal.

The person who left package in Cristobal check room on July 4 can recover it by applying to C. M. Bullard, chairman, refreshment committee.

ELECTRICAL TRANSMISSION.

Distribution of Energy for Future Canal Requirements.—Construction of Main Line.

Construction work has been begun upon the permanent electrical transmission line across the Isthmus. A few foundations for the track-span bridges have been placed at New Culebra siding, on the Gold Hill relocation of the Panama railroad, and first shipments of steel for the bridges have arrived from the United States. A shed is being constructed in the abandoned borrow pit just east of Gatun Locks, for the assembling of the bridges.

The transmission line is fundamentally to transmit electrical energy from a source of generation at Gatun to load centers at Miraflores, Balboa, and Cristobal. The system is simple and straightforward. At the Gatun spillway, a portion of the lake water will be passed through turbines to generate electrical energy, as described in THE CANAL RECORD of July 3, 1912. The energy, generated at 2,200 volts, 25 cycles, three-phase, will be carried along the east wing of Gatun dam by heavy cables in duplicate underground duct-lines, and through tunnels under the locks, into a transformer substation, situated on the east side of the locks. The duct-lines are in duplicate, to insure maximum safeguard against damage in event of a burn-out of a cable in one or the other of the lines, and are to be laid approximately 600 feet apart.

At the Gatun substation, which is to be situated at the north end of the hill upon which the present Atlantic Division office building stands, the electrical energy will be transformed from 2,200 volts to 44,000 volts by means of step-up transformers. The equipment, in addition to three 2,000-kilowatt transformers, will consist of the necessary lightning arresters, oil switches, buses, control board, and other auxiliary appurtenances. Two high-tension lines will emerge from the substation and tap into duplicate transmission lines.

The transmission line will run from Cristobal to Balboa, completely across the Isthmus, permitting distribution of energy both ways from Gatun. The line is to parallel the right-of-way of the Panama railroad for its entire length. At Cristobal and Balboa will be terminal substations similar to the Gatun substation. The terminal substations will receive the energy at 44,000 volts, less the voltage drop in the line, and step-down transformers will convert the pressure to 2,200 volts, which will be the distributing voltage for all circuits. At Miraflores, a substation will be installed for supplying energy for the motors and lamps of Pedro Miguel and Miraflores Locks. If electricity is required along the line, the transmission lines will be tapped by outdoor type of transformer substation equipment. This will probably be done at Caimito, to supply electricity to the high power radio station; at Monte Lirio, to supply power to the bascule bridge, and at any permanent town or military reservation which demands electric lights and power.

At Miraflores, the present steam turbogenerators will be tied into the permanent electrical system through 2,200-volt tie-lines extending to the Miraflores substation. This steam station will serve as a reserve in the event the hydroelectric station at Gatun should break down. In emergency, energy from Miraflores will be transmitted back to Gatun and to the terminal substations at Cristobal and Balboa, insuring a continuity of service on the system

at all times. The present steam station at Gatun, which has been operated during the construction period, may be abandoned in a year or two if conditions warrant placing entire dependence upon the water power. It will, however, be tied temporarily into the system, until abandonment, and will also be required to supply energy to Gatun Locks until such time as the transmission system is fully installed.

The type of transmission line which has been adopted is illustrated in the accompanying sketch. The track-span bridge supports one of the duplicate three-phase lines upon each side of the railroad tracks. Each of the three power conductors is carried from suspension insulators attached to a side bracket. The conductors are No. 00 in size, and are five feet apart and five feet from the frame. The insulators are made of vitreous porcelain, in three units, which is ample to sustain the impressed potential of 44,000 volts. The insulator fittings are made entirely of monel metal to resist climatic corrosion. A ground wire for protection against lightning is carried at the top of each side frame. The ground wire is 5/16-inch copper-clad solid wire. The copper-clad wire is being furnished

000 feet in length. The individual strands are manufactured without either a soldered or a welded joint. Splices in the cable will be made with soft copper sleeves. The conductors are suspended at the insulators from monel metal fittings, which are bushed with a copper sleeve. Thus, in the entire length of line, there will be no point where the copper strands are in intimate contact with a second metal; this prevents the introduction of an electric couple and consequent electrolytic deterioration.

At each track-span bridge, the ground wire will be clamped to the tower, and a positive T-connection through a copper wire will be made to ground plates buried in the earth. These ground plates are being manufactured from old scrap copper and cable which have accumulated at the Empire storehouse. By frequently grounding the ground wires, it is expected that line trouble and substation burn-outs caused by lightning will be reduced to a minimum. Five hundred thousand feet of copper-clad wire are required for the two ground wires.

The insulators, which will support the conductors, are of two types, suspension and strain, each assembled of three porcelain discs, ten inches in diameter, joined by monel metal fit-

TRACK-SPAN BRIDGE, CRISTOBAL-BALBOA TRANSMISSION LINE.

Front and side elevations: A, concrete pedestals; B, side frame; C, cross bridge; D, brackets; E, three-phase transmission line; F, suspension insulators; G, ground wire; H, Panama railroad car.

with a copper sheath of nearly one-half the area of the wire, surrounding an amalgamated, carefully selected steel core.

The steel bridges are spaced on 300 foot centers, a total of 917 being required across the Isthmus. The span between side frames is 36 feet. The track-span bridge, in addition to supporting the duplicate transmission lines, admits of the suspension of a catenary trolley construction, should it prove desirable in the future to electrify the Panama railroad.

The construction adopted has several advantages for transmission purposes. By paralleling the Panama railroad, material can be brought to within a very few feet of the point of actual erection. The side bracket suspension of the conductors separates the duplicate lines so that a burn-out in one will in no manner affect the other. The conductors are outside the track and will be comparatively free from deterioration caused by smoke from the locomotives. The structure itself is fundamentally strong and is capable of easily resisting all strains introduced by breaks in the wires.

A few details of construction are worthy of note. The No. 00 copper conductors are 7-strand pure copper cables, totaling 1,500,-

tings. This metal is used on account of its unusual strength and its ability to resist corrosion; galvanized fittings which are customarily used in the United States and abroad are considered practically worthless in the Isthmian humidity. The strain insulator is to be used on sharp curves and for anchoring at intervals, and the suspension insulator is to be used upon tangents and light curves. The suspension insulator swings freely from the bracket, while the strain insulators take the position of the conductors and hold the conductors more rigidly to a line. Each wire requires two strain insulators per bridge on sharp curves, and one suspension insulator is required for each wire per bridge on tangents and light curves. Four thousand suspension insulators and 2,500 strain insulators, have been ordered for the entire line. The total weight of the copper conductors, including the ground-wires, will be approximately 400 tons.

In the design of the bridge the steel is distributed, so as most efficiently to resist the maximum stresses incurred. The side frames are A-frames, to resist uprooting of the bridge in event all wires are down in one span. The crosspiece is made of two channels, which are crossbraced to carry the longitudinal pull of

the catenary construction which may be attached if the railroad is electrified. The side brackets for supporting the line conductors are three-legged, designed both to support the weight and to resist the torsional pull of the wires. The brackets and the crosspiece are braced to the side frames, so that the entire bridge acts as a unit to resist side pull on sharp curves.

The type of concrete foundations for the track-span bridges has been given considerable study. The standard foundation will consist of two pedestals under the two legs of each side frame, the pedestals resting upon a spread slab, which latter is reinforced by scrap steel rails. Each leg of the side frame is to be secured to the pedestal through two 15-inch anchor bolts, which are clamped at the lower end to the steel rails in the spread slab. Provision for anchoring the foundations is made by extending downward long reinforcing rods, encased by concrete in a drilled hole, which latter has been sprung at the bottom with light charges of dynamite. This foundation should afford a thorough footing, both for the normal bearing and for anchorage to resist side pull when wires are broken.

Among the permanent loads which are to be placed on the transmission system, the following are tabulated:

Place.	Division.	Description.
Colon.....	Public works...	Sump pumps.
Cristobal....	Panama railroad	Docks, light and power.
Cristobal....	Subsistence....	Bakery, laundry, cold storage, ice plant, etc.
Mount Hope..	Second.....	Coal handling plant.
Mount Hope..	Public works...	Colon waterworks.
Gatun.....	First.....	Lock machinery, and lighting.
Gatun.....	Atlantic.....	Agua Clara pumping plant.
Monte Lirio..	Panamarailroad	Bascule bridge
Caimito Jct..	Navy Department.	Wireless station.
Pedro Miguel	First.....	Lock machinery, and lighting.
Miraflores...	First.....	Lock machinery, and lighting.
Miraflores...	Public works...	Water pumping plant.
Balboa.....	Second.....	Dry docks, permanent shops.

In addition to the above, all permanent towns of the Canal Zone will be supplied with electric lights, and the range and beacon lights and the Panama railroad signals will be furnished with electrical energy where required.

Balboa Sand Service.

A report of sand shipped from Balboa during the month of June, follows:

Sale of Public Buildings at Gorgona and Matichin.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., July 1, 1913.

Sealed proposals will be received at this office until 3 p. m., Saturday, July 19, 1913, and then opened, for the purchase of any or all of a miscellaneous lot of buildings located at Gorgona and Matichin, C. Z. List of the buildings offered for sale and full information relative thereto, can be secured upon application to any district quartermaster, or to this office. Proposals must be accompanied by certified check, post-office money order, or cash, for five per cent of amount bid. Envelopes containing proposals should be marked "Proposal for purchase of buildings" and addressed to the undersigned.

R. E. Wood,
Chief Quartermaster.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week, July 14 to 19 is, as follows: Monday, Corozal; Tuesday, Empire; Wednesday, Gorgona; Thursday, Culebra; Friday, Porto Bello and Gatun; Saturday, Cristobal.

COROZAL.

High scores in tenpins for the week ending July 5 were, as follows: Callahan, 222; Copeland, 210; Whiston, 200, 209.

Mr. D. E. Conner gave an exhibition of the game of chess at the clubhouse on Saturday night, July 5, playing seven Corozal players at once, winning five, and losing two games. Of his opponents, Mills and Sherrard won their games, while Morehead, Fields, Lindsay, Kingsbury, and Bartman lost one each.

Mr. F. A. Gause, superintendent of the Canal Zone schools, entertained about 225 people with an interesting and instructive illustrated lecture on Panama and the Canal, on Sunday evening, July 6.

CULEBRA.

Mr. H. G. Cornthwaite won first place in the local handicap tenpin tournament for the month of June, and Mr. Clarence Leonard finished second. The prizes are gold and silver medals.

High scores for the week in tenpins are, as follows: Leonard, 217; Fleischman, 210; Dougherty, 209, 202; Anderson, 202.

EMPIRE.

Gymnasium classes will be held twice weekly from now on. Mr. Russell, who has just returned from the United States, will have charge.

The Y. M. C. A. has secured the Tenth Infantry band to give an open air concert to the people of Empire, on Sunday evening, July 13, at the bandstand, beginning at 6 o'clock.

GATUN.

Two sets of indoor quilts have been ordered from the United States; also, a "Chess players' manual."

Mr. Louis DePorter, who has had charge of all pool and billiard activities since the opening of the clubhouse in March, 1910, was given a farewell reception by the members of the Gatun Y. M. C. A., on Wednesday evening, July 2. He was presented with a gift, and a set of resolutions was read in his honor. Following the presentation, the second half of a 300-ball match pool game for the championship of the Isthmus was played between Mr. DePorter and Mr. Theodore Wehmeier, the leading player of Cristobal. The first half of the match had been played at Cristobal on Tuesday evening, July 1, when the score resulted: DePorter, 160, Wehmeier, 140. The second half, played at Gatun resulted: DePorter, 140, Wehmeier, 81. Totals: DePorter, 300, Wehmeier, 221. During the evening, a progressive pool tournament was also played, with the following results:

DeMoll.....	23..32..28..28—111
Pettit.....	26..32..20..24—102
Baxter.....	22..25..27..20—94
Swallow.....	16..28..9..17—70
Garrison.....	22..13..20..13—68
Mitchell.....	17..5..22..15—59
Campbell.....	16..10..10..13—49
Reisner.....	12..10..12..10—44

Mr. De Moll received a cue as first prize, and Mr. Reisner, having won the booby prize, was presented with a ladies' white parasol.

Mr. D. C. Galloway has been appointed supervisor of pool and billiards, with Mr. F. H. Wang, first office assistant, and E. M. Foster, second assistant.

"Natural law in the world of labor" was the subject of an address given by Mr. W. Benton Childers at the meeting of the "Forum" on Tuesday evening, July 1. The tropical male quartet sang two songs, Mr. Ross sang a tenor solo, and Mr. Pearsall played several piano solos.

"Open house" was observed on July 4. The building was appropriately decorated, and free pool and billiards were enjoyed all day.

CRISTOBAL.

The results of the ragtime bowling tournament held on July 4 were, as follows:

Duckpins.

Weston, Cristobal, 101; Wurster, Gatun, 115; total, 216.

Davis, Empire, 110; Claherty, Gatun, 106; total, 216.

Pinney, Empire, 110; Giavelli, Empire, 101; total, 211.

High score, Claherty, Gatun, 120.

Tenpins.

Wolf, Empire, 156; Swallow, Gatun, 267; total, 423.

Barte, Gatun, 207; Wolf, Empire, 147; total, 354.

Swallow, Gatun, 174; Collins, Cristobal, 176; total, 350.

High score, Swallow, Gatun, 267.

Mr. E. J. Schulte, the assistant secretary during the past year, has resigned, and will sail for the States on July 14.

It is estimated that 3,000 people visited the Cristobal clubhouse on July 4. Three hundred and thirty games of tenpins and duckpins were rolled, and 600 games were played on the pool and billiard tables. Suitable accommodations were provided for those who wished rest and refreshment.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal and Colon, during the week ending July 5:

Tivies, June 29, from New York with 12 bales rubber hose, 12 cases rubber packing, 10 crates valves, 30 cases putty, 100 cases paint, 250 drums calcium carbide, for stock; 14 barrels floor tile, 9 reels cable, First Division; 20 pieces structural steel, 26 cases sheet copper, Panama Railroad Company.

Colonial, June 29, from Liverpool, with 6 pieces dredge buckets, 30 pieces bucket links, Sixth Division.

Talisman, June 30, from New York, with 4,080 bags cement, 8,700 cases dynamite, for stock.

Prins August Wilhelm, June 30, from New York with 1,756 pieces wrought pipe, 41 kegs rivets, 214 kegs bolts and nuts, for stock.

Carlota, July 1, from New Orleans, with 14,043 pieces lumber, Mechanical Division; 1,262 barrels paving brick, Panama Railroad Company; 300 pieces cross ties, 231 crates handles, 159 bales timothy hay, 50 cases wash bowls, 1,053 pieces lumber, 270 cases kerosene, 270 drums kerosene, 159 pieces piling, for stock.

Zacapa, July 2, from New York, with 12 cases valve machinery, 11 reels cable, First Division; 923 packages structural steel, Second Division; 425 pieces structural steel, Panama Railroad Company; 7 cases expansion bolts, fortifications; 600 rolls roofing paper, 544 sacks oats, 26 coils rope, for stock.

Colon, July 2, from New York with 29 cases files, 20 cases paint, 20 cases steel, 20 kegs chalk, 68 cases caustic soda, 25 barrels pipe-fittings, 53 rolls cotton duck, 60 cases lard oil, 120 cases varnish, 600 cases linseed oil, 668 bundles roofing iron, 250 bundles garbage cans, 50 crates buckets, 73 bales cotton waste, 153 cases common soap, 570 pieces steel bars, for stock; 38 reels copper wire, 233 rolls mesh reinforcement, 1,200 pieces structural steel, First Division; 9,500 pieces hollow tile, 203 pieces steel bars, Second Division; and a miscellaneous cargo, the whole consisting of 15,870 packages, weighing 860 tons.

Abangares, July 3, from New Orleans, with 356 packages castings, Mechanical Division; 116 barrels paving brick, Panama Railroad Company; 200 packages switch stands, 420 sacks dairy feed, 114 pieces piling, 434 bales timothy hay, 3,328 pieces yellow pine lumber, for stock.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, July 5, 1913. All heights are in feet above mean sealevel.

DAY AND DATE.	STATIONS.

OFFICIAL CIRCULARS.

Transfer of Timekeeping Work.

CULEBRA, C. Z., July 2, 1913.

CIRCULAR No. 183-V:

Effective July 1, 1913, the timekeeping work and personnel at present partially centralized in the Department of Examination of Accounts, including the preparation of rolls and issues of coupon books, will be transferred to the office of the Chairman and Chief Engineer, Fourth Division. The timekeeping of the Central Division and the Subsistence Department will be taken over at a date to be later determined by the Chairman.

GEO. W. GOETHALS, *Chairman.*

Approved: June 14, 1913.

LINDLEY M. GARRISON,
Secretary of War.

Removal of Gorgona Shops.

CULEBRA, C. Z., June 25, 1913.

CIRCULAR No. 349-E:

1. Preparatory to the abandoning of the Gorgona shops, the work heretofore performed therein will be transferred to the Empire and the Balboa shops on the approximate dates hereinafter given.

2. The instrument repair shop will be transferred from Gorgona to Empire on June 30; all instruments requiring repairs will hereafter be sent to Empire shops.

3. The planing mill and carpenter shop will be transferred from Gorgona to Balboa shops during the week beginning July 7.

4. The foundry will be transferred to the Balboa shops, as follows:

Brass foundry on or about July 21.

Iron foundry on or about July 24.

Steel foundry on or about August 1.

The pattern shop will be transferred to Balboa on or about July 24.

The exact dates on which the different departments of the foundry and the pattern shop will be transferred to Balboa will be fixed by the inspector of shops.

5. The air brake department and the car machine shop will be transferred from Gorgona to Empire on August 1.

6. The transfer of the erecting, machine, blacksmith, and boiler shops from Gorgona to Empire will be made, as follows:

(a.) *Repair work.*—All locomotives, steamshovels, locomotive cranes, track shifters, spreaders, piledrivers, plows, and other classes of equipment, except cars (see Circular No. 349-B) and hand push cars, baggage trucks, and rock drills (see Circular No. 349-C), requiring repairs on or after August 1, will be sent to the Empire shops.

(b.) *Manufacturing work.*—All shop orders issued after August 1 covering manufacturing work that is not required to be completed prior to August 23 will be executed at the Empire shops. Shop orders covering manufacturing work issued prior to August 1 that are not required to be completed before August 31 will be transferred to the Empire shops at such time during the month of August as will least interfere with the prosecution of the work.

7. The office of the superintendent of the Mechanical Division, the drafting room, employees, and necessary machines, tools, and so forth, will be transferred from Gorgona to Empire at such times as may be directed by the inspector of shops. All correspondence with the Mechanical Division will be sent to Gorgona until the removal of the office of the superintendent, and of the drafting room, is announced.

8. Circulars Nos. 343 and 349-A are hereby modified to direct the work indicated above to be performed at the Empire and Balboa shops instead of at the Gorgona shops after the dates of transfer of work indicated above.

9. The heads of departments and divisions will anticipate, so far as practicable, their requirements for repair and manufacturing work, particularly for brass, iron, and steel castings, as during the transfer of each department there will be a period of about one week during which the output will be partly or entirely stopped.

H. F. HODGES,

Acting Chairman, Isthmian Canal Commission,
Second Vice-President, Panama Railroad Company.

Doors of Box Cars to be Kept Closed.

CULEBRA, C. Z., June 27, 1913

HEADS OF DEPARTMENTS AND DIVISIONS:

The deterioration of floor and sills in box cars is accelerated by the entrance of water through the doors when the latter are left open. Hereafter, the doors of all box cars will be kept closed, except when the operations of loading or unloading are actually being carried on.

The heads of departments and divisions will take

such action as is necessary to insure compliance with these instructions.

H. F. HODGES,

Acting Chairman and Chief Engineer.

Transfer of Major Ashburn to the Isthmian Service.

WAR DEPARTMENT,

WASHINGTON, D. C., JUNE 14, 1913.

Special Order

No. 138

[Extract.]

8. Maj. Percy M. Ashburn, Medical Corps, is relieved from duty as a member of the board of medical officers appointed for the purpose of studying tropical diseases as they exist in the Philippine Islands, and from further duty in the Philippine Department, and will proceed on the first available transport to San Francisco, Cal., thence to Ancon, C. Z., for the purpose of establishing a board of medical officers for the purpose of studying diseases as they exist in Panama. The travel directed is necessary for the military service.

[2047984, A. G. O.]

By order of the Secretary of War:

LEONARD WOOD,

Major General, Chief of Staff.

Official:

H. O. S. Heistand,

Adjutant General.

Gold Hill Hydraulic Operations.

COROZAL, C. Z., July 2, 1913.

ORDER:

Effective at 5 p. m., July 2, 1913, Mr. Wilber D. Stanton, assistant engineer, will assume charge of hydraulic operations at Gold Hill, vice Mr. W. L. Thompson, resigned.

H. O. COLE,

Resident Engineer, Fifth Division.

New Manager, Hotel Washington.

PANAMA RAILROAD COMPANY,

OFFICE OF GENERAL SUPERINTENDENT,

COLON, R. P., July 3, 1913.

CIRCULAR No. 123:

TO ALL CONCERNED:

Effective Wednesday, July 2, 1913, Capt. O. F. Wood is appointed manager of the Hotel Washington, vice Mr. J. D. Bennett, assigned to other duties.

J. D. PATTERSON,

General Superintendent.

Guarding Against Train Accidents.

PANAMA RAILROAD COMPANY,

TRANSPORTATION DEPARTMENT,

COLON, R. P., July 3, 1913.

TRANSPORTATION BULLETIN No. 87.

TO ALL CONCERNED:

An unknown man was recently killed on our line on account of being struck by a train. There have been a number of fatal accidents of this kind in the past, and while in each and every case, it has been shown that those who were struck by trains were trespassers, the matter is brought to your attention, in order that a more careful lookout may be kept by train and engine crews in the future to avoid accidents of this kind.

Employees and others have been much accustomed to use our tracks, although they trespass in doing so

and we may be able to avoid some fatal accidents by train and engine crews being on the alert.

J. D. PATTERSON,

General Superintendent.

Notice to Mariners.

BALBOA, C. Z., July 3, 1913.

Effective July 3, 1913, the buoys on the starboard side of the channel, coming in to Balboa, will flash "RED" until further notice. No change in other characteristics.

C. H. MANN, *Port Captain.*

*Standard rain gage—readings at 5 p. m., daily—automatic rain gage at unstarred stations—values midnight to midnight

WEATHER CONDITIONS, CANAL ZONE, JUNE, 1913.

Rainfall during June was more evenly distributed over the Isthmus than usual, but the total monthly precipitation was below normal at all stations, except Ancon, Culebra, Empire, and Trinidad. Practically all of the deficiency occurred after June 20. The monthly totals ranged from 7.15 inches at Balboa, to 12.17 inches at Brazos Brook. The maximum rainfall recorded in one day was 3.36 inches at Empire on the 7th.

The air temperature was slightly above normal for the month of June, and there was a moderate excess in wind movement at all stations except Ancon.

The cloudiness, relative humidity, and atmospheric pressure were below normal.

Forty-six per cent of the fog observed during the month were dissipated by 6.30 a. m., 92 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

STATIONS.	Pressure (reduced to mean of 24 hours.)	Temperature.				Mean relative humidity.	Precipitation.			Wind.		
		Mean.	Maximum.	Date.	Minimum.	Date.	Total inches.	Station average.	Number of rainy days.	Total movement (in miles.)	Prevailing direction.	Date.

Sale of Towboat "Exotic."

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., June 21, 1913.

Sealed bids will be received at this office until 2 p. m., Tuesday, September 2, 1913, for the steel-hull, stern-wheel towboat *Exotic*, built for the Commission in 1908 by Pusey and Jones, Wilmington, Del., at an approximate cost of \$40,000.

Gross tonnage, 150; two tandem compound engines, 7-inch by 14-inch, 48-inch stroke; two horizontal tubular boilers, Mississippi River type, 44-inches by 190-inches; indicated horsepower, 70; equipped with boiler feed pumps; boat equipped with capstan, steam steering gear, etc.; retired from service in 1911.

This boat can be inspected and further particulars obtained on any working day between 7 and 11 a. m., and 1 and 5 p. m., upon application at this office; any further information desired by intending bidders at a distance will be furnished by letter on request. Right is reserved to reject any or all bids.

Bids should be addressed to the Depot Quartermaster Mount Hope, Canal Zone, plainly marked, "Proposal to purchase towboat *Exotic*, to be opened September 2, 1913."

C. NIXON,
Depot Quartermaster.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

The Panamanian Steamship Company's steamer *Panama* will sail from Panama, for Aguadulce and Pedregal, on Sunday, July 20.

The following ships arrived at, or departed from, the port of Balboa during the week ending July 7:

Arrivals—July 2, *Limari*, from south ports; July 2, *Huallaga*, from south ports; July 3, *Acapulco*, from San Francisco via Central America; July 4, *Ecuador*, from Guayaquil; July 7, *Ucayali*, from south ports; July 6, *Santa Rita*, Port San Luis, California;

Departures—June 30, *Guatemala*, to south ports; July 4, *Chile*, to intermediate ports; July 7, *Limari*, to south ports.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, JULY 16, 1913.

No. 47.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Consolidation of Quarters in Colon and Cristobal.

Effective August 1, all Canal Commission and Panama railroad quarters at Colon and Cristobal, with the exception of the new Hotel Washington, will be consolidated and placed under the jurisdiction of the Quartermaster's Department, and all repairs to houses and furniture, will, thereafter, be handled by its forces. The consolidation is in the interest of economy, for, under the existing arrangement, the district quartermaster at Cristobal delivers coal and wood to the houses on Colon Beach, furnishes team service, when required, and collects the garbage, while the repairs to quarters and furniture of the Panama railroad are made by its men. In this way, it has been necessary for the railroad company to send its force to repair quarters in Cristobal, and for the district quartermaster to perform similar work at the hospital quarters on Colon Beach.

Canal Excavation in June.

The grand total of Canal excavation to July 1 was 203,383,539 cubic yards, leaving to be excavated 14,812,034 cubic yards.

The total excavation for the month of June was 2,659,424 cubic yards, as compared with 2,339,770 cubic yards for the corresponding month last year, and 2,646,442 cubic yards in June, 1911.

The dry excavation for the month amounted to 1,152,299 cubic yards, entirely by steamshovels. The dredges removed 1,507,125 cubic yards, nearly attaining the total of the previous month, 1,525,493 cubic yards, which was the highest of record on the Canal.

In the Atlantic Division, the total excavation was 814,980 cubic yards. Of this amount, all but 388 cubic yards consisted of material dredged from the Atlantic entrance and approach to Gatun Locks.

The total excavation in Central Division territory was 878,300 cubic yards, 57,274 cubic yards of which consisted of hydraulic excavation, back of Gold Hill, performed by the

forces of the Fifth Division. Central Division shovels removed 821,026 cubic yards, as follows: Eight hundred and five thousand one hundred and nine cubic yards, classified as primary excavation from Culebra Cut; 13,017 cubic yards charged to "Plant" excavation, and 2,900 cubic yards from the drainage ditch between Empire and Culebra, on the west bank. The total excavation from the Culebra Cut section in June, 1912, was 1,348,780 cubic yards.

In the Pacific Section, the total excavation was 966,144 cubic yards, 330,885 cubic yards by steamshovels, and 635,259 cubic yards by dredges. The dry excavation consisted of 229,894 cubic yards from the Canal prism, south of Miraflores Locks, and 100,991 cubic yards from the terminal site. The wet excavation consisted of 604,080 cubic yards from the Pacific entrance, between the dike and the sea, and 31,179 cubic yards from the terminal basin.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

ATLANTIC DIVISION.

LOCALITY.	"Work" Excavation.	"Plant" Excavation.	Total Excavation.

Mean rainfall along Canal (ten stations), 9.35 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Paraiso Selected for Dredging Headquarters.

The Chairman and Chief Engineer has approved the recommendation of the resident engineer of the Sixth Division that the various dredging units in the Canal service be consolidated, with headquarters at Paraiso. In view of the projected dredging operations in the Culebra Cut section after the water is turned in, this arrangement will, it is believed, place the plant on a basis where it can be maintained more economically, for, under present conditions, in making extensive repairs to dredges engaged in Cut excavation, it would be necessary to send them either to Balboa or Cristobal, involving a loss in time and labor. Repairs to the dredging fleet are now made in the shops situated one at each end of the Canal. Under the new plan, these shops will be abandoned, and the repair work centralized in the shop at Paraiso. The two offices now maintained, one at Balboa, and the other on dock No. 14, Cristobal, will also be consolidated at Paraiso, and quarters will be provided there for the Sixth Division employees, including the resident engineer and the dredging superintendent, leaving but one clerk at each end to look after miscellaneous work.

In order to insure an adequate fuel supply for the dredges operating in the Culebra Cut section, coal will be brought through the Canal from the Atlantic side in rock and sand barges, and fuel oil will be piped into a tank to be erected at Paraiso. In providing suitable facilities for making repairs to the dredging fleet, a 5-pile bent wharf, 500 feet long, is to be constructed so that it will set in a recess in the bank of the Canal. The floor of this wharf will be at elevation 95 feet above sealevel and it will be of sufficient strength to permit of the handling of heavy repair parts with a 100-ton crane. In addition, another recess will be excavated nearby, with six 10-pile dolphins driven close to the shore line, for the purpose of mooring barges, tugs, and other floating equipment.

For the actual repair work, it has been decided to refit the old machine shop at Paraiso,

NOTES OF PROGRESS.

(Continued).

now occupied temporarily by the First Division, and by the American Cement Tile Manufacturing Company. A list of the machinery required has been prepared and includes the following:

Machine shop—Five lathes, one each 30-inch, 26-inch, 16-inch, 14-inch, and 12-inch, one 6-foot boring mill, one 18-inch slotter, one Universal grinder, one wet grinder, one dry grinder, one planer, one bolt cutter, one radial drill, four vertical drills, and one No. 3 milling machine.

Blacksmith shop—One steam hammer, four forges.

Boilermaker shop—One countersinking machine, one radial drill, one vertical drill, three punch and shears, one set plate rollers, one furnace, one forge, one grindstone.

Carpenter shop—One band saw, one circular saw, one wood planer.

All of the above machinery is available at one or the other of the present shops.

The requirements for the new plant are estimated to cost about \$81,000, as follows: Construction of repair wharf, using cypress piles, \$15,000; conversion of building No. 2 into an office for the resident engineer, \$1,000; erection of oil tank and laying pipeline, not including, however, cost of the tank, which can be procured from the Mechanical Division, \$1,000; driving of dolphins for moorings, \$1,000; excavation for recesses, approximately 100,000 cubic yards, at 60 cents a yard, \$60,000; installation of machinery, \$3,000. The recesses are designed to provide ample room for the pontoon bridge, in case that method of crossing the Canal, after the destruction of Gamboa dike, is adopted.

Native Residents Leaving Gorgona.

The personal effects and household goods of some of the native residents at Gorgona were loaded into two Panama railroad box cars, especially provided for the purpose, on Wednesday, July 9, for transportation to Panama. An additional coach was also attached to train No. 5, leaving Colon at 10.30 a. m., on Thursday, July 10, for the accommodation of about 60 men, women, and children, who are removing from the native town at Gorgona. Some of the people expect to go to the town of New Gorgona, which the Panama Government is laying out on the south coast, about 25 miles west of Panama City.

Agricultural Opportunities.

The Department of Commerce and Labor has issued a series of bulletins describing the agricultural opportunities throughout the United States and the territories of Alaska and Hawaii. A limited number of these bulletins are available for distribution on the Isthmus and will be furnished employees of the Isthmian Canal Commission and Panama Railroad Company upon application to the office of the Chairman.

Record Day's Output for the "Corozal."

The *Corozal* established a new record for one day for ladder dredges in the Canal service, on Friday, July 11, by excavating 13,700 cubic yards of material, 90 per cent of which was rock, in 19 hours and 50 minutes actual working time, an average of about 685 cubic yards an hour. The dredge has been working in the Canal prism, north of the old dam, ever since the latter was dynamited on May 18, and

during the nine days of the present month, up to July 12, in which it was operated, the daily average of material excavated has been approximately 12,000 cubic yards. The dredge was taken off the work on Saturday, July 12, in order to have its top tumbler replaced, and will be out of commission for about two weeks. The tumbler is made up of five separate pieces, and is hard to handle with the cranes available. When the new floating cranes are in service, it is estimated that the exchange of tumblers may be effected within 24 hours.

Uniform Rate for Water Supplied Shipping.

A uniform rate for water supplied shipping at Colon, Cristobal, and Balboa will be placed in effect on August 1. The rate per thousand gallons will be \$1, with a minimum charge of \$2. In delivery from dock for water delivered by lighter, there will be an additional charge of \$15 an hour to cover tug service in handling lighter, with a minimum charge for such service of \$15.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on July 12, being 4,468,112 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of July 12, follows:

COLON ELECTRIC TRAMWAY.

Fifty Year Franchise Granted Dr. Antonio Papi Aizpuru by Municipality.

The contract for the construction of a street railway in Colon was executed between the municipal council of that city and Dr. Antonio Papi Aizpuru on November 21, 1910. This contract was approved by the president of the council on January 18, 1911, and by the alcalde on February 4, 1911. Work on the system has begun on May 23, 1913, and the track has been laid for practically its entire length on D street. A bond for \$7,500 for proper replacement of the paving was given by Dr. Aizpuru, with Messrs. Ruben S. Arcia and Pascal Canavaggio as sureties, and this instrument, which will be in force for eight years, has received the approval of the Chairman of the Canal Commission, and the General Counsel.

Dr. Aizpuru has turned over his interest in the franchise to a company, known as the Colon Electric Tramway Company, organized with a capital stock of \$50,000, of which Mr. Ruben S. Arcia is president; Mr. Elias Aizpuru, secretary, and Mr. H. Hellinger, manager. The track will be 42-inch gage, and will be constructed of 56-pound steel T-rail, laid on wooden cross-ties, six feet long and six inches square. Some of the principal items in the construction of the system will be: One hundred and seventy-one tons of steel rail; 4,000 cross-ties; four cars, equipped with storage batteries, estimated to cost \$12,400; car shed to cost \$2,500; electric plant to cost \$3,250, and the breaking up and replacing of 8,550 square feet of macadam, \$4,788. The erection of an electric plant to furnish power for operating the line has not yet been fully decided upon, and current for a time may be obtained from a local company.

The main line will begin at the intersection of D and Second streets, thence extend westward to Bottle alley, thence to Fifth street, thence to Bolivar street to the starting point, the line thus forming an irregular loop. The construction of a branch line from Bolivar and Eighth streets to the railroad station is contemplated, and, under the contract, other branch lines in the extension of the service may be built from time to time.

The contract under which the company will operate is in force for 50 years. The work of construction must be completed within one year after it is begun, and the company has been required to deposit \$2,000 in the municipal treasury as an act of good faith. The company is exempt from the payment of municipal taxes, but it is required to pay into the municipal treasury three per cent of its gross receipts for the first three years of operation, and four per cent of its gross receipts after the first five years. Cars will be required to operate from 6 a. m., to 11 p. m., and a penalty of \$12.50 is provided for each day's suspension of service. The fare is limited to five cents, United States currency, over the whole or any part of the system, and includes the carriage of parcels and baggage that do not exceed a measurement of more than 27 centimeters. Certain public officials, and members of the police and fire departments are to be carried free upon proper authorization. Freight cars may be operated at the option of the company. All differences are to be submitted to a tribunal for arbitration.

SOCIAL LIFE OF THE ZONE.

Camp Fire Girls.

The Camp Fire Girls of Gatun gave a subscription entertainment at the residence of the camp fire guardian, Mrs. William L. Sibert, on Tuesday, June 17. The object of the entertainment was to raise money for the purpose of joining the national organization of the "Burden Bearers."

The twelve members of the camp fire appeared in their ceremonial dress, wearing their honor beads. The following program was given:

Introductory address.....Aurelia Karkeet
Recitation—*Burn, fire, burn*.....Wilma Grant
Song—*Burn, fire, burn*.....The circle
Indian club swinging.....Mary Sibert and Joseph Reed
Recitation—*The wind*.....Sarah Widener
Dance—*Washing clothes*
Katherine Parmeter and Dorothy Childers.
Song—*Mammy moon*.....The circle
Dance—*Mountain dance*.....The circle
Recitation—*The travelers*.....Marion Ross
Piano duet.....Katherine Waid and Mary Sibert
Dance—*The butterfly*
Barbara Gayer, Katherine Parmeter, Lucile Childers, and Sarah Widener.
Song—*The bugle man*.....The circle
Florence Kenny, Katherine Parmeter, Josephine Reed and Mary Sibert.
Recitation—*The children's hour*.....Florence Kenny
Dance.....The circle
Song—*Goodnight*.....The circle

On July 3, the circle held an outing under the care of the guardian and assistants, going to Colon, where they spent a part of the afternoon at the Hotel Washington swimming pool.

Church Notes.

The Culebra Christian League held a farewell reception in honor of the retiring chaplain, the Rev. A. A. Nellis, and family, on Tuesday evening, July 15. At this time, it was decided to disband the league, as it was considered unwise to continue it without a chaplain. The Sunday evening services will be continued at the chapel under the auspices of the Young Men's Christian Association.

A reception was tendered the Rev. Mr. Nellis, and Mrs. Nellis, by the Thursday evening song and praise association of Pedro Miguel, on July 10, following the farewell preaching service. A musical program, in which Mrs. R. A. Morton, Mrs. J. C. Ewing, Miss E. Whiting, and Messrs. G. C. Hover and Ray Millet took part, was given, and an address was delivered by Mr. A. H. Shrimpton. The association presented Chaplain Nellis with a watch fob and charm as a token of appreciation of his past services. The arrangements were in charge of Mrs. W. H. Faulkner and

Mr. C. E. Pendry, and refreshments were served by the women of the organization. The Rev. Mr. Nellis has been the visiting chaplain at Pedro Miguel since his arrival on the Isthmus in 1910.

Fourth of July Tennis Tournament.

The following are the results of the tennis tournament played in connection with the Fourth of July celebration:

Preliminary singles played June 22, 1913.

Fechtig defeated Drennan, 6-0; 6-2.
Bartholomew defeated Kuhn, by default.
Earhart defeated Dryden, 6-3; 6-3.
Poole defeated Goethals, 6-3; 2-6; 6-2.
Herrick defeated Poole, 8-6; 6-3.
Edwards defeated Smith, 6-3; 7-5.
Neely defeated Ross, 10-8; 8-6.
Shropshire defeated Rowe, 7-5; 5-7; 6-2.
Ohlson defeated Wechlar, by default.
Nevius defeated Ohlson, 6-1; 6-2.

Second Round.

Fechtig defeated Bartholomew, 6-4; 6-4.
Herrick defeated Earhart, 8-5; 6-2.
Neely defeated Edwards, 6-4; 6-4.
Nevius defeated Shropshire, 6-4, 6-4.

Semifinals.

Fechtig defeated Herrick, 7-5; 6-4.
Nevius defeated Neely, 4-6; 6-4; 6-1.

Finals played at Cristobal, July 4.

Nevius defeated Fechtig, 6-0; 4-6; 6-3.
Preliminary doubles played June 22.
Herrick and Drennan defeated Gassman and Daschell, 6-3; 6-2.

Earhart and Neely defeated Snyder and Ross, 7-9; 6-3; 6-2.

Pearman and Russell defeated Reeder and Crabtree, 6-4; 6-2.

Edwards and Bartholomew defeated Goethals and Kuhn, 6-2; 6-0.

Shropshire and Sherrard defeated Wechlar and Burlingham, 6-2; 6-4.

Fechtig and Nevius defeated Rowe and Ohlson, 6-4; 12-10.

Second Round.

Earhart and Neely defeated Herrick and Drennan, 6-4; 6-4.

Earhart and Neely defeated Pearman and Russell, 9-7; 3-6; 6-4.

Fechtig and Nevius defeated Shropshire and Sherrard, 6-1; 6-1.

Edwards and Bartholomew defeated Fechtig and Nevius, 4-6; 6-3; 6-4.

Earhart and Neely defeated Edwards and Bartholomew, 4-6; 6-4; 10-8.

Semifinals, consolation, played July 13.

Ross defeated Ohlson, 6-4; 6-1.

Finals.

Ross defeated Drennan, 6-4; 6-4.

In the report of the results of the aquatic events at the Fourth of July celebration at Cristobal, event No. 17 should have been omitted, as it was not held. Event No. 18, aquatic jousting tournament, should have been included, with W. Fraser, first; J. Raymond, second.

EXECUTIVE ORDER.

Jury Trials in the Canal Zone.

Under authority vested in me by law, it is ordered:

That paragraph 1 of Executive Order No. 750, dated February 6, 1908, providing for jury trials in the Canal Zone, is hereby amended to read, as follows:

1. In all criminal prosecutions in the Canal Zone for felonies, the accused shall enjoy the right of trial by an impartial jury of the District in which the crime shall have been committed, to be chosen, as follows:

This Order shall take effect on and after July 4, 1913.

WOODROW WILSON.

THE WHITE HOUSE,

June 30, 1913.

[No. 1792.]

PERSONAL.

Col. John L. Chamberlain of the Inspector General's Office, United States Army, arrived on the Isthmus, on the *Cristobal*, which docked on Monday, July 14.

Congressmen George J. Kindel of Colorado, and S. Hubert Dent of Alabama, accompanied by Mrs. Dent and son, were passengers on the *Cristobal*, which arrived on Monday, July 14.

Justice Thomas E. Brown, Jr., returned from leave of absence, on the *Panama*, which docked at Cristobal on Monday, July 14.

Mr. A. K. Stone, formerly master of transportation of the Panama Railroad Company at Colon, sailed for the United States on the *Colon*, on Tuesday, July 8.

Rapid Handling of Powder.

The largest shipment of Trojan powder ever unloaded at Balboa was received on the steamer *Lyra* on July 9, from San Francisco. It consisted of 5,000 cases, which were carried out of the vessel in exactly three hours, constituting a record in the unloading of explosives at the Balboa wharf.

Hotel Washington Service.

The contemplated change in service at the Hotel Washington, advertised to take effect Tuesday, July 15, has been deferred until further notice.

O. F. WOOD, Manager.

COLON, R. P., July 12, 1913.

Cristobal Marine Association.

The Cristobal Marine Association meets every first and third Sunday in the month at Cristobal lodge hall, house No. 1, upstairs, at 8 p. m. The next meeting will be on July 20.

L. PETTOLETTI,

Recording Secretary.

CRISTOBAL, C. Z., July 9, 1913.

I. B. of S. S. and D. M.

Local No. 19, International Brotherhood of Steamshovel and Dredgemen, will hold its next meeting at Empire lodge hall on Sunday, July 20. All members are requested to attend.

J. I. MAJOR,

Secretary and Treasurer.

Empire, C. Z., July 13, 1913.

United Spanish War Veterans.

Chagres Camp will hold a meeting in the I. C. C. lodge hall at Bas Obispo, on Saturday, July 19, at 8 p. m.

STEPHEN BYRNE, Adjutant.

Gorgona, C. Z., July 14, 1913.

TEAM SCORES IN FOURTH OF JULY TRACK EVENTS.

The team scores in the track events at the Fourth of July celebration at Cristobal are shown in the following table:

EVENT.	Ancon	Corozal	Cristobal	Culebra	Camp Elliott	Empire	Gorgona	Toro Point
100-yd. hurdles.....		5	1	3				
Shot put.....					3	1	5	
880-yd. run.....	5-1		3					
100-yd. dash.....		5	1				3	
440-yd. run.....	5				3-1			
Running broad jump.....	1				5		3	
Pole vault.....				4				5
220-yd. dash.....		5					3-1	
One mile relay.....		3		1	5			
Marathon.....	5-3		1					
Running high jump.....				3	5		1	
Total.....	20	18	6	11	22	1	16	5

Five points were awarded team securing first place; three points for second place, and one point for third place. The team scoring the most points in the regular events was given a point trophy.

A vertical ruler scale showing measurements from 0 to 6 inches. The markings are as follows:
- 0 inch at the bottom.
- 1 inch mark with "1" below it.
- 2 inch mark with "2" below it.
- 3 inch mark with "3" below it.
- 4 inch mark with "4" below it.
- 5 inch mark with "5" below it.
- 6 inch mark with "6" below it.
The ruler has horizontal tick marks every half-inch and vertical tick marks every quarter-inch. There are also small numbers between the main inch markings: "1/2" between 1 and 2, "3/4" between 2 and 3, "5/8" between 3 and 4, and "7/8" between 4 and 5.[illegible]

1891

CHAGRES RIVER GRAVEL.

Committee Reports on Method of Handling for Future Use.

The Chairman has approved the following report of a committee, consisting of Mr. W. G. Comber and Lieutenant Frederick Mears, appointed to investigate the procuring of Chagres gravel for various construction purposes:

"The committee visited the Chagres gravel beds to one-half mile above the village of Cruces, and found sufficient quantities to fulfill all requirements; the survey forces of the Second Division are now making necessary surveys and so marking the beds that they may be readily located when the lake level is raised.

"The responses to your letter of May 12, asking for information as to the gravel requirements of various divisions and departments, show that there will be a good demand for this class of material, and that it will be justifiable to put in a good plant for the handling of same and maintenance of a steady output for some years, experience having shown that the demands for material increase rather than diminish.

"One source of profitable use for this gravel has not been touched on by any of the replies to your letter of May 12, i. e., that of highway use; if we can furnish this material at about the figure named, it is probably the cheapest and best highway material that is available.

"The requirements of the various departments, under the plan proposed by us, cannot be filled until we have sufficient water in the lake to take care of the dredging plant required, but it is thought that by August 1, material in the Canal, just below the Gamboa bridge, can be dredged with pipeline suction dredge sufficient for temporary requirements, and delivered on shore where it can be loaded by clamshell on cars for shipment. For permanent supply your committee would respectfully suggest the employment of an outfit substantially a duplicate of the Chamé sand-handling plant, i. e., a French ladder dredge with a sufficient number of sand barges to fill all wants, together with a small tug to move the barges to the wharf. The dredge *Gopher*, or *Mole*, is thought to be the most suitable for this work, and the *De Lesseps*, a suitable tug; barges are also available, or will be by the time needed. The committee recommends the construction of a small pile wharf at a suitable location east of the Gamboa bridge, about 200 feet long, together with an overhead bin with a capacity of about 500 cubic yards of gravel, so that cars may be loaded by gravity from it, and the further construction of suitable spur tracks to the wharf and under the bins. It is considered that by the time the lake level is sufficiently high for this work, Chamé operations can be stopped and the plant moved to the lake.

"In the matter of moving the gravel-dredging outfit from the Canal to above and east of the Gamboa bridge, it is thought that dredge and tug may be passed through by lifting a set of girders north of the center span on two barges and towing them away until the dredging outfit has passed through, when the girders can be replaced in the same way; it is considered perfectly feasible to do this on a Sunday, without unduly delaying operations of the Panama Railroad Company.

"The committee further recommends the installation of electric crane No. 3, used in Chamé sand-handling at Balboa, recently dis-

mantled by the Sixth Division, and which is now in the hands of the Quartermaster's Department, to handle the gravel from barges to loading bins. The requirements, as shown by the replies to your letter of May 12, insure at least two years' work for the outfit above named.

"It is proposed by your committee that the marine operations of the gravel outfit be placed under the Sixth Division, and that the shore operations, including construction of wharf and installation of crane, together with the operation of same, be done by the Panama Railroad Company, as the largest users of the supply proposed."

A statement showing the gravel requirements of the various departments for the next two years, beginning with May, 1913, follows:

Department.	Cu. Yds.	Purpose.
First Division.	3,000	At Gatun locks.
	35,000	At Miraflores locks.
	8,600	At transmission line.
	26,400	At substations.
	1,000	At lighthouses, etc.
Total.	74,000	
Atlantic Division.	4,000	For municipal work.
Central Division.	25,000	For ballast.
	25,000	For municipal work.
	400,000	For revetment.
Total.	450,000	
Second Division.	165,000	At Balboa terminal
Sanitary Department.	2,000	Zone sanitation, etc.
Panama railroad.	100,000	For ballast, concrete, etc.,
		etc..
Q. M. Department.	600	Sidewalks.
Fortifications.	2,500	
Grand total.	898,100	

The first gravel pit was opened on the east bank of the river, opposite Gorgona, in 1907. Over 200,000 cubic yards of gravel were reclaimed up to the first of December, 1908, when operations were transferred to a point near the baseball park, since abandoned. Later, the nearest available source of supply was up the river, near the Gamboa bridge. In January, 1911, the area below the bridge was assigned to the Central Division, and that above the river to the Panama railroad. During that season, the railroad company obtained about 75,000 cubic yards from a bed about half a mile above the bridge; the following season another 20,000 cubic yards were taken out, in addition to 75,000 cubic yards further up stream. With the first rise in Gatun Lake, the bed below the bridge was inundated.

A recent examination made of the two beds, one just below, and the other above Cruces village, showed that there are about 300,000 cubic yards still available in the former, and 1,000,000 cubic yards in the latter. Two other beds were noted in this vicinity one on the south side of the river at the Gamboa fluviograph station, and the other between this point and the first bed below Cruces. In all, 25 beds, containing gravel suitable for concrete purposes, were counted between Gamboa bridge and Alhajuela. The gravel is of larger size further up the river, and most of the lower ends of the beds were found to be dirty from Palo Grande to Alhajuela.

The gravel beds continue all the way up to Dos Bocas, where the Rio Chagres and the Rio Pequeni unite to form the main river. The Pequeni flows through a more alluvial country and there is less gravel on its lower course, but the Chagres flows over a gravelly bed for the greater part of its length, causing, where the gravel has formed into banks, a constant succession of rapids, some of which are difficult

of navigation by cayucos, giving this stream the name of "Mad river" among the native boatmen.

Increased Accommodations at East Balboa Hotel and Mess Hall.

The Commission hotel at East Balboa is to be enlarged by a 12-foot extension along the front, which will provide room for 12 additional tables. With the augmentation of work at the Balboa terminals, and especially since the transfer of the Gorgona shop employees began, the table accommodations at the hotel have become cramped. Eight hundred and fifty meals a day are now served, the number having increased 300 during the past three months. Including the additional space, the hotel will have seating capacity for 280 people at one time. The hotel kitchen is also being widened 10 feet at one end to allow the waiters greater freedom of movement. With the employment of more waiters, the quarters for the help in the rear of the hotel became too small, and another building for this purpose, containing nine rooms, has been erected nearby. An annex to the mess hall for laborers, situated on the side of the hill opposite the commissary, which is under the jurisdiction of the steward of the hotel for American employees, has been built recently, and the mess hall kitchen has been newly equipped with a steam boiler, a 60-gallon steam kettle, and a 33-gallon vegetable steamer. At the end of June, there were about 600 Spanish laborers eating at the mess hall, while about 400 West Indians obtained their food supply from the kitchen.

Balboa Agency Retransferred.

Effective Wednesday, July 16, the receiving and forwarding agency at Balboa was retransferred to the Panama Railroad Company, together with the personnel engaged on the work, and on that date, the Quartermaster's Department ceased to act as agent for the railroad. Cargo handling at Balboa was taken over by the Quartermaster's Department on January 1, 1913, after a trial given stevedoring by contract. A reorganization of the work was undertaken, and on January 16, a regular day and night force, with a 9-hour, instead of a 10-hour day, was established. Results showed that about as much work was accomplished under the new schedule as under the old, and the operating cost was materially reduced.

Obituary.

The death of Andrew G. Kitchin, a naturalized American, employed in the Sixth Division, as captain of the tug *Porto Bello*, occurred at Colon Hospital on Monday, July 14. He was a native of Canada, was 47 years of age, unmarried, and had been on the Isthmus nearly five years. Two sisters, the Misses Cassie and Effie Kitchin, live at New Glasgow, Nova Scotia.

John H. Guinther, an American, employed in the Atlantic Division as a carpenter, was killed at Gatun Locks, about 4.30 p. m., on Monday, July 7, by a concrete elevator, which struck him in its descent. He was 29 years of age, unmarried, and had been on the Isthmus nearly seven years. His father, Charles Guinther, lives at Mount Carroll, Illinois.

Cleaning up Lock Chambers.

A general cleaning up of the lock chambers at Gatun will be undertaken shortly, and the superintendent of the McClintic-Marshall

Construction Company has been advised of this intention, in order that he may take steps to clear away all unused scaffolding, and trestles, together with such debris as may have accumulated during the erection of the lock gates, and for which his company is responsible. A similar cleaning up of the floors of the Pedro Miguel and Miraflores locks will be begun soon.

Awards by Joint Land Commission.

The following awards have been made by the Joint Land Commission since last report:

Award No. 5. In the matter of the estate of Baillamonos, supplementary to award No. 1—To Theophilus Archer, \$200; Alexander Campbell, \$65; Lee Cheong, \$20; Victorio Gomez, \$100; Juan Gonzales, \$95; Gabino Gutierrez, \$60; Juan Mendieta, \$225; José Martinez, \$75; Basilio Moran, \$45; Manuel Ochoa, \$135; Joseph Odis, \$100; Daniel Pincock, \$100; Pablo Rodriguez, \$275; Vicente Torres, \$200; Juan Flores, \$200. Total, \$1,895.

Award No. 6. In the matter of the estate of Juan Grande, supplementary to award No. 2—To Juan Diaz, \$30; owner of house No. 1,519, \$30; Rafael Maestre, \$225; William Richards, \$80; Adolphus Samuels, \$40; Thomas Smith, \$45; Samuel Williams, \$1,500. Total, \$1,950.

Award No. 7. In the matter of claims of occupiers located in the area comprised within the relocated line of the Panama railroad and the Canal prism, extending from Gatun to Gamboa—Juan Barcasnegro, \$400; Emiliano Bolano, \$60; Vicente Castillo, \$325; Samuel Davy, \$2,300; Joseph (José) Deterville, \$60; William Findelson, \$100; Eustace Golding (Golden), \$100; Charles McKensie, \$80; Pedro (Federico) Perez, \$50; William Stewart, \$250. Total, \$3,725.

Award No. 8. In the matter of the estate of Mamey y Culo Seco, located on the west bank of the Chagres River—To Isaac Brandon and Brothers, for all their right, title, and interest, including improvements, \$4,515; to the following owners of improvements: Juan Alonzo, \$300; Charles Phillip Bartlett, \$130; Carmen Bello, \$40; Marie Charpentier, \$40; Julian Cianza, \$275; Tereso Cianza, \$175; Alejandro de la Cruz, \$55; Catalino de la Cruz, \$60; Richard Ferguson, \$140; José Isabel Fernandez, \$275; Gerónimo Gutierrez, \$250; José Pilar Guerrero, \$225; Manuel Eugenio Guerrero, \$550; Salvador Isturian, \$85; José Minier (Munier), \$300; Modesto Mosquera, \$40; Julian Polla, \$35; Balbino Reyes, \$130; Carlo Reyes, \$130; Felipe Ruiz, \$125; Manuel Antonio Sanchez, \$210; Mercedes Sorilla, \$225; George Smith, \$100; Rossier Terini, \$20; Brigido Torres, \$40. Total, \$3,955.

Award No. 9. In the matter of the estate of Mamey y Culo Seco, located on the east bank of the Chagres River—To the owners of the land, for all right, title, and interest, including improvements, \$9,285, subject to any equities possessed by third parties; to the following owners of improvements: Roberto Campo, \$20; José Felix Diaz, \$500; Charles Francis, \$55; Polo (Hipolito) Gonzalez, \$500; Sebastian Gutierrez, \$30; Marco A. Posada, \$12.50; Thomas Posada, \$12.50; Elvira Posada, \$12.50; Carmen Posada, \$12.50; Manuel Ramos, \$150; José de la Rosa Rodriguez, \$140; Edward Samuels, \$20; Isaac Samuels, \$50; Tiburcio Valencia, \$125; Heriberto Villaverde, \$30; Timothy Williams, \$40. Total, \$10,995.

Remigio, \$300; heirs of Francisco Ardila, \$600; heirs of Vicente Alfaro, \$150; heirs of Luis R. Alfaro, \$150; heirs of Carlos Icaza Arosemena, \$300; to the owners of improvements, as follows: Henry Brown, \$75; Samuel Reid, \$85. Total, \$1,660.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture reels entitled "From the manger to the cross," were shown at Gorgona on July 6, where there was an attendance of 200, and at Corozal on July 13, where there was an attendance of 300. These moving pictures are the result of months of patient work on the part of the film company. A large company was sent to the Holy Land, where the pictures were made, the scenes being almost invariably laid in the localities in which Christ lived. A great many of the natives of Palestine appear in the production. The acting of those taking the principal parts is reverential and at the same time forceful and dramatic. These exhibitions are the first given on the Isthmus of these particular reels. Exhibitions will be given at the Empire Clubhouse, on Friday, July 18; Culebra, Sunday, July 20; Gatun, Saturday, July 26; and Cristobal, Sunday, July 27.

The regular weekly schedule for moving pictures, July 21 to 26, is, as follows: Monday, Culebra; Tuesday, Gorgona; Wednesday, Gatun; Thursday, Cristobal; Friday, Empire and Porto Bello; Saturday, Corozal.

COROZAL.

The chess match recorded in THE CANAL RECORD of July 2, 1913, as between Corozal and Gatun should have been Corozal versus a mixed team from the Atlantic side. The team which played Corozal was not composed entirely of Gatun men.

Corozal was defeated by a chess team from Culebra on July 9.

High scores in bowling for the week ending July 12 were made by the following: *Tenpins*—Sims, 247; Ziller, 200; Garrett, 201. *Duckpins*—Smith, 103, 115.

EMPIRE

On Sunday evening, July 13, the Tenth Infantry band played the following numbers at the clubhouse, to an audience of about 400 people:

1. March—*Washington Grays*.....Graffula
2. Grand selection—*Les Contes d'Hoffman*..Offenbach
3. Fantasia—*The Sunny South*.....Lampe
4. Selection—*Amorita*.....Czibulka
5. Waltz—*Daughter of Love*.....Bennett
6. Medley—*Popular Hits*.....Arr. by Lampe

The gymnasium and handball classes are well attended. The handball tournament will be started during the week. Ten entries have been received.

GORGONA.

Special music was furnished by Mr. Freedman at the motion picture entertainment, on Thursday evening, July 10.

There is an increased interest on the part of the night men in the afternoon handball games.

Mr. Spencer King is bowling alley manager, taking the place made vacant by the resignation of Mr. Regan, who moved to Culebra. The special features in the bowling alleys are bigpins and candlepins. Mr. King holds the high score for the week, 216.

GATUN.

At present bowling is the most popular activity at the clubhouse. The receipts have doubled since the first of the month. A meeting of the bowlers was held on Monday evening, July 14, when it was decided to conduct a "Lock city bowling tournament" in which six teams will compete. The schedule will be printed in next week's issue. During the past week, two match games were held. On Wednesday evening, July 9, the "McClintic-Marshalls" played the "Lock gate inspectors" and the results were, as follows:

	McC-M.	L. G. I.
1.....	398	402
2.....	426	380
3.....	420	418
4.....	389	390
5.....	407	441
Totals.....	2,040	2,031

On Thursday evening, July 10, the office force of the McClintic-Marshall Construction Company played the field force. W. B. Childers acted as captain of the former, while J. O. Childers led the latter. The results were:

	Office.	Field.
1.....	379	370
2.....	442	399
3.....	392	400
4.....	422	412
Totals.....	1,635	1,581

The present membership of the Gatun clubhouse is 401, which is 60 per cent of the men in town. An effort is being made to increase this number by August 1.

A "smoker" will be given at the clubhouse in the

near future. An interesting program will be arranged.

CRISTOBAL.

A beginners' class in Spanish will be organized on Friday night, July 18. The meetings will be at from 7.30 to 8.30 o'clock on Monday, Wednesday, and Friday nights. The class will be open to all members, and a charge of \$1.50 for the balance of the month will be made. The rate for the full calendar month will be \$3. There is a class in intermediate Spanish, and one in advanced Spanish. Any who wish to avail themselves of the opportunity to study the language are urged to join one of these classes.

A class in shorthand will be organized, providing enough men are interested in its study. Mr. Margon, who has been an instructor in the New York schools, has been procured to give instruction.

It is desired to organize a chess club, and all chess players in Cristobal and Colon are asked to meet in the game room on Monday night, July 21, at 8 o'clock.

The next motion picture entertainment will be given on Saturday night, July 19. There will be music

Red Cross Finances.

Sale of Public Buildings at Gorgona and Matachin.

OFFICE OF THE CHIEF QUARTERMASTER.

CULEBRA, C. Z., July 1, 1913.

Sealed proposals will be received at this office until 3 p. m., Saturday, July 19, 1913, and then opened, for the purchase of any or all of a miscellaneous lot of buildings located at Gorgona and Matachin, C. Z. List of the buildings offered for sale and full information relative thereto, can be secured upon application to any district quartermaster, or to this office. Proposals must be accompanied by certified check, post-office money order, or cash, for five per cent of amount bid. Envelopes containing proposals should be marked "Proposal for purchase of buildings" and addressed to the undersigned.

R. E. WOOD,
Chief Quartermaster.

LOST—On evening train, Colon to Panama, Tuesday, July 15, one heavy gold cuff-link, lovers' knot pattern. Reward for return to THE CANAL RECORD office.

LOST—Finder of a package of papers addressed to P. B. Keefer, and of no value except to the owner, is requested to return same to him at Box 164, Cristobal, C. Z.

OFFICIAL CIRCULARS.

New Division of Municipal Engineering.

CULEBRA, C. Z., July 9, 1913.

CIRCULAR No. 183-W:

The following changes in organization will take effect July 16, 1913:

With the exception of the pipelines and pumps necessary to the construction work in Culebra Cut, all municipal engineering work now in charge of the Atlantic, Central, and Fifth Divisions will be consolidated and constitute the Division of Municipal Engineering.

With the approval of the Secretary of War, the Division of Public Works in the Department of Civil Administration will be transferred to the Division of Municipal Engineering.

Mr. Geo. M. Wells will be relieved from duty with the Atlantic Division and assigned to duty as resident engineer, Division of Municipal Engineering, reporting to the Chief Engineer.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Railroad Transportation for Returning Employees and their Families.

CULEBRA, C. Z., July 10, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Under existing rules an employee on the gold roll upon termination of service is furnished free transportation from his official station or residence on the Isthmus to the port of embarkation. In the future, the families of employees on the gold roll whose services have been terminated may also be furnished free transportation to the port of embarkation. One official business trip ticket may be used to cover both the employee and his family.

GEO. W. GOETHALS,
Chairman.

Organization Charts.

CULEBRA, C. Z., July 8, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS.

Please prepare and submit to this office with the least possible delay organization charts of your respective departments and divisions similar to those which have been published heretofore in the annual reports. These must show the actual authorized organization as of July 1, 1913, and are to accompany the annual report. Tracings of the charts above requested should be 21 inches from top to bottom inside of the border line; the length is immaterial. There should be a 2-inch border for binding on the left-hand side and a 3/4-inch border on the three remaining sides. Departments in which no draftsmen are employed may submit a rough draft of the organization chart, to be completed in this office.

GEO. W. GOETHALS, Chairman.

Card Passes to be Exhibited.

CULEBRA, C. Z., July 8, 1913.

All holders of complimentary card passes on the Panama railroad will be required to present the same to the collector for inspection on each trip.

GEO. W. GOETHALS, President,
Panama Railroad Company.

Time Vouchers.

CULEBRA, C. Z., July 8, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is invited to the fact that frequent complaints are being made to this office that employees on the silver rolls who have been laid off and who desire to leave the Isthmus have been refused time vouchers and told they cannot be paid until the next regular pay day.

By my direction, the Examiner of Accounts has recently issued instructions to timekeepers amending Section 102 of the timekeeping rules, as follows:

"Section 102. Time vouchers will be issued to gold employees upon termination of service, or when entering on leave of absence, if requested.

"Time vouchers will be issued to all silver employees whose services are terminated by action of the Commission on account of reduction of force or other causes and who desire to leave the Isthmus.

"Silver employees who voluntarily quit the service may be paid by pay receipt unless they intend to leave the Isthmus prior to the next regular pay day, in which case the time voucher will be issued."

The refusal to issue time vouchers to employees on the silver rolls who have been discharged on account of reduction of force or for other causes, and who desire to leave the Isthmus, very often works a hardship that should be avoided. Time voucher should be issued in all such cases where the employee requests payment, or expresses the intention to leave the Isthmus. In instances where employees on the silver rolls voluntarily

quit the service they should be paid on pay receipt, unless it is the intention to leave the Isthmus, in which case time voucher should be issued.

Such employees should not be permitted to voluntarily quit the service for the purpose of securing pay by time voucher and then immediately return to work in the same or some other division, but where they express the intention to leave the Isthmus, action must be determined by the department or division in which employed and an effort made to verify the stated desire to leave, such as name of ship or steamship company, date of sailing, intended destination, etc., and, in case of doubt, it would be better to request issue of time voucher than to inflict the hardship which might result from a refusal to do so. It should not be required of such employees that they exhibit steamship tickets as very often they have no sufficient funds to purchase their tickets until they have received final pay, and in some cases steamship companies will not issue the class of tickets used by these employees until the day of sailing.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Superintendent, Second Division.

CULEBRA, C. Z., July 8, 1913.

TO ALL CONCERNED:

Effective July 3, 1913, Mr. J. A. Walker will perform the duties of superintendent in charge of construction work, Second Division, Chief Engineer's Office, on Balboa terminals.

H. H. ROUSSEAU,
Assistant to the Chief Engineer.

Gorgona Telephone Exchange Discontinued.

PANAMA RAILROAD COMPANY.
OFFICE OF GENERAL SUPERINTENDENT
COLON, R. P., July 13, 1913.

Effective July 15, the telephone exchange at Gorgona was discontinued. All telephones formerly connected to the Gorgona exchange may be reached through the Empire exchange.

JOHN D. PATTERSON,
General Superintendent.

Family Quarters.

Applications for married quarters on file on June 30 were, as follows:

DISTRICT.	List No. 1.	List No. 2.

Total.....	21 (11)	751 (91)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal, Colon and Balboa, during the week ending July 12:

Sixaola, July 6, from New York, with 20 cases washers, 403 bundles shovels, 15 barrels chip soap, 30 barrels rosin, 71 slabs zinc, 30 reels steel cable, 376 bundles corrugated iron, 30 cases soapstone, for stock; 221 pieces structural steel, 135 cases steel doors, for Panama Railroad Company; 18 reels cable, for First Division; 36 pieces car castings, 200 pieces car couplers, for Mechanical Division.

Heredia, July 7, from New Orleans, with 615 barrels paving brick, for Panama Railroad Company; 983 pieces lumber, for Mechanical Division; 13 cases hardware, 943 bales prairie hay, 69 crates handles, 269 pieces cross-ties, 30 pieces piling, 9,125 pieces lumber, for stock.

Emil L. Boas, July 7, from New York, with 60 cases machinery, for emergency dams; 26 cases castings, for First Division; 95 cases paper, 3,138 bundles steel bars, 1,545 bundles galvanized pipe, 217 kegs bolts and rivets, for stock.

Adriano, July 9, from New York, with 56 pieces cast iron pipe, for Atlantic Division; 155 coils wire, 20 cases lamps, 615 packages steel beams, 295 pieces car castings, for Mechanical Division; 232 cases electrical machinery, 49 reels cable, 1,200 pieces structural steel, 214 bundles pipe and fittings, for First Division; 244

bundles steel bars, for Sixth Division; 50 pieces steel plates, for Second Division; 27 cases paper, 10 barrels compound, 11 cases car seals, 24 cases wrenches, 19 bales sand paper, 296 kegs bolts and rivets, 200 pieces steel bars, 61 pieces steel plates, 250 bundles brooms, 73 pieces lumber, for stock; and a miscellaneous cargo, the whole consisting of 4,440 packages, weighing 590 tons.

Almirante, July 9, from New York, with 186 packages structural steel, for Panama Railroad Company; 3,000 pieces hollow tile, for Second Division; nine pieces steel plates, for Atlantic Division; 23 packages valve machinery, for First Division; 10 cases sheet zinc, for stock.

Lyra, July 9, from San Francisco, with 5,000 cases Trojan powder, 13 crates rubber hose, three rolls sheet lead, for stock.

Atenas, July 10, from New Orleans, with 5,940 pieces lumber, 48 pieces piling, for stock; 350 pieces lumber, for Mechanical Division.

The total value of material received during the month of June was \$1,173,391.38, distributed, as follows:

Mount Hope (stock).....	\$382,421.79
Atlantic Division.....	13,285.20
First Division, Chief Engineer.....	334,540.69
Second Division, Chief Engineer.....	231,536.74
Fourth Division, Chief Engineer.....	818.64
Fifth Division, Chief Engineer.....	11,719.59
Sixth Division, Chief Engineer.....	17,983.49
Mechanical Division.....	72,981.68
Sanitary Department.....	5,552.44
Civil Administration.....	140.63
Fortifications.....	23,443.08
Department of Law.....	231.60
Examiner of Accounts.....	627.75
Panama Railroad Company.....	78,108.06

Total..... \$1,173,391.38

The material came forward in 38 steamers; the total weight of cargo, exclusive of lumber, piling and ties, was 20,000 tons.

Rainfall from July 1 to July 12, 1913, Inclusive.

Hansen, Miss O.	Welch, Geo.
Iseley, Don B.	Wight, Allan
Jones, A. M. (colored)	Winston, P. P. Jr.

Sale of Towboat "Exotic."

OFFICE OF DEPOT QUARTERMASTER,
MOUNT HOPE, C. Z., June 21, 1913.

Sealed bids will be received at this office until 2 p. m., Tuesday, September 2, 1913, for the steel-hull, stern-wheel towboat *Exotic*, built for the Commission in 1908 by Pusey and Jones, Wilmington, Del., at an approximate cost of \$40,000.

Gross tonnage, 150; two tandem compound engines, 7-inch by 14-inch, 48-inch stroke; two horizontal tubular boilers, Mississippi River type, 44-inches by 190-inches; indicated horsepower, 70; equipped with boiler feed pumps; boat equipped with capstan, steam steering gear, etc.; retired from service in 1911.

This boat can be inspected and further particulars obtained on any working day between 7 and 11 a. m., and 1 and 5 p. m., upon application at this office; any further information desired by intending bidders at a distance will be furnished by letter on request. Right is reserved to reject any or all bids.

Bids should be addressed to the Depot Quartermaster Mount Hope, Canal Zone, plainly marked, "Proposed to purchase towboat *Exotic*, to be opened September 2, 1913."

C. NIXON,
Depot Quartermaster.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m. ships for New York via Kingston on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays; the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

The Panamanian Steamship Company's steamer *Panama* will sail from Panama, for Aguadulce and Pedregal, on Sunday, July 20.

The following ships arrived at, or departed from, the port of Balboa during the week ending July 14:

Arrivals—July 7, *Quillota*, from south ports, July 8, *Manavi*, from intermediate ports; July 9, *Pennsylvania* from San Francisco; July 10, *Lyra*, from San Francisco; July 14, *San Juan*, from San Francisco.

Departures—July 7, *Huallaga*, to south ports; July 8, *Santa Maria*, to Port San Luis; July 8, *Lewis Luckenbach*, to San Francisco; July 10, *Agapito*, to Central American ports; July 13, *Ucayali*, to south ports; July 14, *Quillota*, to south ports.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employes of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Ancon, Canal Zone,
Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission to the Secretary of War for the month of June is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Gamboa Dike to be Destroyed on October 10.

Steamshovel operations in Culebra Cut from now on will proceed on the assumption that the dike at Gamboa will be dynamited and water admitted to the Cut on Friday, October 10. All available shovels are to be set at work on the rock sections remaining in the Canal bottom between Cucaracha slide and the Empire suspension bridge, using those that have been working in the less important parts of the Cut, and in terracing operations on the east bank. The shovels engaged in lightening the weight of the west bank in the vicinity of Culebra village are to be continued for the present. Shovel work at Cucaracha slide has been placed secondary to the bottom excavation, and the greater part of the material in this slide, after October, 1913, will be left to the dredges. All accessible moving rock in the slide will, however, be drilled ready for blasting, and fired after the Cut is flooded. At the Tower R incline, there remain about 75,000 cubic yards of material to be removed, which will reduce the curve in the Canal at that point. This work is to be carried on, without interference with the passage of the dirt trains to the north, as long as material can be transported in this direction to advantage. The rock berm on the west side of the Canal at La Pita point will be drilled and charged after the water is admitted, so that the material may be blasted, with the water as a cushion, and later removed by dredges. This arrangement will also apply to the bench that exists on the east side of the Canal between Empire bridge

and Hagan's slide. The incline at Paraiso, used by the dirt trains moving south out of the Cut, will be allowed to remain in service as long as it is found necessary.

Disposition of Pacific Locks Handling Plant.

Proposals for the purchase of the eight steel cantilever cranes, comprising the permanent concrete handling plant at Pedro Miguel and Miraflores locks, were opened in Washington on July 14. Only one bid was received, that of the Chicago House Wrecking Company, which offered \$2,000 for the eight cranes, an average of \$250 each. The bid was ordered rejected, and the Canal Commission has since decided to take down four of the cranes and store the parts on the Isthmus. In furtherance of this plan, contract was let, on Saturday, July 19, to Messrs. J. R. Goodwin and J. W. Wright, to dismantle the cranes at once. The contract price is \$17,500. The cranes to be removed are chamber cranes Nos. 1 and 3, situated at the lower end of the locks at Miraflores, opposite the guide wall; and berm cranes G and H, situated on the west side of the locks. It is proposed to store the parts in the open for the present, but it is possible that later some of them may be utilized in connection with the permanent terminal facilities at Balboa.

Pumps at New Colon Water Works to be Motor-Driven.

The original plan for furnishing the power in the operation of the pumps at the new Colon water works was to utilize the three boilers, two stacks, and three pumps in the old station, but upon examination it was found that their condition would not justify their installation in a new plant. It has now been decided to substitute electrical for steam energy, and to install three motor-driven, single-stage pumps, using 2,200 volts. The average load on these pumps will probably be less than 200 horsepower a day. It is believed that the operating expense will be considerably less with motor-driven than with steam-driven pumps, while the electrical installation will leave a space approximately 28 by 35 feet available for the installation of oil pumps for the fuel oil pipeline system. Power will be obtained from the hydroelectric station at Gatun, when it is in operation, otherwise from the Miraflores steam plant.

Changes in the Mechanical Division.

The position of superintendent in the Mechanical Division has been abolished, and that of assistant superintendent authorized. The latter will have charge of the routine administration work of the Mechanical Division. The position of assistant chief clerk has also been abolished, and his work will hereafter be performed by the chief clerk. It has been decided to consolidate the preparation of all shop work orders, the making of requisitions and the substitution of material

under a material foreman, who will report directly to the chief draftsman. These, with a number of minor changes, are expected to effect a considerable saving in the overhead expense each month.

The abandonment of Gorgona shops was begun on May 1, with the transfer of car work to Empire and Cristobal. The transfer of the planing mill and carpenter shop to the permanent plant at Balboa was begun on July 10. The transfer of the brass, iron, and steel foundries will begin about July 28, while the removal to Empire of the blacksmith, boiler, machine, and erecting shop work will be begun on August 1. The latter arrangement will remain in effect only until such time as the new shops at Balboa are prepared to handle the work. The coach and freight car work transferred to Cristobal shops, and the Lidgerwood and steel car work transferred to Empire shops, will all be concentrated at Balboa as soon as the car and paint shops are ready for occupancy. All machines, tools, and shop equipment will be moved from Gorgona about September 1, and the demolition of all buildings and removal of all tracks completed before October 1.

Equipment for New Balboa Foundry.

Award for supplying an oil burning furnace for annealing various sizes and kinds of steel castings; another furnace for drying molds for steel castings; also, for four oil burning ovens, one for drying large cores for steel, iron, and brass castings, and three for drying smaller cores, all to be installed in the new foundry building at Balboa, has been made to the firm of Tate, Jones and Company, Incorporated, of Pittsburgh, at \$13,740 for the order complete. Delivery is to be made within 90 days from the date of the award.

The annealing furnace will be 18 feet nine inches long from front to rear, and 15 feet six inches high to the top of pulleys. It will be provided with an all-steel car and track, the latter to extend into the shop a distance of 24 feet from the center of the main columns, and will be capable of handling single castings in weight up to six tons, and of steel castings of varying dimensions in total weight up to 15 tons. The furnace will be built to withstand a constant working temperature of 1,600 degrees Fahrenheit.

The mold drying furnace will be 18 feet five inches wide, 27 feet six inches long, and 12 feet six inches high at the highest point. It will be provided with double tracks, and with cars or trucks suitable for transporting all sizes of flasks up to 15 tons. This furnace will be built to withstand a constant working temperature of 800 degrees Fahrenheit.

The larger of the core ovens will be 12 feet six inches wide, 18 feet eight inches long, and 10 feet eight inches high, provided with removable shelves 18 inches wide, spaced 24 inches apart. The oven is to be equipped with track

NOTES OF PROGRESS.

(Continued).

and cars or trucks suitable for carrying various sizes of cores, and will be capable of withstanding a constant working temperature of 300 degrees Fahrenheit.

The three smaller ovens are duplicates, each about three feet wide, four feet long, and six feet high, equipped with shelves of the revolving type. These, as well as the larger oven, will be located in the bay of the foundry, their backs to be against the rear of the large oven. Each of the small ovens will be built to withstand a constant working temperature of 200 degrees Fahrenheit.

The annealing furnace will be provided with six burners, the mold oven with three, the large core ovens with two burners. Each small core oven will be provided with one burner.

The burners are to use either air or steam at from 85 to 100 pounds pressure per square inch, for atomizing the oil and air, at from four to six ounces pressure per square inch, for combustion.

Agricultural Opportunities.

Owing to the heavy demand for the Agricultural Bulletins mentioned in THE CANAL RECORD of July 16, no further copies can be supplied from the Chairman's office. Unfilled requests for copies have been forwarded to the Department of Commerce and Labor, Washington, D. C., to which address future inquiries regarding these bulletins should be made.

Ancon Crusher.

The following is a statement of rock crushed at Ancon quarry during the two weeks ending July 19:

DATE.	Hours worked.	Cubic yards.
July 7.....	9.35	2,203
July 8.....	3.55	2,074

July 17.....	4.35	625
July 18.....		
July 19.....		
Total.....	23.35	4,962

Changes in Quarantine Against Guayaquil.

To meet the new regulations placed in effect by the authorities at Guayaquil, Ecuador, the following modifications in the local quarantine restrictions against vessels calling at that port have been made:

1. If vessels, after loading at the anchorage in front of the city, proceed down the river and anchor below the Matadero, and are thoroughly fumigated, including cabins, saloons, store rooms, crew's quarters, and the holds, at that point, the quarantine of the vessels will date from the time of sailing from Guayaquil.

2. Vessels not equipped with the Clayton apparatus must have the necessary number of Dutch ovens, pans, etc., placed on board to

insure complete fumigation of the vessel in question.

3. The fumigation must be carried out under the supervision of the medical officer attached to the American Consulate, and must be to his satisfaction, and proper certificate from this officer, or notation on the bill of health that the fumigation has been properly performed, will be required.

4. Passengers cannot be embarked on any vessel until after this fumigation has been completed.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on July 19, being 4,469,147 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of July 19, follows:

*Includes hydroelectric station.

In order to minimize unemployment as the Canal force is reduced, the Chief Quartermaster has advised the authorities in the various West India islands that the work is drawing to a close and that for the present there is no market for labor on the Isthmus. The various corporations and individuals which have shown desire to recruit local labor are to be notified when there is an excess in sight, and given permission to recruit, under the usual restrictions. The contract laborers will be repatriated on request.

RELAY AND BOOSTER PUMPS.

Transmission Line for Dredging and Sluicing Operations

The installation of a transmission line from the Miraflores power plant to the east of Gold Hill to furnish power for the operation of two relay pumps on the west bank on the Canal, south of Contractor's Hill; two relay pumps on the east bank, south of Cucaracha slide, and two booster pumps, north of Gold Hill, has been approved. The four relay pumps are to be used by the Sixth Division in connection with dredging operations in Culebra Cut, and the booster pumps, by the Fifth Division, for the hydraulic work back of Gold Hill.

The transmission line proper will consist of three conductors of not less than No. 00 gage, and the stock of No. 00 and No. 0000 copper wire now on the Isthmus, including that ordered for the First Division for the permanent transmission line across the Isthmus, may be drawn upon. In crossing the Cut, the conductors will be suspended from steel cables, and the ends of the latter will be firmly secured and connected, in order that there may be no danger of their parting and falling into the Canal. The conductors will be swung across at an altitude of not less than 345 feet above sealevel. As much as practicable of the present pole line from Pedro Miguel to a point south of Cucaracha slide is to be utilized.

Transformers have been ordered from the Allis-Chalmers Company of Milwaukee, Wis., at an approximate cost of \$9,496, delivery to be made at Colon within 90 days. They are to have a total capacity of 1,500 kilowatts, and are to be 25-cycle, at either 6,600, or 11,000 volts, with a primary voltage of 2,200. The transformers are to be installed in a substation to be located on the west face of Gold Hill, and from there power will be transmitted to the four relay and two booster pumps. The transmission line will be installed for a primary voltage of 11,000, and as it is to furnish power to the motors for the Gold Hill engine house, operated by the Mechanical Division, in addition to the above pumps, and possibly for other purposes at some future time, the cost of its erection and maintenance will be charged to a new plant account to be designated by the Examiner of Accounts.

It is desired to have the relay stations on the west bank of the Canal, south of Contractor's Hill, ready for operation by October 1, and the booster pumps about September 1, or as soon thereafter as power can be supplied. With this in view, the work on the transmission line will be carried on as rapidly as possible, in order that it may be operated as soon as the transformers are received and installed.

Cleaning Concrete Surfaces.

A wash, consisting of a dilute solution of hydrochloric acid, one part of commercial 30 per cent acid to five parts of water, has been found effective in cleaning the stains, due to weather, and other causes, from the concrete surfaces of the lock walls. A test was recently conducted on the center wall lamp standards of the middle lock at Gatun. The surface of the concrete was brushed over with the solution, and afterward was rinsed with clear water. The application and subsequent rinsing freed the concrete of all discoloration. The process has proved satisfactory, but will be kept under observation before further work is done.

SOCIAL LIFE OF THE ZONE.

Culebra Christian League Disbands.

The Culebra Christian League formally disbanded at a public meeting held in the Commission chapel at Culebra, on Tuesday evening, July 15. The occasion was also in the nature of a farewell reception to the retiring chaplain of the league, the Reverend A. A. Nellis, who, with his family, sailed on the *Cristobal*, on Monday, July 21, for the United States. The reception was preceded by a program in which the following took part: Messrs. Ramsey, Arbuckle, and C. C. Pear-sall; Mr. and Mrs. George R. D. Kramer, and Mr. Silver of Culebra. The history of the league was read by its president, Mr. J. F. Warner. Following the farewell address of the chaplain, a copy of a resolution of thanks voted by the league, and prepared by Mr. William Dubois in suitable form for framing, was presented him by Mr. F. W. Leydecker, and, in addition, a substantial testimonial of good will was made on behalf of the league by its treasurer, Mr. A. W. Bechlem. During the social session which followed, refreshments were served. About 125 were present.

The organization of the league was one of the first efforts in undenominational church work to be undertaken by Canal employees. The first steps were taken in 1906, and, in February, 1908, an organization was effected. Prior to this time, religious services in Culebra village had been confined to the occasional visit of a minister, and Sunday school work. The preaching services were variously held in the building used for school purposes; in a room in the old postoffice, and in the hotel building. While no records have been kept, it is believed that a Sunday school was organized toward the end of 1905. In the beginning of the following year, the work seems to have suffered somewhat from changes in the Canal personnel, and from other causes, but in September, 1906, the Sunday school movement was revived, and by Christmas, there was an enrollment of 50 pupils, with an excellent average attendance. Preaching services were held regularly, and a young people's society, similar to the Young People's Society of Christian Endeavor and the Epworth League, was formed. An organ, suited to the tropics, was purchased in 1906, and singers and organists volunteered their services, thereby creating additional interest in the meetings.

About this time it became obvious that an organization to meet the religious needs of the American population was necessary. There were not enough members of any one denomination to warrant the division of church life into the usual sects, but it seemed that there must be some provision whereby the young people might develop along the lines of moral and spiritual growth. In the effort to evolve a plan for carrying out these objects, the meetings were often converted into discussion clubs. The feature most strongly emphasized was that any local religious work, to be successful, must be undenominational. A formal statement, as a basis for a union, was drawn up and read at a meeting held in October, 1907, at the home of Mr. W. J. McLaughlin. The plan was agreed to, and 16 persons signed the document. This was the real beginning of the Culebra Christian League. Another meeting was held on February 13, 1908, at which the action of the previous meeting was ratified, and a com-

mittee was appointed to submit a report on a constitution and by-laws.

The Canal Commission agreed to cooperate with the efforts of the league to the extent of appointing a chaplain to be attached to the hospital service. This concession on the part of the Canal Commission relieved the league of the responsibility of fixing a suitable salary for its pastor, although in May, 1908, a ruling was adopted that the league pay the sum of \$25 monthly for the chaplain's services, in addition to his salary as hospital chaplain. The first to be called was the Reverend J. W. Holland of Aurora, Ill. He arrived on the Isthmus on October 28, 1908, and served until August, 1909. Under his leadership, the league prospered, and the young people's society became an important feature of the work. The Reverend Mr. Nellis was the next chaplain, arriving on the Isthmus in February, 1910. The result of his labors is indicated by the expressions of esteem accorded him by his fellow workers at the farewell meeting.

Past presidents of the league have been, Mr. J. M. Weaver, Mr. F. C. Freeman, and Mr. E. E. Lee. The average attendance for the past four years has been, as follows: 1910, 36; 1911, 26; 1912, 34; and to date in 1913, 28. The following list, taken from the early records, indicates members of various denominations that have united in the work of the league: Methodist Protestant, 1; Methodist Episcopal, South, 1; Free Baptist, 1; Reformed, 1; Episcopalian, 7; Unitarian, 2; Methodist Episcopal, 14; Baptist, 11; Universalist, 1; Congregational, 4; Presbyterian, 18; Christian, 2; Evangelical, 4; Dutch Reformed, 1; Moravian, 1.

The later addition of a member of the Society of Friends practically completes the universality of support given the organization by members of Protestant churches. Some of the members brought letters from their home churches; others joined on statement of church connection. The league issued an attractive card to each member, many of which were sent to members in the United States to be used as transfer cards, or for verification of church connection during residence in the Canal Zone. Transfer cards were also issued to Sunday school pupils who were transferred to some other point on the Isthmus, or who returned to the United States.

The Culebra Sunday school will continue to meet as usual in the chapel. There will be no break in the Sunday evening meetings, the charge of such services having been undertaken by the Young Men's Christian Association.

Evangelist Speaks.

The Reverend Alfred B. DeRoss, the evangelist whose field of work has been Central America, spoke before the young people's meeting at the Union Church, in Cristobal, on Sunday evening, July 13. On the same evening, the pastor of the church preached at the 7.45 service, on "The hero of the dark continent."

Lodge Notes.

Isthmian Canal Rebekah Lodge, No. 1, will hold its regular meeting in the Commission lodge hall at Empire, on Saturday evening, July 26, at 8.30 o'clock. The following newly elected officers will be installed by District Deputy B. F. Sisson of Gatun: Noble grand, Mrs. Clara Rhodes; vice-grand, Mrs. Ida

Johnson; recording secretary, Mrs. S. B. Bewley; financial secretary, Mrs. Mollie Perry; treasurer, Mrs. Mamie Vickery; trustee, Mrs. Annie Calvit. At the close of the meeting an informal reception will be held, during which refreshments will be served. All members are requested to be present, and all Rebekahs in good standing are invited.

The Pythian Sisters, with headquarters at Las Cascadas, will hold an installation of officers on Thursday, August 7. The lodge meetings are held in the Commission lodge hall on the first and third Thursdays of each month. A dinner is given once a month at the home of one of the members. In point of membership and interest, the standing of the auxiliary is as prosperous as it has been since its organization.

Officers of Pacific Lodge, No. 4, I. O. O. F., were installed at Ancon Hall on Thursday evening, July 17, as follows: Noble grand, A. F. Holzapfel; vice-grand, K. P. Curtis; treasurer, A. S. Curtis; secretary, Emil J. Rall; warden, O. E. Granberry; conductor, E. E. Price; chaplain, Wm. H. Stone; right supporter to noble grand, Jas. C. Young; left supporter to noble grand, Geo. C. Olsen; right supporter to the vice-grand, J. L. Webster; left supporter to the vice-grand, C. C. J. Wirz; inside guardian, B. H. Post.

On Tuesday evening, July 8, the following officers were installed by Ancon Lodge, No. 8, Knights of Pythias: Chancellor commander, W. H. Clapp; vice-chancellor, E. C. Bunker; prelate, A. F. Holzapfel; master of work, D. R. Wolverton; keeper of records and seals, and master of finance, S. C. Russell; master of exchequer, E. B. McCormick; master at arms, O. M. Ewing; inner guard, R. H. Hull; outer guard, C. P. Hoffman.

Canal Zone Postal Savings Bank Transactions.

A statement of the postal savings bank transactions at Canal Zone postoffices for the month of June, follows:

NAME OF OFFICE.	Postal savings certificates issued.	Postal savings certificates paid.
Ancon.....	\$13,832.00	\$8,269.00
Balboa.....	11,787.00	16,200.00
Bas Obispo.....	1,480.00	1,319.00
Corozal.....	25,408.00	17,120.00
Cristobal.....	13,009.00	9,540.00
Culebra.....	8,469.00	10,829.00
Empire.....	11,728.00	8,810.00
Gatun.....	12,370.00	17,421.00
Gorgona.....	12,491.00	19,601.00
Las Cascadas.....	9,706.00	9,159.00
Matachin.....	1,264.00	406.00
Miraflores.....	5,782.00	5,473.00
Paraiso.....	10,488.00	9,040.00
Pedro Miguel.....	11,475.00	15,363.00
Cristobal, Sta. "A".....	1,145.00	490.00
Cristobal, Sta. "B".....	1,026.00	2,200.00
Total.....	\$151,460.00	\$151,240.00
Deposits on hand on June 1, 1913....	\$645,470.00	
Amount deposited in June.....	151,460.00	
Amount withdrawn in June.....		\$151,240.00
Balance on hand July 1, 1913.....		645,690.00
	\$796,930.00	\$796,930.00

Tile Manufacture.

The output of tiles manufactured by the American Cement Tile Manufacturing Company at its plant at Paraiso, up to June 25 was, as follows: Gutter tile, 145.77 squares; standard tile, 52-inch, 3,058.72 squares; special tile, 166.90 squares; skylight tile, 2,847 pieces; ridge tile, 3,590 feet.

CANAL ZONE SCHOOLS.

Records of Attendance and Changes, and Comparative Figures.

The Canal Zone public schools closed on June 30, to reopen on October 1. During the year, 29 graded schools were maintained, 14 schools for white children, and 15 schools for colored children. There was a steady increase in the number of children enrolled each month. The highest enrollment was in June, 1913, when the total for all schools was 2,949, divided, as follows: Schools for white children, 1,369; schools for colored children, 1,580. The highest daily attendance in the combined schools was in March, 1913, when, out of an enrollment of 1,334 in the schools for white children, the average daily attendance was 1,034.4; and out of an enrollment of 1,470 in the schools for colored children, there was an average daily attendance of 819.3. The largest graded school for white children was at Ancon, with an enrollment for the year of 246; the second was at Cristobal, with 224 enrolled. Of the schools for negro children, the largest was at Cristobal, where there were 340 enrolled; and the second at Ancon, with 239. There were 93 pupils in the high school, the largest number ever enrolled. In all schools the highest enrollment was in the first grades, 315 in the schools for white children, and 577 in the schools for colored children. At the close of the school year, there were 47 teachers employed in the schools for white children and 32 in the schools for colored children. In addition, there were two supervisors for all the schools; one primary substitute, and one upper grade substitute for the schools for white children, one teacher employed as gardener for the schools for colored children and two supervisors of children who were employed during the noon recess.

The consolidation of several of the elementary schools made it possible to operate a few well-graded central schools, to which children living in contiguous territory, were transported by brake. A supervisor of children was in attendance at the school building during the noon hour, so that the pupils who could not go home for lunch, were never without adult care. Children residing at longer distances were allowed train transportation to the nearest school.

At the opening of the school year, the consolidated high school was transferred from Gatun to Ancon, and branch high schools for first and second year courses were established at Gatun and Empire. New schools were opened, as follows: Lower grade school at Toro Point on October 14, 1912; one for first, second, and third grades at Corozal on October 28, 1912, and one for third and fourth grades at Las Cascadas on May 13, 1913. Two new rooms were opened in the school for colored children at Cristobal, one on December 9, and the other on December 15, 1912, making it a 6-room school; one additional room was opened in the Empire school on December 9, 1912, making it a 4-room school; and one room was opened in the Gatun school on April 1, 1913, making it a 3-room school. Twenty-nine buildings have been in use for school purposes during the year, including the rooms in buildings other than those constructed especially for school use. The latter were, as follows: One room each in the Commission hotel and church building at Las Cascadas; one room in the recreation hall at Toro Point; one in nonhousekeeping quarters at Porto Bello, and one in a church

building at Majagual. At the end of the school year, the schools for white children at Gorgona and Toro Point, and the schools for colored children at Gorgona and Matachin were closed permanently.

Medical inspection of schoolchildren, which was established in 1908-09, was continued. Of the 1,044 children examined for nose, ear, throat, and teeth conditions, a percentage of 40.8 was found defective.

The school garden at Empire, operated in connection with the school for colored children at that point, gave successful results. It comprises two and one-half acres of ground, of which one-half of an acre was devoted to truck gardening, and the remainder to the growing of bananas, papayas, cocoa, and other native products. The total value of the products raised was \$348.35, beans being the largest single item. The school garden at Culebra was abandoned on November 23, 1912.

Holidays and vacations were observed, as follows: Independence Day of Panama, November 3; Thanksgiving Day, and the Friday following, November 28 and 29; Christmas holidays, December 21 to January 1, inclusive; Washington's Birthday, February 22; Easter holidays, March 15 to 23, inclusive; Decoration Day, May 30.

The growth of the schools since 1906 is shown in the following table:

Number of Pupils.

October.	White	Colored	Total
1906.....	176	1,565	1,741
1907.....	721	2,146	2,867
1908.....	745	1,067	1,812
1909.....	931	906	1,837
1910.....	1,076	903	1,979
1911.....	1,157	1,042	2,199

Number of Teachers.

October.	White	Colored	Total
1906.....	121
1907.....	130
1908.....	23	20	43
1909.....	37	21	58
1910.....	40	25	65
1911.....	45	27	72
1912.....	48	28	76

Number of Buildings.

October.	White	Colored	Total
1906.....	18
1907.....	30
1908.....	11	14	25
1909.....	11	16	27
1910.....	9	15	24
1911.....	11	15	26
1912.....	13	15	28

Figures for years prior to 1911 show gross enrollment of pupils; figures for 1911 and 1912 show net enrollment of pupils:

*Approximate.
*The number authorized October 31, 1910; 37 and 24, respectively, employed in that month.

*The number authorized October 31, 1911; 43 and 24, respectively, employed in that month.

*Includes 4-room colored school building under construction at Ancon, November 6, 1911.

The establishment of a Canal Zone public school system was authorized by the Isthmian Canal Commission in 1904, but, owing to press of other work, no action was taken in organizing the school until December, 1905, when a census of children of school age was taken. The first school was opened at Corozal on January 2, 1906. At the close of the first term, which ended September 30, 1906, there were 30 schools, with an enrollment of 1,796, including both white and colored children. Prior to this time, the schools were administered by the Division of Revenues; from May to No-

vember, 1906, they were under the Bureau of Municipalities, and after that time, the Division of Schools was organized and placed under the Department of Civil Administration. During the first year of this administration, the school year was divided into four terms of equal length, but during the following year, the term was made continuous by resolution of the Canal Commission, the school year covering the period from October 1 to June 30, with holidays and vacations as shown above.

Fatal Accidents.

Maria Conong, a Panamanian woman, living at Peña Prieta, near Panama city, was struck by I. C. C. engine No. 227, about 100 yards north of the East Balboa commissary, on Monday, July 21, at about 5.15 p. m., receiving injuries from which she died at Ancon Hospital half an hour later.

Edwin Carrington, a Barbadian, employed as a carpenter in the Quartermaster's Department, received fatal injuries on Saturday, July 19, by a section of a house, under re-erection in Bishop's Hollow, Ancon, falling on him. He died at Ancon Hospital on Tuesday, July 22.

Fred Linday, a Barbadian, check No. 177-792, fell between the cars of a labor train at Balboa, on Tuesday, July 22, at about 6.15 a. m., and was instantly killed.

John E. Priel, alias John Pryan, a St. Vincentian carpenter, employed at Balboa, died at Ancon Hospital on July 8, from injuries received while wrestling at the Panama bathing beach on July 4.

William Lennon, a Jamaican laborer employed in the First Division, at Paraiso, died at Ancon hospital on July 15, as the result of injuries sustained by being crushed between a locomotive crane and a staircase at the west wall of Miraflores Locks on June 21.

Simeon Reid, Jamaican, check No. 141730, employed in the First Division at Gatun, became caught between the bed and carriage of crane No. 81, on July 1, and received injuries from which he died.

Estimated Cost of Materials Ordered on United States Requisitions.

The estimated cost of material and supplies ordered on United States requisitions during the fiscal year ending June 30, 1913, by departments and divisions is, as follows:

Atlantic Division.....	\$124,802.91
Pacific Division.....	165,294.05
Mechanical Division.....	723,795.38
Quartermaster's Department.....	2,358,856.25
Chief Engineer.....	10,714.17
W. G. Comber—Sixth Division.....	308,605.92
H. O. Cole—Fifth Division.....	56,279.75
H. D. Hinman—Second Division.....	129,340.45
Chief Engineer—First Division.....	2,171,580.58
Terminals.....	1,194,625.00
Panama railroad.....	559,517.56
Superintendent of erection.....	29,807.18
Fortifications.....	154,646.45
Lighthouses.....	5,305.45
Secretary of Commission.....	853.00
Examiner of Accounts.....	2,115.00
Disbursing Officer.....	10.25
Central Division.....	903.75
	\$7,997,053.10
Quartermaster's Department, annual contracts.....	1,715,681.51
Total construction and engineering.....	\$9,712,734.61
Sanitary Department.....	\$59,139.61
Civil Administration.....	1,674.30
Canal Zone Government.....	5,230.94
Department of Law.....	1,506.00
Police Department.....	1,158.35
Department of Schools.....	528.37
	69,237.57
	\$9,712,734.61
Grand total.....	\$9,781,972.18

CANAL WORK IN JUNE.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., July 14, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of June, 1913:

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	388	808,009	100,991	229,894		1,139,282
Work excavation, wet.	Cubic yds...	814,592	*57,274	†31,179		604,080	1,507,125
Total work excavation	Cubic yds...	814,980	865,283	132,170	229,894	604,080	2,646,407
Plant excavation, dry.	Cubic yds...		13,017				13,017
Total Canal excavation	Cubic yds...	814,980	878,300	132,170	229,894	604,080	2,659,424
Material placed in dams	Cubic yds...	99,457			11,800		111,257
Concrete placed, locks, dams and spillways.	Cubic yds...	6,074			26,568		32,642
Explosives used.....	Tons (Gross)	12.89	54.98	11.30	24.61	15.10	118.88
Rock drilled.....	Feet	11,650	177,420	29,750	71,235	10,645	300,700
Tracks removed.....	Miles	0.18	3.66	1.00			4.84
New tracks laid.....	Miles	0.94	12.77	4.05	1.04		18.80
Rock crushed.....	Cubic yds.				51,446		54,446
Cement used.....	Barrels	14,371	403	2,850	25,778	45	43,447
New roads built.....	Miles	.08			.28		.36
Water mains laid.....	Feet	1,200			8,767		9,967
Sewers laid.....	Feet	120	250		1,828		2,198
Open drains and ditches dug.....	Feet.....	5,403		3,250	132		8,785
Average daily force.....		3,395	7,082	1,866	5,375	2,260	19,978
Average rainfall.....	Inches.....	11.26	9.14	7.15	9.00	7.15	9.35

*Removed by Fifth Division for Central Division.

†Removed by Sixth Division for the Second Division.

First Division, Office of the Chief Engineer.

MASONRY AND LOCK STRUCTURES.

The material under contract for work designed in this subdivision is being inspected by the force of the General Purchasing Officer in the United States, and the erection work on the Isthmus is being conducted by the construction divisions and the erection subdivision of this office, the inspection of this work being cared for by the masonry and lock structures subdivision. This subdivision was also charged with the general inspection of the masonry work of all locks. Work was continued on the preparation of rising stem gate valve machinery chambers, and inspection reports show that practically all of this work at the different lock sites is completed. On June 30, the subdivision was abolished.

LOCK GATES AND PROTECTIVE DEVICES.

The status of the work in the several locks may be summarized, as follows:

Gatun—Work in progress on all the leaves, 40 in number: Erection, 98.3 per cent completed; reaming, 99.8 per cent completed; riveting, 97.8 per cent completed; finishing, 67 per cent completed.

Pedro Miguel—Work was in progress on the entire 24 leaves: Erection, 98.1 per cent completed; reaming, 99 per cent completed; riveting, 95 per cent completed; finishing, 62 per cent completed.

Miraflores—Work was in progress on all of the 28 leaves: Erection, 93.6 per cent completed; reaming, 93 per cent completed;

riveting, 77.5 per cent completed; finishing, 38 per cent completed.

ERECTION.

The lower guard gates at Gatun were finally completed and painted June 14, 1913, with the exception of the bitumastic enamel in the air chamber which is now being applied. Water was pumped into the tail bay, and the gates are now under the full hydrostatic pressure they were intended to withstand. They are remarkably watertight, no leaks being evident. The upper guard gates and lower guard gates at Pedro Miguel, and the upper guard gates at Miraflores were also completed during the month.

per cent of single, and 33 per cent of double crossovers have been placed.

Spillway gate machines—All machines are on the Isthmus. At Gatun, 54 per cent of the mechanical, and 1.8 per cent of the electrical work is done on the spillway erection. Concrete work at Miraflores will not yet permit of machinery installation.

Pumps—Pumps and motors, with float switches and starters, have been received complete, except chain fender operating pumps and motors. Installation, both electrical and mechanical, is approximately 21.08 per cent complete.

Transformer room equipment—Transformers for lighting and power have been received complete, with approximately 32 per cent of all switchboards and buses for transformer room equipment installed. Work is practically complete on 35 per cent of all rooms, and has been started on another 30 per cent. All other material used in this construction, such as bells, tape, varnish, solder, etc., is on the Isthmus.

Hydroelectric station—All structural steel, turbines, penstocks, generators, exciters, head gates, gate operating machinery, and traveling cranes are on the Isthmus. All foundations have been built, and the three turbines and their penstocks set complete. The head gates have been set. The switchboard and transformer equipment have been contracted for, but not received.

Cable—Of the 2,372,110 feet of cable ordered, about 93 per cent has been delivered, and 462,729 feet pulled into the ducts.

Control houses—All steel beams for the floors have been received, and 15 per cent placed in the concrete. No other structural steel has been received.

Illumination—Reflectors for interior and exterior illumination are being manufactured on the Isthmus, and satisfactory progress is being made. Concrete lamp posts are being made by the Atlantic and Fifth Divisions, according to plans from this office. At Gatun, 120, out of 211, are erected.

Control apparatus—Practically all control apparatus for the locks and spillways is on the Isthmus, except the main control switchboard with interlocking system and indicators, none of which has been shipped from the factory.

Transmission line—Deliveries of transmission line material have not begun, except for copper conductor, which is 29 per cent complete. Work on surveys is practically complete, and work has been started on the installation of foundations for track-span bridges to carry transmission line towers.

EMERGENCY DAMS.

Inspection was in progress in four localities in the United States, and 852 tons of material were accepted during the month. This completes the inspection of all material necessary for the six dams, except for a few replacements. Practically all material has been shipped. Work was in progress on all the dams. About 70 per cent of all material required for the six dams is on the Isthmus, and approximately 62 per cent has been erected.

On May 20, the contractor began the final tests of the east dam at Gatun, the total time for closing the dam in the first test being one hour one minute and 30 seconds. After three complete operations of the dam had been made, the contractor began the second part of

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Valve machines—All rising stem valve, cylindrical valve, and auxiliary culvert valve machines have been received complete, and to date the status of mechanical erection complete is: 91.75 per cent for rising stem valve machines, and 100 per cent for cylindrical valve, and auxiliary culvert valve machines, respectively. The delivery of electrical material for the above machines is complete, and the electrical installation 39.2 per cent complete for the rising stem valves, 41.62 per cent complete for the cylindrical valves, and 46.6 per cent complete for the auxiliary culvert valves. Delivery for 18 guard valve machines is 33.3 per cent complete, and erection 31.6 per cent complete. Electrical work has not been begun, although the material is on hand.

Miter gate moving machines—The complete shipment of miter gate moving machines has been received, and 85.52 per cent of mechanical erection is completed. Electrical installation of these machines is 24.2 per cent complete.

Miter gate forcing machines—Deliveries are 100 per cent complete. Mechanical erection is 9.36 per cent complete. Electrical erection is in about the same stage as that of the miter gate moving machines.

Tracks—Delivery of all track material is complete. Forty-six per cent has been completed with concrete and conductor slot, and 4.7 per cent more distributed and bolted up ready for concreting and finishing. All crossover material has been received; to date, 25

the tests, consisting of operating the turning and wedging machinery for twenty days, at intervals, depending upon the heating of the motors. After completing the second part of the tests, three additional complete operations were made in accordance with the contract. The last of these tests was made in 42 minutes and 17 seconds, which is 19 minutes and 13 seconds less than the time required for the first test. The time consumed in the actual operation of the various parts of the dam varied but little for the different tests, the variation in no instance being more than five seconds. The only exception to this was the turning of the dam into position across the lock chamber, the minimum recorded time for which is one minute and 29 seconds, and the maximum time two minutes and 22 seconds. The time recorded for the actual operation of the various parts of the dam in the last test was, as follows:

PARTS	Time.	
	Mins.	Secs.
Drawing wedges		19
Turning dam	1	44
Drawing wedges		20
Lowering gates No. 1	4	40
Turning dam into position for gate No. 2	3	2
Lowering gates No. 2	3	35
Turning dam into position for gate No. 3	3	49
Lowering gates No. 3	3	3
Turning dam into position for gate No. 4		40
Lowering gates No. 4	2	32
Turning dam into position for gate No. 5		49
Lowering gates No. 5	2	2
Total	24	23

As stated above, the time required to bring the dam into position was 42 minutes and 17 seconds; thus it will be seen that the time lost in the various operations was 17 minutes and 54 seconds. The minimum time in which the dam was brought back to its original position was one hour 27 minutes and 59 seconds.

AIDS TO NAVIGATION.

During the month, work was in progress erecting range tower No. 27, Gatun Lake section; setting range lenses in towers Nos. 12 and 13, Pacific end; constructing submarine foundations for the Santa Cruz beacon; clearing land for the Central and Sixth Divisions; and making the necessary surveys and reconnaissances in Gatun Lake in connection with the construction of range towers, reference targets, and beacons.

Second Division—Office of the Chief Engineer.

SHOPS.

Studies and plans for the various buildings, machine foundations, motorizing of machines, and illumination system, were advanced during the month. The system of distributing electrical power in the planing mill, and the design for the distribution in the foundry, and in the machine and erecting shops, were completed. The interior illumination system in the planing mill was completed, and the design for that system in the foundry and pattern storage was also completed. Orders were given for the material for walks in roof trusses, and for supports for all piping in the permanent shop buildings; for the supports for four jib cranes to be erected in the foundry, and for manhole covers in the tunnel. Specifications were prepared, and requisition submitted, for one 96-inch by 132-inch by 24-foot open-sided extension planer; one double-head engine lathe; one 500-ton forging press; six 5-ton pillar cranes for forge shop, and 48 slate stalls

for fittings, for urinals, closets, and showers. The following awards were made: Twenty-six slip-ring motors, 56 squirrel-cage motors, 23 D. C. motors, 43 autostarters, and three oil switches to the General Electric Company; five squirrel-cage motors to the Westinghouse Electric and Manufacturing Company; one annealing furnace, one mold oven, and four core ovens to the Tate-Jones Company. Excavation for shop foundations amounted to 1,005 cubic yards, and for the shop tunnel, 75 cubic yards. A total of 489 cubic yards of concrete was placed in shop foundations, and 765 cubic yards in the tunnel. Filling on the site of the shops and yards amounted to 73,538 cubic yards. A total of 492 linear feet of tunnel was constructed. All structural steel for the machine and erecting shop, steel storage building, and paint shop and oxy-acetylene building was delivered on the Isthmus. During the month, 2.7 per cent of the structural steel for machine and erecting shop, 18 per cent for the planing mill, 72 per cent for the pattern storage building, and 70 per cent for the foundry, was completed. The erection of the structural steel for the planing mill, and for the pattern storage building, was completed. During the month, 77.9 squares of gutter tile, 693.4 squares of standard tile, 37.4 squares of special tile, 1,142 pieces of skylight tile, and 790 feet of ridge tile, were manufactured. On the planing mill, 75 per cent of the several kinds of tile, and 5.7 per cent of skylight glass were erected.

DRY DOCKS.

Plans were prepared for the granite required for miter gate of dry dock No. 1, and for caisson seats of dry docks Nos. 1 and 2. Studies for pumping plant and supports for caisson seats of dry dock No. 1 were continued. Plans and specifications were prepared for valves to control flooding dry docks Nos. 1 and 2, and the drainage of dry dock No. 2. Work on the design of the floating caisson for dry dock No. 2 was started. Excavation for dry dock No. 1 amounted to 73,458 cubic yards.

COALING PLANT.

Proposals for coal handling machinery and accessories have been received and are under consideration.

WHARVES AND PIERS.

Work was continued on plans for the two sections of the quay wall, and drawings were made for a landing bridge for small boats. Excavation for the quay wall amounted to 2,552 cubic yards; 27 caissons were sunk to rock, with a total penetration of 1,068 linear feet; excavation for pier No. 1 amounted to 2,051 cubic yards, 12 caissons were set into rock, having a total penetration of 1,026 linear feet.

Fifth Division—Office of the Chief Engineer

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation.—The total excavation amounted to 229,894 cubic yards, of which 162,810 cubic yards were classified as rock, and 67,084 cubic yards as earth.

Filling and embankment.—Dry filling in the prism of the west dam at Pedro Miguel was increased by 3,580 cubic yards, the total amount of material used for this purpose being 696,558 cubic yards. The backfill at Pedro Miguel was increased by 13,535 cubic yards, the total quantity in place at the close of the

month being 1,013,323 cubic yards. At Miraflores, the dry filling in the toes of the west dam was increased by 11,800 cubic yards, making the total quantities of dry and hydraulic filling in place at the close of the month 1,659,999 cubic yards, and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 109,622 cubic yards, the total quantity in place on June 30 being 1,672,227 cubic yards.

Pedro Miguel Lock.—The work of backfilling the lock and filling the north and south guide walls was practically completed. Rock was supplied from Ancon quarry for riprapping along the north face of the west dam and junction with the wing wall, also for the south wing walls. The concrete work of the control house was completed to the elevation of the first floor, and the steel floor beams and girders were set. Other concrete work consisted in the installation of lamp post bases and miscellaneous finishing and trimming. The total amount of concrete laid was 257 cubic yards.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours)	8.00
Average number of hours per day worked laying concrete, actual working time	1.49
Average number of mixers per day	.20
Average hourly output per mixer, actual working time (cubic yards)	6.04
Concrete laid (cubic yards)	257.00

Of the above, 73 cubic yards were mixed by hand.

Miraflores Locks.—Concrete work in the locks consisted of the installation of bracket supports in the north wing walls, reinforced concrete floor and stairway at the junction of the upper and lower middle walls, west emergency dam quadrant, and other miscellaneous work.

The concrete work for the spillway was continued, the concrete being transported on transfer cars from the berm cranes to derricks, and also supplied by three small mixers at the site.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours)	8.00	8.00
Average number of hours per day worked laying concrete, actual working time	1.52	7.00
Average number of mixers per day	2.00	3.08
Average hourly output per mixer, actual working time (cubic yards)	36.94	24.45
Average number of concrete laid per hour per berm or chamber crane, actual working time (cubic yards)	21.76	
Total concrete laid (cubic yards)	827.00	29,823.00

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.	
Length of working day (hours)	30.12.00
Average number of hours per day, actual working time	7.85
Average number of cubic yards crushed per hour of working time	238.80
Average number of cubic yards crushed per working day	315.00
Total output for the month (cubic yards)	54,416.03
Plant lay from 1st to 5th. Crushers shut down for repairs from 6th to 9th.	

DISTRICT NO. 5—GOLD HILL SLUICING PLANT.

The installation of the pumping station, discharge mains, flumes, oil supply tanks, pipelines, etc., was completed and operation started on June 17. After a few days' preliminary work getting the monitors into position, washing out flumes, etc., the sluicing work was started and operated seven days,

excavating 57,000 cubic yards at a total cost of approximately eight cents per cubic yard.

Sixth Division—Office of the Chief Engineer.

PACIFIC END.

Seven dredges were engaged in channel and inner harbor excavation at Balboa, removing 424,619 cubic yards of earth, and 179,461 cubic yards of rock from the Canal prism, and 31,179 cubic yards of earth from the inner harbor and turning basin, a total of 635,259 cubic yards. At the close of the month, there remained to be removed from the Canal prism 3,286,144 cubic yards. The French ladder dredge *Gopher*, engaged in sand excavation at Punta Chamé during the entire month, removed 32,700 cubic yards.

ATLANTIC END.

Nine dredges were in operation during the month, removing 722,785 cubic yards of earth and 91,807 cubic yards of rock from the Canal prism. On June 30, there remained to be excavated 1,936,791 cubic yards. The drill barge *Terrier* completed mining on the site for the bridge across the French canal. On June 30, dredge No. 1 was moved to the bridge site, prepared to do the necessary excavating. At the close of the month, 40 feet of water could be carried from zero to zero plus 2,100 feet, 35 feet to mile post 6 plus 2,300 feet, 30 feet to mile post 6 plus 2,320 feet, 20 feet to mile post 6 plus 2,350 feet, and 10 feet to mile post 6 plus 2,800 feet.

Atlantic Division.

GATUN LOCKS.

Excavation.—Out of a total of 31,115 cubic yards of rock and earth excavated during the month, 27,749 cubic yards were borrow pit excavation, 228 cubic yards were dug by hand in the locks, 1,246 cubic yards were removed by scraper and crane in grading the backfill, 280 cubic yards were excavated by crane in bringing the backfill to grade, and 1,612 cubic yards were taken out by steamshovel for transformer substation.

Backfill.—During the month, there were 31,225 cubic yards of backfilling placed. On June 30, the backfill was 95.45 per cent completed.

Receiving and issuing material.—The issues of rock amounted to 9,683 cubic yards. There were 3,450 cubic yards of sand issued. Cement receipts totaled 6,474 barrels, and the issues amounted to 10,870½ barrels.

Concrete work.—A total of 5,064 cubic yards of concrete was laid, distributed, as follows: Upper locks, 200 cubic yards; middle locks, four cubic yards; lower locks and north approach walls, 4,860 cubic yards.

On June 30, the locks concrete work was 99.9 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.	
Length of working day (hours).....	8.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	.85
Average number of mixers per day.....	2.00
Average hourly output per mixer, actual working time (cu. yds.).....	51.86
Average amount of concrete laid per hour, per strand of cableway, actual working time (cubic yards).....	31.40
Concrete laid (cu. yds.) cableways.....	5,300
Concrete laid (cu. yds.) portable mixers.....	330
Concrete laid (cu. yds.) hand mixed.....	229
Total amount of concrete laid (cu. yds.)....	5,878.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement 109,266 cubic yards, making the total amount

in place 21,786, 820 cubic yards. On July 1, the dam was 99 per cent completed.

Dry fill.—Additions to the dry fill amounted to 99,457 cubic yards, which was placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 11,578,268 cubic yards.

GATUN SPILLWAY.

Concrete.—Concrete laid during the month amounted to 565 cubic yards, making the total in place 224,134 cubic yards. Concrete work for the spillway was 97.9 per cent completed.

Hydroelectric plant.—In preparing foundations, 160 cubic yards of rock were removed by hand and crane, making a total excavation of 98,750 cubic yards. During the month, 1,456 cubic yards of concrete were placed, making a total of 5,068 cubic yards.

WEST BREAKWATER—COLON.

Out of a total of 19,681 cubic yards of Porto Bello rock placed on the breakwater, 8,663 cubic yards were unloaded by cranes, and 11,018 cubic yards by derrick barges. The total amount placed upon the breakwater to July 1 was 248,895 cubic yards.

MUNICIPAL ENGINEERING.

The floors and walls of the six filters of the new Colon waterworks were completed, as were also the foundation and floors of the mixing chambers, and all foundations and footings in the aeration basin.

Central Division.

The total amount of material excavated during the month was 821,026 cubic yards, of which 258,740 yards were classified as earth, and 562,286 cubic yards as rock. The entire amount was removed by steamshovels, 805,109 cubic yards being classified as primary excavation, 2,900 cubic yards as from ditch for draining Old Culebra dump, and 13,017 cubic yards as plant excavation. Of the total primary excavation, 143,958 cubic yards were taken from within the lines of the Canal prism, and 661,151 cubic yards from without the Canal prism, the latter amount being excavated from slides and from high levels as a preventive measure against slides.

The daily average number of steamshovels at work was 38.28, and the number of shovel days was 957, as compared with 40.54 shovels at work, and 1,054 shovel days in May. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work	W kg days.	Av. yds. per shovel day.
		Rock.	Earth.			
1912:						
June	Cu. Yds.	Cu. Yds.	Cu. Yds.	C. P.		
1913:						
June	821,026	258,740	562,286	38.28	25	858.00

Rainfall at Empire: 1912, 8.60 ins.; 1913, 11.48 ins.

The estimated amount of dry material removed and to be removed, according to the revision of February 1, 1913, is 111,751,472 cubic yards. Up to July 1, 1913, 107,139,181 cubic yards had been removed, leaving 4,612,291 cubic yards to be removed, in order to complete all dry excavation in this division. At the close of the month, 95.87 per cent of all dry excavation was completed. On June

30, the status of the work in the two sections which compose this division was, as follows:

CULEBRA CUT.		Cubic Yards
Dry excavation accomplished.....		94,751,526
Dry excavation to be accomplished.....		4,612,291
CHAGRÉS SECTION.		
Dry excavation completed.....		12,384,655
Wet excavation to be accomplished.....		300,000

Deliveries of 9,097 cubic yards of spoil were made to Quebrancha siding, to be used for reinforcing the Quebrancha and Brazos embankments of the relocated line of the Panama railroad.

Material dumped from Naos Island trestle during the month totaled 30,538 cubic yards.

The daily average number of laborers at work was 6,483, while the average number of gold men working was 599.

Quartermaster's Department.

LABOR.

The force report of June 25 showed 38,301 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 3,961 men. The unskilled labor supply was adequate.

BUILDINGS.

The removal of buildings at Gorgona has progressed rapidly. Nine buildings removed from this settlement were reerected during the month, two at Balboa, and seven at Corozal. At Pedro Miguel, five buildings were removed to new sites. The motor car house at Culebra was converted into a dispensary. One cottage at Cristobal was moved to a new location. Twelve buildings were demolished.

QUARTERS.

At the close of the month, there were 21 applications on the No. 1 list for married quarters, and 751 names on the No. 2 list. Only 50 families remained in quarters at Gorgona, and it is expected that 35 of these will be transferred to other districts during the present month. Bachelor quarters at Balboa were congested.

MATERIAL AND SUPPLIES.

The value of material received was \$1,173,391.38. This material came forward in 38 steamers, the total weight of cargo, exclusive of lumber, piling, and ties, being 20,000 tons.

Subsistence Department.

The Hotel Tivoli was operated at a net loss of \$820.22. The operation of the line hotels, European laborers' messes, colored laborers' kitchens, restaurants, tugs, and dredges resulted in a net loss of \$33.58. The total net loss on subsistence operations during the month was \$853.80.

Department of Civil Administration.

COURTS.

Courts.—During the month, one civil case was disposed of in the Supreme Court, 70 civil and 60 criminal cases in the Circuit Courts, and 61 civil and 584 criminal cases in the District Courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$408,885.06 and the fees to \$1,912.33. Receipts from stamp and card sales and newspaper postage aggregated \$8,609.87. The total collection of revenues was \$25,934.45, and the collections on account of court fines, costs, and fees, \$2,888.30. A total of \$151,460 was deposited in postal savings accounts, and a total

of \$151,240 was withdrawn. At the port of Ancon, 21 vessels entered and 22 cleared; at the port of Cristobal, 16 entered and a like number cleared.

POLICE AND PRISONS.

The total number of persons arrested was 584, of whom 510 were men and 74 women. Sixteen convicts were committed to the penitentiary, and 11 were discharged, leaving 133 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,310.48, and the value of the work performed by them on the roads of the Canal Zone was \$2,221.60.

FIRE PROTECTION.

Six fires were reported in the Canal Zone. The total damage occasioned by these fires was \$20.

PUBLIC WORKS.

In the city of Panama, the daily average consumption of water was 1,734,733 gallons, and in Colon, 1,082,076 gallons.

SCHOOLS.

The net enrollment in the white schools was 1,369; the average number of pupils belonging was 1,001.2, and the average daily attendance 940.6. In the colored schools the net enrollment was 1,580; the average number belonging was 877.4, and the average daily attendance, 706.6. At the close of the month, 47 teachers were employed in the white schools, and 32 teachers in the colored schools, the total number being the same as at the close of the preceding month. Seven pupils graduated from the high school, having completed the 4-year course. On June 30, the schools closed for the summer vacation.

Department of Sanitation.

The total number of deaths from all causes among employes was 28, divided, as follows: From disease, 16, and from violence, 12, giving an annual average per thousand of 3.27 and 2.46, respectively. The annual death rate per thousand among employes for the month of June, 1912, was 6.84.

The annual average death rate per thousand in the Canal Zone, and in the cities of Panama and Colon, including both employes and nonemployes, was 22.11. This rate based upon a population in the Canal Zone of 62,810, according to the census of February, 1912, and populations in Panama and Colon, respectively, of 47,172, and 20,232, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of June, 1912, was 22.88.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites, 4.85; blacks, 2.85, giving a general average for disease of 3.27. For the same month during 1911, the annual average rate per thousand from disease among whites was 11.19; blacks, 8.82, giving a general average of 9.4; and for the same month during 1912, whites, 5.92; blacks, 3.25, giving a general average of 3.91.

Among employes, deaths from the principal diseases were: Dysentery, one; lobar pneumonia, one; malaria fever E. A., one; organic disease of the heart, two; tuberculosis, four, leaving seven deaths from all other diseases, and 12 deaths from external violence. No case of yellow fever, smallpox, or plague

originated on, or was brought to the Isthmus during the month.

Respectfully,
GEO. W. GOETHALS,
Chairman and Chief Engineer.

Markers for Canal Zone Roads.

The Panama-Gorgona, Empire-Chorrera, and Las Sabanas roads have been provided with markers containing information as to distances. They consist of oblong cast iron plates, manufactured at Gorgona shops, having raised letters and figures, painted white on a black background, with iron rails for the posts. In addition, round plates, similar to the markers in all respects, except shape, are placed where the roads extend to, or cross the Canal Zone boundaries. Thirty-four plates for markers, and four for boundary designations, have been made for the three roads. The distances from Panama on the Canal Zone highway and Las Sabanas road begin at the Panama passenger station; those on the Empire-Chorrera road from the railroad station at Empire. The legends on the south side of the markers on the Panama-Gorgona road give the distances to each town in miles and fractional parts of a mile; those on the north side, from Gorgona toward Panama in even miles, 22 to 1, inclusive.

On Las Sabanas road, the distances from Panama to Juan Diaz are given in fractional miles and kilometers, and from the Canal Zone line, near the police station, to Panama in even kilometers and fractional miles, as follows:

TO JUAN DIAZ.		TO PANAMA.	
Miles.	Kilometers.	Miles.	Kilometers.
8.22	13.24	3.94	6.34*
7.60	12.24	3.72	6.00
7.60	12.21*	3.10	5.00
6.98	11.24	2.48	4.00
6.36	10.24	1.86	3.00
5.74	9.24	1.25	2.02†
5.12	8.24	1.24	2.00
4.91	7.90†	.62	1.00

*Boundary line of the Republic of Panama. †Boundary line of the Canal Zone.

On the Empire-Chorrera road, there are six markers and one boundary post. The post is 6.32 miles from Empire, and the first marker is stationed at the sixth mile, continuing in even miles from there to Empire. From Empire toward the Canal Zone line, the east sides of the markers show fractional miles.

Miscellaneous Notes.

Permission has been granted to sell grass from the Corozal farm to coachmen in Panama, and others, at the rate of \$1 per load. The fixing of a rate for the pasturing of animals on the farm on a monthly basis is also being considered.

The use of a plot of ground back of the row of houses opposite the clubhouse at Cristobal, as a playground for the children of the Cristobal white school, has been granted.

Mr. H. S. Farish has been appointed chairman of a committee to investigate and report on the condition of the furniture in the Canal offices on the Isthmus.

The Quartermaster's Department will discontinue shortly the purchase of merchant bar iron, and meet the Isthmian requirements with purchases of soft steel. From time to time, quantities of the bar iron received from the United States have been of poor quality, and the soft steel is more satisfactory.

PENITENTIARY DEMOLISHED.

Necessitated by Slide Encroachment.—Convicts at Gamboa Stockade.

The concrete penitentiary building at Culebra, which was abandoned in October, 1911, because of slides on the west bank of the Cut, menacing its stability, has been demolished. The slide area has never broken back to the site of the building, but the possibility of its doing so has made the building useless, and it was decided to remove it to obviate injury to the steel roof trusses and cell construction.

When the erection of the building was begun, in 1906, it was intended for a laundry, but on account of the imperative need of increased accommodations for long-term prisoners, numbering about 75, an order was issued on May 1, 1907, to convert it to a prison. It was completed as such on May 7, 1908. The danger from slides became imminent in 1911, and, in October of that year, the occupants were moved to a stockade erected near the Mandingo River, on the line of the Empire-Chorrera road. Convict labor had been employed on this highway since March 20, 1911, building it outward from Empire. During the following February, the Culebra police station and jail, adjacent to the penitentiary, was dismantled and reerected at West Culebra. The Mandingo stockade was closed on January 13, 1913, and the convicts were transferred to the stockade at Gamboa to work on the Gamboa-Empire highway.

The erection of a permanent penitentiary for the Canal Zone has been under consideration since the organization of the Canal Zone Government. A site was selected for it near Bohio, but was abandoned after the lock-type canal was decided on; Bohio lies within the Gatun Lake area and is now under water. In 1907, a site across the Panama railroad from Camp Diablo was recommended, but was not decided on because of uncertainty as to the layout of the Pacific locks and dams. Their present arrangement was determined upon on December 19, 1907, but when the matter of a permanent penitentiary was next taken up the idea of a farm in connection with it found favorable consideration and a site was selected, south of Pedro Miguel and just east of the relocated Panama railroad. Plans were made for moving the penitentiary from Culebra to this site, but the matter has since been held in abeyance, pending the development of a permanent organization for the operation and maintenance of the Canal. Following the demolition of the building at Culebra, the steel work for the cells has been stored with the Quartermaster's Department, subject to future requisition.

All of the long-term prisoners, or convicts, are at present confined at Gamboa and actively employed in the road construction. On June 29, 1913, they numbered 133, nine of whom are white Americans, 11 white Europeans, and 113 blacks. Two, a Panamanian, and a United States negro, are life prisoners. There are no women convicts at present.

Pending the adoption of wharfage rules and charges under the permanent organization for the operation of the Canal, the wharves and piers owned or operated by the Isthmian Canal Commission will be subject to the rates, rules, and regulations which are in effect for the wharves of the Panama Railroad Company.

CULEBRA CUT RAILROAD.

Transportation System for Disposal of Material Excavated by Central Division.

Digging Culebra Cut involves dry excavation amounting to at least a hundred million cubic yards. From the beginning, it was recognized that the working efficiency of the steamshovels depends primarily upon the means of disposition of the spoil; to "make the dirt fly" meant to move it out of the channel. The shovel engineers' detailed reports of delays classify them as mining, cleaning track, repairs, switching, derailments, moving up, cutting out, waiting for steam, and waiting for cars. In an aggregate of reports covering any considerable length of time on a large job, "waiting for cars" is chargeable with the maximum time loss, unless transportation is markedly expeditious. The rumble of the dirt trains sound the keynote of excavation progress.

In the 9-mile length of Culebra Cut, the number of shovels at work has averaged about 37, and, though this number has been diminished by perhaps half a dozen as the area of excavation has drawn toward the summit of the continental divide, the concentration of work within a mile and a half of channel has intensified the problems of transportation. In the section just north of Gold Hill are seven parallel tracks, on the levels of excavation, in constant use. Slides frequently put all but one or two out of service, so that the removal of tracks and the laying of new ones averages about a mile a day. The disposal of spoil, except from the half-dozen shovels engaged in terracing at the tops of slides, is made at dumps from one to 10 miles beyond the ends of the Cut, or from three to 12 miles from the shovels. The work employs 119 locomotives, and a total of about 2,000 dirt cars. Under these conditions, the transportation involves unusually acute "railroading."

The operation of the trains is controlled by the superintendent of transportation and the chief dispatcher of the Central Division, from their joint office in the division office building at Empire. Their work for the day begins the evening before, when, from reports by telephone from the yardmasters in the Culebra and Empire construction districts, as to the position of the trains at the close of work, they order bulletins posted at the roundhouses at Las Cascadas and Pedro Miguel, covering the distribution of crews and locomotives for the next morning. As the locomotives come in from the day's work, the crews on the extra list learn from the assignment board at which roundhouse to report in the morning, which they do by the early labor train.

From these same orders the hostling crews at the roundhouses distribute the locomotives on numbered tracks which indicate their destinations. A crew boarding an engine at Pedro Miguel roundhouse knows from the number of the track upon which it is placed whether it is to go direct to the Cut by way of the Paraiso incline, or to make its way to the dumps north of the Miraflores tunnel, or to Balboa; at Las Cascadas, the arrangement shows which locomotives are to go into the Cut from the west side, down the incline at Bridge 50½; which are to cross the dike from Matachin and go down the east side, and which are to proceed across the Chagres River bridge to the dumps along the relocation of the Panama railroad.

As the locomotives entering the Cut pass the

tower of the district yardmaster, he directs their passage to the trains of cars by order cards handed to the conductors. The first engine goes to the farthest train, and the others, in order, so that there will be no congestion due to backing in or crossing over. Throughout the day the district yardmasters direct the passage of the loaded trains to the various dumps, by telephone reports from dump yardmasters on their readiness to receive spoil; and on the return of the empty trains, distribute them to the shovels. From half a dozen small towers distributed along the line of excavation, tower-tenders keep the yardmasters informed of the progress of loading in their vicinity. The yardmasters order the right-of-way for loaded trains, and report their passage out of the district to the dispatcher, who handles the trains to the dumps. On their way, most of them pass on to the main line of the Panama railroad. The dispatcher's office has direct telegraphic connection with the lines of the railroad, and is informed as each train enters and leaves a block. The train crew takes its orders from the semaphores.

At each set of dumps is a yardmaster who reports to the dispatcher the arrival and departure of trains, and his readiness for spoil. He also orders the distribution of the loaded trains to the several dumping tracks, as well as the movements of the Lidgerwood unloaders, and the spreaders and trackshifters.

The transportation requirements of steamshovels engaged in Central Division work outside the Cut, such as terracing, diversions, and special work, are attended to directly by the dispatcher, on report from the foreman in charge. The dispatcher also handles directly the movements of labor trains, and the wrecking trains, which operate in all divisions and on the Panama railroad, and a picked crew in his charge hauls all the explosives used in the Canal and railroad construction.

The construction tracks of the division totaled 132.7 miles in length on July 1, 1913. Its track length and equipment in service exceed those of a number of minor railroads in the United States*. Its force for the maintenance of way numbers 1,923 men. The tonnage of traffic per mile is greater than that of the Panama railroad, reputed to be in excess of that of any other commercial railroad in the world. The latest annual report of the Panama railroad showed that the road hauled in the fiscal year ending June 30, 1912, 1,871,076 tons of freight, or 36,846.7 tons (of 2,000 pounds) per mile of main line. This is equivalent to 3,070.56 tons per mile a month. For the first five months of 1913, the Central Division excavation amounted to 5,415,480 cubic yards, an average of 1,083,096 cubic yards per month. Assuming that the run-of-Cut spoil weighs 1.3 tons per cubic yard, the weight of such material hauled by Central Division dirt trains per month in 1913 has been 1,408,024.8 tons, or 10,610.5 tons per mile; including weight of equipment, it has been 3,528,088.8 tons, or 26,587 tons per mile of operated track.

The force engaged in transportation for the Central Division, exclusive of the force for the maintenance of track, comprises 183 engineers, 173 conductors, 14 yardmasters, 10 towermen, two telegraph operators, and two yard clerks,

*Of the 1,270 railway systems on the North American continent, and in Cuba, listed in the June, 1913, number of the *Official Railway Guide*, issued by the National Railway Publication Company, 998, or 78 per cent of the total, have less than 130 miles of track.

a total of 384 "gold" men. Their average monthly pay is above \$210; it is believed that this is the greatest number of men engaged at such pay under one department of work in the world. All of the locomotive engineers and conductors in the service of the Panama railroad, with the exception of eight "old timers," whose service with the road antedates the advent of the Isthmian Canal Commission, are graduates of the Canal service.

PERSONAL.

Gen. Rafael Reyes, ex-president of Colombia, accompanied by his son, arrived on the Isthmus on Tuesday, July 22, on the steamer *Guatemala*, from Valparaiso, Chile. During the past year and a half he has been traveling extensively in Spain, the United States, Cuba, and most of the South American countries in the furtherance of a project for erecting a statue to Vasco Núñez de Balboa at the Pacific entrance to the Canal. He will spend several days on the Isthmus visiting the Canal work.

Congressman Robert Crosser of Ohio returned to New York on the *Cristobal*, on Monday, July 21, after a week spent in viewing the Canal work. Congressmen S. Hubert Dent, Jr., and family, and George J. Kindel also returned to the United States on the same steamer.

The resignation of Mr. Arthur L. Robinson as Superintendent of the Mechanical Division became effective July 20, and Mr. and Mrs. Robinson and Miss Cecile Robinson sailed for the United States on Monday, July 21, on the *Cristobal*. Prior to coming to the Isthmus, where he arrived on June 4, 1905, Mr. Robinson was head of the electrical department of the Southern Railway. He served as electrical engineer in connection with the electrical and mechanical work of the Commission until October, 1909, when, upon the resignation of Mr. George D. Brooke as Superintendent of Motive Power and Machinery, he was appointed head of the reorganized Mechanical Division. In this capacity he made improvements in the management of the shops, one of his changes resulting in an annual saving of \$105,000 in overhead expense. On his return to the United States he will visit friends in Harrisonburg, Virginia, before proceeding to his home in Louisville, Kentucky.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, July 30, beginning promptly at 2 p. m., for persons desiring to secure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, not later than the day previous to the examination. Applicants for chauffeurs' licenses must also bring automobiles with them.

Missing Man.

Any one having information regarding the whereabouts of Mr. Ober Lucas, who was in the employ of the McClintic-Marshall Construction Company at Miraflores, up to April 7, 1913, will please communicate with the office of the Chairman and Chief Engineer, Culebra.

AUTOMOBILE TARIFF.

Schedule of Rates for Transporting Passengers Over Canal Zone Streets and Roads.

ANCON, C. Z., July 10, 1913.

Under the authority vested in me by the Ordinance enacted by the Isthmian Canal Commission on August 25, 1910, and approved by the Secretary of War on December 3, 1910, I hereby prescribe the following rates for the transportation of passengers by automobile or other motor vehicle of similar construction over the streets and roads of the Canal Zone.

Any person who shall charge any amount in excess of the rates herein prescribed, or any person who shall fail or refuse to pay the duly prescribed rate for transportation shall be punished by a fine not to exceed twenty five dollars (\$25). (Sections 4 and 5 of Ordinance No. 21.)

A rate different from that herein prescribed may, however, be made and charged, if the parties to the transaction agree thereon. In case of any dispute, the duly prescribed rate shall prevail.

Section 6 of Ordinance No. 19 requires that all motor vehicles shall, when being operated on any of the Canal Zone streets or roads, between the hours of 6 p. m. and 5 a. m., carry and prominently display lights, as follows: Automobiles, or motor vehicles of similar construction, two bright front or headlights, one on either side, and one red light at the rear.

This tariff of rates is made reciprocal between points in the Canal Zone and the city of Panama by a Resolution adopted by the Municipal Council of Panama on April 28, 1913, and becomes effective in the Canal Zone following its publication in two consecutive issues of THE CANAL RECORD.

GEO. W. GOETHALS, Chairman,

In charge of Department of Civil Administration.

Automobile Tariff Between Points in the Canal Zone and the City of Panama.

RATES BY THE HOUR.

(All rates in United States Currency.)

Capacity of car.*	For first hour.	For each hour thereafter.
5 passengers.....	\$5.00	\$4.00
6 passengers.....	6.00	5.00
7 passengers.....	7.00	6.00

*Five, six, and seven-passenger cars are those having a normal seating capacity for five, six, and seven passengers, respectively, including the chauffeur.

For cars having a seating capacity less than that above indicated the rates are not to exceed \$1 U. S. currency per hour for each person for which the car has a normal seating capacity, including the chauffeur.

For any car having a normal seating capacity of more than seven passengers, the charge shall be computed for the first hour at the rate of \$1, U. S. currency, for each person for which such car has a normal seating capacity, including the chauffeur, and for each hour thereafter \$1 less than the first hour rate for the car.

COMPUTATION OF TIME.

Time lost in breakdowns, the making of repairs and other stops for which passengers are not responsible, shall not be charged against passengers.

Where cars are ordered from garages in the cities of Panama and Ancon for service to begin in said cities, the time upon which the hourly rate shall be computed shall begin when the car leaves the point where it is boarded by the passenger or passengers, and the time shall be deemed to end when the car returns to such point of original departure or any other point designated by the passenger or passengers, except where cars are ordered to be at a designated place at a certain time, in which case the time shall start from such specified hour.

Where cars are ordered from garages in the cities of Panama and Ancon for use outside of said cities, time for which charge may be made at the hourly rate shall begin when the car leaves the garage.

For fractional parts of an hour the proportionate part of the hourly rate will be charged.

Whenever any car is employed at the hourly rate and the passengers leave the car at some point or points other than the place of departure, the time which should be consumed by the car in returning direct to the place of departure, or to such other point as may be agreed on, shall be included in the time to be charged for.

RATES BETWEEN LOCAL POINTS.

Where automobiles engage in the business of carrying one or more passengers between the points shown in the following table, and such automobiles are not hired upon an hourly basis, the charges for transportation furnished between such points shall not be in excess of those hereinafter prescribed.

PANAMA—ANCON—BALBOA.

Between any point in	And	United States currency
Ancon or Panama	Any other point in Ancon (outside of hospital reservation) or Panama. One way—For each person....	\$0.50
Ancon or Panama	Balboa Docks and return: 5-passenger car.....	3.50
	7-passenger car.....	5.00
	No reduction for one way.	
Ancon or Panama	Old Panama and return: 5-passenger car.....	5.00
	7-passenger car.....	7.00

NOTE—The rate to Old Panama and return is that above shown, provided the time consumed does not exceed one (1) hour, in which case the charge shall be computed upon the hourly basis.

Canal Zone Automobile Tariff.

LOCAL POINT RATES FOR CULEBRA, EMPIRE, AND LAS CASCADAS.

Between	And any point in	U. S. currency. One way.
Culebra (Administration building, and environs).	Empire.....	For each passenger. .75
Culebra, (Railroad station.)	Empire.....	.50
Empire.....	Las Cascadas.....	.50

NOTE.—The rates by the hour, as well as the rules governing the computation of time, shall be the same as those prescribed in the Automobile Tariff between points in the Canal Zone and the city of Panama.

Approved:

GEO. W. GOETHALS, Chairman,

In charge of Department of Civil Administration.

ANCON, C. Z., July 10, 1913.

Under the authority vested in me by the Ordinance enacted by the Isthmian Canal Commission on August 25, 1910, and approved by the Secretary of War on December 3, 1910, I hereby prescribe the following rates for the transportation of passengers by automobile or other motor vehicle of similar construction over the streets and roads of the Canal Zone.

Any person who shall charge any amount in excess of the rates herein prescribed, or any person who shall fail or refuse to pay the duly prescribed rate for transportation received, is guilty of a misdemeanor, and upon conviction shall be punished by a fine not to exceed twenty-five dollars (\$25). (Sections 4 and 5 of Ordinance No. 21.)

A rate different from that herein prescribed may, however, be made and charged, if the parties to the transaction agree thereon. In case of any dispute, the duly prescribed rate shall prevail.

Section 6 of Ordinance No. 19 requires that all motor vehicles shall, when being operated on any of the Canal Zone streets or roads, between the hours of 6 p. m. and 5 a. m., carry and prominently display lights, as follows: Automobiles, or motor vehicles of similar construction, two bright front or headlights, one on either side and one red light at the rear.

This tariff of rates is made reciprocal between points in the Canal Zone and the city of Colon by Ordinance No. 25, enacted by the Municipal Council of Colon on June 27, 1913, and becomes effective in the Canal Zone after publication in two consecutive issues of THE CANAL RECORD.

GEO. W. GOETHALS, Chairman,

In charge of Department of Civil Administration.

Automobile Tariff Between Points in the Canal Zone and the City of Colon.

RATES BY THE HOUR.

(All rates in United States Currency.)

Capacity of car.*	For first hour.	For each hour thereafter.

OFFICIAL CIRCULARS.

Assignments in Division of Municipal Engineering.

ISTHEMIAN CANAL COMMISSION.
DIVISION OF MUNICIPAL ENGINEERING.
OFFICE OF RESIDENT ENGINEER.
GATUN, C. Z., July 21, 1913.

To All Concerned—Effective at once, certain work in the Division of Municipal Engineering will be divided, as follows:

All work in the territory from Gatun, north, including the city of Colon, but exclusive of the construction of the new Colon water works and the operation of the filtration plants, will constitute the Northern District. Mr. E. H. Chandler will be in charge of this district, as superintendent, with office at Cristobal.

All work in the territory from Gorgona, south, including the city of Panama, but exclusive of the construction of the new water works and the operation of the filtration plants, will constitute the Southern District. Mr. D. E. Wright will be in charge of this district, as superintendent, with office at Ancon.

Mr. W. J. Spalding, assistant engineer, will be in charge of the construction of the new water works for the southern end of the Canal, with office at Corozal.

Mr. J. T. B. Bowles, physiologist, will be in charge of the operation of all filtration plants and the examination and analyses of Canal Zone water supplies. His office will be at the Gatun laboratory.

GEO. M. WELLS,
Resident Engineer.

Approved:
GEO. W. GOETHALS,
Chairman and Chief Engineer.

CIRCULAR No. 137:

All Concerned—All letters and telegrams, pertaining to coal orders, heretofore addressed to Mr. A. O. Herman, general foreman, car department, should be addressed in the future to Mr. R. W. Bersin, receiving and forwarding agent, Colon.

JOHN D. PATTERSON,
General Superintendent.

Cucaracha Call Station Abolished.

DEPARTMENT OF CIVIL ADMINISTRATION.
DIVISION OF POLICE AND PRISONS,
ANCON, C. Z., July 18, 1913.

GENERAL ORDER No. 1791:

Effective today, Cucaracha call station is abolished, and Policeman J. E. Forde ordered transferred from Cucaracha to Paraiso substation.

The property of the Department of Civil Administration, and the Quartermaster's Department, now at Cucaracha call station, will be turned in to the sub-police station at Paraiso.

C. W. BARBER,
Chief of Division.

Gorgona Police Station Discontinued.

DEPARTMENT OF CIVIL ADMINISTRATION.
DIVISION OF POLICE AND PRISONS,
ANCON, C. Z., July 17, 1913.

GENERAL ORDER, 1790:

Effective today, the Gorgona police station is discontinued, and the following officers on duty at that station are transferred to Bas Obispo for station: Sergt. Charles F. Johnson, Corp. William H. Walston, first-class policeman M. L. Brooke, first-class policeman Patrick Farrell, first-class policeman William Heller.

first-class policeman Angus McCormack, first-class policeman Harry S. Rowe, first-class policeman Frank C. Ruggles, and first-class policeman L. Seiber.

First-class policeman Walter Grimm is ordered transferred from Gorgona substation to Ancon central station.

First-class policeman Archie L. Reeve is ordered transferred from Matachin substation to Culebra substation.

Gorgona is designated as a call station and police protection and executive administration for that town will be furnished from the Bas Obispo police station.

Matachin is designated as a call station and police protection and executive administration for that town will be furnished from the Bas Obispo police station.

The property of the Department of Civil Administration and Quartermaster's Department now on hand at Gorgona and Matachin stations, which is in excess of the requirements of the service, should be turned in to the respective departments.

The records at Gorgona and Matachin stations will be turned in to Empire central station for consolidation with the files of that police district.

The hours of relief for the officers assigned to duty at Gorgona and Matachin call stations will be arranged, so as to permit train service being used for transportation each way, between those stations and Bas Obispo police station.

C. W. BARBER,
Chief of Division.

Changes in Shop Personnel of Mechanical Division.

Launch Service to Taboga.

The steamer *Sanidad* leaves the dredge landing at Balboa, at 9 o'clock Tuesday, Thursday and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule for moving picture exhibitions for the week July 28 to August 2 is, as follows: Monday, Gorgona; Tuesday, Cristobal; Wednesday, Culebra; Thursday, Empire; Friday, Corozal, and Porto Bello; Saturday, Gatun.

CULEBRA.

One hundred and fifty people attended the exhibition of the moving pictures, "From the manger to the Cross," on Sunday evening, July 20. Mr. C. C. Pearsall furnished the piano music.

EMPIRE.

On Monday evening, July 21, a large number of Empire people enjoyed the exhibition of oil paintings of Panama, Colon, Culebra Cut, and other places of interest along the line, which were made by Mr. J. M. Gleason of New York.

The handicap pool tournament closed recently with the following men as winners: Mr. George Dryden, first prize, having won 17 games and lost but two; Mr. McCullough, second, with 13 games out of 20, and Mr. Jacques, third, with 14 games out of 19.

Mr. DeCora holds first place in the handicap handball tournament.

GORGONA.

There will be a farewell entertainment at the clubhouse on Friday evening, July 25. All former residents of Gorgona, as well as the public generally, are invited to attend.

GATUN

The "Lock City" duckpin tournament promises to be one of the most enthusiastic bowling contests which the clubhouse has ever conducted. The following teams compose the league:

Office force, McClintic-Marshall Company—Wurster, J. O. Childers, Furlong, Wilson, McMahon, Hess.

Field force, McClintic-Marshall Company—W. B. Childers, Tucker, Bellringer, Conley, Galloway, Harper. *Lock Gate Inspectors*—Dumville, Claherty, Quinn, Sloan, Briggs, Roberts.

First Division—Hodges, Humphries, Easter, Matter, Ragan, Grover.

American Bitumastic Enamel Company—Gray, Gibson, Farley, Peck, Duer.

Atlantic Division—Wells, Barte, Coleman, Brown, Dennis, Gilbert.

Gold and silver medals will be given as prizes. The first match games of the series were held on Thursday evening, July 17, when the bowling alleys were filled to their seating capacity. Archer's brass band of New Gatun furnished the music. The results were: McClintic-Marshall office force, 2; Bitumastics, 1; McClintic-Marshall field force, 3; Inspectors, 0.

On Friday evening, July 18, the results were: First Division, 2; Atlantic Division, 1.

A ladies' bowling carnival was held at the clubhouse on Wednesday evening, July 16. About 75 people were present. The winners of the "Open" contest were Mr. Harper and Mrs. Meise; and of the "Married folks," contest, Mr. and Mrs. M. Conley.

Motion pictures entitled "From the manger to the Cross," illustrating scenes in the life of Christ, will be shown at the clubhouse on Saturday evening, July 26.

Twelve new members joined the association during the week ending July 19.

An interesting program was given at the clubhouse on Saturday evening, July 19. Mr. W. Benton Childers presided, and the following program was given: Piano solo from Mendelssohn, by Mrs. E. T. Gilbert of Gatun; remarks by the presiding officer; address on "Government," by Congressman Robert Crosser of Ohio; violin solo from Kreisler, by Mr. W. W. Whitehead of Corozal; address on "Transportation and parcels post," by Congressman George J. Kindel of Colorado; tenor solo from Wilson, by Mr. W. G. Ross of Empire. An informal reception was held after the exercises, during which refreshments were served.

Mr. D. C. Galloway won first prize in the elimination pool tournament recently conducted. Mr. Pettit was awarded second prize.

CRISTOBAL.

A class in Spanish was organized on Friday night July 18. Those who have made some study of the language before are urged to join the intermediate and advanced classes.

A special set of films entitled "From the manger to the Cross" will be shown on Sunday night, July 27, at 8.30 o'clock. Admission will be free.

The Gatun ladies' bowling team defeated the Cristobal ladies' team on Tuesday afternoon, July 15, two out of three games of duckpins.

The local chess players organized a club on Monday night, electing a president and a secretary.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Cristobal, 8 a. m. to 12.30 p. m., and 2 to 7 p. m.
Balboa, 8 a. m. to 12.30 p. m., and 2.30 to 7 p. m.
Ancon, 8 a. m. to 1 p. m., and 3 to 6 p. m.
All others, 8 a. m. to 1 p. m., and 3 to 7 p. m.

NOTES OF PROGRESS.

Oil Storage Areas for Individuals and Companies.

The Canal Commission is now in position to make assignments of land for oil storage at the Atlantic and Pacific ends of the Canal. It is the purpose of the Commission to install the necessary oil pumping plant at the water fronts, and to run the oil mains from there to the vicinity of the oil tanks. The area assigned for the tanks at the Pacific terminus is on Balboa dump, south of the Union Oil Company's station, and west of the railroad track to the breakwater. The ground there is from 25 to 45 feet above mean sealevel, and suitable for the erection of tanks, with little or no grading. The area set aside at the Atlantic end is immediately east and south of Mount Hope cemetery. This area was previously reserved for oil tanks for the Commission. Since then, applications, which have been received from individuals and companies, indicate that private organizations will furnish a sufficient supply, therefore, practically all of the area heretofore reserved, together with the area between the cemetery and the old East Diversion, may be assigned to individuals and companies, with the exception of space for two additional tanks for the Canal Commission. The use of the land required for private storage tanks will be granted under revocable leases, or licenses. It is probable that the tanks will be required to be spaced about 300 feet apart. In view of the fact that there will probably be ample ground to meet all demands, and, as the Commission will run its own supply and delivery pipes from the water fronts to the general tank areas, there is practically no choice of location.

Bohio Fluviograph Station Demolished.

The fluviograph station formerly standing on the east bank of the Chagres River at Bohio was destroyed by dynamite on July 12. The first charge tore off the wooden house where the instruments were kept, and

the second demolished the brick tower. The explosive tore the base of the structure away well below the existing water line, so that when the lake is at its normal height, no obstruction will be offered. The station was established by the French some time previous to 1890, and was in use by the Canal Commission up to the time the lake began to fill.

New Concrete Storage Building at Corozal.

The committee, consisting of Lieut.-Col. T. C. Dickson, chairman; Capt. R. E. Wood, Mr. H. O. Cole, Mr. E. E. Lee, and Mr. C. W. Northrop, appointed to report to the Chairman and Chief Engineer on facilities for distributing cement after August 1, and the construction of a new building for storage, has recommended that a 200-foot length of the cement storehouse west of Miraflores Locks be moved to a site just west of the Panama railroad at Corozal, and north of the recently erected quartermaster's storehouse at that point. The recommendation of the committee was approved, and the preparation of the site began on July 25.

Besides this site, the committee considered one on the east toe of Sosa Dam, which was deemed insecure for the pressure of 1,500 pounds per square foot to which the area will be subjected; a site between the Panama railroad track to Balboa and the Big Tree yard, approximately north of the new Administration building; and one on the Balboa dump. The latter were considered too small.

The preparation of the site at Corozal will involve the excavation of about 2,400 cubic yards, at an estimated cost of \$1,200, and the laying of about 1,000 feet of track, costing about \$1,250. The cost of moving the portion of the Miraflores storehouse is estimated, as follows: Demolishing and loading, \$1,500; reerecting, \$2,500; concrete foundations, floors, etc., \$3,500; extras, \$500; total \$8,000, making a grand total of \$10,450. This estimate covers the transfer of the requisite number of overhead cranes now installed in the Miraflores shed.

Work on New Water System Begun.

Work in connection with the construction of the new water works for the southern end of the Canal started on July 16, when the forces of the Division of Municipal Engineering began clearing the site for Miraflores pump station, No. 1, located immediately east and north of the north portal of the Miraflores tunnel. The project contemplates taking the water from the Caimitillo arm of Miraflores Lake and pumping it into the purification plant to be located on the top of the Miraflores hill immediately above the Miraflores spillway. The water, after passing through the various processes of purification in this plant, will flow by gravity to a pump station at Ancon, where electric pumps will force the water into the mains leading to Panama, Balboa, and adjacent points. This pump station

will also contain high-service pumps which will be thrown into service during fires. Designs and details for this work are being made in the office of the resident engineer of the Municipal Engineering division.

Dumping of material on the south end of the fill between Pedro Miguel and Miraflores, east of the Panama railroad relocation, and a little north of the tunnel, will be discontinued in view of the fact that the new pumping station and suction chamber of the permanent water supply for the Pacific side will be situated at this point. The fill encroaches on a small basin, fed by the Caimitillo River, and its branches, which the Division of Municipal Engineering desires to keep intact as a reservoir for the pump station intake.

Oil Storage Tanks.

The Canal Commission's two new oil tanks at Mount Hope were completed on June 25, with the exception of painting, and on June 30, in order to test for leaks, water was turned into the higher tank. On July 21, the height of water in the tank was 18 feet six inches. After the tank is filled, an inspection will be made preparatory to its acceptance, after which a similar test will be made on the lower tank. It is expected that rivet work on the two tanks at Balboa will be completed about August 20. Each of the four tanks has a capacity of 42,000 barrels of oil, or a combined storage capacity of 168,000 barrels. Each tank is 93 feet in diameter and 35 feet high. The work of erection is being performed by the Petroleum Iron Works of Sharon, Pa.

Crematory at Ancon.

Award has been made to the Jarvis Engineering Company of Boston for the equipment for a crematory to be built at Ancon cemetery, or at some convenient point in Ancon Hospital grounds, at the price of \$4,370. Bids for the apparatus were opened in Washington on June 5, and five tenders were received. The contract calls for two retorts, each equipped with two Schütte and Koerting burners. The retorts are to be placed side by side, so arranged that repairs can be made to the interior of one while the other is in operation; they must be free of smoke, noise, or odor, with an elapsed time for a complete incineration of not to exceed two hours. The retorts are to be provided with a positive means of collecting and removing the ashes after each cremation.

The burners are designed for using fuel oil. An oil pump and an air blower are to supply sufficient oil and air to the burners to operate, at maximum capacity, both retorts at the same time. They will be driven by 220-volt, 25-cycle, 3-phase, alternating current electric motors, equipped with rheostats and switches mounted on a suitable panel board. The drives from the motors to the air blower and oil pump will be gearless, and will be effected

either by direct gearing or silent chain. The burners are of a type that will permit proper regulation of the mixture of oil and air. The oil line will be fitted with two duplex strainers, one placed on the suction line between storage tank and pump, and the other upon the discharge line between pump and heater. An oil heater, using charcoal as fuel, will be installed to heat the oil before it enters the burners. The contractor is to furnish the cast iron fronts for the retorts, all doors and fixtures for operating same, any special tile required, and all necessary fittings. He is also to furnish the services of an expert to supervise the erection of the crematory, and to instruct the Commission's operator. The Canal Commission will supply all the common building material, erect the oil storage tank, and furnish the necessary labor.

The equipment supplied by the contractor is to include 200 two-quart polished copper cans, and 100 one-quart polished copper cans as ash containers.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed the aggregate amount in place at the close of work on July 26, being 4,470,666 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of July 26, follows:

JOINT LAND COMMISSION.

Opinion as to Status of Occupiers, Etc.

The following opinions were read at the public session of the Joint Land Commission, held on July 25:

Opinion of the Joint Land Commission on the status of settlers or occupiers on public lands in the Canal Zone who went upon such lands subsequent to the ratification of the treaty of February 26, 1904.—It was said by the Supreme Court of the United States, in the case of United States vs. Anguizola, (1 Wall, 352) in passing on certain property rights involved in the territory ceded by Mexico to the United States in 1848:

"They have directed their tribunals in passing upon the rights of the inhabitants, to be governed by the stipulation of the treaty, the law of nations, the laws, usages, and customs of the former government, the principles of equity, and the decisions of the Supreme Court, so far as they are applicable. They have not desired the tribunals to conduct their investigations as if the rights of the inhabitants to the property which they claim, depended upon the nicest observance of every legal formality. They have desired to act as a great nation, not seeking to extend their authority over the ceded country, to enforce forfeitures, but to afford protection and security to all just rights which could have been claimed from the government they superseded."

It is in this spirit that the Commission approaches the question as to the status of occupiers on public lands subsequent to 1903, who were not occupying such lands under leases or revocable licenses issued by the Isthmian Canal Commission. We are fully cognizant of the fact that the courts of the United States hold that occupiers of public lands acquire no rights.

The only question which presents itself is whether this rule of law is applicable to conditions in the Canal Zone.

It is a general principle of international law, that:

"When political jurisdiction and legislative power over a territory are transferred from one sovereignty to another, the municipal laws of the territory continue in force until abrogated by the new sovereign."

This principle was strongly emphasized with reference to the Canal Zone in the instructions from the President of the United States to the Secretary of War, under date of May 9, 1904. The pertinent portion of these instructions reads, as follows:

"The inhabitants of the Isthmian Canal Zone are entitled to security in their persons, property, and religion, and in all their private rights and relations. They should be so informed by public announcement. The people should be disturbed as little as possible in their customs and avocations that are in harmony with principles of well ordered and decent living."

"The laws of the land, with which the inhabitants are familiar, and which were in force on February 26, 1904, will continue in force in the Canal Zone and in other places on the Isthmus over which the United States has jurisdiction until altered or annulled by the said Commission, but there are certain great principles of government which have been made the basis of an existence as a nation, which we deem essential to the rule of law and the maintenance of order, and which shall have force in said Zone. The principles referred to may be generally stated, as follows:

"That no person shall be deprived of life, liberty, or property without due process of law; that private property shall not be taken for public use without just compensation; that in all criminal prosecutions the accused shall enjoy the right of a speedy and public trial, to be informed of the nature and cause of the accusation, to be confronted with the witnesses against him, to have compulsory process for obtaining witnesses in his favor, and to have assistance of counsel for his defense; that excessive bail shall not be required nor excessive fines imposed, nor cruel or unusual punishment inflicted; that no person shall be put twice in jeopardy for the same offense, or be compelled in any criminal case to be a witness against himself; that the right to be secure against unreasonable searches and seizures shall not be violated; that neither slavery nor involuntary servitude shall exist except as a punishment for crime; that no bill of attainder or *ex post facto* law shall be passed; that no law shall be passed abridging the freedom of speech or of the press, or of the rights of the people to peaceably assemble and petition the government for a redress of grievances; that no law shall be made respecting the establishment of religion or prohibiting the free exercise thereof."

In the consideration of this question, the Commission has also given weight to certain principles, which, in view of the exceptional conditions prevailing in the Canal Zone, acquire much weight.

The Canal Zone was acquired for the definite purpose of constructing a great international highway. To accomplish this purpose, the United States acquired complete control over this territory and has exercised a vigilant police power.

The plainest principles of equity required that, in

a territory where the inhabitants had been accustomed, from time immemorial, to go upon public lands for the purpose of cultivating small tracts in order to secure a livelihood, the United States Government give peremptory notice that "squating" would not be permitted on the public lands of the United States and that such occupiers would be removed without compensation.

It is a further fact worthy of consideration that no attempt was made clearly to define the precise boundaries of public lands, and that in most cases, there was nothing to indicate to the claimants, now under consideration, whether their improvements were being made on public or private lands. The fact that the agents of the United States did not know the exact limits of such public lands is indicated by the fact that in some instances they undertook to issue leases for land which belonged to private parties.

Not only has there been some uncertainty on the part of the government as to the precise boundaries of public lands, but there has also existed much confusion in the public mind as to the limits of public property, because of the fact that by the frequent acquisitions by the United States, either through purchase or expropriation proceedings, land formerly known as private land has been converted into public land. These uncertainties would greatly complicate the situation, if a rule were adopted denying to occupiers of public lands, rights which have been recognized with respect to occupiers of private lands.

In arriving at any conclusion with reference to occupiers of the public lands of the United States within the Canal Zone, the exceptional governmental and legal conditions prevailing in this strip of territory must never be lost sight of. In this connection the following considerations deserve particular attention:

First—The laws of the United States do not extend *ex proprio vigore* to the Canal Zone. Some positive act of the Government of the United States is necessary in order to extend the operation of such laws. The Commission finds no trace of any positive action of the United States to indicate that the Colombian law governing the rights of cultivators to compensation for improvements (Law No. 48 of 1882) was to be regarded as abrogated. In the case of the United States vs. Andrade (Canal Zone Supreme Court Reports, Vol. 1, p. 69) the Supreme Court of the Canal Zone had occasion to pass on the rights accruing under this law. It is true that the case involved the question of compensation for improvements made prior to American occupation, but if the law continued in force subsequent to such occupation the principles to be applied remain the same. In the course of its opinion in this case the Supreme Court said:

"In regard to the rights of settlers upon public lands, Law 48 of 1882 contains, besides Art. 2, above quoted, Art. 5, which reads, as follows:

"Art. 5 of Law 48 of 1882: 'In case a cultivator should be deprived of his property through due process of law, he shall not be dispossessed of the land occupied by him without first being indemnified to the extent of the value of the improvements made on the land, as possessor in good faith of the land.'

"Improvements shall consist of clearing of the land, embankments, cultivation and dwellings, the value of which shall be appraised by experts, as provided for in the Judicial Code of the nation or of the state in which the adjudicated land is located."

"Until the value of such improvements shall have been paid, there shall not exist against the possessor any action for ejectment from the land."

"The defendant, besides being considered to all effects by law as a possessor in good faith of the land occupied by him, and having occupied it undisturbedly (?) with the knowledge and consent of the Colombian authorities, is entitled to the right provided for by Art. 739 of the Civil Code, which article provides for the payment of the improvements made on the land."

Second—Long before the institution of these proceedings before the Joint Land Commission, the right of occupiers to compensation for improvements made on private lands was generally recognized by the Government of the Canal Zone. In the instructions issued by the Chairman and Chief Engineer of the Isthmian Canal Commission in Circular No. 301, dated January 7, 1910, we find the following clause:

"Should there be any buildings or crops located within the area to be covered by the waters of Gatun Lake and outside of the Canal channel upon lands belonging to private parties, the owners will be paid the actual value of such buildings or crops at the time the water reaches the property."

In other words, the Government of the Canal Zone has recognized, and continues to recognize, the right to compensation of occupiers on private lands, a right not founded upon any doctrine of American Law, for most of such persons, under standards of American Law are mere trespassers on private property, and such trespass cannot give rise to a right. If, therefore, the right of such persons to compensation is recognized, such right can only rest on one or both of the following principles.

(a) Article 730 of the Civil Code of Panama.

(b) A broad spirit of equity in dealing with the exceptional conditions prevailing on the Canal Zone.

In short, persons who under American Law would be considered as mere trespassers on private property, have received repeated and continuous recognition of their right to compensation for their improvements. If Article 739 of the Civil Code of Panama remains in force with reference to occupiers on private lands, it would seem but just and equitable that Article 5 of the Cultivators' Law (Law No. 48 of 1882) should be recognized as remaining in force with reference to the right to compensation for improvements made on public lands, thus preserving to such occupiers the same rights which they enjoyed prior to the treaty of November 18, 1903.

Third—A further circumstance to which the Commission has given due weight is the fact that the instructions of the President of the United States, dated May 9, 1904, after prescribing with much emphasis, that the people of the Canal Zone "should be disturbed as little as possible in their customs and avocations that are in harmony with principles of well-ordered and decent living," directs that:

"The laws of the land with which the inhabitants are familiar and which were in force on February 26, 1904, will continue in force in the Canal Zone and in other places on the Isthmus over which the United States has jurisdiction, until altered or annulled by the said Commission."

These instructions clearly indicate that the Government of the United States was not only prepared to assure to the people of the Canal Zone the full and undisturbed enjoyment of their property rights, but was anxious to avoid any action the effect of which would be to destroy any property or property rights which were recognized by the laws, customs, and traditions of the people as they existed prior to the treaty of November 18, 1903.

In fact, that the Government of the Canal Zone is distinctively an executive government, and that the President of the United States, in whom full authority over the Canal Zone was vested by the Act of April 28, 1904, expressed himself unequivocally with reference to the preservation of the property rights of the people, together with the further fact that there is nothing to indicate any intent to abrogate Article V of the Cultivators' Law of 1882, but that on the contrary there are many circumstances which tend to show that it was intended that this article should remain in force, justify the conclusion that any rights, which may have accrued by reason of the operation of Article V of Law No. 48 of 1882, are entitled to full consideration by this Commission.

Reasoning, therefore, from the constitutional and legal status of the Canal Zone, the exceptional situation created by the fact that the decision to remove inhabitants from the Zone was not made until nearly ten years after the conclusion of the treaty of November 18, 1903, and taking into consideration the principles of law which govern property rights in this territory, the Commission has reached the conclusion that Article V of the Cultivators' Law of 1882, in force in the Canal Zone at the time of the conclusion of the treaty of November 18, 1903, has not been abrogated by any action of the United States and still remains in force, and that, therefore, those persons who, complying with the provisions of this act, have made improvements on public lands, are entitled to compensation for the value of such improvements, and awards will be made accordingly.

There still remains for determination, the status of those persons who went on public lands after the ratification of the treaty of February 26, 1901, and who, subsequent to such occupancy, accepted licenses issued by the Isthmian Canal Commission.

With reference to claimants included in this category, it is evident that if they had acquired any rights at the time of the acceptance of these licenses, such acceptance did not divest them of the rights which had accrued prior to the date of the issuance of the license. Their claims, therefore, so far as they relate to rights accrued prior to the acceptance of the licenses, are within the jurisdiction of the Commission and should be adjudicated accordingly.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Opinion Regarding Claim of Heirs of Carlos Icaza Arosemena, and Others.

In the matter of the claim of the heirs of Carlos Icaza Arosemena, heirs of Francisco Aranda, heirs of Vicente and Luis E. Alfaro (Alfaro Brothers), and Remigio Dutary C., for the loss of free passage on Panama railroad in re lands of Bailamonos. Docket No. 294; July 16, 1913.—By agreement dated December 31, 1885, the predecessor in interest of the present claimants granted to the Panama Railroad Company a right-of-way for its double track across the lands of Bailamonos Norte on condition that they be given free passage with baggage rights, for themselves, their wives, direct descendants, and servants.

These claimants presented to the Joint Commission

of 1908 a claim for damages. In the final report of the Commission we find the following statement:

"In the cases of Peñas Blancas en Medio and Bailamonos, damages were claimed on account of the fact that the Panama Railroad Company had issued passes over its railroad for the benefit of the landowners or landholders in consideration of being given a right-of-way over the estates affected. We have not considered such claims in estimating the damages, but reserved to the parties any rights they may have to enforce such claims in the premises."

Subsequent to the presentation of this claim to the Joint Commission of 1908, the question of damages arising out of the refusal of the Panama Railroad Company to continue the issuance of passes, was presented to the Supreme Court of the Republic of Panama, which tribunal passed on all the questions of law involved. In this opinion, dated August 8, 1912, the Court holds:

First—That with reference to the refusal of the Panama Railroad Company to issue passes prior to the date of the award of the Joint Commission of 1908, the claimants be required to establish in a separate suit the quantum of damages suffered, and that the Panama Railroad Company pay to the claimants the amount of such when once established.

Second—That with reference to any claims for damages arising out of the failure of the Panama Railroad to issue passes subsequent to 1908, the expropriation of that portion of the lands of Bailamonos occupied by the Panama Railroad Company "terminated any rights of the parties who originally created the easement. The transfer of the property took place by reason of conditions (fuera mayor ó caso fortuito, Art. 1, Law 95 of 1890), causes not chargeable to the railroad company, (Art. 1604 of the Civil Code) because it was not the railroad company which contracted with the Government of the Republic for the construction of the Canal, authorizing the expropriation of private lands."

Having taken into consideration:

First—The opinion of the Supreme Court of the Republic of Panama, dated August 8, 1912;

Second—That the claim now under consideration cannot have any relation to that portion of the estate of Bailamonos Norte, which is the subject of expropriation proceedings before this Commission; and,

Third—The fact that the right of free passage granted to the claimants by the agreement of December 31, 1885, was in the nature of a covenant running with the land, and that, as has been clearly stated by the Supreme Court of Panama, the expropriation proceedings under which the United States acquired title to that part of the estate of Bailamonos Norte over which the Panama railroad enjoyed a right-of-way, terminated any right of free passage so far as the present claimants are concerned;

The Commission has reached the conclusion that this claim be dismissed without award, and an order to this effect is entered accordingly.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Opinion Regarding Status of Certain Claimants on Lands of Bailamonos Sur.

Opinion of the Commission with reference to the effect on occupiers of the warranty clause contained in the deed of May 1, 1909, under which the United States took title to that portion of the estate of Bailamonos Sur, below the 87-foot contour line. Docket No. 276, July 22, 1913.—In the deed under which the United States acquired that portion of the estate of Bailamonos Sur below the 87-foot contour line, the following warranty clause is found:

"To have and to hold the above designated and described lands, together with all rights, claims, leasehold interests, and demands of whatever nature appertaining thereto unto the said United States of America, its successors, or assigns forever; we do hereby for ourselves and for our heirs, administrators, executors, and assigns, covenant and agree to warrant and defend these lands unto the United States of America, its successors and assigns, against the lawful claims and demands of all persons whomsoever, and we do hereby likewise release and surrender any and all claims for actual or consequential damages to the said lands which may have heretofore been caused or claimed by reason of the action of the Isthmian Canal Commission, the Panama Railroad Company, or any of their agents, servants, or employees."

It has been urged upon the Commission that this clause saves the United States free from all claims that may be presented by persons who, at the time the property was purchased, had acquired an interest in the lands or a right to compensation for improvements made thereon, and that such persons must seek compensation by action against the grantors.

The covenant of warranty contained in the deed of May 1, 1909, is in the nature of a personal covenant, the breach of which entitles the grantee to the recovery of damages, but which does not affect the rights or status of third parties, whose rights had accrued prior to the date of this deed. This covenant is similar to the covenant of "evicción y saneamiento" provided for

in Articles 1893 to 1913, inclusive, of the Civil Code.

The Commission, after taking into consideration the terms of the covenant of warranty contained in the deed of May 1, 1909, and the provisions of Articles 1880 to 1913, inclusive, of the Civil Code, has reached the conclusion that where rights accrued to any persons occupying that portion of the estate of Bailamonos purchased by the United States by deed of May 1, 1909, which rights had accrued prior to the date of said instrument, the covenant of warranty contained therein does not debar such persons from presenting and prosecuting their claims against the United States before this Joint Commission.

The attention of the Commission has been called to an agreement for the sale of a portion of the estate of Bailamonos Sur, made and entered into the 11th day of July, 1908, by and between Gen. Rafael Aizpuru, of the first part, and the Isthmian Canal Commission on behalf of the United States of America, represented by its general counsel, Richard Reid Rogers, of the second part. This agreement contains the following clauses:

Fourth—The United States of America or the Isthmian Canal Commission, as the case may be, shall allow the said first party to retain the use and possession of the said lands herein agreed to be conveyed, free of rental, until such time as the same may be occupied or flooded by the operations of the said second party, at which time the said first party shall be authorized to remove at his own expense, fences or other improvements belonging to him.

Fifth—The United States of America agrees to assign to the said first party its rights to the rents and profits that may be derived from such part or portion of said lands that are now occupied by tenants or other occupants, until such time as they may be compelled to vacate on account of the inundation of said lands, and in consideration thereof, the said first party undertakes to see that the said tenants and occupants shall remove their houses and other movable improvements without any claim for damages against the said second party."

It is the contention of Counsel for the United States that the contract of July 11, 1906, is ratified and continued in force by the deed of May 1, 1909, and that the clauses quoted indicate, so far as occupiers on the land are concerned, the specific intent of the covenant of warranty. If these contentions are sustained, they may have an important bearing upon the obligations assumed by the vendor, but it is not necessary for the Commission to consider in this connection the relative rights and obligations of grantor and grantee. Certain claims have been presented, and the only question before the Commission is whether awards may be made in these cases.

Whatever may have been the relationship created and now subsisting between the parties to this agreement, the Commission is of the opinion that from the time the United States acquired the title to the property by deed of May 1, 1909, the status of third persons who had acquired an interest in the land, as occupiers of the same, was not affected by the terms of the agreement of July 11, 1908.

The Commission has, therefore, reached the conclusion that whatever rights the United States may possess against the grantors, growing out of the deed of May 1, 1909, and the preceding agreement of July 11, 1906; those persons who have acquired, prior to the date of said deed, and interest in, or a right to, compensation for improvements on that portion of the estate of Bailamonos Sur covered by the said deed, may assert such right or interest against the United States, and that it is within the jurisdiction of the Commission to make awards in proper cases.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Additional Awards.

The following awards have been made by the Joint Land Commission since last report:

Award No. 14. In the matter of the claim of Marco Antonio and Tomas Posada—To Marco Antonio Posada and Tomas Posada in equal shares, for the settlement of all rights, claims, or other interests in all growing crops, fruit trees and buildings, and all other improvements of every kind, and claims in the land which they occupy, located near the town of Gorgona, to the south of the road leading from Gorgona to Matichin, but excluding property in the town of Gorgona, \$3,500.

Award No. 15. In the matter of the claims of occupiers located in the area comprised between Gatun and Gamboa, and east of the Canal prism—To the following owners of improvements of every kind, and all other rights and claims in land located as above described: Baldomero Acosta, \$170; Clementina Acosta, \$100; Francisco Acosta, \$75; Jules Amable, \$300; José Vicente Barcasnegro, \$125; Zachia Barrett, \$150; William Brown, \$800; Thomas Carter, \$350; Sergio Cuervo, \$45; Charles R. Grant, \$400; George Hamilton, \$125; Samuel Hilton, \$50; Joseph Lozier (Logie), \$125; Julian Martinez, \$125; Antonio Silva, \$50; Boque Zalas, \$125. Total, \$3,115.

DARIEN RADIO STATION.

New High Power Plant will Communicate with Washington Direct.

Construction is to begin shortly on the large Naval radio station at Caimito, to be known as the Darien Radio Station. This is to be a 100-kilowatt plant, of the same power as the Arlington station, near Washington. In the size of its towers it will exceed the latter; all of the three masts will be 600 feet high, whereas at Arlington one of the towers is 600 feet in height, and two are 450 feet high. The bases of the towers will be about 180 feet above sealevel, and they will be arranged in a triangle, approximately 900 feet on a side. The sending and receiving radius will be nominally 3,000 miles, so that communication may be held direct with the Arlington station, instead of by way of Key West, as at present. The station will be able to "talk" to San Francisco, 2,785 miles away by air line. The present stations at Colon and Balboa will be continued in use, to handle messages for ships using the Canal, and the Caimito station will be used exclusively for official business of the Government, principally as a relay station for communicating with ships of the Navy in southern waters. It will be able to send messages as far as Valdivia, 421 miles south of Valparaiso; and, on the Atlantic side of South America, as far down as Buenos Aires. It could reach a vessel anywhere along the eastern coast of the United States, or midway between New York and Gibraltar, on the Mediterranean route; in approximately east and west lines, it could communicate with the island of St. Vincent, 500 miles west of Africa. In sending, the station will use the Poulsen wireless apparatus, employing sustained oscillations, considered an improvement on the spark method. Situated between the Canal and the Panama railroad, its antenna will span an arm of Gatun Lake. The water will afford good electrical grounding, and furnish the waves a good "grip" in starting. The Federal Company, which is operating stations along the west coast of North America, has the contract for furnishing the apparatus. The Navy Department has authorized the Isthmian Canal Commission to construct the following buildings, at estimated costs as shown: Power house, \$7,800; operating buildings, \$4,600; quarters for operators, \$7,600; total, \$20,000. The Penn Bridge Company is the contractor for the towers; the concrete footings for them will be installed by the Canal Commission. Forces of the Quartermaster's Department will have charge of the work to be done by the Commission. Lieut. R. S. Crenshaw, U. S. Navy, is stationed on the Isthmus in charge of radio stations.

Board of Appraisal.

A board of appraisal has been appointed to fix the value, preparatory to a sale, of buildings and equipment that have become obsolete, or are no longer necessary in connection with the Canal work. The members are H. S. Farish, chairman; C. L. Parker, and C. T. Cushman.

The board meets once a week, and all matters properly coming before it will be disposed of at these meetings. Arrangements have been made whereby all requests for appraisal of material in stock, or in the obsolete storehouse, will be forwarded to the board through the depot quartermaster, while all requests for appraisal of equipment or buildings will

come through the Chief Quartermaster. The depot quartermaster has been instructed to procure the necessary information on requests for appraisal made of him in advance, in order that the board can take intelligent action at its sessions. In case articles are at points other than the depot, the board is to be furnished with definite information as to location, so that there may be no delay in inspection. The depot quartermaster has been advised that he is expected to furnish the necessary clerical work for the proper keeping of records of the minutes of each meeting, and to see that all papers are properly filed. It has been found that the work of the board will require more time than was first anticipated, and that as the Canal work draws to a close, the number of appraisals will increase. On this account, and in view of the fact that all of the members of the board have their time taken up with other work, the making of appraisals at other times than the regular meetings is to be reduced to a minimum. Every item appraised is to be inspected by some member of the board, and in some instances inspection will probably require the presence of the entire board.

Panama Tramways Ready for Service.

The Panama Tramways Company will open its Central Avenue line to the public on August 1, at 2 p. m. The service will be, as follows: Cars will leave the National Palace every 10 minutes for Hotel Tivoli and Ancon Hospital station, and *vice versa*. The fare will be five cents, United States currency, between any two points on the line in one direction only. Each person is expected to have the proper amount of fare ready when boarding car as the conductor will have no access to the money, and will not be obliged to give change. To avoid dispute, conductors are supposed to see the coin before it is deposited in the fare box. Passengers will be required to board the car by the left hand rear door and leave by the front door.

The following regulations have been issued:

1. No disorderly or otherwise obnoxious person, whether, or not, under the influence of liquor, will be allowed to board the cars.
2. No person suffering from any contagious or infectious disease, or whose clothing is in such a state that it might prove objectionable to other passengers, will be admitted into the cars.
3. Smoking and spitting in the cars is strictly prohibited.
4. No dogs, or other animals, nor birds, will be permitted within the cars.

After the opening day, the cars will run on the Central Avenue line in accordance with the following schedule:

	Week days	Sundays and holidays
	A. M.	A. M.
First car from National Palace for Ancon.....	5.40	6.40
	P. M.	P. M.
Last car from National Palace for Ancon.....	11.30	11.30
	A. M.	A. M.
First car from Ancon for National Palace.....	5.55	6.55
	P. M.	P. M.
Last car from Ancon for National Palace.....	11.45	11.45

As soon as possible, there will be a formal opening ceremony, immediately after which all lines will be thrown open to the public.

Wandering Herd.

A meeting of the Wandering Herd will be held at Empire, Sunday, August 3, at 8.30

a. m., to form plans for a Labor Day outing. J. H. KEEFE, President.

PERSONAL.

Maj. Gen. George W. Davis, U. S. A., (retired), the first head of the Canal Zone Government, accompanied by his daughter, Miss Elsie Davis, is spending a few days on the Isthmus. They are at the Hotel Tivoli.

Mr. Joseph Bucklin Bishop, accompanied by his wife, son, and daughter, returned from his annual leave on the *Ancon*, which docked at Cristobal on Tuesday, July 29.

Congressmen Lincoln Dixon of Indiana, accompanied by his son, and Alfred G. Allen of Ohio, accompanied by Mrs. Allen, have been viewing the Canal, arriving on the *Colon* on Thursday, July 24.

Justice W. H. Jackson, accompanied by his family, returned from his annual leave, on the *Metapan*, on Wednesday, July 23.

Progress on Permanent Shops.

During the past week the forces of the United States Steel Products Company at Balboa have been placing the roof trusses for the permanent machine shop, building No. 1, in addition to driving the finishing rivets for the framework of the planing mill and the foundry. At the pattern storage building, steel erection is temporarily at a halt, while forces of the Commission are laying the reinforced concrete ground floor. The main columns for the steel shed, building No. 3, adjoining the machine shop, have been erected and roofwork will follow the completion of that for the machine shop. The steel for the general storehouse, the largest of the buildings, with a floor space of 96,000 square feet, has arrived on the Isthmus, and tracks have been laid to the site, so that erection can begin as soon as forces and equipment can be spared from the work now under way. Forces of the Second Division are completing the foundation of this building by the construction of heavy longitudinal and transverse beams of reinforced concrete, resting on the clusters of piles, which are capped with concrete blocks.

The installation of machinery in the planing mill, moved from Gorgona shops, continues; the traveling planer, the circular cross-cutting and rip saws, and several shapers have been in service for the past week. These machines are belt-driven, from motors set on temporary wooden bases; most of them will be direct-connected to new motors, set on adjacent concrete bases. The motors are ordered from the United States, and delivery is expected within a few weeks.

Obituary.

Robert Moody Patterson, a white American, at one time employed by the Mechanical Division under the alias of John Patterson, died at Ancon Hospital on Monday, July 21. He was 41 years of age, unmarried, and had been on the Isthmus since August 31, 1911, coming here from Guatemala. His nephew, Walter Patterson, resides at No. 1474 Washington street, Roxbury, Mass.

The death of Roland Lord, an Englishman, nonemployee, who has been on the Isthmus for the past 18 months, coming here from Valparaiso, Chile, occurred at Ancon Hospital on Wednesday, July 23. He was about 50 years of age, and was married.

SOCIAL LIFE OF THE ZONE.

Church Notes.

The Woman's Auxiliary to the Gatun Christian League completed six months of activity on July 16. At a meeting held on Thursday, July 18, there was an election of officers, the following being chosen; President, Mrs. G. Borse; vice-president, Mrs. Gilbert; secretary, Mrs. E. J. Feild, reelected; devotional leader, Mrs. Annie Hill, reelected. A review of the work of the league, which was organized on January 16, shows that there has been a steady increase in membership, and that the organization has been of assistance to the Christian League in contributing to the chapel improvements, and caring for the preparation of the chapel for the Sunday services. By various means, the league has raised \$109.75; over \$40 of this money has been spent in the chapel. The league meets in the chapel on the first and third Thursdays in each month.

The Rev. H. R. Carson, chaplain of Ancon Hospital and rector of St. Luke's hospital chapel, has been granted an extension of leave, and is due to arrive on the Isthmus on Monday, August 4. Regular services at St. Luke's chapel will be resumed on the Sunday following, August 10. The Sunday school will continue as usual every Sunday at 9 o'clock. Notice of the resumption of services at St. Mary's church, Empire, and the monthly celebration of the Holy Communion at Culebra will be given in THE CANAL RECORD.

Some of the young people of Empire have organized a Christian Endeavor Society, and will hold meetings at the chapel on Sunday mornings in place of those held hitherto under the Christian League chaplain, the Rev. A. A. Nellis. A meeting was held in the chapel on Sunday morning, July 20, under the temporary chairmanship of Mr. Robert Browning, and the permanent organization was effected on Tuesday evening, July 22. The following officers were chosen: President, Mr. Warren H. Barrett; vice-president, Miss Mary A. Smith; secretary, Mrs. Frank Peck; treasurer, Mr. David Johnson. The present enrollment is 16. The executive committee is planning to hold an informal reception in the first week in August.

The rite of confirmation will be administered at St. Ferdinand's Roman Catholic Church, Empire, on Sunday, August 17. The third in the series of monthly euchre parties under the auspices of the Altar Society will be held in the parish house on Saturday evening, August 9.

Isthmian Sunday Schools.

The quarterly meeting of the Isthmian Sunday School Association was held at the Commission chapel at Empire on Sunday afternoon, July 13. There were present, besides a number of visitors, representatives from the federated Sunday schools in the Canal Zone, as follows: Panama, Methodist Episcopal, six; East Balboa, one; Corozal, four; Pedro Miguel, six; Paraiso, two; Culebra, 10; Empire, 42; Las Cascadas, six; Cristobal, six; Porto Bello, one. The reports indicated a good Sunday school spirit, and in spite of the removals of families from one village to another, the enthusiasm and activity of the superintendents and directors of the schools enable them to keep the work up to a high standard.

The schools at Gorgona and Bas Obispo have been abandoned, but there has been a

subsequent increase in the enrollment of the schools at Balboa, Empire, Cristobal, and Corozal.

The convention was opened with congregational singing, followed by devotional exercises, after which routine business was taken up. The musical features of the program were: Solo, by Mr. W. E. Hoffman, a vocal duet by Mr. and Mrs. George R. D. Kramer, and a selection by the Sunday school quartet of the Panama school. The organ, which was returned to the association on the closing of the Sunday school at old Balboa, was reported to be in use by the primary room of the Cristobal school, which hold its sessions in a room in the courthouse. The president announced that the petition of the association for a building for Union Sunday school uses in the permanent village of Balboa has been favorably received, and further, that he has had the assurance that a playground for the children of the village will be provided.

Mr. Page, superintendent of the Sunday school at Porto Bello, made an address on "Discipline, and the power of example." In his address, on "Coming and going," Mr. Kromer of Cristobal, made several practical suggestions in regard to the grading of the pupils transferred to the schools from other villages; of constant care in looking out for these children; in advertising, and in keeping a record of the class work and attendance of each pupil.

Mr. J. M. Weaver on behalf of the association read a letter expressing the good wishes of the members to their president, the Rev. A. A. Nellis, who has left the Isthmus. Mr. Nellis had been at the head of the association since his arrival on the Isthmus in 1910.

The statistics for the past quarter are, as follows:

Cristobal—Enrollment, 294; children, 183, adults, 41; cradle roll, 70; average attendance, 158. Graded lessons are used. A contribution of \$5 is sent monthly to foreign missions.

Gatun—Average attendance, 70. The school reported three classes perfect in attendance for the quarter.

Las Cascadas—Enrollment, 85; children, 60, adults, 25; average attendance, 64.

Empire—Enrollment, 238; children, 182, adults, 56; cradle roll, 20; average attendance, estimated at 130, but the figures are not certified. International graded lessons are used. The school has contributed \$100 to the Christian league during the quarter. The men's Bible class, recently instituted, has a healthy membership.

Culebra—Enrollment, 85; adults, 20; average attendance, 64; home department, 15; cradle roll, 30. International graded lessons are used. The increase in the average attendance for the past three years has been, as follows: 1910, sixty-six; 1911, sixty-two; 1912, sixty-one.

Paraiso—Enrollment, 43; adults, 22; average attendance, 30.

Pedro Miguel—Enrollment, 30; adults, 10; average attendance, 26.

Panama—Enrollment, 60; adults, 15; average attendance, 49; men's Bible class, 18.

East Balboa—Enrollment, 14; adults, two; cradle roll, two; average attendance, 11.

Corozal—Enrollment, 55; average attendance, 46.

Porto Bello—Enrollment, 36; children, 28, adults, 8; average attendance, 33.

The annual election of officers resulted, as follows: President, J. M. Weaver, Cristobal;

vice-president, J. F. Warner, Culebra; secretary, W. H. Kromer, Cristobal; treasurer, W. E. Hoffman, Empire.

Ancon Study Club to Revise Library System

The Ancon Study Club has arranged for a revision of its library system, and the meeting on Thursday, July 31, will be devoted to the explanation of the system to be adopted, and a preliminary classification of the books. At the meeting, the reading of papers on current events will be resumed. The fourth volume in the study of American history was completed at the reading on July 24.

Playground for Seawall Methodist Church.

The members of the Woman's Foreign Missionary Society of the Methodist Episcopal Church, Panama, are making arrangements to place swings and exercising bars in the school yard of the mission school on the seawall. The only playground for the children of the school at present is the small patio in the rear of the church building, therefore, the installation of suitable playground equipment will be welcome.

Magazines for Canal Zone Penitentiary.

Back numbers of magazines, or whole volumes in good condition, would be appreciated at the Canal Zone penitentiary. The district quartermaster at any station will take charge of the forwarding of such magazines as may be sent for this purpose without charge to the sender.

Grand Consistory of Louisiana.

The Grand Consistory of Louisiana will confer the degrees from the fourth to the thirty-second, inclusive, at Ancon Hall, on Friday night, August 1, at 7.30 p. m. Work will be continuous during Saturday and Saturday night, and Sunday and Sunday night. Applicants are requested to take notice.

W. EDGAR PARKER, 32d°

S. H. MARCUSE, 32d°

Representing the Grand Master of Kadosh for the State of Louisiana.

Programs for Souvenirs.

Any person desiring extra copies of the Fourth of July programs as souvenirs can procure same by addressing Printing Plant, Mount Hope depot, Cristobal, C. Z.

Knights of Pythias.

Lock City Lodge, No. 5, Knights of Pythias, will hold a dance at the Gatun clubhouse on August 9. Music will be furnished by an orchestra from the Tenth Infantry. An admission charge has been fixed to defray expenses.

Missing Man.

Any one having information as to the whereabouts of Joseph P. McGiff, a former employe on the Isthmus of the American Bridge Company, is requested to notify the office of the Chairman, Culebra.

In a note in THE CANAL RECORD of last week on the decrease of the West Indian labor force, it was stated, "The contract laborers will be repatriated on request." The employment contract stipulates that return transportation will be furnished only to those who have worked at least 500 days.

AUTOMOBILE TARIFF.

Schedule of Rates for Transporting Passengers Over Canal Zone Streets and Roads.

ANCON, C. Z., July 10, 1913.

Under the authority vested in me by the Ordinance enacted by the Isthmian Canal Commission on August 25, 1910, and approved by the Secretary of War on December 3, 1910, I hereby prescribe the following rates for the transportation of passengers by automobile or other motor vehicle of similar construction over the streets and roads of the Canal Zone.

Any person who shall charge any amount in excess of the rates herein prescribed, or any person who shall fail or refuse to pay the duly prescribed rate for transportation shall be punished by a fine not to exceed twenty five dollars (\$25). (Sections 4 and 5 of Ordinance No. 21.)

A rate different from that herein prescribed may, however, be made and charged, if the parties to the transaction agree thereon. In case of any dispute, the duly prescribed rate shall prevail.

Section 6 of Ordinance No. 19 requires that all motor vehicles shall, when being operated on any of the Canal Zone streets or roads, between the hours of 6 p. m. and 5 a. m., carry and prominently display lights, as follows: Automobiles, or motor vehicles of similar construction, two bright front or headlights, one on either side, and one red light at the rear.

This tariff of rates is made reciprocal between points in the Canal Zone and the city of Panama by a Resolution adopted by the Municipal Council of Panama on April 28, 1913, and becomes effective in the Canal Zone following its publication in two consecutive issues of THE CANAL RECORD.

GEO. W. GOETHALS, Chairman,
In charge of Department of Civil Administration.

Automobile Tariff Between Points in the Canal Zone and the City of Panama.

RATES BY THE HOUR.

(All rates in United States Currency.)

Capacity of car.*	For first hour.	For each hour thereafter.
5 passengers.....	\$5.00	\$4.00
6 passengers.....	6.00	5.00
7 passengers.....	7.00	6.00

*Five, six, and seven-passenger cars are those having a normal seating capacity for five, six, and seven passengers, respectively, including the chauffeur.

For cars having a seating capacity less than that above indicated the rates are not to exceed \$1 U. S. currency per hour for each person for which the car has a normal seating capacity, including the chauffeur.

For any car having a normal seating capacity of more than seven passengers, the charge shall be computed for the first hour at the rate of \$1, U. S. currency, for each person for which such car has a normal seating capacity, including the chauffeur, and for each hour thereafter \$1 less than the first hour rate for the car.

COMPUTATION OF TIME.

Time lost in breakdowns, the making of repairs and other stops for which passengers are not responsible, shall not be charged against passengers.

Where cars are ordered from garages in the cities of Panama and Ancon for service to begin in said cities, the time upon which the hourly rate shall be computed shall begin when the car leaves the point where it is boarded by the passenger or passengers, and the time shall be deemed to end when the car returns to such point of original departure or any other point designated by the passenger or passengers, except where cars are ordered to be at a designated place at a certain time, in which case the time shall start from such specified hour.

Where cars are ordered from garages in the cities of Panama and Ancon for use outside of said cities, time for which charge may be made at the hourly rate shall begin when the car leaves the garage.

For fractional parts of an hour the proportionate part of the hourly rate will be charged.

Whenever any car is employed at the hourly rate and the passengers leave the car at some point or points other than the place of departure, the time which should be consumed by the car in returning direct to the place of departure, or to such other point as may be agreed on, shall be included in the time to be charged for.

RATES BETWEEN LOCAL POINTS.

Where automobiles engage in the business of carrying one or more passengers between the points shown in the following table, and such automobiles are not hired upon an hourly basis, the charges for transportation furnished between such points shall not be in excess of those hereinafter prescribed.

PANAMA—ANCON—BALBOA.

Between any point in	And	United States currency
Ancon or Panama	Any other point in Ancon (outside of hospital reservation) or Panama. One way—For each person....	\$0 50
Ancon or Panama	Balboa Docks and return: 5-passenger car.....	3.50
	7-passenger car.....	5.00
	No reduction for one way.	
Ancon or Panama	Old Panama and return: 5-passenger car.....	5.00
	7-passenger car.....	7.00

NOTE.—The rate to Old Panama and return is that above shown, provided the time consumed does not exceed one (1) hour, in which case the charge shall be computed upon the hourly basis.

Canal Zone Automobile Tariff.

LOCAL POINT RATES FOR CULEBRA, EMPIRE, AND LAS CASCADAS.

Between	And any point in	U. S. currency. One way.
Culebra (Administration building and environs).	Empire.....	For each passenger. .75
Culebra, (Railroad station)...	Empire.....	.50
Empire.....	Las Cascadas.....	.50

NOTE.—The rates by the hour, as well as the rules governing the computation of time, shall be the same as those prescribed in the Automobile Tariff between points in the Canal Zone and the city of Panama.

Approved:

GEO. W. GOETHALS, Chairman,
In charge of Department of Civil Administration.

ANCON, C. Z., July 10, 1913.

Under the authority vested in me by the Ordinance enacted by the Isthmian Canal Commission on August 25, 1910, and approved by the Secretary of War on December 3, 1910, I hereby prescribe the following rates for the transportation of passengers by automobile or other motor vehicle of similar construction over the streets and roads of the Canal Zone.

Any person who shall charge any amount in excess of the rates herein prescribed, or any person who shall fail or refuse to pay the duly prescribed rate for transportation received, is guilty of a misdemeanor, and upon conviction shall be punished by a fine not to exceed twenty-five dollars (\$25). (Sections 4 and 5 of Ordinance No. 21.)

A rate different from that herein prescribed may, however, be made and charged, if the parties to the transaction agree thereon. In case of any dispute, the duly prescribed rate shall prevail.

Section 6 of Ordinance No. 19 requires that all motor vehicles shall, when being operated on any of the Canal Zone streets or roads, between the hours of 6 p. m. and 5 a. m., carry and prominently display lights, as follows: Automobiles, or motor vehicles of similar construction, two bright front or headlights, one on either side and one red light at the rear.

This tariff of rates is made reciprocal between points in the Canal Zone and the city of Colon by Ordinance No. 25, enacted by the Municipal Council of Colon on June 27, 1913, and becomes effective in the Canal Zone after publication in two consecutive issues of THE CANAL RECORD.

GEO. W. GOETHALS, Chairman,
In charge of Department of Civil Administration.

Automobile Tariff Between Points in the Canal Zone and the City of Colon.

RATES BY THE HOUR.

(All rates in United States Currency.)

Capacity of car.*	For first hour.	For each hour thereafter.
5 passengers.....	\$5.00	\$4.00
6 passengers.....	6.00	5.00
7 passengers.....	7.00	6.00

*Five, six, and seven-passenger cars are those having a normal seating capacity for five, six, and seven passengers, respectively, including the chauffeur.

For cars having a seating capacity less than that above indicated the rates are not to exceed \$1 U. S. Currency, per hour for each person for which the car has a normal seating capacity, including the chauffeur.

For any car having a normal seating capacity of more than seven passengers, the charge shall be computed

for the first hour at the rate of \$1 U. S. Currency, for each person for which such car has a normal seating capacity, including the chauffeur, and for each hour thereafter \$1 U. S. Currency, less than the first hour rate for the car.

COMPUTATION OF TIME

Time lost in breakdowns, the making of repairs and other stops for which passengers are not responsible, shall not be charged against passengers.

Where cars are ordered from garages in the cities of Colon and Cristobal for service to begin in said cities, the time upon which the hourly rate shall be computed shall begin when the car leaves the point where it is boarded by passenger or passengers, and the time shall be deemed to end when the car returns to such point of original departure or any other point designated by the passenger or passengers, except where cars are ordered to be at a designated place at a certain time, in which case the time shall start from such specified hour.

Where cars are ordered from garages in the cities of Colon and Cristobal for use outside of said cities, the time for which charge may be made at the hourly rate shall begin when the car leaves the garage.

For fractional parts of an hour the proportionate part of the hourly rate will be charged.

Whenever any car is employed at the hourly rate and the passengers leave the car at some point or points other than the place of departure, the time which should be consumed by the car in returning direct to the place of departure, or to such other point as may be agreed upon, shall be included in the time to be charged for.

RATES BETWEEN LOCAL POINTS.

Where automobiles engage in the business of carrying one or more passengers between the points shown in the following tables, and such automobiles are not hired upon an hourly basis, the charges for transportation furnished between such points shall not be in excess of those hereinafter prescribed.

CRISTOBAL—COLON—GATUN.

Between any point in	And	United States currency.
Cristobal or Colon.	Any other point in Colon or Cristobal. One way—For each passenger.....	\$0.50
Cristobal or Colon	Gatun and return* 5-passenger car.....	\$6.00
	7-passenger car.....	8.00
	No reduction for one way.	

*With privilege of 5-minute stop for benefit of passengers.

Sale of Brass Borings.

MOUNT HOPE, C. Z., July 28, 1913.

Sealed bids will be received at the office of the Depot Quartermaster, Mount Hope, until 3 p. m., August 8, 1913, when they will be opened in the presence of attending bidders, for approximately 49,200 pounds of brass borings now stored at this depot. Borings will be delivered f. o. b. docks Colon or Panama in present containers. This material may be seen on any working day between the hours of 7 and 11 a. m., and 1 and 5 p. m. The right is reserved to reject any or all bids. Bids must be plainly marked "Proposal for purchase of brass borings, to be opened August 8, 1913," and addressed to

C. NIXON,
Depot Quartermaster.

Sale of Towboat "Exotic."

OFFICE OF DEPOT QUARTERMASTER.

MOUNT HOPE, C. Z., June 21, 1913.

Sealed bids will be received at this office until 2 p. m., Tuesday, September 2, 1913, for the steel-hull, stern-wheel towboat *Exotic*, built for the Commission in 1908 by Pusey and Jones, Wilmington, Del., at an approximate cost of \$40,000.

Gross tonnage, 150; two tandem compound engines, 7-inch by 14-inch, 48-inch stroke; two horizontal tubular boilers, Mississippi River type, 44-inches by 190-inches; indicated horsepower, 70; equipped with boiler feed pumps; boat equipped with capstan, steam steering gear, etc.; retired from service in 1911.

This boat can be inspected and further particulars obtained on any working day between 7 and 11 a. m., and 1 and 5 p. m., upon application at this office; any further information desired by intending bidders at a distance will be furnished by letter on request. Right is reserved to reject any or all bids.

Bids should be addressed to the Depot Quartermaster, Mount Hope, Canal Zone, plainly marked, "Proposal to purchase towboat *Exotic*, to be opened September 2, 1913."

C. NIXON,
Depot Quartermaster.

OFFICIAL CIRCULARS.

Appointment of Disbursing Officer.

CULEBRA, C. Z., July 24, 1913.

CIRCULAR No. 491:

Mr. John H. McLean is hereby appointed Disbursing Officer of the Isthmian Canal Commission, effective August 1, 1913, vice Mr. Edward J. Williams, resigned. The cash, books, and other property in charge of the Disbursing Officer will be turned over to Mr. McLean on that date.

In order that Mr. Williams may be given time to settle his accounts, his resignation will become effective at the close of business on August 15, 1913.

GEO. W. GOETHALS.
Chairman and Chief Engineer.

Appointments in Mechanical Division.

CULEBRA, C. Z., July 19, 1913.

CIRCULAR No. 183-X.

Mr. J. J. Eason is hereby appointed assistant superintendent of the Mechanical Division, effective July 21, 1913, and will report for duty to the inspector of shops.

Mr. C. W. Fisher, Jr., Naval Constructor, United States Navy, is appointed superintendent of erection in the Mechanical Division, effective July 19, 1913, and will report for duty to the assistant superintendent thereof.

GEO. W. GOETHALS.
Chairman and Chief Engineer.

Silver Employees' Service Slips.

CULEBRA, C. Z., July 23, 1913.

CIRCULAR No. 229-Z-3.

In the future, in every case where a silver employee above the 10-cent grade voluntarily quits, silver employees' service slip (C. E. 262-2) must show whether the employee quit with or without the permission of his superior. If the employee quits with the permission of his superior, and the service slip so states, he may be reemployed at the same rating received under the previous employment. If he quits without permission, he must be reemployed at a lower rating and serve at least three months before being promoted to a higher grade.

GEO. W. GOETHALS.
Chairman and Chief Engineer.

No Reduction on Children's Half-Rate Tickets on United Fruit Company's Ships.

CULEBRA, C. Z., July 11, 1913.

CIRCULAR No. 175-N.

The local agent of the United Fruit Company advises that, effective July 12, 1913, no reduction will be made on half-rate tickets issued to the children of employees of the Isthmian Canal Commission, and that thereafter the reduced rate will apply to adults only.

GEO. W. GOETHALS.
Chairman and Chief Engineer.

Invoicing of Accrued Vacation Leave.

CULEBRA, C. Z., July 26, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS.

When an employee is transferred from one department or division to another, the department or division transferring the employee will be invoiced by the department or division requesting the transfer with the amount of accrued vacation leave due the employee. This information will be obtained from the transfer slip furnished at the time of transfer. Bills should be rendered monthly covering all transfers during the month.

This method is effective on and after July 1, 1913, and cancels the existing order, which requires that accumulated leave be assumed by the department or division to which an employee is transferred.

GEO. W. GOETHALS.
Chairman and Chief Engineer.

Appointment of Chief Dispatcher, P. R. R.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT.
COLON, R. P., July 28, 1913.

CIRCULAR No. 242;

All concerned—Effective August 1, 1913, Mr. C. W. Northrop is appointed chief dispatcher of the Panama railroad.

JOHN D. PATTERSON.
General Superintendent.

Cash Sales of Commissary and Hotel Books.

CRISTOBAL, C. Z., July 28, 1913.

Effective August 1, the sale of commissary and hotel books for cash will be discontinued in the commissary stores at Gatun, Bas Obispo, Las Cascadas, Empire, Culebra, and Corozal, and will be taken over by the

station agents at these points. Books will be sold daily during the hours the stations are open for business.

Approved: EUGENE T. WILSON,
GEO. W. GOETHALS, Subsisistence Officer.
Chairman and Chief Engineer.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal and Colon during the two weeks ending July 26:

Carrillo, July 13, from New York, with 570 pieces steel ties, 45 bundles splice bars, 21 kegs bolts and clips, for Second Division; 34 cases electrical material, for First Division; 87 kegs rivets, 304 pieces structural steel, for Panama Railroad Company; 1,084 sacks oats, 100 bundles scoop shovels, for stock.

Parissima, July 15, from New Orleans, with 113 packages castings, 679 pieces white oak lumber, for Mechanical Division; 523 barrels paving brick, 297 pieces cross-ties, for Panama Railroad Company; 150 sacks feed, 549 pieces cross-ties, 80 pieces lumber, 64 pieces piling, 513 bales prairie hay, for stock.

Cristobal, July 14, from New York, with 81,433 sacks cement, 487 pieces structural steel, 190 kegs rivets, 70 cases rivets, for stock; 475 pieces boiler tubes, for Sixth Division; 158 bundles steel bars, for fortifications; 100 pieces steel plates, 33 kegs bolts and rivets for Second Division; and a miscellaneous cargo, the whole consisting of 83,241 packages, weighing 4,400 tons.

Panama, July 14, from New York, with 15 barrels muralie, 49 cases drift bolts, for Atlantic Division; 90 bundles steel bars, 107 pieces steel plates, for Second Division; 111 cases drift bolts, for Fifth Division, 10 pieces car castings, 102 cases car castings, 15 cases insulating tape, 19 coils copper wire, 11 cases shades, for Mechanical Division; 10 cases electrical machinery, 11 reels copper wire, 1,200 pieces structural steel, for First Division; 156 pieces structural steel, 404 bundles galvanized pipe, 39 barrels coal tar, 80 cases lye, 12 casks glassware, 63 cases hexagonal nuts, 50 bundles sheet iron, 2,072 kegs wire nails, for stock; and a miscellaneous cargo, the whole consisting of 5,200 packages, weighing 550 tons.

Santa Maria, July 16, from New York, with 27 pieces steel columns, for Panama Railroad Company; 55 bundles steel bars, for fortifications; 173 kegs bolts and nuts, 14 cases boiler lagging, 15 packages hardware, for stock.

Nicosian, July 17, from Liverpool, with 76 pieces bucket links, five pieces dredge buckets, for Sixth Division; 50 pieces dipper teeth, for stock.

Turrialba, July 17, from New Orleans, with 120 barrels paving brick, for Panama Railroad Company; 117 pieces lumber, for Mechanical Division; 53 pieces piling, 843 pieces cross-ties, 1,435 pieces pipe and fittings, 105 cases paint, 1,845 pieces lumber, for stock.

Allianca, July 20, from New York, with 277 pieces car castings, 7 barrels car castings, 150 barrels sand, 18 cases paint, 41 reels copper wire, 9 barrels batteries, for Mechanical Division; 16 cases linoleum, for Sanitary Department; 445 pigs lead, 20 barrels molasses, 10 barrels asphalt, 100 cases Sapolio, 22 cases copper tacks, 45 bales rubber hose, 20 barrels lubricant, 25 cases lamp chimneys, 46 pieces I-beams, 32 packages pipe-fittings, 34 bundles shovels, 1,440 pieces bar iron, for stock; and a miscellaneous cargo, the whole consisting of 2,900 packages, weighing 185 tons.

Pastores, July 20, from New York, with 24 reels electric cable, 23 cases electric machinery, for First Division; 17 pieces steel columns, for Panama Railroad Company; 225 cases bolts, 58 sacks tie plugs, 50 cases varnish, 25 cases rubber hose, for stock.

Hafnia, July 21, from Thompson's Point, N. J., with 12,000 cases dynamite, for stock.

Carl Schurz, July 21, from New York, with 12 cases machinery, for First Division; 12 cases paper, 10 cases pipe-fittings, 1,060 pieces wrought pipe, for stock.

Catago, July 21, from New Orleans, with 781 barrels paving bricks, 210 pieces switch ties, for Panama Railroad Company; 451 pieces car lumber, for Mechanical Division; 46 pieces piling, 320 bales prairie hay, 372 pieces white oak lumber, 6 cases castings, 432 pieces switch ties, 12,000 pieces yellow pine lumber, for stock.

Metapin, July 23, from New York, with 31 reels electric cable, 1,200 pieces anchor bolts, for First Division; 10 cases insulating compound, for Mechanical Division; 5,000 pieces hollow tile, for Second Division; 9 cases packing, 10 cases copper, 31 barrels rosin, for stock.

Abanquez, July 25, from New Orleans, with 5 cases insulating compound, for Mechanical Division; 237 pieces switch ties, for Panama Railroad Company; 548 pieces yellow pine lumber, for Mechanical Division; 420 pieces lumber, for stock.

Montoso, July 25, from Baltimore, with 2,734 pieces sewer pipe, for stock; 1,316 pieces sewer pipe, for Fortifications; 1,236 pieces steel plates, for Second

Division; 16 pieces castings, for First Division; 432 tons structural steel, for Second Division.

Colon, July 25, from New York, with 26 cases machinery, for Atlantic Division; 42 crates asbestos roofing, for fortifications; 2,703 bags sand, 225 barrels clay, 18 barrels car castings, 331 pieces car castings, 12 pieces steel bars, for Mechanical Division, 13 casks crockery, 40 crates handles, 17 crates reed furniture 150 cases paint, 48 cases picks, 20 cases sal soda, 204 kegs bolts and rivets, 16 crates closet seats, 39 reels wire rope, 950 pieces structural steel, 21 bales oakum, 125 cases bronze wire cloth, 220 drums lubricating oil, 40 cases soap, for stock; 300 bundles galvanized iron conduit, for Mechanical Division; 228 pieces channels, 195 pieces plates and bars, for Second Division; 50 cases electrical machinery, for First Division; and a miscellaneous cargo, the whole consisting of 6,385 packages, weighing 660 tons.

Auction of Hogs at Ancon Hospital Dairy.

ANCON, C. Z., July 23, 1913.

There will be sold at public auction at the Ancon Hospital dairy, Saturday morning August 23, at 10 o'clock, five hogs (barrows) for butchering.

The right to reject any and all bids is reserved.

CHAS. F. MASON,
Superintendent.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The moving picture schedule for the week August 4 to 9 is, as follows: Monday, Empire; Tuesday, Culebra; Wednesday, Cristobal; Thursday, Gatun; Friday, Porto Bello; Saturday, Corozal.

COROZAL.

Moving pictures will be Friday night this week.

A handicap tenpin bowling tournament will be started August 1. Prizes will also be given for high score and for high average during the month.

The highest scores for the week ending July 26 were, as follows:

Tenpins—Bordt, 202, 202, 211; Beall, 207, 208; Emerson, 202; Start, 212; Whiston, 214.

Duckpins—Ryan, 103; Beall, 103.

The Spanish class for boys was started Friday afternoon by Señor Gabino Arandilla A., with four boys present. The class will meet Monday, Wednesday, and Friday afternoons at 3.30 p. m. More scholars will probably join the next class.

The chess club has just completed a preliminary tournament which resulted, as follows:

	Won.	Lost.
Morehead	9½	2½
Sherrard	9	3
Mills	6	6
Garrell	6	6
Fields	5½	6½
Kingsbury	4	8
Kyte	2	10

The championship chess tournament will begin August 1, and end on or before September 15. An entrance fee of \$1 is required of each contestant. The following prizes will be given: First place, medal; second place, chess board and chess men; third place, chess men.

The chess match held on July 19 between Corozal and Culebra resulted, as follows:

Corozal.	Won.	Culebra.	Won.
Connor	2	DuBois	0
Gartrell	2	McClure	0
Hall	2	Hall	0
Sherrard	1	Warner	1
Mills	1	Wilson	1
Morehead	1	Warner	1
Fields	1	Strong	1
Kyte	1	Shropshire	1
Total	11		5

CULEBRA.

The Sunday evening song service was well attended. The program for next Sunday will be announced by bulletin. These services will be held every Sunday evening at 7.30, and a general invitation is extended.

EMPIRE.

In the handball tournament just closed Mr. DeCora won all 13 games. There were 12 men in the tournament.

The gymnasium classes meet twice weekly; a few minutes are spent each night in first aid instructions. All are invited to join the gymnasium activities.

The local ragtime tenpin tournament will close the first of August. All games must be bowled by that date.

All Gorgona men holding membership tickets in the Gorgona Y. M. C. A. are requested to transfer them to the Empire association, providing they hold quarters in Empire.

GORGONA.

The farewell reunion, held on Friday evening, July 25, was attended by the largest number of people ever assembled in the Commission clubhouse. A special train brought many of the old residents of Gorgona from Balboa, Ancon, Corozal, and other villages to which they have been transferred. The entire building was decorated with bunting and palms, and during the evening the Marine band from Camp Elliott played. A program, which had been arranged by the local secretary, included the following numbers: Contralto solo, Mrs. Adolf Faure of Culebra, tenor solo, Mr. W. G. Ross of Empire, Mr. A. B. Dickson, accompanying; piano solo, Mr. C. C. Pearsall of Empire; song and dance by Mr. R. F. J. Cogan; sketch entitled "Three Barbadians," by Messrs. Burmaster, Otis, and Morrison; sketch entitled "Fifteen minutes in China," by Messrs. Aaron and Homer of Gatun. Speeches were made by Mr. W. F. Morrison, Mr. F. G. Swanson, and Secretary George K. R. Kramer. During the informal reception that followed, refreshments were served. Mr. LeRoy Smith, chairman of the executive council of the clubhouse, was chairman of the meeting.

Only 97 people attended the motion picture show on Wednesday evening, but this meant that almost every American, young or old, in town was present. The last

picture entertainment at the clubhouse was held on Monday evening, July 28.

The clubhouse activities are greater at the noon hour than at any other time during the day when all the old Gorgonites come to the building.

If there are any members of the Gorgona association that still have in their possession books belonging to the clubhouse library, the secretary requests that they be turned in at once.

The pool room activities are kept up as usual, but the bowling alleys have not been used very much during the last few weeks, as nearly all the members that were interested in bowling have moved away.

GATUN.

Bowling continues to be the busiest activity at the clubhouse. An average of 175 games a day was bowled during the past week. The standing of the "Lock City" duckpin tournament on Saturday evening, July 26 was, as follows:

Team.	Won.	Lost.	P. C.
McClintic-Marshall Con. Co.			
Field	6	3	.666
McClintic-Marshall Con. Co.			
Office	8	4	.666
First Division	6	3	.666
Atlantic Division	6	3	.666
Lock gate inspectors	3	9	.250
American Bitumastic Enamel Company	1	8	.111

The ten men who stand highest in average so far are, as follows:

Name.	P. C.	Name.	P. C.
Wurster	92.2	Grover	89.7
Wells	92.2	Bellinger	88.6
Barte	91.2	Furlong	87.9
Hodges	91.1	Humphreys	87.5
Claherty	90.6	Madder	87.5

S. M. Bellinger's score of 132 pins is high single game so far in the tournament. It has been decided to award medals to the teams, as follows: First prize, gold medals; second prize, silver medals; third prize, bronze medals. Silver medals will be given to the men having high average and high single game.

Three hundred and twenty-five people attended the motion pictures illustrating the Life of Christ, which were shown on Saturday night, July 26. Mrs. Shivers of Empire played appropriate piano music.

Twenty-five of the latest books of fiction have been ordered from the States.

Several interesting features have already been procured for the "Smoker," which will be held the latter part of August.

Basketball practice has been started at the Gatun clubhouse. Ten men were present on Thursday evening, July 10.

CRISTOBAL.

A number of chess players met on Monday night and organized a local chess club. Mr. D. Wilson was elected president, and Mr. C. L. Salzberg, secretary.

The set of films depicting scenes in the Life of Christ entitled, "From the Manger to the Cross," were shown on Sunday night, July 27. The Union Church united with the Y. M. C. A., and the attendance was 350. Music was furnished by Mr. C. C. Pearsall.

Mr. Wm. E. Burrell, who has been connected with the Cristobal Y. M. C. A. since May, 1910, first, as physical director for two years, and afterwards secretary for one year, sails for the United States on Thursday, July 31. Mr. Joseph Page, formerly of Porto Bello, succeeds Mr. Burrell as secretary.

PORTO BELLO.

The attendance at the moving picture entertainments has about doubled during the past ten months.

Rev. Mr. Sobey of New York preached on Sunday night, July 13. Mrs. Cecil Wilkes sang "Only a beam of sunshine."

The moon and an immense bonfire were the illuminations for the second after-dark swim, which was given on July 17. The ladies served coffee and home made cake to over 50 participants.

Mr. and Mrs. Geo. R. D. Kramer, Jr., Mr. and Mrs. Cogan of Gorgona, and Mrs. Fitzpatrick of Corozal gave an entertainment on Saturday night, July 19. Mr. and Mrs. Kramer sang a number of solos. Mr. Kramer gave a bar exhibition, also with Indian clubs. Mr. Cogan sang a number of popular songs. Mrs. Fitzpatrick was the accompanist for the evening, and in addition played two piano solos. Refreshments were served.

On request, the Children's Day entertainment was repeated Sunday night, July 20.

At the conclusion of the moving picture entertainment on Friday night, July 25, a Howard watch and watch fob of Canal stones was presented by the members to Mr. J. A. Page, the retiring secretary, who left to assume charge of the Cristobal clubhouse. Mr. Ad. Hoehne made the presentation speech.

MOVEMENT OF OCEAN VESSELS.

The following is a list of sailings of the Panama Railroad Steamship Company; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and of the United Fruit Company's Line.

Cold Storage Prices.

The following changes have been made in the list of cold storage articles:

Apricots, 15 cents per pound, added to stock.

Peaches, 10 cents per pound, added to stock.

Plums, 10 cents per pound, added to stock.

Sale of Musical Instruments.

MOUNT HOPE, C. Z., July 26, 1913.

Sale of musical instruments and property formerly pertaining to the Isthmian Canal Commission Band is authorized. List includes 14 instruments and cases, music stands, and a quantity of sheet music. All the items can be seen at the storehouse for obsolete material at Mount Hope. Prices will be quoted upon application.

C. NIXON,
Depot Quartermaster.

Sale of Belting.

MOUNT HOPE, C. Z., July 26, 1913.

In the storehouse for obsolete material there is a quantity of belting amounting to 1,304 pounds of better quality, which will be sold at \$.12 per pound, and 3,142 pounds of second quality, which will be sold at \$.08 per pound. Belting can be seen any day at the storehouse at Mount Hope.

C. NIXON,
Depot Quartermaster.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,

Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Wave Action on Limon Bay Shore Line.

On account of the erosion that is taking place on the shore of Limon Bay, immediately to the west of the west channel, it has been decided to construct temporary wing dams, with a view of ascertaining whether this method will provide a sufficient check on the wave action to warrant the construction of permanent rock dams later. A considerable section of the shore at this point has been worn away, and erosion will probably continue unless preventive measures are taken. As the proposed wing dams are an experiment, refuse piling and cheap lumber will be used, so that the entire cost will be only about \$2,000. The dams are expected to hold together for at least a year, and in that time, opportunity will be afforded of studying their effect on the shore line. Should there be a reasonable amount of material deposited inside the dams within the above period, it would indicate that structures of a more permanent character will be all that is necessary to keep the shore from eroding further.

Completing Backfill at Upper End of Gatun Locks.

The core wall extending from the upper end of the west side wall of Gatun Locks into the east end of Gatun Dam has been completed by filling, with about 70 cubic yards of concrete, the gap which had been left for the passage of trains to the lake side of the dam and, formerly, to the upper approach to the locks. The core was built from ground rock, at an average elevation of 15 feet above sealevel, to elevation 92, even with the walls of the upper approach; it is four feet wide at the top, and the gap which was recently filled was about 20 feet wide and 15 feet deep. Following the completion of the wall, forces of the Atlantic Division are dumping red clay into the hollow west of the backfill, where the railroad tracks were, and completing the connection between backfill and dam. The clay is obtained from the west side of the

spillway discharge channel, from the excavation by steamshovels engaged in reducing the lower side of Spillway Hill to evenness with the terreplain of the dam.

On the east side of the upper end of the locks, nine double team scrapers are being used in smoothing the backfill at the 92-foot elevation. It is purposed, by running roads and walks over this site, and planting it in trees and shrubbery, to make it a decorative park. At the upper end the backfill sloping down to the lake is being paved with concrete from the top to a line about 15 feet below the normal level of the lake, in order to protect the fill from the action of the waves. The paving is being laid six inches thick, on an armor of rock about a foot deep, in squares five feet on the side. Each square is provided with a 4½-inch weeper, and is anchored by two 30-inch lengths of 4½-inch iron pipe filled with concrete. This work extends from the offset wall at the lock entrance to the west end of the concrete wharf for small boats, near the railroad station, a distance of about 300 feet. It is laid on a slope slightly greater than one in three, and the surface width of the belt of paving is 45 feet, exclusive of a 6-inch coping, 24 inches wide, running along the top.

Term "Common Laborers' Kitchens" Abolished.

The designation "Common laborers' kitchens" has been dropped by the Subsistence Department, and a consolidation of the accounts of the European laborers' messes and the kitchens has been made, as of July 1, under one head to be known as "Laborers' messes." There have been no common laborers' kitchens maintained in separate buildings for some time past, and, as all of the colored laborers have their food passed out to them from the serving windows of the European laborers' messes, the account is really a distribution, as a steward sees it, between the mess account and the steward's account for each individual mess. Hereafter, it will be considered as so many 40-cent, and so many 27-cent rations served. The kitchens will no longer be known by a number, but the present numbers of the messes will be retained, without using the word "European."

Police to Have Charge of Zone Markets.

The work of inspecting the Canal Zone public markets and slaughter houses was turned over to the Division of Police and Prisons, and placed immediately under the jurisdiction of the Chief of Police, on August 1. Seven markets and one slaughter house are operated in the Zone at the present time. The markets are at Folks River, Gatun, Las Cascadas, Empire, Culebra, Paraiso, and Pedro Miguel. The slaughter house is at Empire. The market at Gorgona was closed, due to the abandonment of the town, on July 15. The force authorized in connection with market operations consists of one inspector

and four foremen. Under the new arrangement, the Division of Police and Prisons will take over this force, and will see that all regulations are complied with. The collection of stall rents, etc., will continue to be made by the district tax collectors.

Record Day's Work in "Pulling" Cable.

The force engaged in "pulling" cable into the conduits at Miraflores Locks established a local record on Monday, July 25, when 7,444 feet of 5-conductor cable and 10,000 feet of 8-conductor cable were "pulled" into the ducts in the center wall of the upper lock, a total of 17,444 feet, or over three miles, of cable in a day of eight hours. This record was made possible by the fact of so little interference during the day by other lock operations.

Marine Barracks.

An Act making appropriations for the naval service for the fiscal year ending June 30, 1914, was approved on March 4, 1913, and included provision for the erection of barracks, quarters, and other buildings for the accommodation of United States Marines stationed on the Isthmus. The amount appropriated for this purpose was \$400,000. The office of the Chairman and Chief Engineer has received advice from Washington that the construction of the buildings has been held up pending the visit of the Secretary of the Navy to the Isthmus.

Hotel Washington Improvements.

Ornamental iron gates are being placed at the entrances to the grounds at the Hotel Washington in Colon. The east gates are already in place. There will be large double gates at the driveway entrance on the south side, and one gate on the west side.

Retirement of Cars to Save Repair Costs.

Fifty-three Lidgerwood cars in the transportation service of the Canal Commission had been retired up to and including July 23, in order to avoid the cost of repairing them. This action has not interfered with the work in any way, as the cars were not required for any other department or division, with the exception of the Panama railroad, which may take over 25 of them for its commercial service. Lidgerwood cars Nos. 969, 1051, 1617, and 1710 will be turned over to the Quartermaster's Department for sale.

Transportation of Material Between Shops.

In order that material may be promptly handled between Gorgona and Empire shops, and the Balboa terminals, the hauling of bad order cars from the Fifth Division and terminal work will be consolidated into a daily train service between Balboa and Gorgona, in charge of Trainmaster Holmes. The train will leave the yardmaster's office at Balboa at 2 p. m., each workday, making a stop at Empire shops. It will leave Gorgona on the return trip about 2.30 p. m. Any material

at the Balboa terminals or Balboa dump destined for Empire or Gorgona shops, will be loaded and turned over to the yardmaster not later than 12 noon each day. All material at Gorgona shops destined for Empire shops, Balboa terminals, Balboa storehouse, and Balboa dump, will be loaded and car placed before 2 p. m. each workday. All

material at Empire shops destined for Gorgona shops, will be loaded and car placed, not later than 1.15 p. m. each workday. This train is to haul castings made at Balboa, to Gorgona and Empire after foundry is installed in the permanent shops. The work of installing the foundry will be begun on August 11.

LABOR FORCE AND QUARTERS IN JUNE.

The force report for June 25 shows the actual working force of the Canal Commission to be 33,213; of the Panama railroad, 5,088, and of the contractors, 3,961, a total effective working force of 42,262 men. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,282, a reduction of 55, as compared with the previous month. A statement of the Canal force, by divisions, follows:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*											Total silver.	Total gold.	Grand total

JOINT LAND COMMISSION.

Opinion on Demurrer to the Jurisdiction of the Commission.

The following opinion has been announced by the Joint Land Commission:

In the matter of the claim of Juan Sotillo, for property in the town of Gorgona, docket No. 131, July 25, 1913.—On June 23, 1913, Counsel for the United States filed a demurrer to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, which claim is for property owned in the town site of Gorgona. In this plea to the jurisdiction of the Commission, Counsel for the United States contends that any award made to the claimant

"Would constitute a departure from the powers delegated to the Joint Land Commission by the high contracting parties, in the convention between the United States of America and the Republic of Panama, ratifications of which were exchanged at Washington on February 26, 1904, in that the claimant has suffered no damage by reason of the grants contained in said convention, or by reason of the operations of the United States of America within the meaning of Article VI of said treaty, as it is shown on the face of the claim filed that the use and occupation of the land upon which the alleged improvements were located arose out of a private agreement, license, or contract between the United States of America and the claimant. "It is denied that this claimant has any rights in hand to the property described in the statement of claim against the United States of America, except such rights as are derived by him under the terms of Isthmian Canal Commission lease No. 4093, cancelled the first day of April, 1911."

Briefly stated, the position taken by the Counsel for the United States that the status of this claimant is determined by the terms of Isthmian Canal Commission lease No. 4093, and that under the terms of such lease no rights could accrue within the contemplation of Article VI of the treaty ratified February 26, 1904. Furthermore, that the rights of this claimant must be adjudged exclusively by the terms of the lease, and that any rights which may have accrued prior to the issuance of such lease are divested by its acceptance and cannot, therefore, receive the consideration of this Commission.

The questions raised by this plea are so important, involving the status of most of the claimants in the town of Gorgona, that it becomes necessary to enter into a detailed analysis of the situation.

The legislation of the United States of Colombia, governing the organization and powers of municipalities, was characterized by a broad spirit of liberality in granting to such municipalities the ownership of land included within the municipal district, and in allowing the local authorities wide discretionary power to sell or to rent the municipal lands thus granted. Provisions to this effect are to be found in the following laws:

- (a) Article No. 3 of Law No. 2 of March 6, 1832.
- (b) Article 177 of Law No. 1 of May 18, 1834.
- (c) Article No. 26 of Law No. 3 of June 13, 1844.
- (d) Article 18 of the Law of October 22, 1855, of the Sovereign State of Panama.
- (e) Articles 1 to 6, inclusive, of the Law, No. 23, of December 31, 1867.
- (f) Articles 238, 240, and 248 of Law No. 149 of December 13, 1888.

Gorgona was recognized as a parochial district prior to 1855. It was organized as a municipal district by the law of September 12, 1855, of the Sovereign State of Panama. From that date, Gorgona enjoyed all the rights and powers granted to municipalities under Colombian law.

In 1886, the town of Gorgona was destroyed by fire. In order to meet the emergency, the civil and military governor of the National Department of Panama, Ramón Santo Domingo Vila, issued the decree of March 16, 1886. This decree, which was intended to facilitate the reconstruction of Gorgona, contains the following provisions:

"Article III. Former occupiers of town lots shall have preference in the granting of permits for the reconstruction of their houses on such lots, or in case it is impossible to grant to them permits for their former locations, owing to the change of of the town plan, new lots, as near as possible to their old locations shall be assigned."

"Article IV. If, ninety days after the granting of a permit, the person to whom such permit has been granted has not undertaken the work of construction the permit shall be deemed to be cancelled."

"Article V. The rights arising out of the granting of a permit cannot be transferred without the approval of the authority granting such permit."

"Article VI. A license for the use of a town lot does not give title to the lot occupied, and such permit must be renewed every five years."

"Article VII. The Municipality of Gorgona shall collect, at the time of the granting of the permit, a fee, which shall not exceed fifty (50) centavos for every square meter of land for which permits have been granted, and an annual rental of forty

(40) centavos per square meter, to be paid quarterly in advance. The revenue from this source shall be applied exclusively to the construction and preservation of the public buildings and barracks in the district of Gorgona."

"Article VIII. The owners of houses which were not destroyed by fire, or which were erected thereafter, shall pay the annual rental referred to in the preceding article, and the owners of such houses are required to file with the authorities of the District of Gorgona a statement as to the area of the town lots which they occupy and the exact boundaries of such lots."

Less than two years after the issuance of this decree (December 3, 1888) the Republic of Colombia enacted a comprehensive law governing the organization and powers of municipalities. This was the law in force at the time of the acquisition of the Canal Zone by the United States. It provides (Art. 248) that the property of the former municipal districts be transferred to the reorganized municipalities. Furthermore, all vacant lands and all lands, of which there were no known owners, if situated within the limits of the municipality, are declared to be the property of the municipality.

This law also clearly recognizes the power of the municipality to alienate town lots within its limits, and, under certain circumstances, makes such alienation mandatory. Article 244 of the act of December 3, 1888, reads, as follows:

"Every town lot belonging to the municipality, which is situated within the limits of the town and which is not necessary for some public use, shall be sold in accordance with established procedure."

In order to protect the rights of those who had, prior to 1888, rented town lots from the municipality, the Colombian Congress passed Law No. 50 of November 6, 1894, which provides, (Article V):

"When town lots belonging to the municipality and situated within its limits are sold, those persons who have erected buildings on such lots shall, all other things being equal, enjoy the preference in the adjudication of such lots. If, however, the owner of the building does not desire to purchase the lot at the highest price bid at public auction, his rights shall be determined by the application of Articles 739, 966, and 970 of the Civil Code."

The three articles of the Civil Code herein referred to provide:

"Art. 739. The owner of land upon which another person, without his knowledge, shall have built, planted, or sowed, shall have a right to make the building, planting, or sowing his own, upon the compensation prescribed in favor of possessors in good or bad faith in the Title of *Revendication*, or to oblige the person who built or planted to pay him a just price for the land with legal interest for all the time he may have had possession thereof, and the one who sowed to pay him the rental and indemnify him for damages."

"If the building, planting, or sowing shall have taken place with the knowledge and consent of the owner of the land, he shall be obliged, in order to recover it, to pay the value of the building, planting, or sowing."

"Art. 966. A defeated *bona fide* possessor is also entitled to an allowance for the useful improvements made before the answer to the suit."

"By useful improvements shall be understood only such as shall have increased the market value of the thing."

"The person seeking the *revendication*, shall choose between the payment of the value thereof at the time of the restitution of the works of which the improvements consist, or the payment of the increased value of the thing at said time due to the said improvements."

"With regard to the works done after the suit was answered, the *bona fide* possessor shall have the rights only which are granted in the last paragraph of this article to a possessor in bad faith."

"The possessor in bad faith shall not be entitled to any allowance for the useful improvements referred to in this article."

"But he may take with him the materials of which said improvements consist, provided that they can be removed without damage to the thing recovered, and that the owner refuses to pay him the price which such materials would be worth after their separation."

"Art. 970. When there shall be due the defeated possessor a balance by reason of expenses and improvements, he may retain the thing until the payment is made, or security to his satisfaction is given."

It is evident, therefore, that the lessors of town lots belonging to the Municipality of Gorgona acquired certain definite rights under Colombian and Panamanian law, and the question arises whether any rights thus acquired were divested or in any way affected by:

1. Ordinances or resolutions of Municipality of Gorgona, passed subsequent to American occupation.
2. Revocable leases or licenses issued by the Isthmian Canal Commission.

Resolutions and Ordinances of the Municipality of Gorgona.

The resolutions and ordinances of the Municipality of Gorgona relating to the leasing of municipal property are, as follows:

- (a) Resolution No. 5 of the Municipal Council of Gorgona, dated March 20, 1905.

- (b) Ordinance No. 2 of the Municipality of Gorgona, dated February 27, 1907, amending resolution No. 5 of March 20, 1905.
- (c) Ordinance No. 8 of the Municipality of Gorgona, dated May 17, 1905.
- (d) Ordinance No. 1 of the Municipal Council of Gorgona, dated February 27, 1907, amending ordinance No. 8 of May 17, 1905.

The resolution of the municipal council, dated March 20, 1905 (No. 5), together with the amending ordinance of February 27, 1907 (ordinance No. 2), relate to the rental of town lots, whereas ordinance No. 8, dated May 17, 1905, and ordinance No. 1, dated February 27, 1907 and approved February 28, 1907, evidently relate to the leasing of agricultural lands. For the determination of the status of the claimants now under consideration, it is only necessary to consider the resolutions and ordinances relating to town lots.

The resolution of March 20, 1905, provides a procedure for the rental of town lots. The provision of Article 1 of this resolution declaring null and void "all grants of lots or lands within the radius of the town that date from more than ninety days from the date of the concession and on which the concessioners have not begun to build," simply follows the provisions of Article 4 of the decree of Governor Vila of 1886. This ordinance in Article 9 provides, by implication, for leases for a term of one year, and makes no mention of the rights or obligations of tenants in case the lease is terminated. The termination of leases is provided for in the ordinance No. 2 of February 28, 1907, amending resolution No. 5. The pertinent portion of this ordinance reads as follows:

"Article 13. The lessee of any lot of land leased under the terms of this resolution shall deliver the same when called upon by the Mayor to do so, in the event the land is required for use by the municipality, the Government of the Canal Zone, or the Isthmian Canal Commission."

"This amendment shall not be construed to abridge any rights which present lessees may have to notice respecting revocation of their leases or to any compensation for improvements placed on the land. It is, however, understood that upon expiration of the period of notice to which lessees may be entitled under the laws in force in the Canal Zone—such period dating from the approval of this ordinance—all lessees will hold their land subject to the terms of this amendment."

After careful consideration of the whole situation, the Commission has reached the conclusion that, while it was entirely within the power of the Municipal Council of Gorgona to provide for the leasing of town lots, it was beyond the power of the municipality to amend either the law of 1894 or the provisions of the Civil Code.

Whatever, therefore, may have been the conditions under which the town lots of Gorgona were leased, the ordinances of the Municipality could not deprive tenants of rights secured to them by the act of 1894, and by Articles 739, 966, and 970 of the Civil Code.

That the action of the Municipality could not have the effect of undermining or divesting rights guaranteed under the Civil Code is further confirmed, if such confirmation were necessary, by an examination of the general policy of the Government of the United States in the Canal Zone as laid down by the President of the United States in his instructions to the Secretary of War, under date of May 9, 1904, the pertinent portion of which reads, as follows:

"The inhabitants of the Isthmian Canal Zone are entitled to security in their persons, property, and religion, and in all their private rights and relations. They should be so informed by public announcement. The people should be disturbed as little as possible in their customs and avocations that are in harmony with principles of well-ordered and decent living."

"The laws of the land, with which the inhabitants are familiar, and which were in force on February 26, 1904, will continue in force in the Canal Zone and in other places on the Isthmus over which the United States has jurisdiction until altered or annulled by the said Commission, but there are certain great principles of government which have been made the basis of an existence as a nation which we deem essential to the rule of law and maintenance of order, and which shall have force in said Zone. The principles referred to may be generally stated, as follows:

"That no person shall be deprived of life, liberty, or property without due process of law; that private property shall not be taken for public use without just compensation; that in all criminal prosecutions the accused shall enjoy the right of a speedy and public trial, to be informed of the nature and cause of the accusation, to be confronted with the witnesses against him, to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense; that excessive bail shall not be required nor excessive fines imposed, nor cruel or unusual punishment inflicted; that no person shall be put twice in jeopardy for the same offense, or be compelled in any criminal case to be a witness against himself; that the right to be secure against unreasonable searches and seizures shall not be violated; that neither slavery nor involuntary servitude shall ex-

ist except as a punishment for crime; that no bill of attainder or *ex post facto* law shall be passed; that no law shall be passed abridging the freedom of speech or of the press, or of the rights of the people to peaceably assemble and petition the government for a redress of grievances; that no law shall be made respecting the establishment of religion or prohibiting the free exercise thereof."

It now remains to examine the effect of the acceptance of Isthmian Canal Commission leases or licenses on the status of those claimants who occupied town lots either under the renewable permits issued under the decree of March 16, 1886, or under leases from the Municipality of Gorgona granted prior to the Executive Order of the President of the United States, dated March 13, 1907, which order abolished the municipalities of the Canal Zone.

Tenants of municipal lands belonging to this category acquired certain definite rights to compensation in case of eviction, under Law No. 50 of November 6, 1894, and under Articles 739, 966, and 970 of the Civil Code. The rights were not divested by the acceptance of the Isthmian Canal Commission licenses, and the claims of such persons, therefore, come within the jurisdiction of this Commission.

The Commission has, therefore, reached the conclusion:

First—That nothing contained in the resolution No. 5 of the Municipality of Gorgona, dated March 20, 1905, or in ordinance No. 2, dated February 28, 1907, can deprive those persons who occupy town lots either under the decree of March 16, 1886, or under a lease from the Municipality of Gorgona, of the protection granted by Law No. 50 of 1894, or of Articles 739, 966, and 970 of the Civil Code, and it is immaterial in this connection whether such leases were acquired from the Municipality of Gorgona prior to American occupation or subsequent thereto.

Second—Those persons, who, prior to March 13, 1907, possessed either renewable permits under the decree of March 16, 1886, or leases from the Municipality of Gorgona, are entitled to the protection of Article 5 of the law of 1894 and of the provisions of Articles 739, 966, and 970 of the Civil Code, specifically referred to in that law, and the subsequent acceptance of Isthmian Canal Commission leases or licenses does not divest them of the rights thus acquired.

Third—The plea of Counsel for the United States in this case does not raise the question as to the status of claimants, who, at the time of the acceptance of Isthmian Canal Commission leases or licenses did not possess either a permit issued under the decree of 1886 or a lease issued by the Municipality of Gorgona.

In view of the conclusions herein formulated, the Commission orders that the plea of Counsel for the United States to the jurisdiction of the Commission be overruled.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, August 13, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application, and information respecting the filling out of same, at least one day before the examination. Applicants for chauffeurs' licenses must also bring automobiles.

GEOLOGY OF WESTERN PANAMA

I.

Chiriqui Volcano.

By D. F. MACDONALD, COMMISSION GEOLOGIST.

Recently, it was the writer's good fortune to travel through a considerable portion of the Panamanian provinces of Chiriqui and Veraguas. The trip was made chiefly under the auspices of the Smithsonian Institution, but the Canal Commission, and the United States Geological Survey, were indirectly interested in the geological information obtained.

The full results of the journey, which lasted about two months, will be published later by the Smithsonian Institution. It has seemed well, however, to set forth in THE CANAL RECORD an outline of some of the items of interest that were gleaned on this trip. In this issue the so-called Chiriqui volcano will be briefly treated.

Perhaps the most interesting new thing discovered about the extinct volcano was the evidence that indicated about the number of centuries that have elapsed since the last volcanic outburst. It will be remembered that about a year ago, the newspapers told how an "Eruption of Chiriqui volcano" had flung death and destruction far over western Panama. This proved to be a newspaper "story," for the last explosive outburst of the mountain did not occur in 1912, but many hundred centuries earlier.

The majestic Chiriqui peak stands as a king among mountains. Towering over 11,000 feet above sealevel, it overlooks all the other rugged crests of western Panama. From its summit, on a clear day, one can see the wide coastal plain of David meeting the low-lying shore of the Pacific, 40 miles away. Streams, like loose-lying silvery threads flung oceanward, tie the mountains to the sea, and on their banks here and there are distant specks of little native villages. Scattered grazing herds dot the nearer plains, and a tiny dust cloud, barely visible in the blue haze of the distant valley, tells of a train of bull carts toiling from David out to the coffee plantations, near the foot of the mountain. Turning then to the northward, one may behold lessening waves of mountains dimming in the distance, where they meet the wide embayments of the Caribbean shore. In the bays and beyond the headlands, dark island spots are scattered along the landward margin of the sunlit sea. These remnants of a submerged mountain group stand like a struggling rearguard, protecting the main shore line against the foam-crested trade wind waves.

Gazing out over this pleasing picture, one's æsthetic sense may be slightly shocked when he realizes that he is only on the top of an ash heap, for this mighty peak was built up by emanations of volcanic ash and débris, blown out during long centuries from a crater, or group of craters. The last explosion, or series of explosions, was more violent than the rest, for it blew the top off the mountain, and scattered the débris far and wide, burying the surrounding country under some hundreds of feet of volcanic ash and ejectamenta. Later, streams formed on the new surface, and these slowly entrenched themselves in the new volcanic formation. The Caldera River thus excavated for itself a cañon that is 350 feet deep and about half a mile wide—a vaster trench by far than

Culebra Cut, and all done by a river, without drill, powder, or steamshovel. In the flat, wide bottom of this cañon, close to the bank of the stream, are some old Indian graves, and nearby, are some carved stones, or "piedras pintadas." From the weathering of these, and from the pottery and other objects, remnants of an ancient Indian culture buried in them, it is known that they are at least 1,000 years old, and probably considerably more. Since these graves were made, the Caldera River has not cut its channel more than 10 feet deeper over about one-tenth of the total width of its valley bottom. This is equivalent to a deepening of the whole width of the valley one foot. From these data it is seen that the minimum rate of excavation of the Caldera Valley, under approximately present conditions, would be one foot per thousand years. At this rate, the present valley, which is 350 feet deep, would require 350,000 years for excavation. However, during the first few centuries excavation of it went on much more rapidly than now. This is due to the fact that in falling through the atmosphere the coarser rocks of the volcanic débris dropped faster, and are more concentrated in the lower part, while the upper parts of this formation are chiefly of fine ash. Hence, the work of washing out Caldera Valley to its present form was not fraught with much difficulty while the river was cutting through this fine top material. Later, the river channel became somewhat choked by the boulders that accumulated in it, as the cañon was cut deeper, and the work of erosion was thus much retarded. It is also known that volcanic explosions are generally followed by great downpours of rain. Such floods must be considered in the time estimated, for they would greatly hasten the early work of erosion. In order to allow for the more rapid digging out of this cañon by the stream, in the early stages of its history, there might be deducted 33½ per cent from the above mentioned estimate of time. In estimating conservatively the minimum time since the last eruption, 50 per cent may be deducted from the first estimate of 350,000 years, leaving a period of 175,000 years as the least time since this kingly mountain fell away from the pyrotechnic grandeur of its former estate, and became a dead—a good—volcano.

Visiting Masons.

A delegation from the Grand Consistory of the State of Louisiana, consisting of 27 Masons, and a party of about 75 others, including a number of ladies, arrived on the steamer *Atenas*, on Thursday, July 31. The purpose of the Masons' visit was to confer degrees from the fourth to the thirty-second, inclusive, on a class of candidates from the Canal Zone. Ancon was made the official headquarters, and the work in connection with the conferring of the degrees was conducted at Ancon hall, continuing from Saturday night until a late hour on Sunday night. On Monday evening, an extra session was held during which degrees were conferred on six candidates. The total number of candidates initiated into the various degrees was 95.

The social features of the visit consisted of trips by automobile to points of interest in Panama and environs, a trip to the island of Taboga, a sightseeing trip over the Canal on Monday, and a dance at the Hotel Central

on Sunday evening. A number of the party left on Monday for Bocas del Toro, and will return in time to join the others and take the *Atenas* for New Orleans on Thursday, August 7.

A banquet will be held at the Hotel Washington on Saturday evening, August 9, in honor of the newly made thirty-second degree Masons, and their families. The arrangements are in charge of Mr. W. Edgar Parker, Mr. S. H. Marcuse, and Mr. Gerald D. Bliss. Messrs. Parker and Marcuse were the representatives appointed by the Grand Master of Kadosh to look after the visiting members of the consistory. In recognition of his work in this regard, the members presented Mr. Parker with a silver pitcher.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on August 2, being 4,472,866 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of August 2, follows:

The regular dance of the Cristobal Dancing Club will be held on Saturday, August 9, at the Commission clubhouse, Cristobal. Invitations or membership cards must be presented for admittance to hall.

WATERTIGHT LOCK GATES.

Adjustments at Hinge and Miter Ends of Leaves, and at Sills, to Prevent Leakage.

The lower guard gates at Gatun Locks, now protecting the lower and intermediate chambers against inundation by the waters of the Atlantic entrance, are withstanding the maximum pressure to which they will be subjected in actual operation. After they were closed on June 14, the water was let into the forebay from beyond the barrier which had separated the sections of the channel; as the water began to rise against the outer faces of the gates, they showed only slight leakage, and the pressure of the full head of 42 feet of water has forced the mitering leaves so closely together that the slight initial leakage ceased. These gates may be said to be practically watertight.

Each of the four leaves of these gates is 65 feet long, seven feet thick, 47 feet four inches high, and weighs 390 tons. Throughout their construction, special care was taken to perfect their alignment and make them fit exactly. A special machine was installed at the works of the contractors in the United States, by which both ends of the horizontal girders were planed at the same time. This machine remained unchanged until all the girders were completed. As the skeletons of the leaves were erected in the locks their alignment was checked with fine steel wires; it is believed

keep companion leaves at the same height; the heights of all completed gates agree within $\frac{1}{4}$ -inch. The stiffness of the leaves is so great that the total deflection at the bottom has never exceeded $\frac{1}{4}$ -inch, when the leaves were set on pintle and anchors, and swung repeatedly through full movements, without the buoying force of the water, by which the stresses will be lessened in operation.

The careful construction of the structural steel made possible a very exact adjustment of the bearing plates along the vertical ends of the leaves. The closeness of the joints between the two leaves at the mitering ends, and with the fixed castings at the hinge ends, is regarded as unprecedented in large scale steel construction.

The adjustment at the hinge, or quoin, ends of the leaves is indicated in the accompanying sketch (A). Heavy steel castings, shown in light cross hatching in the midst of the concrete, were embedded in the lock walls as they were built. The castings contained machined recesses at the end toward the lock chamber; the bearing plates of the hollow quoins (shown in dark hatching) were set in the recess and attached to the castings by 1-inch bolts, spaced 17 inches apart, while temporary stud bolts were placed at intervals of about two feet along the center line of the plates to assist in the adjustment. The exact center was determined by a plumb line placed directly over the center of the steel pintle on

ing embedded in the wall. The metal was poured through bolt holes about four feet apart, vertically. To avoid explosions from dampness and insure exact filling, hot compressed air was first blown into the space. Finally, the joints between the bearing plates and the castings were calked.

Corresponding bearings were provided in the end of the gate. Heavy steel castings

(B) MITER ENDS OF LEAVES OF CLOSED GATE.

(shown in light hatching in the sketch), with recesses at the outer ends, were securely riveted to the leaf, and to these, bearing plates were attached by means of bolts. The gate was then set on the pintle, as for operation, and swung to its closed position. Finally the bearing plates on the leaf were forced closely against the fixed plates in the wall casting, and held by means of adjustable bolts. The leaf was then swung into open position, exposing the faces of the bearing plates, and the latter were babbitted in the manner used for the fixed quoin plates.

These adjustments were always made early in the morning, to insure a uniform temperature throughout the leaf. It was expected originally to adjust the plates at the outer, or miter, ends of the leaves in the same way, by bringing the two leaves of a gate to correct closed position and pressing the bearing plates against each other by means of jacks. The variations in the lengths of leaves from temperature changes, even within short periods, made it necessary to use another method. In that adopted, the leaves are closed and the plates at top and bottom are brought into contact and fixed in their proper position. The leaves are then swung apart and the remaining plates adjusted in alignment, determined by means of a fine wire, with those at top and bottom. After the babbitting, the leaves are brought together again, and any small irregularities are corrected by grinding. A section of the adjusted plates of the two miter ends, in closed position, is shown in sketch (B).

Leakage at the bottoms of the leaves has been obviated by the use of a specially designed sill, using a rubber strip along the line of contact. A cross-section of the sill, with the leaf closed against it, is shown in sketch (C). As shown, a heavy timber is set in the concrete of the lock floor; this timber is not adjusted until after the quoin and miter bearings have been completely finished and the smaller timber attached to the leaf. The timbers having been adjusted, a strip of rubber, five inches wide and half an inch thick, is attached to the plate below the timber which is fastened to the plate below the timber cushion. The strip serves to prevent the

(A) JUNCTURE OF GATE LEAF WITH LOCK WALL.

that their greatest deviation from a plumb line does not exceed $\frac{1}{4}$ -inch for any of the leaves, even before the end castings are attached and the bearing plates adjusted. At the top of every fourth panel from the bottom, adjustable fillers were set between the vertical diaphragms and the girders above, in order to

which the bottom of the leaf was later to be placed.

After the plates were so exactly aligned that the deviation from exact correctness nowhere exceeded five-thousandths of an inch, melted babbitt metal was poured into the space between the plates and the heavy cast-

escape of water between leaf and sill, even when for any reason the timbers are not in

(c) CROSS-SECTION OF SILL, WITH LEAF CLOSED. absolute contact. This construction is novel and has proved to be effective.

PERSONAL.

Mr. Richard Lee Metcalfe, the new Head of the Department of Civil Administration, accompanied by his family, sailed on the *Panama* from New York, on Friday, August 1, and is due to arrive at Colon on Thursday, August 7.

Lieut.-Col. Eugene T. Wilson sailed for New York on the *Tivies* of the United Fruit Company's service on Tuesday, August 5, on his annual leave of absence.

Lieut.-Col. Charles F. Mason, accompanied by his family, will sail for the United States, on his annual leave, on the *Ancon*, on Saturday, August 9.

Lieut. Frederick Mears, accompanied by Mrs. Mears and their two children, will sail for New York, on the *Ancon*, on August 9, on his annual leave of absence.

Mr. Walter F. Beyer, returned from a two weeks' trip to Costa Rica on Monday, July 28.

Notary Public at Gatun.

In order that employes at Gatun who find it necessary to swear to survey and other property papers, or Government documents, may not be required to lose time to go to Cristobal and return, Sergeant Lawrence C. Callaway, in command of the Gatun police station, has been appointed a notary public.

Men Wanted to Drive Rivets.

The Mechanical Division at Gorgona is urgently in need of gold employes to drive rivets, or who are willing to learn to drive rivets. The rates of pay are 32, 38, and 44 cents an hour, depending upon skill. Application should be made at the office of Mr. S. G. Shearer, general foreman, Gorgona shops.

Record of Masons.

Application blanks for the "Biographical record of Masons on the Panama Canal," which is being published under the auspices of the Masonic Club of Empire, have been placed in the hands of the secretaries of the various Masonic bodies on the Isthmus. It is requested that all applications, as well as photographs, be sent to W. I. Beam, Empire, C. Z., at an early date.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club.

The Cristobal Woman's Club gave a reception on Wednesday afternoon, July 30, in honor of Mrs. Carl H. Elliott, who is leaving the Isthmus. Although a large number of the club members are away on vacation there were 25 women present to say goodbye to their former president and club associate. Mrs. Elliott has been a member of the board of the club since her arrival on the Isthmus in 1910. For one year she was the chairman of the education department; in 1910-11, she was first vice-president, and acting president. In October, 1911, she was elected president, and during the year of her office, Mrs. Elliott attended every club meeting and every meeting of the executive board. In 1912, she was chosen one of the vice-presidents, but since the resignation of Mrs. Storla, in February, 1913, Mrs. Elliott has been acting president. She was recording secretary of the Canal Zone Federation of Women's Clubs from 1911 to the disbanding of the organization in April, 1913. In recognition of her services to the Cristobal club, and as a souvenir of her life on the Isthmus, the women presented her with a set of sherbet glasses, heavily embossed with silver inlay, and a sugar bowl and cream pitcher of the same design.

At the request of the club women, a report was given of the progress of Elysus James, the blind boy, who is being educated at the expense of the Federation. The boy has done well in his work and it is expected that one year more of schooling in the Perkins Institute will be sufficient to equip him for a life of independence and self-support.

Church Notes.

The Reverend H. R. Carson, chaplain of Ancon Hospital and of St. Luke's Hospital chapel returned to the Isthmus on the *Parismina*, on Monday, August 4, after a six weeks' special leave of absence. During a part of the time of the chaplain's absence the services at St. Luke's were taken by the rector of Christ Church, but since the latter part of July, the church has been closed, the Sunday school only being maintained. Beginning on Sunday, August 10, the services will be resumed according to the following schedule: Divine service, with celebration of the Holy Communion on the first Sunday in each month at 10 a. m.; Holy Communion on the second and fourth Sundays in each month at 7 a. m.; morning prayer and litany on these Sundays at 10 a. m.; Sunday school every Sunday at 9 a. m. The chaplain may generally be found in the vestry of the church between 8 and 9 a. m., and between 2 and 4 p. m.

Beginning on Sunday, August 10, there will be services every Sunday evening at St. Mary's Church at about 7.30 o'clock. This service will begin after the arrival of the 7 o'clock train from Panama. There will be a celebration of the Holy Communion at Culebra on Sunday, August 17, and, thereafter, on the third Sunday in each month at 7 a. m. This service will be held in the Commission chapel.

The subject of the meeting of the young people's society of the Cristobal Union Church on Sunday evening, July 27, was "Missionary essentials," and the following program was carried out: Reading, "Japanese babies," by Miss Julia Nelson; paper, "Dr. Eleanor Chestnut, missionary," by Miss Louise Still-

son; paper, "A Chinese mob," by Miss Sara Harrison; "Some Philippine experiences," by Miss Richmond; paper, "John Eliot, an apostle to the Indians," by Miss Easter Rogers. A debate was also held between the pastor, the Rev. Carl H. Elliott, and Mr. DeLong on the subject, "Resolved, that home missions are more important to the Christian church of America than foreign missions."

Sailing of the "Ancon."

The sailing date of the steamer *Ancon* has been set for Saturday, August 9, at 3 p. m., from pier No. 11, Cristobal.

Informal dances will be held on August 7 and 21 at the Strangers Club, Colon.

Stages of the Chagres.

Maximum heights of the Chagres River for the week ending midnight, Saturday, August 2, 1913. All heights are in feet above mean sealevel.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

An athletic and aquatic meet will be held on Labor Day, Monday, September 1, at Corozal, under the supervision of the Y. M. C. A. clubhouses. Since the Fourth of July meet at Cristobal, athletic and aquatic enthusiasts have made requests for another meet in the near future. Labor Day has been chosen as the best time, as it will enable many men to participate, who, through the coming reduction in the forces along the Canal will later be unable to take part in such a meet. This probably will be the last meet for many of the men, and, consequently, it is hoped to make it the largest occasion of its kind ever held on the Isthmus.

The athletic events will be held in the morning and will consist of the following:

Track events—100-yard dash; 220-yard dash; 440-yard run; 100-yard low hurdles; fat men's race; three-legged race.

Field events—Running broad jump; running high jump; 12-pound shot put; pole vault; tug-of-war.

Boys' events—60-yard dash; relay race.

The aquatic events will be held in the afternoon, and will comprise the following: 50-yard swim, 100-yard swim, one-mile swim, fancy diving, equipment race, relay race, half-mile canoe race, canoe tilting, canoe obstacle race for the men, and a 50-yard swim for the boys.

The entry fees will be 50 cents for the first event, and 25 cents for each additional event for the men, and 25 cents for each event for the boys. Entry blanks will be printed within the next few days and can then be obtained from the local Y. M. C. A., or the quartermaster's office.

The meet is open to all gold employees and members of the Tenth Infantry and Marine Corps. Any additional information may be procured from R. L. Dvelle, secretary of the Corozal Y. M. C. A., to whom the entries should be forwarded.

The moving picture schedule for the week August 11 to 16 is, as follows: Monday, Gatun; Tuesday, Corozal; Wednesday, Culebra; Thursday, Cristobal; Friday, Empire and Porto Bello. The titles of the films to be shown are, as follows: "She cried," "Buster in Nodland—double courtship," "Joker's mistake," "Too much wooing of handsome Dan," "Unexpected fortune," "Loafer's mother," "Broncho Bill's pal."

COROZAL.

At the moving picture show on Friday night, Mr. and Mrs. Geo. R. D. Kramer, Jr., furnished music.

High scores in bowling for the week were, as follows: *Bigpins*—Garrett, 211. *Duckpins*—Beall, 116; Kent, 110.

Twenty-one men have entered the local handicap tenpin bowling tournament which will run through the month of August. A gold medal will be given to the man who makes the highest average.

CULEBRA.

Next Sunday evening at 7.30, in place of the usual song service, Mr. S. P. Verner of Cristobal will give an address, on "The man who came back."

High scores in tenpins recently made are, as follows: Tragsdorf, 206; Dougherty, 213; Leonard, 217; Hobbs, 217.

A two-man bowling tournament will be started August 11. In this plan, each man will bowl every other man two games, the pair making the highest score for the four games rolled receiving gold medals. If sufficient entries are received, the one making the highest average, and the one making the highest single score will receive gold medals. The entry fee is \$1. All desiring to enter are requested to sign the conditions posted on the bulletin board.

In the local handicap tenpin bowling tournament just closed the winners of the medals were B. A. Armstrong and G. J. Finley.

An order for library books will be sent to the United States very soon. Those desiring any special books may hand the titles of same to the librarian.

EMPIRE.

The local tenpin tournament closed on August 1. The highest single score was 230, made by Mr. Arnold. Mr. Johnson and Mr. Gilmore won the doubles. Thirty-two men participated in this tournament. The entry list is up for another tenpin tournament. Entries close this week.

The Corozal chess team played the Empire men on Saturday, August 2. Corozal won all but one game. Some of the Empire players were unable to play in this match. The Culebra chess team will be at Empire on Friday evening, August 8.

Two Spanish classes for beginners have started. One class meets on Tuesday and Thursday evenings at 8.30 o'clock, and the other on Wednesday and Friday mornings, at 8.30. It is not too late to enroll now.

Posters are out for the athletic and aquatic meet to be

held on Labor Day at Corozal. All interested should see Mr. Kussell at once.

The Empire "American" duckpin team, which was tied with the Cristobal team for first place, will bowl the Cristobal team on the Gatun alleys on Saturday, August 9.

GORGONA.

The clubhouse at Gorgona was closed on August 1. It will be torn down and reerected at Pedro Miguel.

GATUN.

Mr. P. T. Woolworth, who has been assistant secretary and physical director here since August, 1912, has taken up his duties as secretary of the Porto Bello Y. M. C. A., effective August 1. Mr. George W. Watson, formerly assistant secretary at Gorgona, will serve as assistant secretary and physical director, temporarily.

The "Lock City" duckpin tournament, which started on July 17, was brought to a close on Thursday evening, July 31, when the "Field" took two out of three games from the "Bitumastics" and the "First Division" won three games from the "Office" team.

The final standing of the teams is, as follows:

McClintic-Marshall Field.....	11	4	733
First Division.....	10	5	666
Atlantic Division.....	9	6	600
McClintic-Marshall Office.....	8	7	533
Lock gate inspectors.....	5	10	333
Amer. Bit. Enamel Company.....	2	13	133

The names of the players on the McClintic-Marshall Field team, which won first prize (gold medals) are, as follows: W. B. Childers, captain; M. Conley, L. Harper, S. M. Bellinger, D. C. Galloway, J. A. Tucker.

The First Division, which took second prize (silver medals), was composed of F. N. Easter, captain; H. H. Hodges, O. E. Matter, E. L. Grover, W. J. Humphreys, C. P. Gray.

The Atlantic Division, winning bronze medals as third prize, consisted of G. A. Barte, captain; W. A. Wells, E. T. Gilbert, A. J. Coleman, G. T. Dennis, W. H. Brown.

S. M. Bellinger won a silver medal for high single game, 132 pins. Chas. C. G. Wurster had the highest average for the tournament, 92.4, and received a silver medal.

The ten men who stood highest in average were:

Wurster.....	92.40	Barte.....	88.40
Wells.....	90.11	Bellinger.....	88.30
Grover.....	90.60	Matter.....	87.14
Claherty.....	89.11	Hess.....	87.11
Hodges.....	88.70	Humphreys.....	87.40

Mr. Frank Johnson, bass, sang a solo at the motion picture entertainment on Saturday evening, August 2. Mrs. Gilbert was accompanist, and played several solos.

The membership of the Gatun Y. M. C. A. on August 1 was 405, an increase of four over last month. The number of bowling games was 3,369, which established a new record for the last three years. There were 5,098 pool games.

A concert was given by the orchestra from the *Prinz August Wilhelm* of the Hamburg-American steamship line, on Tuesday evening, July 29. Mr. C. C. Pearsall also gave several piano solos.

CRISTOBAL.

Señor R. Diez de la Cortina, an author of language text books, was the guest of Señor J. B. Gomez, instructor of the Y. M. C. A. Spanish classes, Monday night, July 28. The classroom was filled to capacity to hear the lecture and exhibition lesson given by Señor Cortina.

A progress pool tournament was held on Wednesday, July 30. Eight contestants participated. Mr. Joseph Burgoon won the tournament by seven points, by pocketing 207 balls in 60 minutes. All five tables have been recovered in the past 30 days, and much interest in pool and billiards is manifested at present.

All four of the bowling alleys are again in operation, two of the alleys having been closed for repairs. A local pool tournament will be started about August 12. All persons wishing to enter the tournament are requested to leave their names with the manager of the alleys not later than August 9.

In consideration of the departure of Mr. and Mrs. Burrell for the United States, a farewell married folks, duckpin tournament was held on Saturday, July 26. Mr. and Mrs. Charles Cotton won the tournament with a total score of 511, and will receive a gold medal as a prize.

Commissary Cold Storage.

No material changes have been made in the prices of cold storage articles sold at the commissaries since last week.

Auction of Hogs at Ancon Hospital Dairy.

ANCON, C. Z., July 23, 1913.

There will be sold at public auction at the Ancon Hospital dairy, Saturday morning August 23, at 10 o'clock, five hogs (barrows) for hutchering.

The right to reject any and all bids is reserved.

CHAS. F. MASON,
Superintendent.

MOVEMENT OF OCEAN VESSELS.

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays, the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

LOST—Probably in Hotel Washington, fraternity signet ring, having Maltese cross with skull and bones. Reward, if returned to Spencer C. King, Empire.

CANAL

RECORD

Volume VI.

ANCON, CANAL ZONE, WEDNESDAY, AUGUST 13, 1913.

No. 51.

The Canal Record

Published weekly under the authority and supervision of the Isthmian Canal Commission.

The Canal Record is published free of charge, one copy each to all employees of the Commission and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Ancon, Canal Zone,

Isthmus of Panama.

No communication, either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Organization for Work of Landscape Architect.

The organization in connection with the town work, other than building, at Balboa, has been approved, and includes a landscape architect, junior engineer, transitman, two rodmen, two draftsmen, one general foreman, three subforemen, and 300 silver laborers. All of the above force will be carried on the organization chart of the Second Division.

From Miraflores Locks to the Sea.

The Canal prism south of Miraflores Locks, extending about 5,000 feet from the lower guard gates to the dike, will be flooded about August 25, and the subsequent removal of the dike will open a sea water channel from the Pacific ocean to the locks. The number of steamshovels in the prism has recently been reduced from eight to four; these are completing the channel to a width of 500 feet at a depth of 45 feet below mean tide level, and will finish their work about August 20. The lower guard gates are to be completed and closed about August 15.

The prism will be filled with water from the Rio Grande diversion, turned in from the east side. It is estimated that the filling will take about five days, and after the water has risen to slightly below sealevel the dike will be removed. About this there will be little that is spectacular; the north toe of the dike, from 20 to 45 feet under water, will be shattered by blasting, for which a fleet of tripod drills is now preparing, but the upper part of the dike is a relatively soft fill of earth and rock which will not need to be blasted. The ladder dredges *Mole* and *Corozal*, which are now at work close to the sea side of the barrier, will proceed against it. Only a few days will be consumed in cutting a channel which will pass the dredges and other vessels of similar draft, though cleaning the channel to full depth and width at this point will require a month or more.

The destruction of the dike will compel the removal of the tracks across it, connecting

with those on the west side of the locks. The only access to the west side will then be by the tracks across the lower end of Miraflores Lake, just north of the upper approach wall of the locks. These tracks will have to be abandoned when it is decided to fill the lake; accordingly, the various items of plant and equipment on the west side are being removed as rapidly as their services can be dispensed with.

Canal Visitors.

The Quarantine Service has prepared an estimate of the number of tourists that visited the Isthmus during the years 1910, 1911, 1912, and the first six months of 1913. It is based on the records of "transit" passengers, 85 per cent of whom, it is believed, come to the Isthmus for the purpose of seeing the Canal. A statement of "transit" passengers during the abovementioned period, divided between Canal visitors, and through passengers, follows:

YEAR.	Canal visitors.	Others.	Total.
1910.....	12,316	2,174	14,490
1911.....	15,790	2,787	18,577
1912.....	20,946	3,697	24,643
1913 (six months).....	18,972	3,348	22,320
Total.....	68,024	12,006	80,030

During 1910, five tourist steamers and private yachts arrived at the ports of Colon and Cristobal, with a total of 1,199 passengers. In 1911, there were seven vessels of this class, with a total of 1,682 passengers. In 1912, the number of vessels had increased to 12, with a total of 3,781 passengers, and for the first six months of 1913, there was a total of 37 vessels carrying 8,708 passengers.

Since January, 1912, the number of tourist passengers arriving on the Isthmus at the port of Ancon has been approximately 100 a month. There has been only one special tourist steamer on the Pacific side during that time, namely, in May, 1912, with 186 passengers.

Reports received at some of the local steamship offices on the Atlantic side indicate that the tourist travel during the coming dry season will exceed all previous records.

Nine Killed at Porto Bello Quarry.

A large slide of rock occurred on the upper level of the quarry at Porto Bello at 10.45 a. m., on Saturday, August 9, causing the death of nine men, and injuring five others. The only American employe killed was Charles A. Nylen, employed as a steamshovel engineer. The names of the others are: Charles Husband, West Indian, pitman, check No. 173903; Alex Clark, West Indian, fireman, check No. 100974; José Nicholas, alias Hilarie Louis, Martiniquan, check No. 145008; James Brown, West Indian, pitman, check No. 145198; Uriah Williams, West Indian, laborer, check No. 107650; George Ellis, West Indian, laborer, check No. 102808;

George Forde, Barbadian, laborer, check No. 102667, and Marcus Perez, Panamanian, laborer, check No. 145176.

Among the injured was Jacob A. Hake, craneman on steamshovel No. 266, who was sent to Colon Hospital for treatment. None of the injured is seriously hurt, and only two were sent to the hospital.

Steamshovel No. 266, which was working directly below where the slide occurred, was completely demolished.

Mr. Nylen was a naturalized American, 43 years of age, and had been on the Isthmus since June 6, 1908. He is survived by his wife and one child, who live at Porto Bello. He came to the Isthmus from Woodbridge, Virginia.

Raising Relocated Railroad Across Lake Area.

Forces of the Panama railroad are engaged in raising to final height the embankments of the relocated line across the Brazos and Quebrancha bottoms, in the Gatun River valley. The construction of the "high line" across this valley necessitated building high embankments across semiswampy areas between hills. As the ground rock was from 150 to 200 feet below the surface, and surmounted by a stratum, about a hundred feet thick, of soft clay, mixed with decomposed vegetable matter and sand, under a surface layer of fairly firm clay, the construction of embankments to the necessary height of from 60 to 71 feet above the surface, was fraught with difficulties. Pile trestles about 30 feet high were extended from the hills, and after the fill had been made to the height of the trestles the embankment was carried up by steps, the dumping tracks being lifted by trackshifters, much as in the construction of the toes of Gatun Dam. The increasing weight of spoil, however, caused the soft bottom to give away, and to bulge up beyond the edges of the fill. This necessitated increasing the width of the dump to distribute the pressure; in consequence, the four embankments across the valley, with an aggregate length of only three miles, have required approximately 5,000,000 cubic yards of filling, an average of about 1,660,000 cubic yards per mile. The sliding on the Brazos and Quebrancha fills was so heavy that up to the time the line was opened to regular traffic, in February, 1912, the embankments had been raised only to 89 feet above sealevel, three feet lower than final elevation. Except for occasional fills to keep the track even, they have been left thus for a year and a half, that they might settle into greater stability.

Since the line has been in service this settling has lowered the track from one to two feet, so that the present work involves raising the roadbed about five feet. The bottom has been holding satisfactorily and does not appear to be affected by the rise of the lake. The present procedure involves raising one side of the embankment to the desired height

and laying a temporary spur on it, over which trains can make about 15 miles an hour, while the rest of the bank is brought to final level. The completed fill is to be 40 feet wide at the top, at 92 feet above sealevel. The width at bottom is determined by the conditions at each point; in general, the slope of the completed embankments is about one on four.

Material for this filling is supplied from steamshovel excavation in a borrow pit near Quebrancha siding. About 75,000 cubic yards of spoil will be used on the Brazos fill, and about half that quantity on a stretch of about 2,000 feet just north of Quebrancha. The relaid track will finally be ballasted with gravel dredged from the Chagres river.

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on August 9, being 4,475,402 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of August 9, follows:

GATUN LOCKS.		Concrete laid, Cubic yards.
Aug. 4.....		148
Aug. 5.....		168

Missing Man.

Any one having information regarding the whereabouts of Dr. Albert Friedman, formerly of Chicago, Ill., who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

SOCIAL LIFE OF THE ZONE.

Masons' Banquet.

As a social feature in connection with the visit of the delegation of the Grand Consistory of the State of Louisiana, a banquet was held at the Hotel Washington, Colon, on Saturday evening, August 9. It was attended by 212 Masons and their families and friends. The Marine band played during the evening, and the young people enjoyed dancing both before and after the supper. The toasts were drunk in water, according to the rules of Scottish Rites Masonry. The speakers were Messrs. Ben Jenkins, W. E. Parker, Harry C. Ragsdale, George R. Brouwer, and William B. Childers; Mr. Gerald Bliss was toastmaster. A roll of thirty-second degree Masons was called, 53 answering. At the roll call by States, it was found that 27 States were represented, as well as the District of Columbia, and the Republic of Panama.

During the evening, a wireless message was received from the chairman of the delegation of the Grand Consistory, Mr. Levy, on board the steamer *Aienas*, expressing the good wishes of the party, to which the committee sent an appropriate reply.

Church Notes.

The Union Church of Cristobal held its semiannual business meeting in the chapel on Sunday evening, August 3, when the reports showed the status of the work to be, as follows: The church membership is 119; 24 members were admitted between January and June. The total expenditures for church work and other purposes were \$458.93. The Sunday school has an enrollment of 284, and the young people's society of 50. This last named society has sent \$25 to the relief of a minister in Bulgaria, a classmate of the Rev. Carl H. Elliott. The finances of the church, where this minister is laboring, have become seriously affected by the war.

Work on the new Methodist church in the Guachapali district, Panama, is in progress, and the minister expects to dedicate the building early in September. The church will be operated in connection with the Methodist Episcopal Church in Panama, and will be under the direction of the pastor of that church, the Rev. Harry Compton.

The bulletin entitled *Union Church Work*, which is published semimonthly in the interest of Christian endeavor, is delivered to quarters occupied by employes on the "gold roll" in Colon, Cristobal, and Las Cascadas. Its circulation is 1,300.

The Rev. Alfred B. DeRoos, the evangelist whose mission in the Baptist churches was completed in June, has returned to the Isthmus from Costa Rica, and is conducting a series of meetings in the Commission chapel at Empire, under the direction of the Rev. J. L. Wise. The mission will continue two weeks, and following it, Mr. DeRoos will conduct a similar series of evangelistic meetings at Corozal. The church work in Corozal has been taken over by the Rev. Mr. Wise.

Salvation Army Transfers.

Staff Captain George Victor Catlin of Colon, head of the Salvation Army in Panama, has been relieved from the post at his request, and will sail for New York on the *Tagus*, accompanied by Mrs. Catlin, on August 26. He will be succeeded by Staff Captain Bennett, who comes from Demerara,

where he has been stationed for the past five years. Staff Captain Catlin came to the Isthmus in March, 1910, succeeding Adjutant Watson. In the Colon fire of March 23, 1911, when the Salvation Army Institute was destroyed, the officers lost everything they had. For a time they lived in an army tent, furnished by the Quartermaster's Department, and carried on such work as was possible in the limited space at their disposal. In August, 1911, the present two-story building, erected by the Canal Commission on Government land, was opened. Adjutant Fillmore Watson, and Mrs. Watson, who were the chiefs of the local branch of the army from 1908 to 1910, have been assigned to a corps in Canada.

Lodge Notes.

The official roster of the Pythian Sisters is, as follows: Most excellent chief, Mrs. Annie Wilson, Las Cascadas; excellent senior, Mrs. Therese Blake, Empire; excellent junior, Mrs. May Jordan, Pedro Miguel; manager of the temple, Mrs. Susie Reese, Las Cascadas; protector, and guard, of the temple, Mrs. Hannah Smith, Empire, and Mrs. Mary Wagner, Culebra, respectively. The auxiliary will continue to meet at the lodge hall at Las Cascadas on the first and third Thursday afternoons in each month.

The Uniformed Rank, Knights of Pythias, held a dance in the lodge hall at Las Cascadas, on Friday evening, August 8.

Local No. 19, International Brotherhood of Steamshovel and Dredgemen, will hold its next meeting at the Empire lodge hall on Sunday, August 17, at 12.15 p. m. All members are requested to attend.

An informal dance was held in the Pedro Miguel social hall on Saturday evening, August 9.

Sojourners Lodge, A. F. and A. M.

Members of Sojourners Lodge, A. F. and A. M., are advised that the special communication called for Saturday, August 23, 1913, has been called off, and a special communication will be held on Wednesday, August 20, at which time the degree of F. C. will be conferred upon the E. P. who are called for August 23.

Eli D. Sims, W. M.

Cristobal, C. Z., August 11, 1913.

United Spanish War Veterans.

Chagres Camp will hold a meeting and entertainment in the lodge hall at Gatun, on Saturday, August 16, at 8 p. m.

Married.

BENTON-SMITH—At the Union Church, Cristobal, on August 12, Caroline Edna Smith, of Truro, Nova Scotia, to Henry Linden Benton, of Columbus, Georgia, the Rev. Carl H. Elliott officiating. Canal Zone residence, Cristobal.

FORSTROM-BERRY—At the Union Church, Cristobal, on August 7, Miss Jessie Ritchie Berry of Providence, Rhode Island, to Mr. Albin Bortel Forstrom of New York City, the Rev. Carl H. Elliott officiating. Canal Zone residence, Gatun.

MARSH-DEVINS—On Sunday, July 20, Mary Louise Devins to William H. Marsh, both of Plattsburg, N. Y., at St. Johns Church, Plattsburg, Rev. J. H. Driscoll, D. D., D. C. L., officiating. Canal Zone residence, Cristobal.

DRENNEN-SARVEY—On July 3, at Ancon, Miss Hattie E. Sarvey of Pedro Miguel, to Mr. John W. C. Drennen of Gatun, the Rev. Harry Compton officiating.

SANGER-CARRERA—In the Cristobal Union Church, on Monday, July 28, Miss Hecelia Carrera of Colon, to Mr. Victor Sanger of Rochester, N. Y., the Rev. Carl H. Elliott officiating.

JOINT LAND COMMISSION.

Additional Awards.

The following additional awards were announced by the Joint Land Commission at a public session held on Monday, August 11:

Award No. 16. *In the matter of certain claims for houses in the town of Gorgona*—To the following owners of buildings, for the settlement of all rights, claims or other interests which they may have in the same, together with any other improvements on the lots with houses designated by their tax numbers, as follows: Ricardo Arias, a total of \$2,680 for individual houses, as follows: Tax No. 717, \$1,300; Tax No. 764, \$730; tax No. 796, \$500; tax No. 843, \$450; George Bailey, \$160; Saturnina Barsallo, \$1,200; Josefina Berguido, for her one-half interest in house No. 715, \$225; estate of Manuel Berry, \$450; Isabela Berry, \$80; L. B. Bolton, for his one-half interest in house No. 706, \$500; Biviara (Juliana) Carrera, \$400; James Constance, \$100; J. R. Foley, a total of \$725 for individual houses, as follows: Tax No. 792, \$325; tax No. 794, \$400; Zolitud Gaspar, \$450; Martina Gonzalez, \$65; Juan Antonio Henriquez, for his one-half interest in house No. 715, \$225; Amelie Hipolite, \$540; J. M. Hyatt, for his one-half interest in house No. 833, \$750; Matthew Makling, \$40; Pedro Pampul Lindor, \$100; Euphemia Meame a total of \$185 for individual houses, as follows: Tax No. 725, \$65; tax No. 800, \$120; Rene Mederick, \$210; heirs of Charles Nelson, \$160; Juan Paredes, \$3,500; David Penso, for his one-half interest in house No. 706, \$500; Faustina del Rio, \$400; Dario Rodriguez, \$300; Dario Rodriguez, for his one-half interest in house No. 819, \$450; Dario Rodriguez, for his one-half interest in house No. 820, \$100; Florentina Rodriguez, \$60; Belisario Roncero, for his one-half interest in house No. 819, \$450; Belisario Roncero, for his one-half interest in house No. 820, \$100; Stanley S. Ross, for his one-half interest in house No. 833, \$750; Jacinto Sanchez, \$1,050; Chong Sifa, \$1,400; Carolina Tejada, \$300; Alexander Wood, \$500. Total \$19,045.

Award No. 17. *In the matter of certain claims for houses in the town of Gorgona*—To the following owners of improvements of every kind, and all other rights and claims in land located as above described: Encarnacion Antipara, \$120; estate of H. Barsallo, \$265; Carlos Carbone, a total of \$2,700 for individual houses, as follows: Tax No. 703, \$500; tax No. 709, \$850; tax No. 723, \$800; tax No. 724, \$550; Ernestina Caranza, a total of \$1,520 for individual houses, as follows: Tax No. 827, \$1,300; tax No. 828, \$220; Edward Douglas, a total of \$530, for individual houses, as follows: Tax No. 846, \$300; tax No. 847, \$230; Francisca Hernandez, a total of \$875, for individual houses, as follows: Tax No. 744, \$275; tax No. 758, \$600; Rosa Junco, \$140; Rafael Maestre, a total of \$3,890, for individual houses, as follows: Tax No. 739, \$2,500; tax No. 740, \$315; tax No. 741, \$500; tax No. 778, \$450; tax No. 782, \$125, (this award is subject to such equities, if any, as may be possessed by third parties, and it is ordered that the amount of this award be deposited in the Circuit Court of the Second Judicial District at Empire for distribution in accordance with the terms of this award;) Manuel Menesis, \$360; Marco Antonio Posada, for his one-half interest in house No. 768, \$180; Tomas Posada, for his one-half interest in house No. 768, \$180; Diego Manuel Sanchez, a total of \$1,080, for individual houses, as follows: Tax No. 722, \$550; tax No. 726, \$65; tax No. 727, \$65; tax No. 761, \$400. Total, \$11,840.

Award No. 18. *In the matter of various claims, located as below designated:*

A. Improvements on the estate of Mamey y Culo Seco, right (east) bank of the Chagres—Emanuel Jose Puison, \$30; Santiago Rangel, \$150.

B. Improvements on the estate of Bailamonos Sur—John Badis, \$75; Robert Duncan, \$40; Joseph Farquhar, \$40; Bernardo Ruiz, \$60; Edward Samuels, \$25.

C. Improvements on the estate of Juan Grande—Carlos Campo, \$10; Roberto Campo, \$10; Magdalena Campo, \$10; Antonia Campo, \$10; Manuel Campo, \$10; Juan Moreno, \$10, the above being joint owners of a finca on the Caribali watershed: Nivnor Chavez, \$100; Frederick Mitchell (excluding value of repairs made to his house under terms of special building permit issued to him), \$100; Martin Rodriguez, \$200.

D. Improvements in the area comprised between Gatun and Gamboa, east of the Canal prism—Henry Wildes, \$35.

E. Improvements on the land of Caño Quebrado—Jose Espiritu Gomez, \$100. Total \$1,015.

Rule of Dismissal

In the matter of certain claims for houses in the town of Gorgona, Docket No. 1250-a, August 9, 1913.—The evidence submitted by certain claimants with re-

spect to claims filed for buildings in the town of Gorgona showed that such persons had entered upon the lots and constructed their buildings after taking out leases from the Isthmian Canal Commission. In the case of Agusta Dunlop, in a decision rendered April 16, 1913, the Commission said:

"We have therefore reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligation which the United States has agreed to discharge under the Treaty; and for the adjudication of all such claims, the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the decision rendered in the case of Agusta Dunlop, the claims of the following persons for the houses upon the lots hereinafter designated by their tax numbers, are dismissed without award: Isabela Berry, tax No. 870; Francis O. Decaille, tax No. 804; Marco Anonio, and Tomas Posada, tax No. 746; Peter Saunders, tax No. 867.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Rule

In the matter of the motion of Counsel for the United States to reconsider the opinion of the Commission overruling the demurrer of the United States to the jurisdiction of the Commission, handed down July 25, 1913. Docket No. 131, August 9, 1913.—The Commission, after giving full consideration to the data submitted by Counsel for the United States requesting reconsideration of the opinion overruling the demurrer entered by Counsel for the United States to the jurisdiction of the Commission in the matter of the claim of Juan Sotillo, has reached the following conclusions:

First.—That the contention of Counsel for the United States with reference to the applicability of law No. 63 of October 20, 1888, and of the provisions of decree No. 906 of the National Executive of Colombia, dated November 22, 1889, passed in pursuance of clause No. 4 of Article 76, and of Article 201 of the constitution of Colombia, is fully disposed of by the fact that on November 6, 1894, a constitutional amendment was passed repealing the abovementioned provisions of the constitution, which constitutional amendment reads, as follows:

"The Congress of Colombia decrees:

Article 1. Article 201 of the constitution and clause 4 of Article 76 are hereby repealed. The general laws of the Republic are hereby made applicable to the Department of Panama.

~In fiscal matters special legislative and executive rules may be prescribed for the Department of Panama."

Second.—The other contentions are fully disposed of by the terms of the Commission's opinion dated July 25, 1913, in the matter of the demurrer to the jurisdiction of the Commission in the case of Juan Sotillo, when taken in connection with the specific provisions of law No. 23 of December 31, 1867, Law No. 149 of 1888, and the amendment to the constitution of Colombia, dated November 6, 1894.

The Joint Commission therefore rules that the data submitted does not furnish any ground for a reconsideration of the opinion overruling the demurrer of Counsel for the United States, to the jurisdiction of the Commission, and an order to this effect is entered accordingly.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

Supplementary Memorandum.

After the adoption of the above opinion the Commission received a supplementary memorandum from Counsel for the United States containing the information that Articles 201 of the Colombian constitution and paragraph 4 of Article 76 had been repealed. The supplementary memorandum furthermore states:

"I had not seen Law 41 at the time my memorandum was submitted. I may say, however, that it does not change the views expressed by the counsel for the United States on the fundamental question involved, that is to say, that the lands upon which the town or Gorgona is situated have always been national lands and within the control of the National Government; and the law of 1894 quoted in the opinion of the Commission could only apply to lands in respect to which the National Government had parted with its title in favor of the municipalities."

I might say in addition that it does not follow from the enactment of Law 41 abovementioned that the special laws previously enacted for the Department of Panama were thereby repealed."

The Commission is of opinion that the opinion just announced fully disposes of these contentions, when considered in connection with the original opinion overruling the demurrer.

(Signed) FEDERICO BOYD, ROLAND P. FALKNER, SAMUEL LEWIS, L. S. ROWE, Commissioners.

STEAMSHOVEL RECORDS.

Work of Central Division Shovels during the Month of July.

During the month of July, the total amount of material excavated in the Central Division was 1,057,200 cubic yards, of which 944,300 cubic yards were excavated by Central Division forces and 112,900 cubic yards were removed by sluicing at Gold Hill, the latter work being in charge of Fifth Division of the Chief Engineer's Office. Of the amount removed by the Central Division, 208,831 cubic yards were classified as earth, and 735,469 cubic yards as rock.

Of the total, 1,037,700 cubic yards were primary excavation for the Canal and 19,500 cubic yards were classified as plant excavation. Nine hundred and forty-four thousand, three hundred cubic yards were removed by steamshovels.

The high record for the month was made by shovel No. 262, working 35½ days in the Empire district, which excavated 42,000 cubic yards of rock.

The second best record for the month was made by shovel No. 256, working 36 days in the Empire district, which excavated 39,000 cubic yards of rock.

The best record for a shovel of the 70-ton class was made by shovel No. 109, working 25 days in the Culebra district, which excavated 22,818 cubic yards of earth.

Shovels No. 219 and No. 208, working in the Culebra district, made high records for one day by excavating 2,318 cubic yards of rock, on July 24 and 29, respectively.

Shovel No. 230, working on a 12-hour shift in the Culebra district, made a high record of 3,073 cubic yards of rock, on July 5.

Except where noted, the monthly reports are computed on place measurement, while daily reports are based on car measurements. The best records for the month, and for one day, are shown in the following tables:

BEST RECORDS FOR THE MONTH.
CULEBRA DISTRICT

SHOVEL No.	CUBIC YARDS.			
	Earth.	Rock.	Total.	No. of days at work.
250.....		37,504	37,504	29½
224.....	35,500		35,500	36½
206.....		35,300	35,300	37½

EMPIRE DISTRICT

262.....	42,000	42,000	35½
256.....	39,000	39,000	36
227.....	31,800	31,800	26

BEST RECORDS FOR ONE DAY.

Shovel.	LOCATION.	Date.	Character of material excavated.	Cubic yards.
227	Empire.....	July 18	Rock.....	2,157
227	Empire.....	July 21	Rock.....	1,995
217	Empire.....	July 16	Rock.....	1,932
208	Culebra.....	July 29	Earth.....	2,318
219	Culebra.....	July 24	Rock.....	2,318
219	Culebra.....	July 14	Rock.....	2,180

NOTE.—The excess number of days over and above the actual number of working days in the month of July (25) is due to double shift and night work.

Office of Architect Abolished.

The Canal Commission's office of Mr. A. W. Lord, the New York City architect, who has been employed on plans for the permanent structures of the Canal, was closed August 1, and the office material will be transferred to the Isthmus for use in the office of Mr. M. J. Schiavoni, the assistant architect, at Culebra.

TELEPHONE PAY STATIONS.

Installation Will be Made at Various Central Places in the Zone.

In order to reduce the unofficial use of telephones installed for official business, the Panama Railroad Company will install automatic pay telephones at dock No. 11, dock No. 16 (when completed), building No. 1, Commission clubhouse, and commissary, Cristobal; the gatekeeper's house at Mount Hope cemetery; New Gatun station; Gatun station and clubhouse; Empire station and clubhouse; Culebra station and clubhouse, and the Administration building; Pedro Miguel station; Corozal station and clubhouse; the steel pier at Balboa, and the East Balboa hotel. The telephones cost about \$20 each, and the cost of their installation will be about \$10 each; it is estimated that revenues for the first quarter will about pay for them.

UNDERGROUND CONSTRUCTION, CRISTOBAL.

A 4-duct line has been laid, extending from house No. 80, in which the telephone exchange is situated, for a distance of 625 feet along Roosevelt avenue and over to dock No. 16, thence out along dock No. 16 to a point about opposite building No. 2, where it crosses the avenue to a point between buildings Nos. 1 and 2. Another line extends from the end of dock No. 16 to a point halfway between dock No. 16 and dock No. 17, and will not be carried further until the fill and other work is completed. This conduit line carries one 100-pair telephone cable for distribution on docks Nos. 16 and 17 and telephones in the vicinity of Cristobal Point. It also carries two 3-conductor cambric cables, No. 4, B. and S. gage, one for light, and the other for power, for docks Nos. 15, 16, and 17.

Another duct line has been laid from Roosevelt avenue to the Cristobal Hotel, 200 feet long, to serve the telephones in that part of the settlement. A manhole has been installed opposite house No. 10 for taking care of two ducts to the Panama railroad lots on the water front leased by the United Fruit Company and the Hamburg-American Line for the building of steamship offices, one duct for light, and the other for telephone distribution. Circuits are being arranged in the 100-pair telephone cable for fire alarm telegraph circuits, distributed from a manhole opposite the fire station, which will serve all of the new docks, as well as dock No. 11 at Cristobal Point.

I. C. C. TELEPHONE SERVICE.

The committee on telegraph and telephones appointed by the Chairman to consider and submit recommendations relative to the establishment of a working basis upon which service is to be furnished the Canal Commission has reported, as follows:

1. That the I. C. C. continue to pay a flat rate per month for the operation and maintenance of telephones, but that the term "Maintenance," be considered to cover only repairs and renewals, the ordinary installation charge, and such extensions, general changes, and repairs, due to the operation of the Commission, as do not exceed a cost of \$100, separate bills to be rendered for all construction, changes, and repairs caused by the operation of the Commission, exceeding a cost of \$100, and charged directly against the department or division requiring such work.

2. That the monthly cost be reduced, effective July 1, to \$5,000 per month, to con-

form to the appropriation made for such service during the fiscal year, and that it be held to cover only the cost of operation and maintenance as outlined above.

3. That the Panama railroad bear the expense of changing the insulators on the relocated line, as the period during which the Commission agreed to pay half of the expense has expired.

4. That under the permanent organization the telegraph and telephone lines be operated by the Panama railroad as an adjunct of the railroad operations.

UNDERGROUND SYSTEM OF WIRE DISTRIBUTION.

A committee, consisting of Mr. R. K. Morris, Capt. W. H. Rose, Mr. Hartley Rowe, and Mr. C. L. Bleakley, has been appointed to consider and make recommendations with reference to placing any or all telegraph, telephone, and fire alarm, as well as electric light and power distribution systems of the Canal Commission and Panama railroad, underground in any or all of the permanent towns. The report is to cover the advantages and disadvantages of such a system, the necessary cost, program of work, and other essentials.

Red Cross Finances.

A statement of the finances of the Canal Zone Chapter, American National Red Cross, for the month of July, 1913, follows:

RECEIPTS.		
July 1.	On hand.....	\$2,320.96
July 5.	Refund of money advanced for deportation of Colombian family, Colon.....	15.00
July 7.	Returned money advanced family at Panama.....	15.00
July 9.	Interest credited at bank for March, April and May.....	10.80
July 18.	Final payment on \$100 advanced family at Panama.....	20.00
		\$2,381.76
DISBURSEMENTS.		
July 7.	To treasurer, American National Red Cross, one-half annual membership dues for quarter ended April 30.....	\$189.50
July 14.	Expenses in connection with deportation of destitute British subject, Colon.....	6.05
July 21.	Relief of destitute woman, Ancon.....	5.00
July 24.	Relief of deported Jamaican, Colon Hospital.....	5.00
July 26.	Relief of American, Colon Hospital, sent to United States account of tuberculosis.....	75.00
		\$280.55
July 31.	Balance on hand.....	\$2,101.21
		JOHN L. PHILLIPS.
Approved:		Treasurer.
EDW. SCHILDHAUER, Chairman.		

Immigration to the Isthmus During July.

According to the figures of the quarantine service, the number of steamship passengers who embarked at Colon during July was considerably in excess of the number who landed. The last month, prior to this time, in which the emigration exceeded the immigration at this port was in August, 1912. The number of persons who landed at the port of Colon from foreign ports during July was 3,566, consisting of 1,574 cabin, and 1,992 steerage passengers. The number of persons who embarked for foreign ports during the same period was 4,695, consisting of 2,043 cabin, and 2,652 steerage passengers. The number of persons who embarked over those who

landed was 1,129. The immigration from the West India islands, and from Colombia, shows a falling off of 1,055, as compared with the month previous, and consisted of 1,523 persons from the West Indies; and 139 from Colombia. The passengers arriving "in transit" numbered 2,306, consisting principally of people bound for the west coast of South America, and tourists. This number is 978 more than for the month of June. Ninety-nine vessels arrived at Colon during July, as compared with 88 in June.

The number of persons who landed at the ports of Panama and Ancon during the month from foreign ports was 672, consisting of 528 cabin, and 144 steerage passengers. The number of persons who embarked for foreign ports was 430, consisting of 330 cabin, and 100 steerage passengers. The number who landed over those who embarked was 242. The net emigration from the Isthmus during July was 887.

Contest for Artists.

Competition is invited by the Director General of the Panama National Exposition, to be held next year, in the submission of designs by both Panamanian and foreign artists for an emblematic coat-of-arms that will best set forth the discovery of the Pacific Ocean by Vasco Nuñez de Balboa, and the result of such discovery on the Iberian race and of humankind in general. To this end, the artist may employ any settings, scenes, or figures, real or fanciful, that will faithfully portray in heroic style the magnitude of the event. The author of the accepted design will be awarded a prize of \$200. All designs must be submitted before August 30, 1913. Further details may be obtained from the Director General, Panama National Exposition, care of the Minister of Public Works, Panama.

Parties Chartering Sightseeing Train.

Societies and other organizations chartering the sightseeing train of the Panama railroad will be required to state at least two days in advance the exact number of passengers to be carried. After the number has been set, charge will be made for it regardless of whether as many passengers are carried; and any passengers in excess of the number will be charged at the regular rate of \$1.50 a person. One social organization, which had chartered the train, requested that arrangements be made for carrying 150 persons, and only 43 took the trip. The ruling is a protection against hauling unnecessary equipment and furnishing unnecessary guide service.

Work of Lidgerwood Unloaders in July.

During the month of July, the following Lidgerwood trains and cars were unloaded by the Central Division:

LOCATION.	No. of unloaders.	No. of trains.	No. of cars.
Balboa.....	4	1,099	23,079
Miraflores.....	1	155	3,255
Gamboa.....	4	1,011	20,220
Total.....	9	2,265	46,554

A contract has been entered into between the Canal Commission and the Rainwater Lumber Company of New Orleans, by which the latter will furnish 864,500 feet B. M., dimension lumber, f. o. b., Colon, at the rate of \$25.90 per thousand feet.

FUTURE OF PANAMA RAILROAD.

Directors Decide To Continue Railroad and Steamship Business, Along Present Lines.

At a meeting of the Board of Directors of the Panama Railroad Company, held in Washington, on June 19, to consider the future of the railroad, and its steamship line, the vice-president laid before the board communications from 13 directors of the Panama railroad, and of the Naval and Military Board, setting forth, in response to a request of the company, their individual views as to the advisability of continuing the operation of the railroad and steamship lines, and their conduct under the private charter of the company.

After a full consideration of these several views, it was unanimously concluded that the operation of a railroad over the Isthmus was both a military and a commercial necessity, and that for the purpose of maintaining a constant and adequate supply of provisions and materials upon the Isthmus for use in connection with the Canal and railroad, and of establishing reasonable prices with respect thereto, and for the purpose of maintaining a line of transportation at reasonable rates between the United States and the Isthmus, available to the employees, officers, and soldiers of the United States, and their families, domiciled upon the Isthmus in connection with the maintenance, operation, and protection of the Canal and railroad, it was highly advisable, it not necessary, that the Government should maintain a steamship line either directly, or through the agency of the Panama Railroad Company, between New York and Colon.

It was further the opinion of a large majority of the directors submitting opinions, and of all present and participating in the discussion, that for legal and practical reasons, it was inadvisable for the Government of the United States to surrender at the present time the charter of the Panama Railroad Company. This charter was granted by special act of the legislature of the State of New York in the year 1849, and which charter conferred valuable privileges not easily obtainable at the present time, including the right to operate a steamship line in connection with the railroad. Moreover, the title to land grants conferred upon the Panama Railroad Company by the Republic of New Granada in connection with the original concession, and the concessionary rights for the exclusive maintenance and control of all railway and water transportation routes across the Isthmus of Panama, were vested in the railroad company. These rights so vested have been subsequently recognized by the Republic of Colombia, and the Republic of Panama. It was further considered that the Panama railroad by reason of its exemption from governmental restrictions with respect to advances, and the collection and disbursing of funds, was capable of discharging a general transportation duty toward the public in the operation of its railroad and steamship lines, which could not be discharged by the Government of the United States operating directly without substantial amendments to the general statutes.

It was the opinion of the majority of the directors that, in the absence of an expression to the contrary by Congress, no good reason was perceived, why, in connection with the operation of the railroad and steamship lines,

they should not be allowed the use of its available space for the transportation to and from the Isthmus of commercial cargo. It was considered in this connection that the establishment of local rates between New York and Panama might have an indirect bearing upon the prices at which commodities might be handled by private merchants, and others upon the Isthmus, and thus indirectly redound to the benefit of the American population resident upon the Isthmus in connection with the operation, maintenance, and protection of the Canal. It was finally unanimously agreed, inasmuch as Congress under various Acts and Resolutions had recognized the continued activities of the Panama Canal, and in the Act of August, 1912, had authorized the continued use of the Panama Railroad Company for the purpose of discharging the duties and functions assumed by the Government in connection with the operation of the Canal, or thought desirable in reasons brought forth in the discussion, that no change of policy in the operation of the Panama railroad and steamship lines should be declared until such time as experience may have demonstrated that a change were advisable, or until such time as Congress may have indicated by legislation that the policy of the Government with respect to this company should be modified or reversed.

Thereupon it was unanimously

Resolved, that, except as the emergencies of the company's traffic may make changes necessary, there be no change in the present method of operating the Panama railroad, and its steamship line.

Removing Gorgona Shops.

The work of transferring Gorgona shops will be entirely completed by the end of August, and as the buildings are being torn down by the forces of the Quartermaster's Department as fast as they are vacated, the site will be left bare very soon after that time. The work of dismantling the car shop machinery was begun on August 4. It has been temporarily installed in the south end of the planing mill at Empire. All air brake work, and the equipment and employees connected therewith, were transferred to Empire shops on August 4, and all steamshovel repairs are now made at that point. The foundry at Gorgona was closed down on August 13, and the work was resumed at the new plant at Balboa on the next day. The night shift of machinists, blacksmiths, boilermakers, and pipe-fitters, with the exception of a few boilermakers making shore and pontoon pipe, commenced work at Empire on the night of August 12. The pattern shop was closed on August 12, and the work will hereafter be done at Balboa. The laboratory, both chemical and physical, was transferred to the Balboa power plant on August 9. The official records, and the office of the assistant superintendent, will be transferred to Empire on August 18. The oxy-acetylene plant will be one of the last to be transferred, and present plans call for its removal to Balboa on August 28; its transfer will probably entail a few days' interruption in the service. The wrecking outfit will be transferred to Empire about August 16.

All machinery at Gorgona shops not required in the permanent plant at Balboa, or at Paraiso, where a marine repair shop will be installed for the permanent dredging fleet, will be shipped to Cristobal and placed in the

machine and erecting shops at that point. The machinery destined for the new marine repair shop at Paraiso may be taken to Cristobal and temporarily stored in the shops.

PERSONAL.

Mr. Richard Lee Metcalfe of Lincoln, Nebraska, accompanied by Mrs. Metcalfe, three sons, Lee, Theodore, and Kenneth, and Miss Edna Harpham, a friend of the family, arrived on the *Panama* on Thursday, August 7. He assumed the duties of Head of the Department of Civil Administration on Saturday, August 9.

Commissioner D. D. Gaillard, accompanied by his family, sailed on the *Ancon*, on Saturday, August 9, on six weeks special leave of absence.

The resignation of Mr. Frank A. Gause as superintendent of schools became effective on August 9. Mr. Frank P. Wagg, formerly supervisor in the Division of Schools, has been appointed superintendent, effective about September 1.

Mr. W. M. Wood, assistant disbursing officer of the Canal Commission, has resigned, effective August 30, and, sailed for New York on the *Panama*, on Wednesday, August 13. He will spend a short time in the United States, and then leave for Cuba, where, near Guantanamo, he has business interests. His family will remain on the Isthmus for a few weeks and then join him in Cuba.

Civil Service Examinations.

A supply of the Manual of Examinations for the fall of 1913 has been received.

Examinations for the following-named positions are scheduled to be held, probably on September 14: Assistant inspector of boilers, assistant inspector of hulls, local inspector of boilers, local inspector of hulls, Steamboat-Inspection Service; copyist topographic draftsman, topographic draftsman, nonappropriated Departmental Service; junior engineer draftsman, Engineer Department at Large; field matron, Indian Service; kindergarten teacher, Indian Service; pharmacist, Public Health Service; physician, all services; printer, Government Printing Office; veterinarian, Bureau of Animal Industry and Quartermaster Corps. Applications will not be received after August 23.

Examination for guard, U. S. Penitentiary Service, will be held probably on September 28; applications will not be received after September 5.

Women will be admitted only to examinations for copyist topographic draftsman, topographic draftsman, field matron, and kindergarten teacher.

Application should be secured from and filed with this office. In requesting information, the kind of examination desired should be specifically mentioned.

The examinations will be held probably at Empire, in the Commission clubhouse, but the place of examination, and also the date, should be omitted in application forms.

Applicants for the Isthmian Canal or Philippine services who fail to present a photograph to the examiner will not be admitted to examination.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application.

ISTHMIAN CIVIL SERVICE BOARD.

Culebra, C. Z., August 9, 1913.

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of moving picture dates for the week August 18 to 23 is, as follows: Monday, Corozal and Empire; Tuesday, Gatun; Wednesday, Culebra; Friday, Cristobal and Porto Bello; Saturday, Empire.

EMPIRE.

There are still a number of the Gorgona members who have not transferred their membership cards to the Empire Y. M. C. A. It is requested that the men do this as soon as possible. An invitation is extended to all new men to join the clubhouse, and take part in the activities.

An entertainment and "Smoker" will be given on Monday evening, August 18. All members are invited to attend.

The Empire clubhouse has purchased a piano player and a number of music rolls; the piano will be located on the first floor and used by those familiar with piano players.

The new covers and other pool and billiard table supplies have arrived, and the tables will be put in shape at once.

The 3-man bowling tournament has been started. Twenty-seven men have entered. The captains are, Edwards, Gustavson, Potter, Beattie, Parkis, Giavelli, Gilmore, King, and Peterson.

Mr. Connor played five members of the Empire chess team on Thursday, August 14, winning three games and losing two. A return match will be played.

Several new Spanish classes have started. All those wishing to enter should do so at once. Classes meet Tuesday and Thursday evenings, and Wednesday and Friday mornings.

GORGONA.

All equipment has been removed from the Gorgona clubhouse and transferred to the Lirio mill, Culebra, where it will be stored until the clubhouse is reerected and ready for use at Pedro Miguel.

The work of dismantling the present clubhouse began on Tuesday, August 12.

GATUN.

The *Wall Street Journal* has been added to the magazine list at the request of several members.

Mrs. F. A. Crosscup and Mrs. M. J. Nolan have recently presented with gold and silver medals, respectively, as prizes for a duckpin tournament, conducted among the women.

The front steps and various porches of the clubhouse have been made more attractive by means of a large number of ferns and other potted plants recently transferred from the Gorgona clubhouse.

D. C. Galloway, manager of pool and billiards, has arranged for a handicap pool tournament, which will be started on Wednesday evening, August 13. Those who have so far handed in their names are, as follows: Bailey, Pettitt, Von, Reisner, Townley, Kerruish, Garrison, Gray, Bradley, Johnson, Dennis, Carkeet, Hamill, Mitchell, Wali, Galloway. Gold, silver, and bronze medals will be given as prizes. The entrance fee is \$1 gold.

Several new duckpin and tenpin balls have been ordered from the United States; also, five sets of rubber band duckpins.

On Thursday evening, August 7, a large number of the members met and organized the "Red Hot" baseball league, with J. O. Childers, president, and H. J. Zane, secretary and scorer. The names of the various teams and players are, as follows:

Transportation—Sheppard (captain), Fluharty, Bowes, Wheeler, Hoffman, Clendennin, Peterson.

First Division—L. Mitchell (captain), Kyes, Winter, Ragan, Walchen, Shad, Easter.

Atlantic Division—Whiston (captain), Thompson, Wright, Roberts, Bailey, Coleman, Carkeet.

Commissary—Kerruish (captain), Hallowell, Delgado, Mock, Walsh.

McClintic-Marshall, Office—Hess (captain), Furlong, Zane, Childers, McMahon, Wurster, Wilson.

First McClintic-Marshall, Field—Rothgeb, (captain), Conley, Rothgeb, Bellringer, Galloway, Harper, Rendinell.

Second McClintic-Marshall, Field—M. Conley (captain), Brennan, Kotch, Hingle, Roudenbush, Tucker, Ridenauer.

The entrance fee is 50 cents. Gold cuff buttons will be given as prizes. The first games of the tournament were played on Monday, August 11. Immediately following the conclusion of the indoor baseball league games, a local tenpin tournament, and a local basketball tournament will be started.

The standing of the First Division duckpin tournament on Saturday, August 9, was, as follows:

Team.	No.	Name.	Won.	Lost.	P. C.
3	Dubbs	4	2	.666
4	Biliacens	2	1	.666
5	Boosters	2	1	.666
1	Transmitters	3	3	.500
2	Shuttles	3	3	.500
6	Nutsplitters	1	2	.333
7	Chronics	0	3	.000

A new supply of pool cues is on sale at the clubhouse.

The following is a part of the program for the "Smoker" to be held on Saturday evening, August 23: Tenth Infantry orchestra; Tenth Infantry gun drill squad; Otis, Burmeister, Morrison, in a "Barbadian talk"; Charles Pierce, in a character sketch; Andy Carr, in characteristic songs; George Adam, ballad singing; Pierce and Adams, as the musical wizards; Harry Aaron, Chinese music; C. C. Pearsall, piano selections; Homer and Aaron, piano duet; Chas. Ray, in tenor vocal selections; McSparran and Carson, broadsword exhibition.

The new game of indoor quoits has become a very popular game among the members of the clubhouse.

Motion pictures will be shown on Saturday evening this week, instead of Monday, as previously announced.

CRISTOBAL.

Mr. D. E. Connor of Panama played a simultaneous chess match with Messrs. Wilson, Oden, Verner, Salzberg, Tuttle, Taylor, MacQueen, and Gill on Saturday evening, August 9. Mr. Connor proved more than a match for his contestants, with the exception of Mr. Taylor, with whom he played a draw.

Thirty men enrolled in the tenpin tournament, which began Tuesday, August 12.

The Corozal chess club will play the Cristobal club at Cristobal on Saturday, August 16.

A prize will be given for the highest score for the month in tenpins.

The Cristobal duckpin team of the "American" league will roll off the tie game with the Empire team on the Gatun alleys on Saturday, August 16.

The ladies' duckpin team will bowl the ladies' duckpin team of Gatun, Saturday, August 16.

Supplies for the Canal.

The following steamers, with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal, Colon, and Balboa, during the two weeks ending August 9:

Magdalena, July 27, from New York, with 331 pieces steel plates, for stock.

Tivies, July 27, from New York, with 12 bales rubber hose, 398 coils Manila rope, 357 sacks oats, for stock.

Heredia, July 28, from New Orleans, with 600 barrels paving brick, 191 pieces creosoted ties, for Panama Railroad Company; 6,000 pieces yellow pine lumber, for Mechanical Division; 70 pieces piling, 279 pieces

cross-ties, 1,719 pieces yellow pine lumber, 28 crates handles, 45 cases lampblack, 311 bales prairie hay, 1,286 pieces sewer pipe, for stock.

Ancon, July 29, from New York with 135,311 bags cement, 264 slabs spelter, 109 kegs rivets, 100 cases lubricating oil, 11 packages lavatories, for stock; 47 packages boilers and fittings, for Sixth Division; 163 bundles car castings, 69 bags silica sand, for Mechanical Division; 256 pieces angles and bars, for Second Division; 48 reels copper wire, 65 cases machinery, for First Division; 68 cases caustic soda, 142 bags tile plugs, for stock; and a miscellaneous cargo, the whole consisting of 136,570 packages, weighing 6,920 tons.

Prinz August Wilhelm, July 28, from New York with 60 cases electrical machinery, for First Division; 16 cases paper, 1,247 pieces wrought iron pipe, for stock.

Santa Maria, July 30, from New York, with 9 cases bolts and washers, 1,500 pieces anchor bolts, for First Division; 10 cases hardware, for stock.

Skogstad, July 31, from Norfolk, with 202 tons smithing coal, for stock.

Atenas, July 31, from New Orleans, with 462 pieces yellow pine lumber, for Mechanical Division; 630 sacks dairy feed, for stock.

Pleiadés, July 31, from San Francisco, with 4 cases rubber hose, 10 drums carbon bisulphide, for stock.

Advance, August 2, from New York, with 56 cases incandescent lamps, 14 crates electrical machinery, 18 pieces locomotive tires, for Mechanical Division; 194 bundles steel bars, 84 pieces steel beams, 39 barrels solid asphalt, 14 crates building paper, for fortifications; 14 reels electric cable, 18 cases electric machinery, 14 barrels tiling, for First Division; 21 cases drug and sundries, 60 cases feed, for Sanitary Department; 12 bags pads, 20 packages stepladders, 22 cases water coolers, 16 cases copper nails, 600 pieces steel angle, 318 kegs paint, 50 rolls wire fencing, 200 pieces steamshovel castings, for stock; and a miscellaneous cargo, the whole consisting of 2,000 packages, weighing 22 tons.

Colusa, August 2, from Tacoma, with 153,000 pieces Douglas fir lumber, 141 pieces piling, for stock.

Sixtola, August 4, from New York, with 39 pieces structural steel, for Fifth Division; 18 pieces structural steel, for Second Division; 20 crates stovepipe, 16 crates lead pipe, for stock.

Emil L. Boas, August 4, from New York, with 66 cases machinery, for First Division; 69 pieces steel plates, 18 barrels pipe-fittings, 11 cases stable broom, for stock.

Parismina, August 5, from New Orleans, with 348 pieces mahogany lumber, 2,600 pieces yellow pine lumber, 55 pieces piling, 8 kegs washers, 500 cases kerosene, 200 drums kerosene, for stock; 729 barrels paving brick, for Panama Railroad Company; 2,300 pieces yellow pine lumber, for Mechanical Division.

Aztec, August 5, from San Francisco, with 2,473 pieces Douglas fir lumber, for stock.

Haakon VII, August 5, from New Orleans, with 2,882 pieces car lumber, for Mechanical Division; 28,000 pieces lumber, 75 drums gasoline, 145 pieces cross-ties, for stock; 2,518 barrels paving brick, for Panama Railroad Company.

Almirante, August 6, from New York, with 52 cases electrical material, for First Division; 37 coils copper wire, 10 barrels electrical material, for Mechanical Division; 232 packages structural steel, for Panama Railroad Company; 210 pieces structural steel, for Fifth Division; 817 kegs white lead, 33 barrels pipe-fittings, 95 kegs bolt spikes, 1,441 sacks oats, for stock.

Turrialba, August 7, from New Orleans, with 10 kegs washers, 22 pieces white oak lumber, for stock.

Alexandria, August 7, from Liverpool, with 58 pieces bucket links, for Sixth Division; 100 pieces dipper teeth, 204 barrels carbolic acid, for stock.

Panama, August 7, from New York, with 11 reels electric cable, 63 cases electrical material, for First Division; 12 barrels dry batteries, 7 cases incandescent lamps, for Mechanical Division; 240 drums paint, 457 cases nuts, 15 pieces steel plate, 18 pieces tees, 20 cases envelopes, 30 pieces castings, 1 kegs washers, 66 cases paint, 55 cases varnish, 78 pieces angles and channels, 300 kegs bolts, 40 bundles iron, for stock; and a miscellaneous cargo, the whole consisting of 1,900 packages, weighing 275 tons.

CLASSIFIED EXPENDITURES—ISTHMIAN CANAL COMMISSION.

A statement of classified expenditures of the Isthmian Canal Commission to April 30, 1913, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering.	General Items.	Fortifications.	Total.
Total to June 30, 1909.....	3,427,090.29	9,673,539.28	69,622,561.42	78,022,606.10	160,745,797.09

OFFICIAL CIRCULARS.

Labor Day, a Holiday.

CULEBRA, C. Z., August 12, 1913.

CIRCULAR No. 496:

Labor Day, Monday, September 1, 1913, will be observed as a holiday throughout the Canal Zone, and as far as possible all work will be suspended on that day.

GEO. W. GOETHALS,
Chairman.

Head of Department of Civil Administration.

CULEBRA, C. Z. August 9, 1913.

CIRCULAR No. 495:

Effective this date, Mr. Richard L. Metcalfe, a member of the Isthmian Canal Commission, is placed in charge of the Department of Civil Administration, vice Mr. M. H. Thatcher, resigned.

GEO. W. GOETHALS,
Chairman.

Acting Division Engineer, Central Division.

CULEBRA, C. Z., August 8, 1913.

CIRCULAR No. 493:

During the absence of Lieut.-Col. D. D. Gaillard on leave, effective August 9, 1913, Mr. A. S. Zinn will act as division engineer of the Central Division.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Acting Subsistence Officer.

CULEBRA, C. Z., August 12, 1913.

CIRCULAR No. 494:

During the absence from the Isthmus of Lieut.-Col. E. T. Wilson, Subsistence Officer, all his duties in connection with the Subsistence Department of the Isthmian Canal Commission and the commissary department of the Panama railroad will be performed by Capt. F. O. Whitlock, Assistant Subsistence Officer.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Extension of Hunting Limits.

CULEBRA, C. Z., August 6, 1913.

CIRCULAR No. 372-B:

The territory within which hunting is permitted, as described in Circular 372-A, is hereby extended to include all the territory in the Canal Zone west of the Canal proper and between the Atlantic Ocean and the Mandingo River. Hunting in the territory between the Pacific Ocean and the Mandingo River is prohibited.

Regulations providing for the hunting of birds will be published in the near future and attention is invited to the fact that in the meantime the hunting of birds is prohibited by Executive Order.

GEO. W. GOETHALS,
Chairman, Isthmian Canal Commission,
President, Panama Railroad Company.

Paragraph 8, Special Orders No. 138, Temporarily Suspended.

WAR DEPARTMENT,
WASHINGTON, D. C., July 21, 1913.

SPECIAL ORDERS
No. 168.

[Extract].

40. The operation of Paragraph 8, Special Orders No. 138, June 14, 1913, War Department, relating to Maj. Percy M. Ashburn, Medical Corps, is suspended for a period of four months.

[2047984, A.-A. G. O.]

By order of the Secretary of War.

W. W. WOTHERSPOON,
Maj. General, Acting Chief of Staff.

Official:

H. O. S. HEISTAND,
Adjutant General.

Acting Chief Engineer, Panama Railroad.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., August 8, 1913.

CIRCULAR No. 154:

All Concerned.—During the absence of Lieut. F. Mears, chief engineer, on leave, Mr. E. Zook is appointed acting chief engineer, effective August 9, 1913.

JOHN D. PATTERSON,
General Superintendent.

Employees' 24-Trip Tickets.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., July 31, 1913.

CIRCULAR No. 147:

Heads of Departments.—Please instruct all employees in your department that all expired monthly trip passes

in employees' twenty-four trip pass books, must be removed and destroyed, before the book is presented for passage.

JOHN D. PATTERSON,
General Superintendent.

Stencilling of Division of Municipal Engineering Equipment.

CULEBRA, C. Z., August 1, 1913.

ALL ACCOUNTABLE OFFICERS:

The Chairman has approved recommendation that all rolling stock, excavating equipment, and hand and push cars assigned to service with the Division of Municipal Engineering be stencilled with a diamond "M. E."

Cars to now in the service of the forces of the Division of Municipal Engineering will be immediately restencilled (unless already so stencilled), and new equipment as assigned will be changed at once by the Division of Municipal Engineering.

R. E. WOOD,
Chief Quartermaster.

Taboga Sanitarium.

ANCON, C. Z., July 23, 1913.

Circular relative to Taboga sanitarium, of July 16, 1912, is hereby republished and amended, as follows: To All Concerned.—The rates charged for board and room at Taboga sanitarium will be, as follows:

Isthmian Canal Commission and Panama railroad employees regularly transferred as patients from Ancon, Colon, and Santo Tomas hospitals, no charge. So far as Santo Tomas Hospital is concerned, this refers to Commission employees detailed for duty there, and white employees of the Republic, regularly employed at the institution.

Such employees regularly transferred as patients from Ancon, Colon, and Santo Tomas hospitals, and who ask for private room to themselves, \$2 a day, when rooms are available.

Employees not transferred as above, and when two or more occupy the same room, \$1.50 a day.

Dependent members of families of Isthmian Canal Commission and Panama railroad employees, as follows: For adults, two, or more, assigned to the same room, \$1.50 a day each.

For adults occupying at their own request a room to themselves, when one is available, \$2 a day.

For all children of such employees under 12 years of age, except infants being fed at the breast, 75 cents a day.

For officers and enlisted men of the Army, Navy, and Marine Corps, stationed on the Isthmus, and for officers and crews of United States vessels cruising in adjacent waters, as follows:

For officers, \$1 a day. For Army officers, the charge is a personal one. For officers of the Navy and Marine Corps, the charge is made against the Bureau of Medicine and Surgery, United States Navy.

For enlisted men, the charge is the actual cost of the ration for the preceding month.

For members of families of officers and enlisted men of the Army, Navy, and Marine Corps, same as members of families of employees of the Isthmian Canal Commission and the Panama railroad.

For employees of the following companies doing work for the Commission on the Canal Zone, rate granted to employees of the Isthmian Canal Commission and the Panama railroad:

McClintic-Marshall Construction Company, United States Steel Products Company, Otis Elevator Company, Penn Bridge Company, American Cement Tile Manufacturing Company, Petroleum Iron Works Company.

For dependent members of families of such employees, rates granted to families of Commission employees.

For individuals not connected with the Isthmian Canal Commission, or the Panama railroad, and not having special hospital rates with the Commission, when two, or more, persons occupy one room, \$2.50 a day.

For such individuals occupying rooms alone, when rooms are available, \$4 a day.

Servants of employees, black, meals only, \$1 a day. Servants of employees, white, meals and room, \$1.50 a day. Servants of nonemployees, white, meals and room, outside rate.

With the exception of employees who have to be admitted to Taboga sanitarium from Commission and Santo Tomas hospitals, in order that their time may be covered by sick certificate, patients and nonpatients may be admitted to Taboga sanitarium direct, without approval of this office, on the written recommendation of any superintendent of hospital, or district physician of the department (this to include the superintendent of the sanitarium).

In sending patients and others to Taboga, in accordance with above rates, the superintendent of hospital, or district physician, should state specifically in his recommendation the name and exact status of each individual as to dependency, so that there may be no doubt as to the rate to be charged. Only employees and the im-

mediate dependent members of their families are entitled to the employee rate. Relatives visiting on the Isthmus should be charged outside rates.

Copies of all admission lists and letters should be furnished this office.

The usual precautions should be taken against sending cases of infectious disease to Taboga.

White people only are to be admitted to the sanitarium.

By direction of the Chief Sanitary Officer.

JOHN L. PHILLIPS,
Assistant Chief Sanitary Officer.

Delivery of Commissary Supplies.

CRISTOBAL, C. Z., August 13, 1913.

CIRCULAR No. 459:

To All Concerned.—By authority of the Chairman, delivery to persons occupying other than Isthmian Canal Commission or Panama Railroad Company's quarters is authorized, effective August 20, as follows:

1. Deliveries of ice, cold storage, and other supplies will be made to all employees in the Canal Zone at places where regular deliveries are now maintained, no matter whether employees live in Commission quarters or not.
2. Deliveries of ice and cold storage supplies will be made to employees living in non-Isthmian Canal Commission and Panama Railroad Company's quarters in the cities of Panama and Colon. Deliveries will not be made in Panama, however, beyond the railroad bridge leading to Las Sabanas road.
3. If employees to whom these deliveries are made abuse their commissary privileges by selling ice or other supplies to other persons, deliveries will be stopped in such cases, and recommendation will be made to deprive offenders of their commissary privilege.

JOHN BURKE,

Approved:

F. O. WHITLOCK,

Acting Subsistence Officer.

Changes in Mechanical Division.

GORGONA, C. Z., August 6, 1913.

To All Concerned.—Effective August 1, 1913, Mr. P. S. Cone is appointed general foreman of Pedro Miguel engine house, vice Mr. Geo. J. Gunn, resigned.

Mr. Chas. P. Hockenberry has been appointed night foreman of Pedro Miguel engine house and will assume the duties formerly performed by Mr. Cone.

Mr. Rolla A. Compton, traveling engine house foreman, has been appointed foreman of Balboa engine house, relieving Mr. Hockenberry.

J. J. EASON,

Approved:

Assistant Superintendent,

T. C. DICKSON,

Inspector of Shops.

Mechanical Division.

*Indicates reduction from last list.
**Indicates 5 cents allowed for return of bottle.
†Indicates advance on last list.
‡Fowls weigh each, about as follows: 3. 3½, 4. 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.
§Sold only from commissaries; no orders taken for delivery.
¶Not less than half of a fresh ham or shoulder will be sold.

Tug Service to Porto Bello and Toro Point.

Following is a revised schedule of Atlantic Division tugs in the service between Docks 13 and 16 and Porto Bello; and Docks 13 and 16, and Toro Point:

PORTO BELLO.
Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays—Leave Dock 13 at 5 p. m., arrive Porto Bello 10 p. m.; returning, leave Porto Bello 11 p. m., arrive Dock 13 about 6 a. m.
Saturdays—Leave Dock 13 at 9 a. m., arrive Porto Bello at 11 a. m.; returning, leave Porto Bello 3.45 p. m., arrive pier No. 4, Colon, 5.45 p. m.
Every Saturday—Leave Dock 13 at 6 p. m., arrive Porto Bello at 11 p. m.; returning, leave Porto Bello 12 midnight, arrive Dock 13 about 6 a. m.
Every Sunday—Leave Pier 16 at 7 a. m., arrive Porto Bello 9 a. m.; returning, leave Porto Bello 9 p. m., arrive Pier 16 at 11 p. m. (Effective August 17.)

TORO POINT.
Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m.; returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. Sailing No. 2—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m. Special, Wednesdays only—Leave Dock 13 at 12 noon, arrive Toro Point 12.30 p. m.; returning, leave Toro Point 12.30 p. m., arrive Dock 13 at 1 p. m.
Saturdays. Sailing No. 1—Leave Dock 13 at 6.30 a. m., arrive Toro Point 7 a. m.; returning, leave Toro Point 8 a. m., arrive Dock 13 at 8.30 a. m. Sailing No. 2—Leave Dock 13 at 5 p. m., arrive Toro Point 5.30 p. m.; leave Toro Point 5.30 p. m., arrive Dock 13 at 6 p. m.
Sundays. Sailing No. 1—Leave Dock 13 at 9.30 a. m., arrive Toro Point 10 a. m.; returning, leave Toro Point at 10.30 a. m., arrive Dock 13 at 11 a. m. Sailing No. 2—Leave Pier 16 at 4.30 p. m., arrive Toro Point 5 p. m.; returning, leave Toro Point 5 p. m., arrive Pier 16 at 5.30 p. m. (Effective August 10.)

Misdirected Letters.

NOTES OF PROGRESS.

Chairman's Report.

The report of the Chairman of the Isthmian Canal Commission to the Secretary of War for the month of July is published in full in this issue of THE CANAL RECORD. It gives a detailed account of the progress of the Canal work in all departments and divisions.

Canal Excavation in July.

The grand total of Canal excavation to August 1, was 206,604,949 cubic yards, leaving to be excavated under the revised estimate of July 1, 1913, 25,748,051 cubic yards.

The total excavation for the month of July was 3,241,968 cubic yards, as compared with 2,633,437 cubic yards for the corresponding month last year, and 2,518,982 cubic yards in July, 1911. The excavation yardage for the month of July was the largest since March, 1911, and the total excavation by dredges—2,022,883 cubic yards—was greater than during any previous month since the beginning of Canal construction, exceeding the previous high record, made in May, 1913, by over half a million cubic yards. The dry excavation for the month amounted to 1,219,085 cubic yards, and was entirely by steamshovels.

In the Atlantic Division, the total excavation was 939,704 cubic yards. Of this amount, all but 17,756 cubic yards consisted of material dredged from the Atlantic entrance and approach to Gatun Locks.

The total excavation in the Central Division was 1,057,200 cubic yards, 112,900 cubic yards of which consisted of hydraulic work, back of Gold Hill, performed by forces of the Fifth Division. Central Division shovels removed 924,800 cubic yards from Culebra Cut, including slides, and 19,500 cubic yards, charged to "Plant" excavation. The total excavation from the Culebra Cut section in July, 1912, was 1,336,366 cubic yards.

In the Pacific section, operations by the Sixth Division resulted in the excavation of 988,035 cubic yards by dredges, 756,930 cubic yards from the Pacific entrance, and

231,105 cubic yards from the terminal basin. Excavation by steamshovels in this section consisted principally of the removal of 88,288 cubic yards at the terminal site, by forces of the Second Division, and 167,805 cubic yards from the Canal prism, south of Miraflores Locks, by forces of the Fifth Division.

A detailed statement of excavation, and a summary of the work on the locks and dams, follow:

Mean rainfall along Canal (ten stations), 7.26 inches. By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, or locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside of any of the constituent parts of the Canal, such as prism, diversions, or locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

ESTIMATE OF EXCAVATION.

Revision of July 1, 1913. Shows 20,000,000 Cubic Yards Increase Over July 1, 1912.

The total excavation necessary to complete the Canal has been increased by the revised estimate of July 1, 1913, to 232,353,000 cubic yards. The highest previous total was that of February, 1913, which was 218,138,000 cubic yards, in round numbers, an increase of 14,215,000 cubic yards. The increase over the estimate of July 1, 1912 is 20,126,000 cubic yards of which 9,067,000 cubic yards is due to work caused by slides and breaks in Culebra Cut. The tabulated statement herewith shows the increase by geographical divisions. The amount remaining to be excavated according to the June, 1913 excavation statement was 14,812,034 cubic yards, and to this amount there has been added 14,157,427 cubic yards, making a total of 28,969,461 cubic yards to be excavated as of July 1, 1913.

The tabular statement of excavation, by geographical divisions, as of July 1, 1913, follows:

Divisions.	Accomplished.	Remaining.	Total.
	Cu. Yds.	Cu. Yds.	Cu. Yds.
Atlantic.			
Dry excavation.....	8,828,582	26,418	8,855,000
Dredges.....	37,156,984	7,155,016	44,312,000
	45,985,566	7,181,434	53,167,000
Central.			
Culebra Sec.....	94,811,800	10,200,200	105,012,000
Other places.....	12,384,655	300,345	12,685,000
	107,196,455	10,500,545	117,697,000
Pacific.			
Dry excavation.....	9,428,404	1,359,596	10,788,000
Dredges and hydraulic.....	40,773,114	9,927,886	50,701,000
	50,201,518	11,287,482	61,489,000
Grand total.....	203,383,539	28,969,461	232,353,000

The increase in volume of excavation over the estimate of July 1, 1912 is due to the following causes:

ATLANTIC GEOGRAPHICAL DIVISION.

Dredging at coaling station and approach.....	20,000,000
Removing shoals.....	3,000,000
Dredging Canal channel, maintenance, etc.....	1,000,000
Total.....	5,229,000

GATUN LOCKS, DAMS, AND POWER HOUSES.

Steamshovel excavation for foundations power and control houses.....	195,000
Dredging at north approach will, Gatun Locks.....	270,000
Total.....	415,000

CENTRAL DIVISION.

Sluicing back of Gold Hill to lessen weight of bank.....	2,057,000
Excavation of diversions and accessories.....	136,000
Excavation Canal prism and slides.....	9,067,000

Total..... 11,280,000
An indeterminate portion of the 9,067,000 cubic yards in the prism and slides is to be removed by dredges

PACIFIC GEOGRAPHICAL DIVISION.

Wet excavation, including maintenance.....	3,065,000
Dry excavation, Miraflores Locks, dams, and power houses.....	5,000

Total..... 3,070,000
Dry excavation in the Canal channel and accessories, and at Pedro Miguel Locks and dams, have been de-

creased by the estimate 371,000 and 6,000 cubic yards, respectively.

PACIFIC TERMINALS AND SHOPS.	
Dry excavation.....	229,000
Wet excavation.....	280,000
Total.....	509,000
Grand total net increase.....	20,126,000

Concrete Work in Locks and Spillways.

Concrete work in the Canal locks is nearly completed, the aggregate amount in place at the close of work on August 16, being 4,476,850 cubic yards.

A statement of the concrete laid in the three sets of locks for the Canal, and in Gatun and Miraflores spillways, as of August 16, follows:

GATUN LOCKS.		Concrete laid, Cubic yards.
Aug. 11.....		170
Aug. 12.....		166
Aug. 13.....		180
Aug. 14.....		140

*Includes hydroelectric station.

Work on Floating Cranes.

The Deutsche Maschinenfabrik A. G. of Duisburg, Germany, the contractor for the two floating cranes, has sublet the work of building the pontoons for the cranes to the Nordseewerke at Emden. This is an old shipbuilding firm, which was recently reorganized on a large scale by the Deutsche Luxemburgische Bergwerks und Hütten A. G. The boilers and piping for the cranes have been ordered from the Fabrik Gebr. Sachsenberg in Rossler am der Elbe. The status of the work on July 15 was, as follows: Several drawings had been approved, and orders had been placed by the Nordseewerke

for about 40 per cent of the material for the two pontoons, most of them with the Gelsenkirchener Bergwerks A. G., at their mills in Aachen, "Rote Erde," and in Dortmund Union.

Suggestions from Employees.

Gold Employes of the Isthmian Canal Commission:

Believing that there may be a considerable number of employees, who, from their experience on the Isthmus, have formed definite ideas which might be of value, the Commission will be glad to receive suggestions in brief form from employees, on the gold roll relative to any feature of the work under the present or permanent organization, or any other suggestion which they may care to offer. Such suggestions, will be carefully considered and adopted if found to be advantageous, but the Commission does not obligate itself to make reply in detail to all communications received, and employees will submit the same with that understanding.

GEO. W. GOETHALS,
Chairman and Chief Engineer.

CULEBRA, C. Z., August 16, 1913.

West Indian Laborers Wanted by United Fruit Company.

Advice has been received from the local general agent of the United Fruit Company to the effect that he is in a position to offer employment to between 4,000 and 5,000 West Indian laborers on the company's plantations in Costa Rica and Bocas del Toro. The conditions of employment are stated to be about the same as those under which the Isthmian Canal Commission has in the past recruited laborers from the islands.

For further information apply to Mr. H. R. Wilford, General Agent, United Fruit Company, Colon.

Church Notes.

The woman's Bible class of Empire invited the visiting missionary, the Rev. Alfred DeRoos, to speak at its meeting on Friday, August 15. Mr. DeRoos spoke of the expectation of the Jewish women at the time of the birth of Christ, and the humility of the Virgin Mary.

Owing to the evangelistic meetings that are being held in the Commission chapel, Empire, the Christian Endeavor Society has suspended its meetings. The society will resume its meetings next month, and it is planning to give an entertainment in the near future.

Society of the Chagres Emblems.

Complaints have been received from members of the Society of the Chagres of the enamel's chipping from their society emblems. If those in possession of such damaged emblems will forward them to the undersigned, they will be sent to the manufacturer, repaired, and returned to the owners, free of charge.

W. F. SHIPLEY,
Secretary-Treasurer.

CRISTOBAL, C. Z., August 18, 1913.

Ships engaged in carrying freight for the Canal Commission and the Panama railroad, or their respective contractors, except such ships as are engaged in the local coastwise trade of the Republic of Panama and do not touch at foreign ports, will be extended commissary privileges.

END OF GORGONA SHOPS.

Plant Has Been Prominent Adjunct of Canal Construction.

The native village of Gorgona, which will shortly disappear under the waters of Gatun Lake, has been a landmark in the transit of the Isthmus, and is known to be very old. The name is believed to have come from the currents in the treacherous Chagres at this point, as in Spanish *gorgona* means dangerous waters. From its earliest times the village has been a trading place for those who plied the Chagres, from the Atlantic to the mountains, but it came into considerable local prominence after 1835, when the river was made navigable for boats of light draft, larger than canoes, as far as Cruces. Prior to that, transit had been from Panama to Cruces, and thence to Porto Bello (earlier, to Nombre de Dios), all the way by the old paved trail. With the opening of the Chagres below Cruces, the trade route shifted to this forerunner of the Canal. Gorgona became a favorite stopping place for the boatmen; usually, on the up-trip; they rested there over night, before attempting the severer currents in the rise to Cruces, six miles beyond. Within a few years the "Gorgona road" to Panama, a rough and miry trail broken through the jungle, became a noteworthy competitor of the paved trail from Cruces; during the gold rush of the middle century its use saved hours for the eager travelers, and Gorgona came to be largely the head of navigation. When the Panama railroad was built, up the valleys of the Chagres and the Obispo to the continental divide, Gorgona was the base of operations for one section. Material and supplies were hauled up the river in light-draft barges, and track was laid from the village, north toward Aspinwall, and south toward Panama.

The first French canal company established machine and manufacturing shops near the village in the year following the formal beginning of work, on January 4, 1882. In the seven years of the company's activity, the shops, called then Bas Matachin atelier, grew to be the most important repair and manufacturing center for the varied machinery employed, though under the French organization of many construction districts, none of the shops was large. With the collapse of the first company, which was dissolved on February 4, 1889, the shops fell idle; but upon the resumption of work in October, 1894, by the new company, they were in use until the formal transfer of property to the United States on May 4, 1904.

When Chief Engineer Wallace took charge, on July 2, 1904, he devoted his first efforts to reorganization and enlargement of force and plant. Almost immediately requisitions were made for modern equipment, but in the meantime such of the large amount of French machinery in storage as seemed potentially useful was overhauled and put in service. Operations began on July 11, Mr. Wallace reported, for "The reestablishment of a machine shop of considerable capacity at Gorgona, where much heavy construction and repair work were done." The buildings for shops and quarters were found in bad condition. The machines, though somewhat antiquated, were in fair condition, having been carefully oiled and coated with white lead when the shops were closed, but most of them required new foundations. At the

end of the year, the capacity of the shops was sufficient to overhaul each month about five locomotives and 160 French dump cars, besides doing much miscellaneous work. The capacity of the foundry was about 50 tons of iron castings and 1½ tons of brass castings per month. The plant occupied about three acres, and the aggregate floor space of its buildings was 36,750 square feet.

As it was obvious that this plant was not equal to the service demanded of it, a decision was made in March, 1905, to rebuild the Bas Matachin shops and equip them for heavier work. One of the newly arrived steamshovels from the United States was set at work on the site, the spoil being used to fill an adjacent slough, between the old plant and the railroad.

From that time until 1912, when it was decided that the shops should be moved to Balboa in 1913, the history of Gorgona shops was a record of the concentration of work from other shops, and of expansion of buildings and equipment, in size and variety, to care for the increase of work. The site covered became seven times that of 1904, and was served with seven miles of railroad. The floor space of the buildings increased to 322,370 square feet.

WORK ACCOMPLISHED.

Inasmuch as Gorgona shops were the principal manufacturing and repair center during the American Canal construction, with its many ramifications, their work may be more easily imagined, from the foregoing summary of their growth, than itemized; the details of their activity, like a bill of household sale, are "too numerous to mention." In general, the work has comprised the manufacture of castings for the construction of machinery, of parts for repairs, and in making repairs, principally to the rolling stock used in excavation, and on the Panama railroad.

The largest single order for castings filled at Gorgona shops was for 2,924 covers for the recesses in the lock walls; the total weight was 1,643,881 pounds, an average of 596.26 pounds each. The largest of these castings, measuring 13 feet one inch by three feet in plan, weighed 3,000 pounds. The order was filled between February, 1912, and March, 1913, being used as timework in the iron foundry when it was not fully occupied with orders of more urgent demand. The second largest order, executed in 1910, was for 1,197,000 pounds of counterweights for the spillway gates and upper guard valves in the lock culverts; there were 1,586 weights, an average of 755.36 pounds each. A third large order was for 955,008 pounds of gray iron castings for the seats, at the lock entrances, for the floating caisson dams.

Following is a summary of total weights of iron castings and of patterns made for them, in each fiscal year since 1905:

FISCAL YEAR.	Iron.		Brass.		Total.
	Patterns.	Pounds.	Patterns.	Pounds.	
1905.....		164,000		11,300	
1906.....		1,151,607		60,000	
1907.....		3,599,798		232,474	1,980
1908.....		4,274,237		216,947	1,462
1909.....	1,080	4,586,342	359	333,416	1,439
1910.....	1,466	4,820,762	3,2	393,995	1,839
1911.....	1,616	8,715,617	630	453,548	2,246
1912.....	1,914	7,476,014	408	350,711	1,602
1913.....	982	7,051,259	371	324,675	1,353
Total.....		41,839,637		2,347,017	11,921

*Including 50,000 pounds of semisteel.

From the opening of the steel foundry on February 1, 1912, to June 30, 1912, the weight of steel cast was 199,803 pounds, in 1,194 castings, for which 106 patterns were made. In the fiscal year 1913, the steel castings weighed 794,593 pounds and required 336 patterns.

Repair work has been even more diversified than the work of manufacture. Exclusive of the marine equipment, for which numerous castings were made, it has covered all equipment in the construction work, from sextants to steamshovels; mention has been made in THE CANAL RECORD of the spiders kept at Gorgona shops to spin threads for the surveying instruments. The bulk of the work, however, was on rolling stock. During 1904 and 1905, the work of the shops was largely in overhauling old French machinery and in erecting that received from the United States; no itemized records of repairs were preserved. Following is a summary of principal repairs since that time, by fiscal years:

FISCAL YEAR.	Locomotives.		Cars. (Not including field.)	Other equipment.	Total.
	Heavy.	Running			
1906.....	11	10	856		877
1907.....	*109	1,159	10,086	816	12,170
1908.....	58	3,232	23,423	2,277	28,990
1909.....	165	7,232	40,674	325	48,396
1910.....	300	21,485	35,293	2,135	61,913
1911.....	209	26,968	117,222	2,240	46,639
1912.....	210	37,197	121,561	2,806	61,774
1913.....	517	39,246	22,620	1,354	63,737
Total.....	1,579	136,529	171,735	11,953	324,496

*Including erection of 89 new locomotives.

†Including shop repairs at Pedro Miguel engine house.

Because of the severe service to which they are subjected in the transportation of spoil from the steamshovels, all of the 1,800 Lidgerwood flat cars have been rebuilt from time to time; some have been in the shops for heavy repairs as many as five times. These cars cost \$1,998,000 when new, and approximately the same amount has been spent on their repairs.

ORGANIZATION.

On August 31, 1904, the Commission created the Department of Material and Supplies, which embraced the mechanical work. Mr. E. C. Tobey, U. S. N., was appointed head of the department. In 1907, was created the Departments of Municipal Engineering, Motive Power, and Machinery, and Building Construction, of which Mr. H. H. Rousseau was chief. Mr. Rousseau has since been in general supervision of the shop work, as head of the Second Division of the Office of the Chief Engineer. Upon the creation of the Mechanical Division on October 1, 1909, Mr. A. L. Robinson was appointed superintendent thereof, with offices at Gorgona shops. Mr. W. O. Johnson was appointed inspector of shops on May 1, 1910; upon his resignation, Lieut.-Col. T. C. Dickson, U. S. A., was appointed to the place, effective June 27, 1910, which position he holds at this time.

Mr. Robinson resigned on July 19, 1913, and the position of superintendent of the Mechanical Division was abolished. The position of assistant superintendent was created at the same time and Mr. J. J. Eason, formerly general foreman of the car department and foundry of Gorgona shops, appointed to the place. The Mechanical Division is under the supervision of the inspector of shops as a part of the work of the Second Division.

Consequent on the changes in the organization, the records do not show exactly the personnel at Gorgona shops each year. On September 30, 1904, when the total Canal force was 471 "gold" and 2,675 "silver" employes, the Department of Material and Supplies employed 28 gold and 265 silver men, a total of 293. On September 30, 1905, the total force at the Bas Matachin shops was 726, with a monthly payroll of \$41,659. By June 30, 1907, it had grown to 1,197, exclusive of the office force. The transfer of artisans to other shops, notably those at Empire, reduced this

number to 882 on June 30, 1908. Including the electrical subdivision, the forces of Gorgona shops aggregated 1,037 at the close of the fiscal year 1909, during which the average monthly payroll was \$78,765.28. During the next year, the average force at Gorgona shops alone was 523 gold and 661 silver men, a total of 1,184. The force was increased to 830 gold, and 1,247 silver men, total 2,077, by June 30, 1911. On June 30, 1912, the numbers were 743 gold, 1,197 silver men, total of 1,940. On June 30, 1913, the gold force at Gorgona shops numbered 990, the silver employes 2,461, a total of 3,451. The payroll for these men for the month of June was \$202,956.15.

REMOVAL TO BALBOA.

The plant at Gorgona covered 21 acres, and had floor space aggregating about 322,370 square feet. The shops at Balboa will occupy 42 acres with a total floor space of 523,915 square feet; a comparison of floor spaces of principal buildings of the two plants is shown herewith:

BUILDING.	FLOOR SPACE, Square feet.	
	Balboa	Gorgona.
Machine, erecting and tool shop.....	67,120	83,000
Boiler and shipfitters' shop.....	45,940	35,600
Forge shop.....	31,650	12,600
Steel storage shed.....	18,080	
General storehouse.....	89,920	30,000
Paint shop.....	12,760	7,200
Car shop.....	38,800	99,000
Planing mill, carpenter and pattern shop.....	48,240	15,000
Galvanizing shop.....	5,620	
Lumber and equipment store shed.....	67,180	
Steel, iron, and brass foundry.....	37,060	29,000
Coke shed.....	3,070	1,000
Boiler house.....	2,380	4,100
Pattern storage building.....	6,960	9,000
Round house.....	25,343	*7,500
Office building.....	22,843	6,000
Gas house.....	649	

*Engine house only.

Because of the different conditions which they will serve, exact comparison of the two plants is impracticable. Some plants at

Gorgona will not be reproduced, while the Balboa shops will care for kinds of work with which the inland shops at Gorgona had nothing to do.

Preparation of plans for the permanent shops was begun in the office of the chief draftsman at Gorgona shops in 1911. In July, 1912, the removal of Commission employes' quarters at Balboa, and of the adjacent native village of La Boca, was begun, and steamshovels were set at work, excavating along the north base of Sosa Hills, to prepare the site for the terminals, of which the permanent shops will be a conspicuous part. The laying of foundations proceeded rapidly, and the first erection of superstructure for the shop buildings was begun in May, 1913, on building No. 8, the planing mill. The laying of the roof began on this building on June 18. On July 7, the planing mill at Gorgona shops was closed, to allow the transfer of its equipment to Balboa, and toward the latter part of the month the new mill began to turn out work.

The transfer of the iron, steel, and brass foundries, and the pattern shop, was begun on July 28. The work of moving them is still under way, and the completion of boiler, machine, and erecting shops and other parts of the large plant will follow in the course of events. The work of Gorgona shops will be distributed, for the time, at Empire, Cristobal, and Balboa. It is expected that the buildings at Gorgona will be entirely vacated by September 1.

Burning of the "Manzanillo."

The launch *Manzanillo*, engaged in survey work in the vicinity of Gorgona, caught fire from an unknown cause near Frijoles about 8.30 a. m., on Saturday, July 26, and was completely destroyed. The operator, Esau Johnson, was drowned in attempting to swim to a nearby tree. Three chainmen from the survey party reached the trees in safety, and were picked up later by the launch *Hibiscus*. At the time of the accident, the *Manzanillo* was returning to Gatun for a new supply of gasoline, and material for the survey party. After catching fire, the launch drifted a distance of about three-fourths of a mile, and finally lodged in the trees and brush along the Canal. The launch was built at the Cristobal dry dock shops, and was placed in service June 14, 1909. It cost \$1,090.79.

Launch Trips Between Gatun and Gorgona.

The launch *Margaret* will be run every Sunday from Gatun to Gorgona and return. The object of this trip is to enable masters and mates in the employ of the Commission to familiarize themselves with the Canal channel between Gatun and Gorgona. The launch will leave Gatun at 9 a. m., and Gorgona at 2.40 p. m. The number of passengers for these trips will be limited to six. Passes may be procured from Mr. W. G. Comber, Resident Engineer, Balboa, C. Z.

Temporary Pumping Facilities on Pacific Side.

In order to furnish additional water supply facilities at the Pacific end of the Canal in advance of the completion of the permanent pumping station and filtration plant, it has been decided to install a temporary pump station in the rear of the railroad station at Miraflores. This will involve the construction of a concrete sump and screen chamber,

from which the water will be lifted by pumps and forced directly into the 16-inch and 20-inch mains to Panama. It is planned to begin work on this sump at once, in order to have it ready for use by the time the water in Miraflores Lake reaches elevation 40 feet above mean sealevel. The station will be equipped with four centrifugal pumps, each having a capacity of 1,500 gallons a minute. Two pumps now at Gamboa dike pumping station will be installed as early as possible, and so arranged that water can be drawn from the Rio Grande reservoir and pumped into the mains to Panama, or from the sump, dependent on the stage of water in the reservoir. When the first two pumps have been placed in service, the two pumps now at Cocoli station will be removed and installed in the temporary station at Miraflores. The maximum capacity of the four pumps will be 6,000 gallons a minute, or approximately 8,500,000 gallons a day, which about represents the present daily consumption, south of Miraflores.

Rise of Gatun Lake.

On August 11, the surface of Gatun Lake reached and passed an elevation of 56.28 feet above sealevel, which is the highest point it had attained before the present rise. The gage on Guarapo Island, near the spillway, registered 56.28 feet on November 29, 1912, and again at 3 a. m., on August 11, 1913. The reading rod at the gaging station, however, has been raised .05 inch since January 1; accordingly, a surface of 56.28 last year is equivalent to a reading of 56.23 at present. The gage registered 56.23 at 1.15 a. m. on August 11.

Record in Changing Pumps.

The main pump of dredge No. 85 at work in the inner harbor at Balboa, was changed in 24 hours, dredge being shut down at 6 p. m., August 16, and started up again at 6 p. m., August 17. At the same time the runner and liners on the relay pump were changed. The work suffered a delay of two hours on account of a workman losing a box of bolts overboard.

This is thought to be a record for this class of work on the Isthmus.

Addition to Administration Building, Culebra.

In order to relieve the crowded condition of the offices of the Chief Quartermaster, a 15-foot extension is being constructed to the Administration Building at Culebra. The ell will be two stories high, and will extend over the bowling alley of the clubhouse. The additional space will be used by the force in the timekeeping office, and that of the Chief Quartermaster.

Shipments of Employes' Household Goods.

The regulations relating to the shipment to the United States of household goods of officers of the United States Army detailed on the Isthmus, and of American employes of the Canal Commission and Panama railroad, have been extended to the American employes of contractors engaged on Commission work on the Isthmus, whose contracts in other respects cover the same privileges afforded employes of the Commission.

The tug *Bolivar* has been transferred from the Panama railroad to the Sixth Division, effective July 26. The latter will pay the appraised value for the vessel, which was fixed by the Board of Local Inspectors at \$16,750.

EXECUTIVE ORDER.

To Prohibit the Unauthorized Use of Flying Machines.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. It shall be unlawful for any person to operate an aeroplane, balloon, or flying machine of any kind in or across the Canal Zone without the written authority of the Chief Executive of the Canal Zone.

Section 2. It shall be unlawful for any person to take or make a photograph, picture, or sketch of any kind of the fortifications or other military works in the Canal Zone from any aeroplane, balloon, or flying machine of any kind without the written consent of the Chief Executive of the Canal Zone.

Section 3. A violation of any of the provisions of this Order shall be punishable by a fine not exceeding One Thousand dollars or by imprisonment in jail not exceeding one year, or by both such fine and imprisonment in the discretion of the Court.

Section 4. This Order shall take effect on and after thirty days from its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,
August 7, 1913.

[No 1810.]

PERSONAL.

Mr. Edward J. Williams, whose resignation as Disbursing Officer of the Canal Commission becomes effective on August 30, sailed for the United States, accompanied by his family, on the *Allianca*, on Tuesday, August 19. He assumed the duties of Disbursing Officer on November 23, 1905, and prior to coming to the Isthmus had filled various offices of trust, including paymaster and traveling auditor of the Chicago and Northwestern Railway, and comptroller of the city of Evanston, Ill. He is a native of West Salem, Wisconsin, and will spend a few weeks in that vicinity before taking up his permanent residence in New York City, where he will become connected with the Interborough Rapid Transit Company.

To Investigate Greenheart Timber.

Mr. C. D. Mell, in charge of wood structures in the Forest Service of the Department of Agriculture at Washington, has been detailed to go to Demerara to ascertain if genuine greenheart timber can be found there in sufficient quantities and proper sizes. He will make the trip via the Isthmus, and will probably be accompanied from here by a representative of the Canal Commission. If enough of the true greenheart can be obtained, it is purposed to use it on the Isthmus in the construction of dry dock keels, etc.

Sailing of the "Cristobal."

The sailing date of the steamship *Cristobal* has been set for Tuesday, August 26, at 3 p. m., from pier No. 11, Cristobal.

Married.

BRIGNAC-COOK—At the Union Church, Cristobal, on July 14, Miss Lena May Cook of Crystal Springs, Miss., to George Bamas Brignac of French Settlement, Louisiana, the Rev. Carl H. Elliott officiating. Isthmian residence, Colon.

LOST—Five-dollar bill on 11 p. m. train out of Panama on Sunday, August 17. Reward, if returned to F. D. Hurwitz, Culebra, C. Z.

CANAL WORK IN JULY.

Monthly Report of the Chairman and Chief Engineer to the Secretary of War.

CULEBRA, C. Z., August 16, 1913.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of July, 1913:

Effective July 1, 1913, the timekeeping work and personnel which was partially centralized in the Department of Examination of Accounts on December 26, 1912, was transferred to the Fourth Division of the Office of the Chief Engineer.

Department of Construction and Engineering.

The following table summarizes the principal items of work accomplished by the construction divisions during the month:

ITEM.	Unit.	Atlantic.	Central.	2d Div.	5th Div.	6th Div.	Total.
Work excavation, dry.	Cubic yds...	17,756	924,800	87,230	168,741		1,198,527
Work excavation, wet.	Cubic yds...		*112,900	†231,105		1,678,878	2,022,883
Total work excavation	Cubic yds...	17,756	1,037,700	318,335	168,741	1,678,878	3,221,410
Plant excavation, dry.	Cubic yds...		‡19,500	1,058			20,558
Total Canal excavation	Cubic yds...	17,756	1,057,200	319,393	168,741	1,678,878	3,241,968
Material placed in dams	Cubic yds...	91,885			9,560		101,445
Concrete placed, locks, dams and spillways.	Cubic yds...	4,944			12,448		17,392
Explosives used	Tons (Gross)	17.72	98.49	14.07	16.41	42.00	188.69
Rock drilled	Feet	11,681	170,157	45,602	73,440	17,675	318,555
Tracks removed	Miles	0.74	6.75	10	1.41		9.00
New track laid	Miles	1.12	12.62				13.74
Rock crushed	Cubic yds.				31,932		31,932
Cement used	Barrels		70	8,267	10,156	35	18,528
New roads built	Miles				10,156		
Water mains laid	Feet	1,400					1,400
Sewers laid	Feet						
Open drains and ditches dug	Feet			3,640			3,640
Average daily force		3,265	6,981	2,561	4,580	2,363	19,750
Average rainfall	Inches	12.43	6.12	4.22	6.80	4.22	7.26

*Removed by Fifth Division for Central Division.

†Removed by Sixth Division for the Second Division.

‡Fourteen thousand, one hundred cubic yards removed by Sixth Division in Central Division.

First Division, Office of the Chief Engineer.

LOCK GATES AND PROTECTIVE DEVICES.

The status of the work in the several locks may be summarized, as follows:

Gatun—Work was in progress on all the leaves, 40 in number: Erection, 99.4 per cent completed; reaming, 99.9 per cent completed; riveting, 99.2 per cent completed; finishing, 78.1 per cent completed.

Pedro Miguel—Work was in progress on the entire 24 leaves: Erection, 98.4 per cent completed; reaming, 99.5 per cent completed; riveting, 96.5 per cent completed; finishing, 70.4 per cent completed.

Miraflores—Work was in progress on all of the 28 leaves: Erection, 95.1 per cent completed; reaming, 96.5 per cent completed; riveting, 84 per cent completed; finishing, 46.8 per cent completed.

ERECTION.

On August 1, about 99 per cent of the total tonnage of lock gate material in all locks had been erected, of which about two per cent was erected during the month. There are still to be erected 423 tons at Gatun, 174 tons at Pedro Miguel, and 861 tons at Miraflores.

INSPECTION AND ERECTION OF OPERATING MACHINERY AND ELECTRICAL EQUIPMENT.

Valve machines—The present status of the mechanical erection is, as follows: Rising

stem valve machines, 95 per cent completed; cylindrical valve machines, 100 per cent completed; auxiliary culvert machines, 100 per cent completed. The electrical installation of the above machines is 42 per cent complete for the rising stem valve, 45 per cent for the cylindrical valve, and 62 per cent for the auxiliary culvert valve machines. The mechanical erection of the 18 guard valve machines is 52 per cent complete.

Miter gate moving machines—Eighty-seven per cent of the mechanical, and 22 per cent of the electrical installation, is accomplished.

Miter gate forcing machines—The mechanical erection is 17 per cent, and the electrical erection, 18 per cent complete.

Tracks—Forty-eight per cent of all track has been completed with concrete and conductor slot, and 27 per cent more has been distributed and bolted up ready for concreting and finishing. Twenty-five per cent of

wire is 55 per cent, of stranded copper wire 52 per cent, and of anchors for transmission line towers 68 per cent complete. Surveys have been made over 10 miles of track, and a total of 69 foundations have been placed for track-span bridges to carry transmission line.

EMERGENCY DAMS.

All work in the United States in connection with the manufacture and inspection of emergency dam material is complete, and all material has been shipped. About 3,813 tons of material were delivered during the month, and 1,481 tons were erected. The status of the work on the several dams is, as follows:

Gatun east dam—This dam has been completed, tested, and accepted.

Gatun west dam—With the exception of the final coat of paint, this dam is complete. Final tests are in progress.

Pedro Miguel west dam—There are 2,330 tons of material on the site. During the month, 185 tons of structural material and turning and wedging machinery were assembled and bolted in place. Erection of the operator's house was begun. The field riveting is finished. The field coat of red lead paint has been applied, and the application of the final coat of gray paint begun.

Pedro Miguel east dam—There are 2,330 tons of material on the site. During the month, 470 tons of structural material and turning and wedging machinery were assembled and bolted in place. Placing of the concrete in counterweight, and the placing of concrete in the horizontal truss, were completed during the month. Installation of the gate and girder hoisting machinery is still in progress. Riveting is approximately 99 per cent completed.

Miraflores west dam—There are 1,863 tons of material at the site. During the month, 300 tons of structural material and turning and wedging machinery were assembled and bolted in place.

Miraflores east dam—There are 1,950 tons of material at the site. During the month, 526 tons of structural material and turning and wedging machinery were assembled and bolted in place. Riveting is about nine per cent completed.

Of the material required for all emergency dams, about 99 per cent has been delivered on the Isthmus, and approximately 76 per cent has been erected.

AIDS TO NAVIGATION.

During the month, work was in progress completing tower No. 27, Gatun Lake section, constructing tower for water stage register for the Second Division at Gamboa, clearing land for the Sixth Division in the vicinity of Mamei, clearing land in the Atlantic Division for electric pole lines and erecting poles, and making the necessary surveys and reconnaissances in connection with the construction of range towers, targets, beacons, etc.

Second Division—Office of the Chief Engineer.

SHOPS.

The designing and preparation of drawings for foundations, motorizing of machines, installation of stringers, shafting, and motors for group drives, illumination, and power distribution systems, and the completion of the designing of the various buildings were continued. The incorporation of architectural features in the designs of those buildings that are totally enclosed was commenced. The system of distributing electrical power the in

single, and 33 per cent of double crossovers, have been placed.

Spillway gate machines—The mechanical erection is 69 per cent, and the electrical erection, four per cent completed.

Pumps—Mechanical installation is 42 per cent complete on miter gate sump pumps, eight per cent complete on chain fender sump pumps, and seven per cent on drainage sump and culvert pumps. Electrical installation is 14 per cent completed on miter gate sump pumps.

Transformer room equipment—At the close of the month, work was 63 per cent complete at Gatun, 46 per cent at Pedro Miguel, and 29 per cent at Miraflores.

Hydroelectric station—Electrical work on switchboards was started during the month, but only a small force is necessary to keep pace with the building construction.

Cable—Out of a total of 2,412,130 feet of cable on order, 560,602 linear feet have been pulled into the ducts.

Control houses—Sixty-five per cent of the steel beams for control house floors have been placed in concrete. The control house at Gatun is ready to receive the roof.

Illumination—At Gatun, the erection of the concrete lamp posts is 62 per cent completed. At Pedro Miguel, 13 per cent of the total number have been erected.

Transmission line—Delivery of copper-clad

foundry, and in the machine and erecting shops was completed, and the design for the distribution of power in the boiler and forge shops was commenced. The interior illumination system for the foundry and pattern storage building was completed, and studies for this system in the machine and erecting shops, forge shop, boiler shop, and permanent administration building were advanced. Specifications were prepared and requisition submitted for all piping for water, steam, fuel oil, compressed air, and sewer, to be installed in the pipe and conductor tunnel; for metal lath, reinforcing fabric, etc., for exterior walls for other buildings; for locks, bolts, sash pivots, and other hardware for doors and windows; for one 70-foot turntable; for structural steel for pattern racks; wire screen partitions for offices, toolrooms, etc., and for cloth pinions for motors. All of the steel for the forge shop and the boiler shop, and all steel for shafting supports in the erecting shop was delivered on the Isthmus, and in addition thereto, 87 per cent of the general storehouse and 40 per cent of the galvanizing plant. The following percentages of the steel in the several buildings were erected during the month: Machine and erecting shop, 75.2 per cent; steel storage building, 23 per cent; boiler shop, two per cent; foundry, four per cent. The riveting on the foundry was advanced by 54 per cent. During the month, 42 squares of gutter tile, 906 squares of standard tile, 51 squares of special tile, 1,913 pieces of skylight tile, and 900 linear feet of ridge tile were manufactured. All the tile on the foundry, and 94.3 per cent of that on the planing mill, was erected. Of the 57 machines to be installed in the planing mill, 39 were installed, and 23 put in operation during the month.

Excavation and construction—During the month, 80,406 cubic yards of excavation were performed by steamshovels; 45,602 linear feet of hole were drilled, and 31,515 pounds of dynamite used; 2,918 linear feet of caisson were sunk for the docks substructure, and 198 feet of 4-foot steel caisson for shop foundations; 6,214 cubic yards of concrete were placed in docks and shop foundations, machine footings, floors, and walls; 13,254 linear feet of track were laid, 5,470 feet were removed; and 44,939 linear feet of piles were driven.

Fifth Division—Office of the Chief Engineer.

DISTRICT NO. 1—LOCKS, DAMS, AND DRY EXCAVATION.

Excavation—The total excavation amounted to 169,541 cubic yards, of which 115,054 cubic yards were classified as rock, and 54,487 cubic yards as earth.

Filling and embankment—Dry filling in the prism of the west dam at Pedro Miguel was increased by 1,210 cubic yards, the total amount of material used for this purpose being 697,768 cubic yards. The backfill at Pedro Miguel was increased by 6,880 cubic yards, the total quantity in place at the close of the month being 1,020,203 cubic yards. At Miraflores, dry filling in the west dam was increased by 8,350 cubic yards, making the total quantities of dry and hydraulic filling in place at the close of the month 1,668,349 cubic yards, and 661,048 cubic yards, respectively. The backfill at Miraflores was increased by 149,511 cubic yards, the total quantity in place on July 31 being 1,821,738 cubic yards.

Pedro Miguel Lock—One steamshovel was operated in the excavation in the prism south

of the locks, the clay being used for filling the core in the junction of the Miraflores west dam with the west lock wall. During the latter part of the month, a steamshovel started the excavation of the dikes, or high ground, in the forebay of the Miraflores locks. Hard shovel rock was supplied from the Ancon quarry for riprapping the southwest wing wall, the northwest wing wall, and junction with the west dam. Concrete work consisted in the construction of lamp post bases and snubbing button piers along the side walls, and the completion of the concrete control house up to the second floor. The installation of the pile supports for the buffers at the ends of the north and south guide walls was completed, and the filling was placed around the bases of the piles at the end of the north guide wall.

OPERATION OF THE AUXILIARY CONCRETE CONSTRUCTION PLANT AT PEDRO MIGUEL.

Length of working day (hours).....	8.00
Average number of hours per day worked laying concrete, actual working time....	3.00
Average number of mixers per day.....	.42
Average hourly output per mixer, actual working time (cubic yards).....	7.56
Concrete laid (cubic yards).....	750.00

One $\frac{1}{2}$ -yard mixer was in service intermittently; 159 cubic yards of concrete were mixed by hand.

Miraflores Locks—Dry excavation was continued in the prism south of the locks, and the material taken out used principally for back-filling the wing walls, and filling the toes in the junction of the west dam with the locks; also, for filling the north and south guide walls and the lower middle lock wall. The filling of the south guide wall was completed during the month. Concrete work for the spillway was continued. The dam proper was completed, and all the piers were well under way at the close of the month. Concrete work in the locks consisted in the installation of lamp post and snubbing button bases, and miscellaneous trimming up. Contracts were let for the dismantling and loading on cars of chamber cranes Nos. 1 and 3, and berm cranes "G" and "H," and the work of dismantling chamber crane No. 1 was begun on July 26. The fixed iron placed in the masonry during the month amounted to 330,418 pounds. General cleaning up in the locks and the clearing out of all pumps, buildings, tracks, etc., was started on the west side, with the view of blowing up the dike across the canal south of the locks by August 20.

OPERATION OF THE PERMANENT AND AUXILIARY CONCRETE CONSTRUCTION PLANTS AT MIRAFLORES.

	Permanent Plant.	Auxiliary Plant.
Length of working day (hours).....	8.00	8.00
Average number of hours per day worked laying concrete, actual working time.....	.98	7.10
Average number of mixers per day.....	2.00	1.69
Average hourly output per mixer, actual working time (cubic yards).....	30.47	17.99
Average amount of concrete laid per hour per berm or chamber crane, actual working time (cubic yards).....	26.26
Total concrete laid (cubic yards).....	1,342.00	7,845.00

Permanent plant—Average number of mixers per day.....	2.00
Average number of berm cranes per day..	1.00
Average number of chamber cranes per day	0.58
Auxiliary plant—Average number of $\frac{1}{2}$ -yard mixers per day.....	0.23
Average number of 1-yard mixers per day..	1.46
Average number of locomotive cranes and derricks per day.....	2.73

DISTRICT NO. 4—ANCON QUARRY.

PERFORMANCE OF ROCK CRUSHER PLANT.	
Length of working day (hours).....	8.00, 12.00
Average number of hours per day, actual working time.....	6.97
Average number of cubic yards crushed per hour per working day.....	180.40
Average number of cubic yards crushed per working hour.....	254.50
Total output for the month (cubic yards)...	31,932.00

12-hour day from 1st to 7th. Crushers shut down for repairs from 9th to 12th, inclusive, and from 18th to 22d, inclusive.

DISTRICT NO. 5—GOLD HILL SLUICING PLANT.

Excavation during the month totaled 112,900 cubic yards. The cut at the north flume was brought down to grade and pushed into the hill and out under the active slide, and, in the part which was cut, it stopped movement of the sliding surface material toward the Canal. Due in part to lack of material for flume extension, the low dump for the north flume caused inconvenience. At the south flume, an effort was made to extend the flume cut as far toward the upper back part of the active slide as possible; about 300 feet at grade was accomplished. Hard rocks at this flume gave trouble early in the month, and a good many required shooting. A hand cut for the middle flume was made from the dump end to the face of the bank to be cut, a distance of about 200 feet. An additional wire screen cage was installed around the spillway pipes, in order to prevent water plants from clogging the pipes. The water in the lake reached to within 18 inches of spillway level.

Sixth Division—Office of the Chief Engineer.

PACIFIC END.

Seven dredges were engaged in channel and inner harbor excavation at Balboa, removing 446,878 cubic yards of earth, and 310,052 cubic yards of rock, from the Canal prism; and 231,105 cubic yards of earth from the inner harbor and terminal basin site, a total of 988,035 cubic yards. At the close of the month, there remained to be removed from the Canal prism, 2,857,947 cubic yards. The French ladder dredge *Gopher*, engaged in sand excavation at Punta Chamé during the entire month, removed 25,572 cubic yards.

ATLANTIC END.

Nine dredges were in operation during the month, removing 852,607 cubic yards of earth, and 69,341 cubic yards of rock, from the Canal prism. In addition, 18,286 cubic yards of earth, and 16,015 cubic yards of rock from the French canal at bridge crossing south of the dry dock; 4,375 cubic yards of earth from between piers Nos. 1 and 2, Colon, and 130,359 cubic yards of coral sand from Margarita Bay, were taken out. On July 31, there remained to be excavated 1,299,176 cubic yards. On July 31, forty feet of water could be carried from zero to zero plus 2,100 feet; 35 feet to mile post 6 plus 2,300 feet; 30 feet to mile post 6 plus 2,320 feet; 20 feet to mile post 6 plus 2,350 feet; 10 feet to mile post 6 plus 2,800 feet, at the barrier across the Canal.

Division of Municipal Engineering—Office of the Chief Engineer.

The municipal engineering work in the Canal Zone in charge of the Atlantic, Central, and Fifth Divisions, and similar work in the cities of Colon and Panama performed by the Division of Public Works, were consolidated, effective July 16, to form the Division of Municipal Engineering, under Mr. George M. Wells, resident engineer. The work of this

division was divided into four principal sections, as follows: 1. Northern District, covering all work from Gatun north, including the city of Colon, but exclusive of filtration plants. 2. Southern district, covering all work from Gorgona south, including the city of Panama, but exclusive of the construction of the new Panama water works and filtration plants. 3. Construction of the new Panama water works, including all work in connection with the building of the pump stations, purification plants, reservoirs, and the laying of new mains. 4. Operation and maintenance of filtration plants at Mount Hope, Gatun, and Ancon.

Atlantic Division.

GATUN LOCKS.

Excavation—For the foundation of the transformer substation, and for the spurtrack connecting it with the main line of the Panama railroad, the month's excavation totaled 14,734 cubic yards of earth.

Backfill—The total backfill placed during July amounted to 17,930 cubic yards. At the close of the month, the backfill was 96.26 per cent completed.

Receiving and issuing material—The issues of rock amounted to 6,533 cubic yards. Sand receipts amounted to 5,220 cubic yards, the issues to 3,490 cubic yards. Cement receipts totaled 3,710 barrels, and the issues amounted to 6,277½ barrels.

Concrete work—A total of 197 cubic yards of concrete was laid, distributed, as follows: Upper locks, 174 cubic yards; middle locks, two cubic yards; lower locks, 21 cubic yards.

On July 31, the locks concrete work was 99.91 per cent completed.

OPERATION OF CONCRETE CONSTRUCTION PLANT.

Length of working day (hours).....	8.00
Average number of hours per day worked, per strand of cableway, laying concrete, actual working time.....	.43
Average number of mixers per day.....	2.00
Average hourly output per mixer, actual working time (cubic yards).....	60.00
Average amount of concrete laid per hour, per strand of cableway, actual working time, (cubic yards).....	25.20
Concrete laid (cu. yds.), cableways.....	2,298
Concrete laid (cu. yds.), portable mixers.....	528
Concrete laid (cu. yds.), hand mixed.....	172

Total amount of concrete laid (cu. yds.).... 2,998.00

GATUN DAM.

Construction during the month increased the total fill, as determined by car measurement, 96,747 cubic yards, making the total amount in place 21,883,567 cubic yards. On August 1, the dam was 99.47 per cent completed.

Dry fill—Additions to the dry fill amounted to 91,885 cubic yards, which were placed on the north and south toes of the dam, east and west of the spillway, making the total dry fill in place 11,670,153 cubic yards.

GATUN SPILLWAY.

Concrete laid during the month amounted to 1,513 cubic yards, making the total in place 225,645 cubic yards. Concrete work was 98.53 per cent completed at the close of the month.

Hydroelectric plant—In preparing foundations, 25 cubic yards of rock were removed by hand, making a total excavation of 98,776 cubic yards. During the month, 683 cubic yards of concrete were placed, making a total of 5,751 cubic yards.

WEST BREAKWATER—COLON.

Out of a total of 23,772 cubic yards of Porto Bello rock placed on the breakwater

during July, 8,727 cubic yards were unloaded by cranes, and 15,045 cubic yards by derrick barges. The total amount placed upon the breakwater to August 1 was 272,667 cubic yards.

Central Division.

The total amount of material excavated during the month was 944,300 cubic yards, of which 208,831 cubic yards were classified as earth, and 735,469 cubic yards as rock. The entire amount was removed by steamshovels, 924,800 cubic yards being classified as primary excavation, and 19,500 cubic yards as plant excavation. Of the total primary excavation, 270,000 cubic yards were taken from within the lines of the Canal prism, and 654,800 cubic yards from without the Canal prism, the latter amount being excavated from slides and from high levels as a preventive measure against slides.

The daily average number of steamshovels at work was 40.74, and the total number of shovel days was 1,018, as compared with 38.28 shovels at work, at 957 shovel days in June. For comparison with the work done by steamshovels during the corresponding month of the previous year, the following table is presented:

Period	Excavated by shovels.	Classification of material.		Av. No. of shovels at work.	W kg days.	Av. yards per shovel day.
		Rock.	Earth.			
1912: July.	Cu. Yds. 1,335,590	Cu. Yds. 1,077,219	Cu. Yds. 258,371	38.71	26	C. Y. 1,327.73
1913: July.	944,300	735,469	208,831	40.74	26	928.00

Rainfall at Empire: 1912, 9.15 ins.; 1913, 4.87 ins.

The estimated amount of material removed, and to be removed, according to the revision of July 1, 1913, is 115,696,455 cubic yards. Up to August 1, 1913, 108,121,255 cubic yards had been removed, leaving 7,575,200 cubic yards to be removed, in order to complete all excavation in this division. At the close of the month, 93.45 per cent of all excavation was completed. On July 31, the status of the work in the two sections which compose this division was, as follows:

CULEBRA CUT.		Cubic yards.
Dry excavation accomplished.....	95,736,600	
Excavation to be accomplished.....	7,425,200	

CHAGRES SECTION.

Dry excavation completed.....	12,384,655
Wet excavation to be accomplished.....	150,000

Deliveries of 4,131 cubic yards of spoil were made to Quebrancha siding on the Panama railroad, to be used for reinforcing the slopes and raising the grade of the Quebrancha and Brazos embankments. Spoil furnished for the Cristobal mole during the month amounted to 350 cubic yards; the total amount furnished for this purpose aggregates 227,625 cubic yards. Material dumped from the Naos Island trestle during the month totaled 49,476 cubic yards.

The daily average number of laborers at work was 6,374, while the average number of gold men working was 607.

Quartermaster's Department.

LABOR.

Labor—The force report of July 23 showed 38,794 men actually working for the Commission and the Panama Railroad Company. The actual working forces of the several contractors totaled 3,705 men. There was very little demand for labor until just at the close of the month, when requests were received from the Division of Municipal Engineering. The

Quarantine Office reports an excess of emigration over immigration during the month of almost 1,000.

Buildings—Seven structures were demolished. The removal of buildings from Gorgona and their reerection at other points, as well as the raising and moving of buildings at Pedro Miguel, progressed rapidly. Construction work was completed on 25 buildings.

Quarters—On the last day of July, eleven families remained in married quarters at Gorgona, and provision has been made for them in other districts. The number of applications for family quarters increased slightly.

Material and supplies—The value of material received was \$1,200,363.44. This material came forward in 39 steamers, the total weight of cargo, exclusive of lumber, piling, and ties, being 20,816 tons.

The abandonment of Gorgona and the transfer of the shops to Balboa demanded the removal of the material storehouse from the former to the latter point. The advanced state of the work justified the discontinuance of issues from the Miraflores storehouse and the transfer to Mount Hope, of a portion of the stock carried at Gatun.

Subsistence Department.

The Hotel Tivoli was operated at a profit of \$3,211.74. The operation of the line hotels, laborers' messes, and restaurants resulted in a net profit of \$93.94. The total net profit on subsistence operations during the month was \$3,305.68.

Department of Civil Administration.

COURTS.

During the month, 44 civil and 45 criminal cases were disposed of in the Circuit Courts, and 57 civil and 481 criminal cases in the District Courts.

POSTS, CUSTOMS, AND REVENUES.

Money order sales amounted to \$400,093.26, and the fees to \$1,906.90. Receipts from stamp and card sales and newspaper postage aggregated \$8,926.42. The total collection of revenues was \$22,522.46, and the collections on account of court fines, costs and fees \$2,424.95. A total of \$183,936 was deposited in postal savings accounts, and a total of \$192,471 was withdrawn. At the port of Ancon, 21 vessels entered and the same number cleared; at the port of Cristobal, 26 entered and 24 cleared.

POLICE AND PRISONS.

The total number of persons arrested was 501, of whom 453 were men, and 48 women. Thirteen convicts were committed to the penitentiary and eight were discharged, leaving 138 convicts in confinement at the close of the month. The cost of guarding and subsisting these prisoners was \$2,372.82, and the value of the work performed by them on the roads of the Canal Zone was \$2,358.50.

FIRE PROTECTION.

Eight fires were reported in the Canal Zone. The property involved was estimated to be worth \$11,675. The damage occasioned was \$10.

PUBLIC WORKS.

Effective July 16, the Division of Public Works was transferred to the Division of Municipal Engineering.

Department of Sanitation.

The total number of deaths from all causes among employes was 37, divided, as follows:

From disease 26, and from violence 11, giving an annual average per thousand of 5.38 and 2.28, respectively. The annual death rate per thousand among employes for the month of July, 1912, was 10.34.

The annual average death rate per thousand in the Canal Zone, and in the cities of Panama and Colon, including both employes and nonemployes, was 24.86. This rate is based upon a population in the Canal Zone of 62,810 according to the census of February, 1912, and populations in Panama and Colon, respectively, of 47,172 and 20,232, as estimated by the Department of Sanitation. The annual average death rate per thousand among the same classes of population for the month of July, 1912, was 23.55.

Segregating the whites from the blacks, the annual average death rate per thousand from disease among employes was: Whites, 1.95; blacks, 6.31, giving a general average for disease of 5.38. For the same month during 1911, the annual death rate per thousand from disease among whites was 10.37; blacks, 10.27, giving a general average of 10.29; and for the same month during 1912, whites, 6.98; blacks, 8.18, giving a general average of 7.88.

Among employes, deaths from the principal diseases were: Dysentery, two; lobar pneumonia, five; malaria fever, two; tuberculosis, seven; typhoid fever, one, leaving nine deaths from all other diseases, and 11 deaths from external violence. No case of yellow fever, smallpox, or plague originated on, or was brought to the Isthmus during the month.

Respectfully,

GEO. W. GOETHALS,
Chairman and Chief Engineer.

Storage for Retired Canal Equipment.

The report of the committee, consisting of Mr. H. S. Farish, chairman; Mr. A. E. Bronk, and Mr. Charles L. Parker, appointed to consider plans for storing Canal Commission equipment after its use for construction purposes is no longer necessary, and pending its disposal by sale or otherwise, has been approved.

In view of the contemplated abandonment of the towns on the west side of the Canal between Gorgona and Pedro Miguel, it was deemed advisable to consider only tracks on the east side adjacent to the Panama railroad. The committee inspected the tracks in Gamboa yard, the tracks on the relocation dumps of the Central Division, and those in Cristobal yard. As the Cristobal shops have been reopened by the Mechanical Division, the tracks at that point are no longer available. In the Gamboa yard, allowing for a ladder track and the necessary clearances at switches, there are a little over 5,000 feet of track, practically all of which can be used. Allowing for clearances at switches, and assuming that a sufficient number of switches can be left on the Panama railroad main line, there are a little over 36,000 feet of track in the yard and approaches to the relocation dumps of the Central Division between Gamboa Cabin and dump No. 7. In addition, there are 27,000 feet of track on the dumps proper.

It was the opinion of the committee that if it is impossible to procure sheltered storage space for steamshovels, locomotives, cranes, piledrivers, and other equipment of this kind, that the arrangement of tracks in the Gamboa yard would make the best place to store this

equipment, especially as less switching would be required to get at any particular piece. The 36,000 feet of track on the relocation dumps can be used in storing various classes of equipment, and tracks on the dumps may be utilized for storing cars. It is believed that tracks can be provided at these points for all rolling stock as fast as it is retired from service.

Motor Boats for Dredging Service.

Award has been made to the Welin Marine Equipment Company of New York for three motor boats, two 40 feet, and one 45 feet in length, at \$7,182 each for the shorter vessels, and \$7,823 for the longer one, an aggregate price of \$22,187. Several other bids were received. The Welin Marine Equipment Company agree to make delivery of one of the 40-foot craft in 130 days, the second in 160 days, and the 45-foot boat in 100 days.

The boats are designed for use by the Sixth Division in connection with future dredging operations in the Canal; they will be faster than any now in service, and with expedite inspection and communication along the 47 miles of channel in which the dredges will operate. The 40-foot boats are to have an 8-foot beam, 3-foot draft, and are to be of heavy construction for rough service, and capable of attaining a speed of 16 knots an hour. Their hulls are to be of southern cedar planking, copper-fastened and copper-covered to six inches above the water line, with frames of white oak. The interiors are to be finished in yellow pine. The equipment, in part, is to consist of a large capacity gasoline tank and electrical apparatus for lighting, including a searchlight. All hardware is to be of solid bronze.

The 45-foot vessel is to have a 9-foot beam, 3-foot draft, and in addition to the requirements for the 40-foot boats, is to be provided with a compartment containing locker and two bunks for crew's quarters, a galley, refrigerator, dishrack, table, and seats. Each boat will carry a short signal mast.

Kerosene and Gasoline.

The contract for supplying kerosene and gasoline to the Canal Commission for the period beginning June 24, 1913, and terminating June 30, 1914, has been awarded to The Texas Company of New York, as follows: In cans and cases, two 5-gallon tins to the case, 100,000 gallons of kerosene at \$0.169 a gallon; 50,000 gallons of gasoline, 62 degree Baumé, at \$0.318 a gallon. In steel drums of 55 gallons capacity each, 100,000 gallons of kerosene at \$0.102 a gallon, and 50,000 gallons of gasoline at \$0.254 a gallon.

Postal Service at Matachin.

Matachin was discontinued as a postal money order office on July 31, and on that date, the receipts and deliveries of mail were turned over to the station agent, who, in addition to his other duties, will look after the postal business until railroad communication with the town is broken. The money order records, formerly at this point, have been deposited with the postmaster as Bas Obispo to whom inquiry regarding money orders issued at or drawn on Matachin should be addressed. It is probable that the postal service at Matachin will be entirely discontinued by the end of the month, as nearly of all the American employes have been transferred, and the place is being vacated by the native population.

TOWING LOCOMOTIVES.

Tests Made of Trial Machines Suggested Some Modifications.

Tests of sample double truck towing locomotive, No. 640, conducted at Gatun Locks, demonstrated that the machine is not satisfactory in all respects. Under the proposal of the General Electric Company to furnish a trial locomotive built from the Commission's design, and 39 others of the same type, if it should prove satisfactory, the Commission reserved the right to change to the alternative single truck design submitted by and bid on by the contractor. Award has now been made for 40 locomotives of the alternative type, with certain modifications, which the recent tests have shown to be desirable.

The principal defects found in the trial machine were, as follows:

1. The unreliable action of friction intended to prevent the drum from turning until the desired pull had been reached.

2. The narrowness of the winding face of the slip drum, which has the width of only two diameters of rope, and which, therefore, caused the layers of rope to overlies each other unevenly, and through violent slipping, to injure the rope, as well as prevent the use of as long a line as had been recommended by the Naval Advisor.

3. The vibration due to the uneven surface of the rack rail against which the thrust wheels bear, which hold the locomotive to the track under the horizontal pull of the line.

4. Failure of the pinion to engage, without shock, in the approach racks placed at the point where the speed of the locomotive changes from the return speed to the towing speed.

Under the award, the contractor will furnish the alternative type of locomotive as originally proposed, inclusive of the following modifications:

1. Omission of solenoid operating clutches and friction gear.
2. Addition of hand operating clutches.
3. Addition of equalized hand brakes.
4. Fitting springs to thrust guide wheel.
5. Change in windlass.

The above will make a net addition in the cost of each locomotive of \$1,543, allowing for a deduction of \$324 for each locomotive for omission of clutches. The total net cost of each machine under the award will be \$13,217, or a grand total of \$528,680 for the 40 locomotives.

The contractor has promised to make delivery of the first locomotive in seven months from the date of the order, and of the remaining 39, at the rate of four a month.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Ancon, on Wednesday, August 27, 1913, beginning promptly at 2 p. m., for persons desiring to procure the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for licenses must procure from the Executive Office, Ancon, forms of application and information respecting the filling out of same, at least one day before the examination. Applicants for chauffeurs' licenses must also bring automobiles with them.

LOST.—Probably at Hotel Washington, a fraternity signet ring, having on it a Maltese Cross, with skull and cross-bones, and Greek letters, "Phi Kappa Sigma." "S. C. K." and Greek letter "Psi," engraved inside. Reward, if returned to Spencer C. King, Empire, C. Z.

RECORD OF CANAL WORK SINCE AMERICAN OCCUPATION. TOTALS BY CUBIC YARDS OF EXCAVATION AND LOCK AND DAM CONSTRUCTION. [All figures are of work useful for the completed Canal.]

COMMISSION CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

The schedule of dates for moving pictures for the week August 25 to 30 is, as follows: Monday, Culebra; Tuesday, Empire; Wednesday, Corozal; Thursday, Cristobal; Friday, Porto Bello and Gatun.

The list of films for the week August 18 to 23 is, as follows: "The dam builder;" "Blind love;" "Gee! my pants;" "The new church organ;" "In the tents of Azra;" "Heart of Esmeralda;" "The wayfarers." The list of films for the week August 25 to 30 is, as follows: "Trials of a playwright;" "When she was about sixteen;" "Awakening of Jones;" "The old wedding dress;" "Ranger girls;" "A dangerous lesson;" "The new ranch foreman."

Judging from the interest taken by athletes in the athletic and aquatic meet at Corozal on Labor Day, it promises to be one of the most successful ever held in the Canal Zone. The following events are scheduled:

Track events—100-yard low hurdles; 220-yard dash; 880-yard run; relay race (four men); running high jump; running broad jump; 12-pound shot put; pole vault; tug-of-war; 60-yard dash for boys; relay race (four boys); three-legged race; fat men's race (200 pounds, or over).

Aquatic events—50-yard dash; 100-yard dash; one mile swim; canoe race, half mile (two men); obstacle canoe race (two men); canoe tilting; relay swimming race, 200 yards, (four men); fancy diving; equipment race; 50-yard swim for boys.

The athletic events will be held in the morning, and the aquatic events in the afternoon. There will be a special train carrying the spectators to and from the aquatic events. In addition to the entries received from Commission employees, there will be entries from members of the Tenth Infantry and United States Marine Corps.

The following artists from the United States have been engaged for the coming season: Alton Packard, cartoonist; Dr. Frederic Poole, moving picture lecturer; the Ernest Gamble Concert Company; Miss Gay Zenola MacLaren, and Walter Eccles and the Four College Girls. Negotiations are under way with several other companies. Mr. Packard is expected in September, and Dr. Poole in December. Other dates will be announced in the near future.

During the month of July, 41 entertainments were held, with a total attendance of 7,585. Eleven tournaments were in progress, in which 198 players were interested. Twenty-three thousand ninety-eight games of pool were played, and 9,672 games were bowled. Two thousand seven hundred and fifty books were withdrawn from the libraries; 632 men made use of gymnasium privileges during the month, and 86 were enrolled in Spanish classes.

COROZAL.

Workmen are engaged in getting the running track and athletic park in shape for the meet to be held on Labor Day, September 1. The running track is to be 12 feet in width, and there will be five laps to the mile. There will also be a straightaway track 15 feet wide, and 100 yards in length.

A large order has been placed with the publishers in the United States for a shipment of the latest books, fiction, and otherwise.

Interest continues in the Spanish class for boys which meets every week.

CULEBRA.

At the regular Sunday night song service, the devotionals were led by Mr. Heckelberry, a former resident of Culebra. As he is to leave this week for the United States, he made a few reminiscent remarks concerning his experiences on the Zone. Mr. John J. Winchester, a former resident of Culebra, now located with the General Electric Company at Lynn, Mass., also made a short address concerning religious and social conditions on the Zone as he had found them, and comparing them favorably with conditions obtaining in the United States.

There are 22 men enrolled in the ragtime tenpin bowling tournament now in progress. So far, the highest score has been made by Warner and Dougherty—740. High scores for the week are, as follows: Dougherty, 203, 201; Anderson, 200, 209; Leonard, 224.

Attention is invited to the coming entertainment and social to be held on Friday night, August 22. A program is being arranged, and refreshments will be served. All the grownups of both sexes are requested to be present.

EMPIRE.

The Culebra chess team defeated the Empire chess team on Monday evening, August 11, winning eleven, and losing five games. The teams were composed of the following players:

Empire.	Won.	Lost.	Culebra.	Won.	Lost.
H. A. A. Smith...	0	2	Dubois.....	2	0
M. A. Hall.....	1	1	E. M. Warner...	1	1

J. L. Caldwell....	0	2	McClure.....	2	0
E. M. Goolsby....	1	1	J. F. Warner....	1	1
G. W. Newbold....	1	1	Strong.....	1	1
Ludlum.....	0	2	C. Wilson.....	2	0
Lippert.....	1	1	J. B. Shropshire..	1	1
D. H. McCullough	1	1	Morgan.....	1	1

Total..... 5 11 11 5

Considerable interest has been manifested of late in chess, and matches will soon be played off with other teams from the various clubhouses.

Several of the new men have shown increased interest of late in checkers, and many inquiries have been made at the desk for sets. Four sets have recently been purchased, and it is hoped to have, in the near future, a team that can successfully compete with other teams along the line. All men interested in checkers are invited to meet with these men in the endeavor to form a winning team.

On Sunday evening, August 24, the Empire glee club will give a sacred concert to which the public is invited.

Many of the basketball players are coming out for practice. If sufficient interest is displayed a local league will soon be formed, from which the candidates for the Empire team will be picked for the Isthmian league.

GATUN.

The members of the Gatun association will entertain in honor of Governor Richard L. Metcalfe, and Mrs. Metcalfe, on Thursday evening, August 21, at 8 o'clock. Lieut.-Col. Wm. L. Sibert, chairman of the executive council, will preside. In addition to an address by Governor Metcalfe, there will be several musical numbers, and a brief address of welcome by Wm. Benton Childers, mayor of Gatun. The evening's program will be concluded by an informal reception, during which every one present will have an opportunity of meeting Governor and Mrs. Metcalfe. Refreshments will be served. On the committee of arrangements are W. C. Gayer, R. M. Gamble, Dr. A. G. Farmer, F. J. Sweek, C. E. Wood, Ben Jenkins, W. B. Childers, Major Jervey, H. B. Furlong.

At the bowling carnival, held on Wednesday evening, August 20, Mr. S. P. Dennis and Mrs. F. A. Crosscup won first prize (gold medal) and Mr. P. J. Claherty and Mrs. M. Conley won second prize (silver medal) in the "Open" contest, and Mr. and Mrs. C. C. Bailey won first prize (gold medal) and Mr. and Mrs. Sloane won second prize (pennant) in the "Married folks" contest.

The standing of the "Red Hot" indoor baseball league on Saturday evening, August 16 was, as follows:

Team.	Won.	Lost.	P. C.
Atlantic Division.....	2	0	1.000
First McClintic-Marshall, field.....	2	0	1.000
McClintic-Marshall, office.....	2	1	.666
First Division.....	1	1	.500
Transportation.....	1	2	.333
Commissary.....	0	2	.000
Second McClintic-Marshall, field.....	0	2	.000

The standing of the popular handicap pool tournament on Saturday evening, August 16 was, as follows:

Name.	Won.	Lost.	P. C.
Townsend.....	2	0	1.000
Bailey.....	1	0	1.000
O'Hara.....	1	0	1.000
Carkett.....	1	0	1.000
Kerruish.....	1	0	1.000
Johnson.....	1	1	.500
Wall.....	0	1	.000
Pettitt.....	0	1	.000
Dennis.....	0	1	.000
Gray.....	0	1	.000
Bradley.....	0	1	.000

The standing of the First Division duckpin tournament on August 16 was, as follows:

Team.	Won.	Lost.	P. C.
Dubbs.....	10	2	.833
Nut Splitters.....	5	4	.555
Shuttles.....	5	4	.555
Billikens.....	5	4	.555
Transmitters.....	5	7	.416
Chronics.....	3	6	.333
Boosters.....	3	9	.250

The Gatun ladies bowling team won two out of three games of duckpins from the Cristobal ladies duckpin team on Saturday afternoon, August 16.

The record for one day's playing in the poolroom was broken on Saturday, August 16, when 376 games were played. There were 223 games of bowling on this same day, which is, with one exception, the largest number ever recorded.

On Wednesday evening, August 20, at 6 o'clock, the first of a series of local aquatic tournaments will be conducted by the Y. M. C. A., in the forebay, north of Gatun Locks. There will be a men's relay race in which teams from the various companies and departments employed at Gatun will compete, together with a 75-yard swim open to boys 14 years of age, or under.

A meeting of the executive council of the Gatun association was held on Thursday evening, August 14. In the absence of Colonel Sibert, Mr. W. C. Gayer pre-

sided. Mr. R. M. Gamble was elected recording secretary in place of Mr. W. N. Windes, resigned. Financial and statistical reports as given by the clubhouse secretary showed the association to be in an exceptionally prosperous condition.

A record-breaking attendance is expected at the "Musical smoker" to be held on Saturday evening, August 23. The program for the evening includes some of the best talent on the Zone. Admission to the "Smoker" is confined to members only.

CRISTOBAL.

An open tournament was held Monday night, August 16, in honor of Miss Mae and Miss Ester Brown who are visiting their brother, Mr. W. L. Brown, and are being entertained by Mrs. Ed. Davis.

Thirty-two children crowded the quartermaster's brake on their way to the Hotel Washington swimming pool on Saturday, August 16. The children were so pleased with the trip that the outing promises to be a regular weekly affair.

The Corozal chess team defeated the Cristobal team Saturday night, by the score of 11½ to 2½. The individual scores were, as follows:

Corozal.	Cristobal.
Conner.....	2
Gartrell.....	1½
Morehead.....	1
Sherrard.....	2
Mills.....	1
Shohan.....	2
Kyte.....	2
Rappiner.....	0
Ogden.....	½
Taylor.....	1
Tuttle.....	0
Wilson.....	1
Salzburg.....	0
Wechsler.....	0

A meeting of the men interested in athletics was held Monday night, August 18, to arrange for the Labor Day field meet at Corozal.

On Tuesday night, August 19, the men interested in the discussion club met to perfect the organization.

PORTO BELLO.

Mr. W. B. Childers, superintendent for the McClintic-Marshall Company, will speak on Sunday night, August 17.

A pool tournament is to be started among the members in the near future.

The moving picture exhibitions continue on Friday nights and are attended by all.

Rainfall August 1 to August 16, 1913, Inclusive.

OFFICIAL CIRCULARS.

Instructions Concerning Installation, Repair, and Operation of Permanent Electrically Operated Canal Equipment Installed by the First Division.

CULEBRA, C. Z., July 19, 1913.

1. *Starting and testing of equipment*—The starting and testing of all machinery and electrical apparatus will be done by a testing engineer. No other person shall start any machine or make alive any circuit (110-volt lighting excepted) unless authorized by the superintendent of erection. It will be the duty of the testing engineer to familiarize himself with all apparatus by watching erection progress; to start, test, make all necessary adjustments of limit switches, interlocking devices, relays, etc., and put in service all electrically operated apparatus used or to be used for the permanent operation of the Canal.

2. *Supervisor's notice of completed work*—When the erection of any machine is completed, including the placing of motor, limit switch, and transmitter, the mechanical supervisor will send a supervisor's notice (Form No. C. E. 382) to the superintendent of erection, with a copy to the electrical supervisor and testing engineer. When any electrical construction work is completed, the electrical supervisor will send a supervisor's notice to the superintendent of erection, with a copy to the mechanical supervisor and the testing engineer.

3. *Supervisor's placards and protection of apparatus*—In addition to the sending of the supervisor's notice, the mechanical supervisor will place a supervisor's placard (sample "A") on the apparatus installed. The supervisor's placard absolutely prohibits any movement of or any further work on the apparatus indicated, except as hereinafter provided. The supervisor's placards are white in color and are marked "Original" and "Duplicate." The original is to state the apparatus involved, the date placed, and be signed by the mechanical supervisor. The duplicate placards are to be placed on various parts of the apparatus where the original is not discernible. In addition to the placing of the supervisor's placards, the mechanical supervisor will put all apparatus likely to be operated by gravity in safe condition. The electrical supervisor will open all disconnects, remove all fuses, and place "Hold cards" (sample "B") on same, when his work on a unit of equipment is complete and ready to be tested. The hold cards are white in color with a single red band.

4. *Testing engineer's notice*—After the superintendent of erection receives a supervisor's notice, he will, at his discretion, issue a testing engineer's notice (Form No. C. E. 380). The testing engineer's notice will be issued in quadruplicate and sent to the mechanical supervisor, electrical supervisor, and testing engineer. It will state the apparatus to be tested, and the date on which tests are to be made. The supervisors shall furnish assistance to the testing engineer, at his request, to remove blocking, energizing circuits necessary to test the apparatus involved. The electrical supervisor will remove "Hold cards" placed by himself previously, provided it is safe to make the circuit alive.

5. *Testing engineer's placards*—The testing engineer, before commencing tests called for in the testing engineer's notice, will remove all mechanical supervisor's placards and replace them with testing engineer's placards (sample "C"). The testing engineer's placards are white in color with two red bands, and are marked "Original" and "Duplicate." They give warning that the apparatus may be energized at any moment for test. The original is signed by the testing engineer and indicates the apparatus involved and the date tests are started. The duplicate placards are to be placed on the various parts of the apparatus from which the original is not discernible. The original mechanical supervisor's placards will be forwarded to the mechanical supervisor who will note and place same on file. When apparatus has testing engineer's placards on it, no person is to work on, make alterations, or energize same, except the testing engineer. On completion of tests and all adjustments on the apparatus involved, the testing engineer will report in detail to the superintendent of erection, using Form No. C. E. 381.

6. *Notice of completed tests*—On receipt of the testing engineer's report (Form No. C. E. 381), the superintendent of erection will send a form letter (Form No. C. E. 383) to the supervisors and to the testing engineer, notifying them if the apparatus involved is considered ready for service; or, if not, what changes or additional tests are to be made. If form letter (C. E. 383) advises that the apparatus is considered ready for service, the testing engineer will remove his placards and substitute "Warning" placards (sample "D").

7. *Alterations by supervisors in tested equipment*—In case alterations are requested by the superintendent of erection, the testing engineer will remove his placards, noting on the original the date removed and alterations to be made, and then file same. He will also disconnect all testing apparatus and notify the supervisor concerned. Before the supervisor makes any alterations,

he will see that all placards are removed and that the men working on the apparatus are safe from accident due to energizing of electrical apparatus. The supervisor, on the completion of his work, will, as before, place supervisor's placards and send a supervisor's notice to the superintendent of erection, and routine will then be the same as in the installation of new apparatus.

8. *Warning placards*—A warning placard (sample "D") is to be placed by the testing engineer on all apparatus that is considered ready for service by the superintendent of erection. The testing engineer will place the warning placard and at the same time remove his placard and file the original, noting the date tests were completed and date apparatus was placed in service. The warning placards are white in color with a green band and contain a warning that the apparatus may be operated or energized at any moment. They will be placed in original and duplicate. The original will identify the apparatus, give the date tests were completed and be signed by the testing engineer. The duplicate placards are to be placed on parts of the apparatus from which the original is not discernible.

9. *General repairs on equipment in operation*—In case of breakdown in any apparatus or trouble of any sort interfering or liable to interfere with the operation of any machinery, the supervisor in charge will notify the superintendent of erection and the testing engineer. Before any tests are made or work is done on the apparatus, the testing engineer will remove all warning placards, note date on same, sign, and file. He will also see that "Hold cards" are placed on all switches and remove or open all disconnects liable to energize the apparatus. In cases where the trouble is not apparent, such as breakdowns in control wire or cables, the testing engineer will proceed at once to locate such faults by proper test methods. When cause of any trouble is ascertained, the testing engineer will report to the superintendent of erection who will, in turn, issue instructions to the supervisor concerned. The procedure will then be the same as in the installation of new apparatus. All verbal conversations are to be confirmed in writing by a supervisor's notice, a testing engineer's notice, and a testing engineer's report. Before apparatus is finally put back in service, the testing engineer will remove all "Hold cards" placed by himself and place a new set of warning placards.

10. *Removal or defacing of placards*—In no case shall any unauthorized person remove or deface any placard or energize any apparatus with placards or "Hold cards" on same under penalty of immediate dismissal from the service. In no case shall a circuit or apparatus be energized by any person when same has a "Hold card" placed on it until the person who placed the "Hold card," and whose signature is on same, shall personally remove it and signify by so doing that the circuit or apparatus may be safely energized.

11. *General rules for the safety of employees*—(a) No person whether an employee, or otherwise, shall lounge about or place himself in such a position as to interfere with the operation of any machine, or touch (or expose person by dangerous proximity) either with or without rubber gloves, any switches, current, or potential transformer, or any electrical apparatus or conductor on which a potential higher than 240 volts exists, until he has positively ascertained that such apparatus or conductor is disconnected from all sources of such potential. Two hundred and forty volts is considered a dangerous potential and should be treated accordingly.

(b) Before touching any apparatus or conductor on which a potential higher than 240 volts may exist, the foreman in charge will make his own tests to verify that such apparatus or line is dead. He will also see that all switches and disconnects are open and place "Hold cards" on same. The "Hold cards" shall be signed by the foreman and give the date of and reason for placing. The foreman will also make a careful inspection to see that there is no condition existing that may endanger himself or his men in their work. In all cases of doubt the foreman shall consult the general foreman and the general foreman shall consult the electrical supervisor, and in case of still further doubt, the matter shall be referred to the testing engineer.

(c) Having taken these precautions and thus ascertained that the apparatus or line is dead, the foreman will, before doing any work, first consult his general foreman. Before any work is to be started the line or apparatus is to be well grounded; a substantial contact is first to be made between an approved ground connector and the ground, and then between the connector and each phase of the apparatus or line.

(d) The foreman in charge is to notify his general foreman on completion of the work, who will instruct whether, or not, the "Hold cards" and ground connectors are to be removed and place supervisor's placards.

(e) All defects, unsafe work, or dangerous conditions are to be reported immediately to the superintendent of erection through regular official channels.

(f) In case of injury to any persons, first aid should be rendered and physician summoned immediately.

(g) All accidents to employees, or any one else when

the First Division is involved, shall be immediately reported on proper form (X-155) provided for that purpose.

(h) When a broken or burned wire or broken or defective piece of apparatus is involved in any accident, it should be carefully preserved and marked for identification.

(i) All persons in the employ of the Commission on work affected by the foregoing regulations are expected to familiarize themselves with them. Ignorance of any rule or requirement will not be accepted as an excuse for not complying with same. A strict observance is necessary for the safety of life and the protection of apparatus.

GEORGE W. GOETHALS,
Chairman and Chief Engineer.

Mechanical Division Headquarters.

CULEBRA, C. Z., August 12, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

The office of the assistant superintendent of the Mechanical Division, and the drafting room under the Mechanical Division, will be moved from Gorgona to Empire on August 18.

All mail on and after August 16 for the assistant superintendent of the Mechanical Division should be addressed to him at Empire.

GEORGE W. GOETHALS,
Chairman and Chief Engineer.

Employees Requested Not to Change their Sailing Date.

CULEBRA, C. Z., August 15, 1913.

HEADS OF DEPARTMENTS AND DIVISIONS:

There is an increasing tendency on the part of employees to request transportation for themselves, or members of their families, on a certain boat, and, although accommodations are available on that particular boat, subsequently change their request for another sailing date. This causes a great deal of confusion and extra work in this office, as well as in the steamship ticket office at Colon.

Employees are urged to arrange their plans sufficiently in advance to be able to fix a definite sailing date, and when transportation is issued by this office no change in sailing date will be allowed unless a satisfactory explanation for such change is submitted.

GEORGE W. GOETHALS,
Chairman.

Rates for Children on United Fruit Company's Vessels.

CULEBRA, C. Z., August 15, 1913.

CIRCULAR No. 175-O.

Referring to Circular 175-N, with reference to rates for children on the United Fruit Company's line.

Advice has been received from the local General Agent of the United Fruit Company that, effective at once, half-rate tickets for children of Commission employees will be sold on the basis of one-half of the regular Commission rate.

GEORGE W. GOETHALS,
Chairman.

Permanent Silver Camp to be Called La Boca.

CULEBRA, C. Z., August 18, 1913.

CIRCULAR No. 245-A.

The permanent silver settlement which has been laid out on Balboa dump, southeast of Sosa Hill, will hereafter be known as La Boca.

GEORGE W. GOETHALS,
Chairman and Chief Engineer.

Abandonment of Gorgona and Matachin Passenger Train Service.

PANAMA RAILROAD COMPANY,
OFFICE OF GENERAL SUPERINTENDENT,
COLON, R. P., August 16, 1913.

CIRCULAR No. 162.

To All Concerned—Effective Monday, August 25, 1913, Gorgona and Matachin stations will be vacated and abandoned. On and after that date we will continue to operate trains across the dike track as at present (except that trains will not go to Gorgona and Matachin), until new time card is put into effect on Tuesday, September 2, 1913, after which all main line trains will be operated between Colon and Panama via the Gold Hill line, and train service will also be inaugurated between Bas Obispo and Panama, detailed schedule of which will be published later.

JOHN D. PATTERSON,
General Superintendent.

General Inspector, Central Division.

EMPIRE, C. Z., August 11, 1913.

CENTRAL DIVISION CIRCULAR No. 371:

Effective this date, the duties heretofore performed by Mr. A. E. Bronk, General Inspector, will be performed by Mr. W. I. Beam in addition to his other duties as chief clerk.

A. S. ZINN,
Acting Division Engineer.

COMMISSARY DEPARTMENT.

The commissary stores are open during the following hours:

Rib roast, first cut (not under 3 pounds), per pound.....	18
Pot roast, per pound.....	19
Rump roast, per pound.....	19
Porterhouse roast, per pound.....	20
Steak, Chuck, per pound.....	12½
Round, per pound.....	13
Rib, per pound.....	18
Sirloin, per pound.....	19
Rump, per pound.....	19
Porterhouse (not less than 1½ pounds), per pound.....	20
Tenderloin (Western), per pound.....	30
Pork—Loin chops or roast, per pound.....	17
Hams, fresh, per pound.....	\$20
Shoulders, fresh, per pound.....	\$17
Spare ribs, per pound.....	15
Backbones, per pound.....	15
Pigs feet, each.....	7
Pigs head, ½ head.....	60
Sausage meat, fresh, per pound.....	20
MISCELLANEOUS.	
Livers—Beef, per pound.....	11
Calf, each.....	60
Half, each.....	30
Steak, Hamburger, package.....	13
Sausage—Bologna, per pound.....	13
Frankfurter, per pound.....	13
Lieberwurst, per pound.....	13
Devonshire Farm, per pound.....	20
Sweetbread, beef, per pound.....	40
Eggs, fresh, dozen.....	30
one-half dozen only.....	15
Bluefish, per pound.....	15
Halibut, fresh, per pound.....	15
Salmon, per pound.....	15
Roe shad, each.....	75
Shad roes, pair.....	40
POULTRY AND GAME.	
Chickens—Fancy roasting, milk fed, large, each.....	1.40
Fancy roasting, milk fed, med., each.....	1.10
Fancy roasting, corn fed, about 5½ pounds, each.....	1.25
Fancy roasting, corn fed, about 4½ pounds, each.....	1.00
Fowls, each.....	1.00
Ducks, (Western, about 4½ pounds), each.....	1.25
Broilers, milk fed, each.....	70
Broilers, corn fed, each.....	60
Turkeys, per pound.....	26
Squabs, each.....	50
Rabbits, skinned, each.....	30
Ducks, blackhead, pair.....	60
Partridges, pair.....	1.30
Grouse, per pair.....	1.30
Pheasants.....	1.30
CURED AND PICKLED MEATS	
Ham—Genuine Westphalia, per pound.....	40
Ham—Sugar cured, per pound.....	20
Sliced, per pound.....	22
Boiled, per pound.....	21
Hocks, per pound.....	28
Beef, salt, family, per pound.....	12
Bacon—Breakfast, whole piece, per pound.....	25
Sliced, per pound.....	26
Ham, lunch, per pound.....	32
Pork, salt, family, per pound.....	14
Ox tongues, each.....	1.00
Pigs' feet, per pound.....	9
Tongues, per pound.....	18
DAIRY PRODUCTS.	
Butter—Creamery, special, per pound.....	34
Sheffield Farms, extra fancy, per lb.....	46

Cheese—Philadelphia cream, cake.....	Price 10
Roquefort, per pound.....	35
Young America, per pound.....	22
Swiss, per pound.....	28
Edam, each.....	1.00
Edam, tin.....	25
Parmesan, per pound.....	35
Gouda, per pound.....	30
Snappy, per cake.....	10
Milk (certified), per bottle.....	**20
Fer-mil-lac, bottle.....	**20
Ice cream, quart.....	125
½-gallon.....	150

VEGETABLES AND FRUITS.

Beets, per pound.....	3
Celery, per head.....	6
Cabbage, per pound.....	4
Cucumbers, per pound.....	4
Carrots, per pound.....	4
Egg plant, per pound.....	*4
Lettuce, per pound.....	12
Onions, per pound.....	3
Potatoes, white, per pound.....	2
sweet, per pound.....	2
Parsnips, per pound.....	3½
Parsley, bunch.....	5
Peppers, green, per pound.....	8
Squash, per pound.....	4
Turnips, per pound.....	4
Tomatoes, per pound.....	3
Yams, per pound.....	3
Apricots, per pound.....	15
Apples, per pound.....	10
Cantaloupes, each.....	*5
Grape fruit, tropical, each.....	4
American, each.....	15
Lemons, dozen.....	24
Limes, per hundred.....	80
Peaches, per pound.....	*12
Plums.....	10
Oranges, Jamaican, per dozen.....	18
Watermelons, each.....	145

*Indicates reduction from last list.
**Indicates 5 cents allowed for return of bottle.
†Indicates advance on last list.
††Fowls weigh each, about as follows: 3, 3½, 4, 4½, and 5 pounds. Prices are based accordingly; when size ordered is not in stock, next lightest weight is supplied and refund note sent for difference.
‡Sold only from commissaries; no orders taken for delivery.
§Not less than half of a fresh ham or shoulder will be sold.

Supplies for the Canal.

The following steamers with supplies for the Isthmian Canal Commission and Panama Railroad Company, arrived at the ports of Cristobal, Colon, and Balboa, during the week ending August 16:

Allianca, August 13, from New York, with 144 barrels sand, 85 boxes incandescent lamps, for Mechanical Division; five barrels oil soap, for stock; 170 crates tiles, for First Division; medical supplies, for Sanitary Division; 30 cases electrical material, six reels wire, for First Division; 10 cases padlocks, 57 kegs horse and mule shoes, 260 drums carbide of calcium, 36 drums oil, 400 tin lines shovels, for stock.

Cristobal, August 15, from New York, with 141,938 bags cement, for stock; 175,300 pounds coke, for Mechanical Division; 132 pieces structural steel, for Fifth Division; 21 cases machinery, for First Division.

Danube, August 10, from New York with four crates pump parts, for Atlantic Division; one case drills, two cases vices, for stock; two cases vices, for Mechanical Division.

Carrillo, August 10, from New York, with nine cases plumbing material, for stock; four reels copper wire, 24 crates structural steel, for Mechanical Division.

Cartago, August 11, from New Orleans, with 513 barrels paving brick, for Panama Railroad Company; 53 pieces castings, for Mechanical Division; 2,036 pieces pipe, 243 bales straw, 1,327 pieces lumber, for stock.

Santa Marta, August 13, from New York, with seven boxes packing, for stock; two boxes gate valve machinery, for First Division.

Abangarez, August 15, from New Orleans, with 3,171 pieces pipe, 2,345 pieces plumbing fittings, two cases flags, for stock.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending August 30, 1913:

DATE.	High	Low	High	Low	High

Panama Railroad Company's steamers sail from Pier 11, Cristobal, at 3 p. m.

Royal Mail steamers leave for New York on alternate Tuesdays at 1 p. m.; for Southampton on alternate Tuesdays at 10 a. m.

United Fruit Company's ships for New Orleans direct, leave on Thursdays and Saturdays at 3 p. m.; ships for New York via Kingston, on Tuesdays at 1.30 p. m. and Thursdays at 1.30 p. m.; for Bocas del Toro, on Mondays at 5 p. m.; for Limon, via Bocas del Toro, on Tuesdays at 5 p. m., and for Limon direct, Tuesdays at 3 p. m.

Hamburg-American steamers sail for New York, via Kingston and Santiago de Cuba, on Tuesdays, the *Prinz Joachim* and *Prinz August Wilhelm* at 10 a. m., and the *Emil L. Boas* and *Carl Schurz* at 2 p. m.

Launch Service to Taboga.

The steam launch *Sanidad* leaves the dredge landing at Balboa at 9 o'clock, Tuesday, Thursday, and Saturday mornings. On the return trip it arrives at Balboa about 4.30 p. m., in time to make connection for the 5.25 train at Panama.

STATEMENT OF
CONSTRUCTION EXPENDITURES
TO JUNE 30, 1913

(Part II of The Canal Record, August 20, 1913.)

STATEMENT OF CONSTRUCTION EXPENDITURES TO JUNE 30, 1913.

Table No. 1.

Includes administrative and general expenses, but does not include "General Items" or expenditures for sanitation, hospitals, or civil administration.

93 Plant and equipment to be absorbed in construction costs after June 30, 1913.....								1,453,394.79	
Total expenditures, Pacific Division.....								\$47,353,924.93	
94 Lighting and buoying canal.....		\$158,288.25			\$239,079.68			\$397,367.93	
95 Permanent buildings.....		46,196.67			22,965.81			69,162.48	
96 Trans-isthmian oil line.....		32,054.69						32,054.69	
97 Electric transmission line.....		9,769.57			5,628.96			15,398.53	
Total expenditures, constr. and eng'nr'g.....								\$185,316,095.75	

Items 31 and 65—Concrete used in erection of the control houses, is included under items 24 and 58, "Masonry, respectively."
 Item 45—Central Division Dredging Excavation, Prism, Preliminary Surveys.
 Item 47—Represents Operation of cement gun used in facing walls of the cut.
 Item 48—Hydraulic Excavation. This work was done on the upper banks of the canal north of Gold Hill by the Fifth Division.
 Item 67—Hydraulic Filling Miraflores West Dam. Expenditures represent cost of pipe lines, flumes, etc. 661,048 cubic yards have been deposited in the dam from dredges and hydraulic excavation in lock chambers and in prism below the locks. The expense thereof has been charged to "Excavation."
 Items 88, 89, and 90—LaBoca Locks and Dams. These expenses were incurred prior to the adoption of Miraflores as the site for the lower locks and dams at the Pacific entrance of the Canal.
 Item 91—Naos Island Breakwater. This breakwater is being constructed entirely by the Central Division with material from the Cut. Only the excess cost of dumping at this point, as compared with the cost at the regular dumps, is charged to this item.
 Items 42, 49, and 93—The expenditures for Plant and Equipment are absorbed in the construction costs on the basis of the estimated cost of plant and the estimated quantities of work to be done. The amount under these items represent the balances which are to be absorbed into construction costs after June 30, 1913.
 General—When excavated material is used for filling, such as dams, backfilling, etc., the cost of dumping only is charged to the item benefited, other expenses being charged to "Excavation."
 Due to changes in organization, this statement no longer represents the work done by the various construction divisions, the divisions shown thereon being geographical

DAM CONSTRUCTION.
